### How to register your land

To register your land, you must first be registered with Rural Payments and Services and have a Business Reference Number.

With your Business Reference Number, you can then register your land using the Land Maintenance Form .

When completing this form, you will be asked to list all of your land parcels. A land parcel is a defined area of land with physical boundaries, such as hedges, walls or rivers.

Each parcel of land that you want to register will be assigned a Land Parcel Identifier – or LPID – which we may ask you for when you apply for some types of funding or if you have a question about your business.

### Making changes

It is your responsibility to tell us if there are any changes to your land.

This could include change of ownership or a change to any of the physical features on the land. You can tell us about changes using the Land Maintenance Form .

Hard copies of this form are available on request from area offices and all forms should be returned to your local Rural Payments and Inspections Division area office when completed.
