

Cross Compliance Verifiable Standards 2023

Verifiable Standards for classifying breaches of:

- **Good Agricultural and Environmental Conditions (GAEC)**
- **Statutory Management Requirements (SMR)**

Contents

GAEC 1: Buffer strips along watercourses	4
GAEC 2: Abstraction of water for irrigation	9
GAEC 3: Protection of groundwater against pollution	11
GAEC 4: Minimum soil cover	14
GAEC 5: Maintain land management reflecting site specific conditions to limit erosion	15
GAEC 6: Maintenance of soil organic matter	16
GAEC 7: Retention of landscape features.....	18
SMR 1: Protection of water in Nitrate Vulnerable Zones (NVZ)	21
SMR 2: Conservation of Wild Birds.....	30
SMR 3: Conservation of Flora and Fauna	33
SMR 4: Food and Feed Law	35
SMR 5: Restrictions on the use of substances having hormonal or thyrostatic action and beta-agonists in farm animals	53
SMR 6: Livestock Identification and Traceability - Pigs	58
SMR 7: Livestock Identification and Traceability - Cattle	63
SMR 8: Livestock Identification and Traceability - Sheep & Goats.....	63
SMR 9: Prevention and control of Transmissible Spongiform Encephalopathies (TSEs)	77
SMR 10: Restrictions on the use of plant protection products	82
SMR 11: Welfare of Calves	84
SMR 12: Welfare of Pigs	92
SMR 13: Welfare of Farmed Animals	109

Introduction

As a condition of receiving support scheme payments farmers have to comply with a number of requirements and if a farmer is found to have breached a requirement their payments are reduced, recovered or withheld. The Verifiable Standards tables provide details of the requirements and how breaches are generally classified in terms of Extent, Severity and Permanence. The classification of a breach, in conjunction with the Penalty Tables, determines the level of penalty that's applied to a support scheme payments. The following annotated table explains the format of the Verifiable Standards and the terms that are used to classify breaches of the requirements.

There are 7 **GAECs** (Good agricultural and Environmental Conditions) standards and 13 **SMRs** (Statutory Management Requirements) which are existing legislative requirements.

Requirement details:
What you have to do.

Aim: tells you what the requirement sets out to achieve.

GAEC 5: Maintain land management reflecting site specific conditions to limit erosion

The aim of these rules is to protect soil against erosion in certain situations

A1	Livestock: You must limit the erosion of the banks of water courses, watering points and feeding areas from overgrazing or heavy poaching by livestock			
	Description of breach	Extent	Severity	Permanence
	The farmer has caused significant soil erosion by failing to limit overgrazing, heavy trampling or heavy poaching by livestock.	On-farm Off-farm	Very low Limited erosion confined to occasional sites. Low Moderate erosion identified across multiple sites where the banks of water courses etc. have predominately shallow sloping sides. Medium Moderate erosion identified across multiple sites where the banks of water courses etc. have predominately steeply sloping sides. High Severe erosion identified at single or multiple sites.	Rectifiable If Very low / Low. Permanent

Reference

Description of breach: if you fail to meet a requirement this gives details of the possible cross compliance breach.

Extent: is the breach confined to your farm or does it have wider implications?

Severity: how significant are the consequences of the breach?

Permanence: does the breach have a lasting effect? Can the effect be remedied by reasonable means?

GAEC 1: Buffer strips along watercourses

The aim of this is to protect water against pollution and run-off. The requirements restrict storage, application of fertilisers and pesticides and cultivations along water courses

B1	You must not apply organic manure to land situated within: <ul style="list-style-type: none"> 10 metres of any surface water or 50 metres of any well, borehole etc. 			
	Description of breach	Extent	Severity	Permanence
	The farmer has applied organic manure (OM) to land situated within: <ul style="list-style-type: none"> 10 metres of any surface water or 50 metres of any well, borehole etc. 	On-farm	Within 10m of surface water Very low ≤150m Low >150m ≤500m Medium >500m ≤850m High >850m	Rectifiable Permanent If there is evidence of OM entering surface water / evidence of pollution.
		Off-farm	Within 50m of a borehole Very low >40m ≤50m Low >20m ≤40m Medium >10m ≤20m High ≤10m	

B2A	You must not locate a field heap within:			
	<ul style="list-style-type: none"> 10 metres of any surface water or 50 metres of any well, borehole etc 			
	Description of breach	Extent	Severity	Permanence
	The farmer has located a field heap within: <ul style="list-style-type: none"> 10 metres of any surface water or 50 metres of any well, borehole etc 	On-farm	Within 10m of surface water Very low 1 field heap >5m ≤10m Low 1 field heap ≤5m Medium 2 field heaps ≤10m High >2 field heaps ≤10m	Rectifiable
		Off-farm	Within 50m of a borehole Very low >40m ≤50m Low >30m ≤40m Medium >10m ≤30m High ≤10m	Permanent If there is evidence of pollution

B2B	You must not allow organic manure from a store on your holding to become located within:			
	<ul style="list-style-type: none"> 10 metres of any surface water or 50 metres of any well, borehole etc. 			
	Description of breach	Extent	Severity	Permanence
	The farmer has allowed organic manure (OM) from a store on your holding has become located within: <ul style="list-style-type: none"> 10 metres of any surface water 50 metres of any well, borehole etc. (This requirement relates to semi-solid organic manure e.g. digestate, which if not stored correctly, can flow across land)	On-farm	Within 10m of surface water Very low 1 incident >5m <10m Low 1 incident < 5m - no evidence of pollution Medium 1 incident <5m - evidence of pollution High >1 incidents <10m	Rectifiable
		Off-farm	Within 50m of a borehole Very low >40m ≤50m Low >30m ≤40m Medium >10m ≤30m High ≤10m	Permanent If there is evidence of pollution

B3	<p>You must not apply a chemical fertiliser (that doesn't contain nitrogen) to any land if there is a significant risk of the fertiliser entering surface water, taking into account:</p> <ul style="list-style-type: none"> the slope of the land, particularly if greater than 12 degrees any ground cover the proximity of the land to any surface water weather conditions the type of fertiliser being applied 			
	Description of breach	Extent	Severity	Permanence
	<p>The farmer has applied chemical fertiliser that doesn't contain nitrogen (e.g. P and K only) to land, with a significant risk of the fertiliser entering surface water taking into account:</p> <ul style="list-style-type: none"> the slope of the land, particularly if greater than 12 degrees any ground cover the proximity of the land to any surface water weather conditions* the type of fertiliser being applied <p>*Applying chemical fertiliser to land which is waterlogged or flooded or has been frozen for 12 hours or longer in the preceding 24 hours or covered in snow is consider to pose a significant risk of fertiliser entering surface water.</p>	<p>On-farm</p> <p>Off-farm</p>	<p>Risk of entering surface water</p> <p>Very Low If the risk is very low</p> <p>Low If the risk is low</p> <p>Medium If the risk is medium</p> <p>High If the risk is high</p>	<p>Rectifiable</p> <p>Permanent If there is evidence of pollution</p>

B4	<p>You must not apply a nitrogen fertiliser to land if there is a significant risk of the fertiliser entering surface water, taking into account:</p> <ul style="list-style-type: none"> the slope of the land, particularly if greater than 12 degrees any ground cover the proximity of the land to any surface water weather conditions the type of fertiliser being applied 			
	Description of breach	Extent	Severity	Permanence
	<p>The farmer has applied nitrogen fertiliser to land, with a significant risk of the fertiliser entering surface water taking into account:</p> <ul style="list-style-type: none"> the slope of the land, particularly if greater than 12 degrees any ground cover the proximity of the land to any surface water weather conditions* the type of fertiliser being applied <p>*Applying nitrogen fertiliser to land which is waterlogged or flooded or has been frozen for 12 hours or longer in the preceding 24 hours or covered in snow is consider to pose a significant risk of nitrogen entering surface water.</p>	<p>On-farm</p> <p>Off-farm</p>	<p>Risk of entering surface water</p> <p>Very Low If the risk is very low</p> <p>Low If the risk is low</p> <p>Medium If the risk is medium</p> <p>High If the risk is high</p>	<p>Rectifiable</p> <p>Permanent If there is evidence of pollution</p>

B5	You must not cultivate land or directly apply pesticides within two meters of the top of the bank of any surface water, unless exemptions apply			
	Description of breach	Extent	Severity	Permanence
	<p>The farmer has cultivated land within two metres of the top of the bank of surface water, and the following exemptions do not apply;</p> <ul style="list-style-type: none"> <i>Creating a green cover where one does not already exist</i> <i>Establishing a new hedge</i> 	<p>On-farm</p> <p>Off-farm</p>	<p>Within 2m of the top of the bank</p> <p>Very low ≤750m</p> <p>Low >750m ≤1500m</p> <p>Medium >1500m ≤3000m</p> <p>High >3000m</p>	<p>Rectifiable</p> <p>Permanent If there is evidence of soil entering surface water / pollution</p>
	<p>The farmer has applied pesticides within two metres of the top of the bank of surface water, and the following exemptions do not apply;</p> <ul style="list-style-type: none"> <i>Controlling injurious weeds, invasive species and, after prior written consent certain other weed species</i> 			

GAEC 2: Abstraction of water for irrigation

The aim of these rules is to protect water resources by licensing abstraction of water for irrigation

A1	<p>You must comply with the authorisation procedures for abstracting water for irrigation. The procedures differ depending on the quantity of water involved:</p> <p>If you abstract less than (<) 10 cubic metres of water each day you have to follow General Binding Rule 2 (GBR 2). Complying with GBR 2 means there is no requirement to contact the Scottish Environmental Protection Agency (SEPA) to register or apply for a licence</p>			
	Description of breach	Extent	Severity	Permanence
	The farmer does not have an irrigation licence	<p>On-farm</p> <p>Off-farm</p>	<p>Very low Failure to have an appropriate valid registration at the time of abstraction</p> <p>Low Failure to have an appropriate valid simple licence at the time of abstraction (abstraction \leq 1000m²/day)</p> <p>Medium Failure to have an appropriate valid simple licence at the time of abstraction (abstraction > 1000m²/day)</p> <p>High Failure to have an appropriate valid complex licence at the time of abstraction</p>	<p>Rectifiable If Very low / Low</p> <p>Permanent</p>

A2	You must comply with all the conditions of a water abstraction licence. Some of the conditions relate to: <ul style="list-style-type: none">• abstraction sites• abstraction periods• maximum daily abstraction volumes• submitting an annual data return even if you don't abstract any water			
	Description of breach	Extent	Severity	Permanence
	The farmer has failed to comply with the conditions of an abstraction licence.	On-farm	Very low Failure to submit an abstraction data return	Rectifiable
		On-farm Off-farm	Very low Failure to comply with the conditions of a licence. Potential impact assessed as Category 4	Rectifiable Permanent If there is an environmental impact
			Low Failure to comply with the conditions of a licence. Potential impact assessed as Category 3	
			Medium Failure to comply with the conditions of a licence. Potential impact assessed as Category 2	
			High Failure to comply with the conditions of a licence. Potential impact assessed as Category 1	
			High Failure to comply with any condition set in a Notice issued under the Water Environment (Controlled Activities) (Scotland) Regulations 2005 (as amended)	
	GAEC 2: Abstraction of water for irrigation – categories for assessing the potential impact on the environment.			
	Category 4 Considered to have no potential environment impact Category 3 Considered to have the potential to have a minor environmental impact Category 2 Considered to have the potential to have a significant environmental impact Category 1 Considered to have the potential to have a major environmental impact			

GAEC 3: Protection of groundwater against pollution

The aim of these rules is to protect groundwater against pollution

A1	You must ensure that a licence is in place to allow or carry out a disposal of list I and list II substances, such as waste sheep dip and/or pesticide washings to land.			
	Description of breach	Extent	Severity	Permanence
	The farmer has carried out or permitted unauthorised disposal of list I or list II substances, such as waste sheep dip or pesticide washings	On-farm Off-farm	Very Low If the disposal would have been allowed under a licence taking into account; the type of substance, the suitability of the disposal area, quantity of substance dilution rate, etc.) High If the disposal wouldn't have been allowed under a licence	Rectifiable If Very low Permanent

A2	You must comply with the conditions of any licence granted by SEPA to allow or carry out a disposal of list I and list II substances, such as waste sheep dip and/or pesticide washings to land.			
	Description of breach	Extent	Severity	Permanence
	The farmer has failed to comply with the conditions of the CAR authorisation.	On-farm Off-farm	Records: Very low Incomplete records (minor omissions but a full assessment is still possible) High No records or incomplete records which prevent a full assessment	Rectifiable If Very low Permanent
			Maximum volume exceeded: Very Low The excess can be accommodated by a variation to the disposal volume on the existing site Medium The excess cannot be accommodated without adding a new disposal site High The excess cannot be accommodated by adding a new disposal site	
			The number of permitted disposals on authorised sites has been exceeded: Very Low The existing disposal site can be sub divided to accommodate the additional disposals Medium At least one new disposal site has to be added to accommodate the additional disposals	
			Disposal on an unauthorised site: Very low The disposal site is suitable and can be added to the authorisation High The disposal site is not suitable	
	The farmer has failed to comply with the conditions of a Notice served under The Water Environment (Controlled Activities) (Scotland) Regulations 2011 in relation to List I and List II substances.	On-farm Off-farm	Medium High SEPA description of major pollution incident	Permanent

B1	You must not carry out or permit an activity which is likely to cause pollution of groundwater by an indirect or direct discharge of List I or List II substances from any non-disposal activity			
	Description of breach	Extent	Severity	Permanence
	The farmer has carried out or permitted an activity that is likely to cause pollution of groundwater by an indirect or direct discharge of List I or List II substances from any non-disposal activity.	On-farm Off-farm	Medium High SEPA description of major pollution incident.	Permanent

GAEC 4: Minimum soil cover

The aim of this rule is to protect soil against erosion after harvest until the end of winter ('winter' is up to and including the last day of February)

A1	The land after harvest must be covered by the stubble of the previous crop, by another crop or by grass unless: <ul style="list-style-type: none"> • agronomic or weather conditions are such that cultivating land would be detrimental to the use for the land for agricultural production • the land is being prepared for sowing the subsequent crop. Secondary cultivations and final seed beds must only be created very close to sowing 			
	Description of breach	Extent	Severity	Permanence
	<p>Soil erosion has occurred or there is a high risk of soil erosion because after harvest land is not covered by the stubble of the previous crop, by another crop or by grass</p> <p><i>The farmer will not break this rule where;</i></p> <ul style="list-style-type: none"> • <i>agronomic or weather conditions are such that cultivating land would be detrimental to the use of the land for agricultural production.</i> or • <i>the land is being prepared for sowing the subsequent crop. Secondary cultivations and final seed beds must only be created very close to sowing.</i> 	<p>On-farm</p> <p>Off-farm</p>	<p>Very low Where there is a high risk of soil erosion</p> <p>Low Where there has been soil erosion over an area of ≤ 5ha</p> <p>Medium Where there has been a soil erosion over an area of $>5 \leq 15$ha</p> <p>High Where there has been soil erosion over an area of > 15ha</p>	<p>Rectifiable If Very low</p> <p>Permanent</p>

GAEC 5: Maintain land management reflecting site specific conditions to limit erosion

The aim of these rules is to protect soil against erosion in certain situations

A1	Livestock: You must limit the erosion of the banks of water courses, watering points and feeding areas from overgrazing or heavy poaching by livestock			
	Description of breach	Extent	Severity	Permanence
	The farmer has caused significant soil erosion by failing to limit overgrazing, heavy trampling or heavy poaching by livestock.	On-farm Off-farm	Very low Limited erosion confined to occasional sites Low Moderate erosion identified across multiple sites where the banks of water courses etc. have predominately shallow sloping sides Medium Moderate erosion identified across multiple sites where the banks of water courses etc have predominately steeply sloping sides High Severe erosion identified at single or multiple sites	Rectifiable If Very low / Low. Permanent

A2	Late harvested crops: You must put in place appropriate measures to limit soil erosion if agronomic or weather conditions prevent the subsequent crop or a cover from being sown (appropriate measures could include grubbing, sediment traps and sediment fences)			
	Description of breach	Extent	Severity	Permanence
	The farmer has not put in place appropriate measures to limit soil erosion, when agronomic or weather conditions have prevented the subsequent crop or a cover crop from being sown.	On-farm Off-farm	Very low Where there is a high risk of soil erosion Low Where there is soil erosion over an area of ≤ 5 ha Medium Where there is soil erosion over an area of $>5 \leq 15$ ha High Where there is soil erosion over an area of > 15 ha	Rectifiable If Very low / there is the risk of soil erosion Permanent

GAEC 6: Maintenance of soil organic matter

The aim of these rules is to maintain soil organic matter levels

A1	You must comply with the requirements of the Muirburn code as they relate to the maintenance of soil organic matter. The following would be considered to be a breach of the requirements:			
	<ul style="list-style-type: none"> leaving a fire unattended. being unable to control a fire or having not made provision for its proper control. causing damage to any woodland. 			
	Description of breach	Extent	Severity	Permanence
	<p>The farmer has not followed the requirements of the Muirburn code. Whereby -</p> <ul style="list-style-type: none"> the fire has been left unattended. the fire has not been able to be controlled or no provisions were made for its proper control. the fire has caused damage to woodland. 	<p>On-farm</p> <p>Off-farm</p>	<p>Very low Unintentional burning ≤20ha</p> <p>Low Unintentional burning >20ha ≤100ha</p> <p>Medium Unintentional burning >100ha ≤250ha</p> <p>High Unintentional burning > 250ha</p>	<p>Rectifiable If Very low</p> <p>Permanent</p>

B1	You must not burn arable stubble except for reasons other than plant disease or pest control.			
	Description of breach	Extent	Severity	Permanence
	<p>The farmer has burned arable stubble.</p> <p><i>The farmer will not break this rule if he has carried this out for the purposes of plant disease or pest control.</i></p>	<p>On-farm</p> <p>Off-farm</p>	<p>Very Low If burning is limited to burst bale(s) or ≤1ha</p> <p>Low Burning >1ha ≤5ha</p> <p>Medium Burning >5ha ≤10ha</p> <p>High Burning > 10ha</p>	<p>Rectifiable If Very low</p> <p>Permanent</p>

B2	You must not plough rough grazing or other semi-natural areas unless approved as part of an Environmental Impact Assessment (EIA).			
	Description of breach	Extent	Severity	Permanence
	The farmer has ploughed up rough grazings and other semi-natural areas without approval under the Environmental Impact Assessment (Agriculture) (Scotland) Regulations 2006.	On-farm Off-farm	Very low Ploughing ≤1ha Low Ploughing <1ha ≤5ha Medium Ploughing .>5ha ≤10ha High Ploughing >10ha	Rectifiable If Very low Permanent

GAEC 7: Retention of landscape features

The aim of these rules is to protect landscape features

B1	You must not remove or destroy any of the following without the prior written consent of the Scottish Ministers: drystone or flagstone dykes, turf and stone-faced banks, walls, hedges, ponds, watercourses or trees (in line, in a group or isolated). Consent is not required to: widen field entrances to enable access for livestock or farm machinery or fell trees that are dead, diseased, damaged or insecurely rooted and are likely to cause a danger by falling over.			
	Description of breach	Extent	Severity	Permanence
The farmer has removed or destroyed a landscape feature without written consent of the Scottish Ministers		On-farm Off-farm	Dykes, banks, walls, hedges and watercourses Very low ≤100m Low >100 ≤200m Medium >200m ≤750m High >750m	Rectifiable If Very low
			Ponds Very low 1 small pond with limited landscape value Low 1 pond other than the description above Medium 2 ponds High >2 ponds	Permanent
			Trees (in line, in a group or isolated) Very low If a felling licence exemption applies Low If the felling would have been covered by a felling licence Medium If the felling would <u>not</u> be covered by a felling licence and no trees with Tree Preservation Orders (TPO) have been felled High Felling involves at least 1 tree with TPO	Rectifiable If Very low / Low Permanent

B2	You must not trim hedges or lop branches off trees during the bird nesting and rearing season starting on March 1 and ending on August 31 except for road safety reasons. Hedgelaying can be carried out up to and including March 31			
	Description of breach	Extent	Severity	Permanence
	<p>The farmer has carried out hedge trimming and/or lopped branches off trees between 1 March and 31 August (inclusive) and the following exemptions do not apply;</p> <ul style="list-style-type: none"> <i>Road safety (prevent danger to or the passage of vehicles, pedestrians and horse riders on farm tracks and areas of public access)</i> <i>The hedge or tree is cut in August and the hedge or tree is in a field which will be sown with one of the following crops in that month:</i> <ul style="list-style-type: none"> <i>oilseed rape.</i> <i>grass.</i> <i>another crop subject to prior written consent of the Scottish Ministers.</i> 	<p>On-farm</p> <p>Off-farm</p>	<p>Hedge trimming Very low ≤750m Low >750m ≤1500m Medium >1500m ≤3000m High >3000m</p> <p>Lopping branches off trees Very low If no trees with a Tree Preservation Order (TPO) are affected Medium If at least one tree with a TPO is affected</p>	<p>Rectifiable</p> <p>Permanent If there is evidence nests have been destroyed or birds have been disturbed</p>

B3	You must not cultivate land or apply fertilisers or pesticides within two metres of the centre line of a hedge, unless the exemptions apply			
	Description of breach	Extent	Severity	Permanence
B3	The farmer has cultivated land within 2m of the centre line of a hedge, and the following exemptions do not apply; <ul style="list-style-type: none"> Creating a green cover where one does not already exist Establishing a new hedge 	On-farm Off-farm	Within 2m of the centre line of the hedge Very low ≤750m Low >750m ≤1500m Medium >1500m ≤3000m High >3000m	Rectifiable Permanent If there is evidence the hedge has been damaged
B3	The farmer has applied pesticides within 2m of the centre line of a hedge, and the following exemptions do not apply; <ul style="list-style-type: none"> Establishing a new hedge Controlling injurious weeds, invasive species and, after prior written consent certain other weed species 			
B3	The farmer has applied fertilisers within 2m of the centre line of a hedge, and the following exemptions do not apply; <ul style="list-style-type: none"> Establishing a new hedge 			

B4	You must not alter, damage or destroy a Scheduled Ancient Monument without prior written consent of the Scottish Ministers (known as Scheduled Monument Consent (SMC))			
	Description of breach	Extent	Severity	Permanence
	The farmer has altered, damaged and/or destroyed any SAMs without prior consent of the Scottish Ministers (known as Scheduled Monument Consent (SMC))	On-farm Off-farm	Very low SAM altered or damaged but does not affect the integrity of SAM and can be rectified. Low SAM altered or damaged but does not affect integrity of SAM and <u>cannot</u> be rectified. Medium SAM altered or damaged affects the integrity of the SAM. High SAM destroyed.	Rectifiable Permanent

SMR 1: Protection of water in Nitrate Vulnerable Zones (NVZ)

The aim of these requirements is to reduce pollution of water caused or induced by nitrates from agricultural sources and to prevent further pollution from arising. They apply if you farm land within a Nitrate Vulnerable Zone NVZ).

A1	You must prepare an annual Fertiliser and Manure Management Plan by 1 st March			
	Description of breach	Extent	Severity	Permanence
A1	The farmer has not prepared a plan by 1 st March	On-farm Off-farm	Very Low plan prepared late up to 1 April Medium plan prepared after 1 April High plan has not been prepared	Rectifiable If Very Low/Medium Permanent
A1	The farmer has not completed a storage calculation (where required)	On-farm Off-farm	High	Permanent
A1	The farmer has not carried out a risk assessment for organic manures (if applied on farm)	On-farm	Medium Organic Manure applied but no obvious sign of pollution and other AP rules not breached as a result	Rectifiable
		Off-farm	High Organic manure applied and pollution occurs as a result, or other AP rules breached as a result	Permanent
	The farmer has carried out an inaccurate risk assessment for organic manures	On-farm	Very low Risk assessment completed, but wrongly assessed (No actual pollution or breach of AP occurred as a result)	Rectifiable
		Off-farm	High Risk assessment completed, but wrongly assessed (Actual pollution or breach of AP occurred as a result)	Permanent

A1 cont.	You must prepare an annual Fertiliser and Manure Management Plan by 1 st March			
	Description of breach	Extent	Severity	Permanence
A1	The farmer has completed an incorrect Nmax calculation for a crop type	On-farm Off-farm	<p>Very Low Nmax calculated incorrectly and nitrogen either hasn't been applied or has be applied to the crop type $\leq 10\%$ in excess of the Nmax limit.</p> <p>Low Nmax calculated incorrectly and nitrogen has be applied to the crop type $>10\% \leq 20\%$ in excess of the Nmax limit.</p> <p>Medium Nmax calculated incorrectly and nitrogen has been applied to the crop type $>20\% \leq 25\%$ in excess of the Nmax limit.</p> <p>High Nmax calculated incorrectly and nitrogen already applied to the crop type is over $>25\%$ in excess of the Nmax limit.</p>	<p>Rectifiable If Very Low</p> <p>Permanent</p>

A2	<p>You must prepare a fertiliser and manure plan annually, which must contain</p> <ul style="list-style-type: none"> • areas of farm & fields, • soil types, • quantity of nitrogen fertiliser applied to each crop, • type & date of crop sown, • type and date of each application of nitrogen fertiliser to crops, • number of livestock, their species and type, and length of time kept on the farm, • quantity type and nitrogen content of livestock manures retained and used on the farm, • quantity, type and nitrogen content of livestock manures moved off the farm, the date of the movement and the name and address of the person receiving it ; • quantity, type and nitrogen content of organic manures imported moved onto the farm, the date of the movement and the name and address of the supplier; and • the quantity and type of chemical fertilisers brought onto, used and retained on farm. <p>The occupier must retain these records for a period of 3 years from the end of the year to which the records relate</p>			
	Description of breach	Extent	Severity	Permanence
	The farmer has no records or missing essential elements - unable to determine compliance with specific requirements of the Action Programme	On-farm Off-farm	Medium missing essential elements High no records	Permanent

A3	<p>Storage of livestock manure</p> <ul style="list-style-type: none"> • You must have sufficient storage to meet the minimum stage requirements for your farm, taking into account any exclusions which apply. 			
	Description of breach	Extent	Severity	Permanence
	The farmer has insufficient storage to meet the minimum requirements	On-farm Off-farm	High	Permanent

A4	You must comply with closed period restrictions for chemical and organic nitrogen fertilisers			
	Description of breach	Extent	Severity	Permanence
A4	The farmer has applied organic manures with high available N content during the relevant closed period.	On-farm Off-farm	High	Permanent
A4	The farmer has applied chemical nitrogen fertiliser during the relevant closed period.	On-farm Off-farm	High	Permanent
A4	The Farmer has applied Organic Manure with high available N content to bare ground or stubble during July, August or September and crop not sown within 6 weeks of the first application (subject to general compliance with the closed periods)	On-farm Off-farm	<p>Very low No crop sown but able to demonstrate intention to sow and was prevented by severe weather conditions</p> <p>Medium Crop sown late, unable to justify late sowing of crop due to severe weather conditions following application</p> <p>High Crop not sown, unable to demonstrate intention to sow crop (no seed on farm or invoice to support intention to sow)</p>	<p>Rectifiable If Very Low</p> <p>Permanent</p>
A4	The farmer has exceeded the Quantitative Restrictions either side of the closed period	On-farm Off-farm	Medium	Permanent
A4	The farmer has applied livestock manure to any area of the farm within 3 weeks of a previous application	On-farm Off-farm	<p>Low No Risk of pollution to the water environment</p> <p>Medium Risk of Pollution to water environment or on an area which should be designated as high risk for livestock manure application</p>	Permanent

A5	You must maintain the structural integrity of manure and silage effluent stores and provide appropriate facilities at stores to prevent pollution of the water environment			
	Description of breach	Extent	Severity	Permanence
A5	The farmer's existing storage facility for manure or silage has structural defects or is leaking	On-farm	Medium No actual pollution of water Environment	Rectifiable
		Off-farm	High Actual pollution of water environment occurring, has occurred	Permanent
A5	<p>The farmer is storing silage (except wrapped or bagged silage) in a facility that does not have an impermeable base, or does not have facilities for collecting run-off.</p> <p>OR</p> <p>The farmer's permanent storage facility for livestock manure (other than slurry) is either:</p> <ul style="list-style-type: none"> • not sited on an impermeable surface • on impermeable surface but not covered by waterproof covering, or • does not have collection facilities for collecting run-off etc 	On-farm	Medium No actual pollution of water Environment	Rectifiable
		Off-farm	High Actual pollution of water environment occurring, has occurred	Permanent

A6	You must comply with farm and field based limits			
	Description of breach	Extent	Severity	Permanence
A6	The whole farm limit for livestock manure N breached	On-farm Off-farm	High	Permanent
A6	The Individual field limit for organic manure, other than compost, breached	On-farm Off-farm	Medium	Permanent
A6	The individual field limit for compost breached	On-farm Off-farm	Medium	Permanent

B1	You must not apply slurry with a raised splash plate (except on growing arable crops)			
	Description of breach	Extent	Severity	Permanence
	The farmer has applied slurry with raised splash-plate spreader (except on growing arable crops)	On-farm	Low	Permanent
		Off-farm	High if pollution has occurred	

B2	You must not inappropriately use or locate field middens			
	Description of breach	Extent	Severity	Permanence
B2	The farmer has temporary field heap containing non-solid manure	On-farm	Very low No actual pollution of water environment	Rectifiable
		Off-farm	High Actual pollution of water environment occurring or has occurred	Permanent
B2	The farmer has stored neat poultry manure in temporary field heap without an impermeable cover	On-farm	Medium No actual pollution of the water environment	Rectifiable
		Off-farm	High Actual pollution of water environment occurring or has occurred	Permanent

B2 cont...	You must not inappropriately use or locate field middens			
	Description of breach	Extent	Severity	Permanence
B2	The farmer has located a field heap within <ul style="list-style-type: none"> 10 metres of any surface water or 50 metres of any well, borehole etc Or on any other site that is a high risk or no spreading area	On-farm Off-farm	Within 10m of surface water Very low 1 field heap >5m ≤10m Low 1 field heap ≤5m Medium 2 field heaps ≤10m High >2 field heaps ≤10m	Rectifiable Permanent If there is evidence of pollution
			Within 50m of a borehole Very low >40m ≤50m Low >30m ≤40m Medium >10m ≤30m High ≤10m	
B2	The farmer has not used the contents of a temporary field heap within 12 months of manure first being placed there	On-farm Off-farm	Very low (if very low risk of pollution and the heap is identified on the RAMS map to confirm this).	Rectifiable
			High (if high risk of pollution, and/or the heap is not identified on the RAMS map so low risk cannot be verified)	Rectifiable Permanent If pollution has occurred
B2	The farmer has created a temporary field heap on the site of a previous heap within 24 months	On-farm Off-farm	Very Low	Rectifiable

B3	You must not apply a nitrogen fertiliser to land when ground conditions are unsuitable or if there is a risk of the fertiliser entering a watercourse			
	Description of breach	Extent	Severity	Permanence
B3	The farmer has applied Nitrogen fertiliser in an inaccurate manner.	On-farm Off-farm	Low High if pollution has occurred	Permanent
B3	The farmer has applied Nitrogen fertiliser to land when: <ul style="list-style-type: none"> the soil is waterlogged or the land is flooded the soil has been frozen for 12 hours or longer in the preceding 24 hours or the land is covered by snow 	On-farm Off-farm	Medium or High	Permanent
B3	The farmer has applied organic manure to land situated within <ul style="list-style-type: none"> 10 metres of any surface water or 50 metres of any well, borehole etc 	On-farm Off-farm	<p>Within 10m of surface water Very low ≤150m Low >150m ≤500m Medium >500m ≤850m High >850m</p> <p>Within 50m of a borehole Very low >40m ≤50m Low >20m ≤40m Medium >10m ≤20m High ≤10m</p>	<p>Rectifiable</p> <p>Permanent If there is evidence of OM entering surface water / evidence of pollution.</p>

B3	The farmer has allowed nitrogen fertiliser of any type to enter a watercourse	On-farm Off-farm	High	Permanent
B3	<p>The farmer has applied nitrogen fertiliser (organic manures or chemical fertiliser) to land, with a significant risk of the fertiliser entering surface water taking into account:</p> <ul style="list-style-type: none"> the slope of the land, particularly if greater than 12 degrees any ground cover the proximity of the land to any surface water weather conditions the type of fertiliser being applied 	On-farm Off farm	<p>Medium Risk of Nitrogen fertiliser entering surface water</p> <p>High Nitrogen fertiliser has entered surface water</p>	Permanent

B4	You must not exceed the Nmax limit as calculated for any crop type			
	Description of breach	Extent	Severity	Permanence
	Nitrogen available to any crop type exceeds Nmax	On-farm Off-farm	<p>Very Low nitrogen available to the crop type is $\leq 10\%$ in excess of the Nmax limit.</p> <p>Low nitrogen available to the crop type is $> 10\% \leq 20\%$ in excess of the Nmax limit.</p> <p>Medium nitrogen available to the crop type is $> 20\% \leq 25\%$ in excess of the Nmax limit.</p> <p>High nitrogen available to the crop type is $> 25\%$ in excess of the Nmax limit.</p>	<p>Rectifiable If Very Low</p> <p>Permanent</p>

SMR 2: Conservation of Wild Birds

The aim of these rules is to protect wild birds, their eggs and nests if you have land classified as a Special Protection Area (SPA). They apply to all wild birds.

Breaches of SMR 2 can vary greatly. The Extent, Severity and Permanence of each breach will be assessed individually taking into account all the facts surrounding the breach. SGRPID may require to seek advice from Scottish National Heritage to obtain technical information to decide the categorisation of the breach.

A1	You must notify Scottish Natural Heritage in writing of any proposal to carry out, cause or permit any specified operation (i.e. ORC) (or where a special nature conservation order applies (unless covered by the terms of a management agreement, scheme or notice) and obtain consent before starting that operation			
	Description of breach	Extent	Severity	Permanence
	The farmer has carried out, caused or permitted a specified operation for which no notice/consent has been given	On-farm Off-farm	Depends on situation/circumstances Very low Low Medium High	Rectifiable Permanent
	The farmer has carried out, caused or permitted a specified operation on land where a special nature conservation order is in force for which no notice/consent has been given	On-farm Off-farm	Depends on situation/circumstances Very low Low Medium	Rectifiable Permanent
	The farmer has carried out, caused or permitted a specified operation with notice/consent but has failed to adhere to the terms of the consent	On-farm Off-farm	Depends on situation/circumstances Very low Low Medium High	Rectifiable Permanent

A2	You must comply with any nature conservation, management, restoration orders relevant to the purpose of the SPA			
	Description of breach	Extent	Severity	Permanence
	The farmer has failed to comply with a nature conservation order (Nature Conservation Act s. 23-27)	On-farm Off-farm	Depends on situation/circumstances Medium High	Rectifiable Permanent
	The farmer has failed to comply with a land management order (Nature Conservation Act s. 29-36)			
	The farmer has failed to comply with a restoration order (Nature Conservation Act s. 40)			

B1	You must not intentionally or recklessly destroy or damage the special interest features of the area or disturb any fauna that are a special interest feature. (This requirement can apply to actions that take place other than on the SPA itself but which have the same consequences)			
	Description of breach	Extent	Severity	Permanence
	<p>The farmer has intentionally or recklessly caused damage or destruction of the special interest or disturbance of the fauna that is also an interest feature of the SPA.</p> <p>You will not break the rules above, if:</p> <ul style="list-style-type: none"> • you have a planning permission to carry out the work • you have consent from a public body or statutory authority that has complied with its duty to consult Scottish Natural Heritage before giving it consent • it is an emergency operation (provided that Scottish Natural Heritage is told as soon as possible after the emergency) 	On-farm Off-farm	Depends on situation/circumstances Very low Low Medium High	Rectifiable Permanent

B2	You must not carry out any activities on land outside a SPA which are likely to result in the disturbance of birds or the deterioration of habitats affecting birds.			
	Description of breach	Extent	Severity	Permanence
	The farmer has carried out an activity outside a SPA which is likely to result in the disturbance of birds or the deterioration of habitats affecting birds.	On-farm Off-farm	Depends on situation/circumstances Very low Low Medium High	Rectifiable Permanent

SMR 3: Conservation of Flora and Fauna

The aim of these requirements is to protect species of flora and fauna, if you have land designated as a Special Area of Conservation (SAC)

Breaches of SMR 3 can vary greatly. The Extent, Severity and Permanence of each breach will be assessed individually taking into account all the facts surrounding the breach. SGRPID may require to seek advice from Scottish National Heritage to obtain technical information to decide the categorisation of the breach.

A1	You must notify Scottish Natural Heritage in writing of any proposal to carry out, cause or permit any specified operation (i.e. ORC) or where a special nature conservation order applies (unless covered by the terms of a management agreement, scheme or notice) and obtain consent before starting that operation.			
	Description of breach	Extent	Severity	Permanence
	The farmer has carried out, caused or permitted a specified operation for which no notice / consent has been given.	On-farm Off-farm	Depends on situation/circumstances Very low Low Medium High	Rectifiable Permanent
	The farmer has carried out, caused or permitted a specified operation on land where a Special Conservation Order (or Nature Conservation Order) applies for which no notice / consent has been given.	On-farm Off-farm	Depends on situation/circumstances Very low Low Medium High	Rectifiable Permanent
	The farmer has carried out, caused or permitted a specified operation with notice / consent but has failed to adhere to the terms of the consent.	On-farm Off-farm	Depends on situation/circumstances Very low Low Medium High	Rectifiable Permanent

A2	You must comply with any nature conservation, management, restoration orders relevant to the purpose of the SAC			
	Description of breach	Extent	Severity	Permanence
	The farmer has failed to comply with a nature conservation order (Nature Conservation Act s. 23-27)	On-farm Off-farm	Depends on situation/circumstances Medium High	Rectifiable Permanent
	The farmer has failed to comply with a land management order (Nature Conservation Act s. 29-36)			
	The farmer has failed to comply with a restoration order (Nature Conservation Act s. 40)			

B1	You must not intentionally or recklessly destroy or damage the protected features that are relevant to the purpose of the SAC or disturb any protected fauna that are a special interest feature. (This requirement can apply to actions that take place on land other than the SAC itself but which have the same consequences).			
	Description of breach	Extent	Severity	Permanence
	<p>The farmer has intentionally or recklessly caused damage or destruction of the special interest or disturbance of the fauna that are also a special feature of the SAC</p> <p>You will not break the rules above, if:</p> <ul style="list-style-type: none"> • you have a planning permission to carry out the work • you have consent from a public body or statutory authority that has complied with its duty to consult Scottish Natural Heritage before giving it consent • it is an emergency operation (provided that Scottish Natural Heritage is told as soon as possible after the emergency) 	On-farm Off-farm	Depends on situation/circumstances Very low Low Medium High	Rectifiable Permanent

SMR 4: Food and Feed Law

The aim of these requirements is to ensure the safe production of food for human consumption and food or feed that is fed to food producing animals (these requirements apply if you are a food or feed producer or keep food producing animals)

A1	You must arrange for unsafe food or unsafe feed to be withdrawn from the market if you believe you have supplied it and inform both your local authority and the Food Standards Scotland (FSS)			
A2	You must destroy unsafe feed unless the competent authority tells you to do otherwise			
A3	You must tell consumers of food, or the users of the feed, of the reason for any withdrawal if it may have reached them			
A4	You must arrange for unsafe food or unsafe feed to be recalled if there is no other way of achieving a sufficiently high level of health protection			
	Description of breach	Extent	Severity	Permanence
A1 A2 A3 A4	Where there has been a feed safety incident and the farmer has not followed the due processes. “Due processes” - procedures to withdraw feed include holding any unused stock and not using it for feed. Recall would include contacting customers receiving non-complying feed. The competent authorities that must be informed of a withdrawal or recall are either the local authority (the trading standards department) or the Food Standards Scotland. Destruction would probably be under the direction of a local authority inspector and would often be as a result of a sample of feed having been tested positive for a contaminant, which breached a statutory maximum permitted level. Other acceptable uses might be considered depending on the case as long as these did not have implications for the food chain (e.g. industrial use)	Off-farm The breach might be in relation to a nationwide recall of batches. A farmer must keep records of those they have immediately supplied with a feed but not other parties, which might receive the feed subsequently	Medium if feed is unlikely to have an adverse affect on animal or consumer health High if feed is likely to have an adverse affect on animal or consumer health	Permanent
A5	You must immediately tell both your local authority and the FSS if food which you have supplied, or is in your possession and you intend to sell, could be injurious to health and of the actions you have taken to prevent risks to the final consumer			
	Description of breach	Extent	Severity	Permanence
A5	Where there has been a food safety incident and the farmer has not followed the requirements concerning notification, recall and withdrawal.	On-Farm Off-farm	High	Permanent

Traceability				
A6	<p>You must put in place systems and procedures related to the traceability of inputs* to your farm.</p> <p>These systems must identify:</p> <ul style="list-style-type: none"> • The name and address of your supplier • The nature and quantity of the products that were supplied to you • The date of the transaction (delivery) <p>*Inputs are: food, feed, food-producing animals, and any other substance intended/ expected to be incorporated into a feed.</p>			
	Description of breach	Extent	Severity	Permanence
	Traceability of inputs - Key pieces of information are missing, or information is not kept at all.	<p>On-farm</p> <p>Although limited to on-farm the consequences of poor traceability systems could affect entire food chain. This would only raise serious implications in the event of a recall/ withdrawal where records were unavailable and there was a serious risk to human health</p>	<p>Very Low Information largely available but incomplete (where records can be completed using information available on farm)</p> <p>Low/Medium depending on the number of inputs. Poor or inadequate system of keeping the required information. Cannot fully meet inspection requirements (records can't be completed using information available on farm)</p> <p>High No system or information kept</p>	Rectifiable

A7	<p>You must put in place systems and procedures related to the traceability of your products when they leave the farm.</p> <p>These systems must identify;</p> <ul style="list-style-type: none"> • The name and address of your customer • The nature and quantity of the products that were supplied to that customer • The date of the transaction (when the product left the farm) 			
	Description of breach	Extent	Severity	Permanence
	Traceability of outputs -Key pieces of information are missing, or information is not kept at all.	<p>On-farm</p> <p>Although limited to on-farm the consequences of poor traceability systems could affect entire food chain. This would only raise serious implications in the event of a recall/ withdrawal where records were unavailable and there was a serious risk to human health.</p>	<p>Very Low Information largely available but incomplete (where records can be completed using information available on farm)</p> <p>Low/Medium Depending on the number of outputs. Poor or inadequate system of keeping the required information. Cannot fully meet inspection requirements (records can't be completed using information available on farm)</p> <p>High No system or information kept</p>	Rectifiable

A8	You must store this information in a format which is readily available and produce it when requested			
	Description of breach	Extent	Severity	Permanence
	Information is kept but not in a systematic manner: it cannot be produced on demand, taking into account a test of reasonableness. (For Cross Compliance purposes, this effectively means within the period of the Cross Compliance inspection.)	On-farm Although limited to on-farm the consequences of poor traceability systems could affect entire food chain. This would only raise serious implications in the event of a recall/ withdrawal where records were unavailable and there was a serious risk to human health.	Very Low Information largely available but incomplete (where records can be completed using information available on farm) Low/Medium Depending on the scale of the business. Poor or inadequate system of keeping the required information. Cannot fully meet inspection requirements (records can't be completed using information available on farm) High No system or information kept	Rectifiable

Hygiene of foodstuffs and feed hygiene				
A9	You must store and handle waste and/or hazardous substances in order to prevent contamination to your food products or feed products			
	Description of breach	Extent	Severity	Permanence
	<p>There is evidence of inappropriate handling of waste or hazardous substances which have the capacity to contaminate stored foodstuffs or feedstuffs.</p> <p>Waste or hazardous substances stored inappropriately which could cause contamination of stored foodstuffs or feedstuffs.</p> <p><i>Hazardous substances; are any that have the potential to cause an adverse effect on health (human or animal). There is no exhaustive list of waste and hazardous substances but may include such things as: slurry, dirty water/ run-off, silage effluent, waste metal, car batteries, sheep dip, plant protection products and biocides, fertilisers, veterinary products, noxious chemicals, diesel. Please note that these are examples only.</i></p>	On farm Off Farm where there has been a food/feed safety incident.	Very Low Poorly stored/handled waste or hazardous substances, where there has been no contamination. Low to be given if there is an increased risk of contaminating the feed. Inspectors to decide severity in each case Medium e.g. gross contamination from poorly stored/ handled waste or hazardous substances. The product is still on farm. The non-compliance is unlikely to lead to a direct impact on human health.	Rectifiable
			High in extreme instances where non-compliance has led to, or can be linked to, food- borne disease with a direct impact on human health. Farmer has taken no steps to control or prevent the breach.	Permanent

A10	You must take account of the results of any relevant analysis carried out on samples taken from primary products or other samples relevant to feed safety			
	Description of breach	Extent	Severity	Permanence
	The results of any analysis carried out indicate a possible risk to human health and the farmer has not taken any action to stop the risk.	On farm Off farm where there has been a food/feed safety incident.	Medium unlikely to have an adverse effect on human health. High likely to have an adverse effect	Permanent

A11	You must store feed away from chemicals or any other products prohibited for use as animal feed			
	Description of breach	Extent	Severity	Permanence
	Feed not stored separately or is stored in direct contact with a product with the potential to cause contamination.	On farm Off farm where there has been a food/feed safety incident.	Very Low Feed is poorly stored or handled although not in contact with hazardous substances. The non-compliance is unlikely to lead to a direct impact on human health. Low to be given if there is an increased risk of contaminating the feed. Inspectors to decide severity in each case Medium e.g. Gross contamination from poorly stored / handled feed that has come into contact with hazardous substances (chemicals or other prohibited products). The feed product is still on farm. The non-compliance is unlikely to lead to a direct impact on human health.	Rectifiable
			High where non-compliance has led to, or can be linked to, food-borne disease or illness with a direct impact on human health. Farmer has taken no steps to control or prevent the breach.	Permanent

A12	You must keep storage areas and containers clean and dry and implement appropriate pest-control measures where necessary. Take particular care when cleaning storage areas and containers which are used to contain medicated and non-medicated feed.			
	Description of breach	Extent	Severity	Permanence
	<p>Farmer has not kept clean and/or dry and/or taken sufficient care when cleaning containers/areas used to store medicated and non-medicated feed.</p> <p>Farmer has not implemented appropriate pest control measures</p>	<p>On farm</p> <p>Off farm where there has been a food/feed safety incident.</p>	<p>Very Low insufficient care taken when cleaning containers/areas. The non-compliance is unlikely to lead to a direct impact on human and/or animal health.</p> <p>Low/Medium depends on the scale of the business. Insufficient care taken when cleaning containers/areas which has led to contamination of feed. The feed is still on the farm. The non-compliance is unlikely to lead to a direct impact on human and/or animal health</p> <p>High non-compliance has led to, or can be linked to, food borne disease or illness with a direct impact on human and/or animal health. Farmer has taken no steps to control or prevent the breach.</p>	<p>Rectifiable</p> <p>Permanent: Where there has been a food/feed safety incident and traceability and/or full withdrawal is not possible.</p>

A13	You must store seed properly and in such a way that it is not accessible to animals			
	Description of breach	Extent	Severity	Permanence
	<p>Seed has not been stored in containers and/or areas that prevent animal access</p>	<p>On farm</p> <p>Off farm where there has been a food/feed safety incident.</p>	<p>Very Low inappropriate storage. The non-compliance is unlikely to lead to a direct impact on human and/or animal health.</p> <p>Low/Medium depends on the scale of the business. Inappropriate storage and there is animal access to the seed. The non-compliance is unlikely to lead to a direct impact on human and/or animal health.</p> <p>High Non-compliance has led to, or can be linked to, food borne disease or illness with a direct impact on human and/or animal health. Farmer has taken no steps to control or prevent the breach.</p>	<p>Rectifiable</p> <p>Permanent: Where there has been a food/feed safety incident and traceability and/or full withdrawal is not possible.</p>

A14	You must handle medicated and non-medicated feeds separately to prevent cross-contamination and store medicated feeds in such a way so they can't be fed by mistake to animals for which they're not intended			
	Description of breach	Extent	Severity	Permanent
	<p>Medicated feeding stuffs not clearly labelled as such and stored separately from non-medicated feed. Feeds are not separated in store via physical barrier or bagged.</p> <p>No separate handling facilities for medicated feedings stuffs.</p>	<p>On farm</p> <p>Off farm where there has been a food/feed safety incident.</p>	<p>Very Low Feed is poorly stored or handled although not in contact with medicated feeding-stuffs. The non-compliance is unlikely to lead to a direct impact on human health.</p> <p>Low- to be given if there is an increased risk of contaminating the feed. Inspectors to decide severity in each case</p> <p>Medium e.g. Gross contamination from poorly stored / handled feed that has come into contact with medicated feed has contaminated non-medicated feed. The product is still on farm. The non-compliance is unlikely to lead to a direct impact on human health.</p>	Rectifiable
			<p>High where non-compliance has led to, or can be linked to, food-borne disease or illness with a direct impact on human health. Farmer has taken no steps to control or prevent the breach.</p>	Permanent

A15	You must make sure the on farm feed distribution system ensures that the right feed is sent to the right destination. During distribution and feeding, feed must be handled in such a way as to ensure that contamination does not occur from contaminated storage areas and equipment			
	Description of breach	Extent	Severity	Permanence
	<p>On farm feed distribution system does not ensure that the right feed is sent to the right destination</p> <p>Feed has been contaminated during its transit from the storage container/area to the feeding point.</p>	<p>On farm</p> <p>Off farm where there has been a food/feed safety incident.</p>	<p>Medium feed fed to wrong animal/species and/or contaminated. The non-compliance is unlikely to lead to a direct impact on human and/or animal health</p> <p>High Non-compliance has led to, or can be linked to, food-borne disease or illness with a direct impact on human and/or animal health. Farmer has taken no steps to control or prevent the breach.</p>	<p>Rectifiable</p> <p>Permanent: Where there has been a food/feed safety incident and traceability and/or full withdrawal is not possible</p>

A16	You must periodically clean on farm feed transport vehicles and feeding equipment, in particular when used to deliver and distribute medicated feed			
	Description of breach	Extent	Severity	Permanence
	Feed contaminated due to transport vehicles/equipment not cleaned sufficiently prior to use	<p>On-farm</p> <p>Off-farm where there has been a food/feed safety incident.</p>	<p>Low insufficient care taken when cleaning vehicles/equipment. The non-compliance is unlikely to lead to a direct impact on human and/or animal health.</p> <p>Medium insufficient care taken when cleaning vehicles/equipment which has led to contamination of feed. The feed is still on the farm. The non-compliance is unlikely to lead to a direct impact on human and/or animal health</p> <p>High Non-compliance has led to, or can be linked to, food borne disease or illness with a direct impact on human and/or animal health. Farmer has taken no steps to control or prevent the breach.</p>	<p>Rectifiable</p> <p>Permanent: Where there has been a food/feed safety incident and traceability and/or full withdrawal is not possible</p>

A17	You must use feed additives, veterinary medicinal products and biocides correctly (if you use them on your farm) with dosage, application and storage as stated on the label or as prescribed. This includes making sure that food you produce does not contain residues of pesticides or veterinary medicinal products that are higher than the permitted maximum residue level (MRL) for the pesticide or medicine used			
	Description of breach	Extent	Severity	Permanence
A17	<p>Evidence of feed additives, veterinary medicines or biocides being used incorrectly or inappropriately <i>For example:</i></p> <ul style="list-style-type: none"> not mixed or stored correctly not labelled past their use-by dates not used in accordance with the instructions/ dosage on the label (evidence from records of application) withdrawal periods have been contravened (evidence from veterinary medicines records) 	<p>On-farm</p> <p>Off-farm where there has been a food/feed safety incident.</p>	<p>Medium gross contamination of feed not stored separately, or medicated feeds fed either in excess or to the wrong species. The non-compliance is unlikely to have a direct impact on human health</p> <p>High where non-compliance has led to or can be linked with direct impacts on human health. The farmer has not controlled or prevented the breach</p>	Permanent

A17 cont.	You must use feed additives, veterinary medicinal products and biocides correctly (if you use them on your farm) with dosage, application and storage as stated on the label or as prescribed. This includes making sure that food you produce does not contain residues of pesticides or veterinary medicinal products that are higher than the permitted maximum residue level (MRL) for the pesticide or medicine used			
	Description of breach	Extent	Severity	Permanence
A17	The farmer has placed food on the market that, on analysis of a sample, and taking account of measurement uncertainty, has been found to contain a pesticide residue that exceeds the statutory maximum residue level (MRL) for a pesticide found in the food tested.	On-farm Off-farm	Low there is approval for the use of a pesticide on the crop, but the MRL set from residues of that pesticide has been exceeded. No safety or health concern arises from the breach of the MRL. High there is no authorisation for the use of the pesticide concerned on any crops in the UK. There is no authorisation for the use of the pesticide on the crop concerned. Safety concerns arise from the level of pesticide residue found;	Permanent
A17	The farmer has sold or supplied an animal for slaughter, or has sold/supplied milk, eggs or honey that, on analysis of a sample, has been found to contain residues of authorised veterinary medicinal products that exceed the maximum residue level (MRL) for the medicine used or an unauthorised substance.	Off-farm	Very Low The medicine used was a UK authorised product or a product prescribed by a Veterinary Surgeon under the terms of the cascade. However the MRL set for residues of that medicine has been exceeded but complete (re origin of medicine + batch number + identity of animals treated) and contemporaneous medicine records kept show that the withdrawal period for the medicine concerned has been complied with. Low/Medium Depends on the number of animals/quantity of product. The medicine used was a UK authorised product or a product prescribed by a Veterinary Surgeon under the terms of the cascade. However the MRL set for residues of that medicine has been exceeded and complete (re origin of medicine + batch number + identity of animals treated) and contemporaneous medicine records kept show that the withdrawal period for the medicine concerned has not been complied with. High The medicine used did not carry UK authorisation and has not been prescribed by a Veterinary Surgeon under the terms of the cascade or the medicine concerned has been prohibited for use in food producing animals or The medicine used was a UK authorised product or a product prescribed by a Veterinary Surgeon under the terms of the cascade but the MRL set for residues of that medicine has been exceeded and there are no complete (re origin of medicine + batch number + identity of animals treated) and contemporaneous medicine records kept to show that the withdrawal period for the medicine concerned has been complied with	Rectifiable if Very Low. Permanent

A18	<p>You must take adequate measures to prevent the introduction and spread of contagious diseases transmissible to humans through food.</p> <p>Which include:</p> <ul style="list-style-type: none"> • ensure that all eligible animals conform to national herd / flock health surveillance and testing intervals for Tb • have a system in place regarding precautionary measures when new animals are introduced on-farm (e.g.; keep separate from rest of herd/flock to verify whether they carry disease or not) • inform the relevant authority of a disease incident on farm (<i>Note: diseases referred to here are the notifiable zoonotic diseases</i>) • report indicators of potential outbreaks (abortions) to relevant authorities 			
	Description of breach	Extent	Severity	Permanence
A18	Failure to ensure that all eligible animals conform to national herd / flock health surveillance and testing intervals for Tb.	On-farm Off-farm	Very Low where testing is overdue by between 1 and 14 days. Low where testing is overdue by between 15 and 30 days. Medium where testing is overdue by between 31 and 60 days. High where testing is overdue by 61 days or more.	Rectifiable if the animals(s) are still on the farm and the test can still be completed Permanent if the animal(s) have been moved off the farm.
A18	Clear evidence that farmer has no system in place regarding precautionary measures when new animals are introduced on-farm (e.g.; not kept separate from rest of herd/flock to verify whether they carry disease or not)	On-farm Off-farm where there has been a food/feed safety incident.	Medium where non-compliance has not led to, or can be linked to a food-borne disease with a direct impact on human health. High where non-compliance has led to, or can be linked to , a food-borne disease with a direct impact on human health	Permanent
A18	The farmer has not informed APHA of a notifiable disease outbreak	On-farm	Medium where non-compliance has not led to, or can be linked to a food-borne disease with a direct impact on human health. High where non-compliance has led to, or can be linked to , a food-borne disease with a direct impact on human health	Permanent
A18	Evidence that the farmer has failed to report indicators of potential outbreaks (abortions)	Off-farm where there has been a food/feed safety incident.		

A19	You must source and use feed, for food-producing animals, from establishments that are registered and/or approved by your local authority			
	Description of breach	Extent	Severity	Permanence
	Evidence that the farmer is sourcing and/ or using feed from establishments that are not registered/ approved	On-farm Off-farm where there has been a food/ feed safety incident.	Low feed has been sourced from establishment not registered/approved in accordance with 183/2005 but there has been no contamination or risk to animal health or human health High feed has been sourced from establishment not registered /approved in accordance with 183/2005 and has led to, or can be linked to, food-borne disease with a direct impact on human health; linked to animal illness death	Permanent

A20	You must take appropriate remedial action when informed of problems identified during official controls.			
	Description of breach	Extent	Severity	Permanence
	Farmer has not implemented the remedial action highlighted during previous official controls.	On farm Off farm where there has been a food/ feed safety incident.	Medium unlikely to have an adverse effect on human and/or animal health. High likely to have an adverse effect on human and/or animal health	Permanent

A21	<p>You must keep records on all of the following areas if they are relevant to your business:</p> <ul style="list-style-type: none"> • veterinary medicinal products, or other treatments, administered to your animals; the dates of the treatment and the withdrawal period. • the results of any analyses carried out on samples taken from food producing animals, plants or other samples taken for diagnostic purposes, that have importance for human health; • use of plant protection products and biocides. • any use of genetically modified seeds (in feed production) 			
	Description of breach	Extent	Severity	Permanence
	No records kept or records incomplete	On-farm	Low missing information or errors that can be rectified and a full assessment is possible	Rectifiable
			Medium sufficient partial records/incomplete records. Only information to allow a partial assessment.	Rectifiable - if records can be corrected. Permanent - if records cannot be corrected.
			High no records	Permanent

Food and feed safety, withdrawal and recall:				
B1	You must not place unsafe food or unsafe feed on the market.			
	Description of breach	Extent	Severity	Permanence
	There is evidence that food that is unfit for consumption and/or injurious to health (for example, mould growth or pest infestation of grain) has been placed on the market and is not to be disposed of or used as feed.	On Farm Off-farm	High	Rectifiable - If products still on farm and no evidence of sales or Permanent

B2	You must not feed unsafe feed to food-producing animals.			
	Description of breach	Extent	Severity	Permanence
	There is evidence that feed that is held for placing on the market or feed to food producing animals is obviously unsafe e.g. there are visible signs or other evidence of gross contamination such as mould or pest infestation.	On Farm Off-farm	Medium Clear visible signs or other evidence of gross contamination, feed has not been fed to animals but producer has failed to take steps to destroy or treat contamination. High Unsafe feed has been fed to food producing animals resulting in animal deaths or sickness, or food products have become contaminated.	Rectifiable - If products still on farm and no evidence of sales or Permanent

DAIRY HYGIENE REQUIREMENTS				
A22	You must The following additional hygiene requirements apply where you are a producer of raw milk and/or colostrum (from any species). You must ensure that raw milk and/or colostrum comes from animals that: <ul style="list-style-type: none"> are in a good general state of health present no sign of disease that might result in the contamination of milk and/or colostrum and, in particular, are not suffering from any infection of the genital tract with discharge, enteritis with diarrhoea and fever, or a recognisable inflammation of the udder; do not have any udder wound likely to affect the milk and/or colostrum; are not within the prescribed withdrawal period following the administration of authorised products or substances have not been administered with any unauthorised substances or products 			
	Description of breach	Extent	Severity	Permanence
A22	(BP 1-3) Evidence that milk and/or colostrum from animals showing signs of ill health (as could reasonably be determined by a non-vet, e.g. discharge, inflammation, udder wounds) has been included in the bulk tank.	On Farm Off-farm	Low where milk is going for heat treatment. Medium where milk will not be heat treated	Rectifiable -if in tank on farm Permanent if found at processors
A22	(BP 4) Evidence of milk and/or colostrum from treated animals that have not observed the required withdrawal time has been included in the bulk tank	On farm Off-farm	High	Rectifiable if in tank on farm Permanent if found at processors
A22	(BP 5) Evidence of milk and/or colostrum from animals treated with an unauthorised substance has been included in the milk tank	On farm Off-farm	High	Rectifiable if in tank on farm Permanent if found at processors

A23	<p>As regards to tuberculosis and brucellosis, you must ensure that raw milk and/or colostrum comes from animals belonging to herds which have disease-free status.</p> <p>Where your herd/ holding is not free from tuberculosis or brucellosis, you may sell milk and/or colostrum from your non-reactor animals if:</p> <ul style="list-style-type: none"> • you are selling to a wholesaler who will heat treat the milk and/or colostrum before marketing it for human consumption, or • the raw milk is from sheep/ goats and is intended to be made into cheese that has a maturation period of at least two months. <p>Where your herd/holding is not free from tuberculosis or brucellosis, you must ensure that raw milk and/or colostrum from any reactor animal is not placed on the market for human consumption</p>			
	Description of breach	Extent	Severity	Permanence
	<p>A23 Evidence that milk and/or colostrum from non-reactor animals from herds or flocks that have lost their disease free status has been marketed for human consumption without being pasteurised (e.g. heat treated or the raw milk is from sheep or goats and is intended to be made into cheese that has a maturation period of at least two months)</p> <p>A23 Evidence that milk and/or colostrum from reactor animals has been marketed for human consumption</p>	Off-farm	<p>Medium all situations except where the producer sells raw milk directly to the final customer.</p> <p>High only if producer retails raw drinking milk directly to the final customer.</p>	Permanent

A24	<p>You must isolate animals that are infected, or suspected of being infected, with tuberculosis and brucellosis must be effective in order to avoid any adverse effect on other animals' milk and/or colostrum</p>			
	Description of breach	Extent	Severity	Permanence
	Evidence of failure to isolate animals that are infected or suspected to be infected	On farm	<p>Low contact with herd mates and milk and/or colostrum has been heat treated</p> <p>High contact with susceptible livestock on neighbouring holdings and milk and/or colostrum has not been heat treated</p>	Permanent

A25	You must ensure that milking equipment and the premises where milk and/or colostrum is stored, handled or cooled must be located and constructed so as to limit the risk of contamination of milk			
	Description of breach	Extent	Severity	Permanence
	<p>Inadequate location or construction of such premises that is within the farmer's ability to do something about.</p> <p>Evidence that there is a significant risk of contamination occurring due to location of the milking equipment close to hazardous materials and/or due to poor construction and/or practices in maintenance of the milking shed or milk/colostrum storage area</p>	On-farm	<p>Very low where there are minor problems with small risk of contamination</p> <p>Low/Medium depending on the scale of the enterprise. Where the problems found show a higher risk of contamination of the milk and/or colostrum</p>	Rectifiable or Permanent

A26	You must ensure that premises used for the storage of milk and/or colostrum are: <ul style="list-style-type: none"> be protected against vermin - including birds and birds' nests; have adequate separation from premises where animals are housed have suitable refrigeration equipment in order to meet the post-milking cooling rules 			
	Description of breach	Extent	Severity	Permanence
A26	Evidence that the premises used for storing milk and/or colostrum are not protected against vermin - including birds and bird's nests	On-farm	<p>Medium gross infestation, inadequate separation or poor refrigeration and milk and/or colostrum is still on farm. The non-compliance is unlikely to lead to a direct impact on human health.</p> <p>High in extreme instances where non-compliance has led to/or can be linked to food borne disease from the milk and/or colostrum that has a direct impact on human health. Farmer has taken no steps to control or prevent the breach.</p>	Rectifiable
A26	Evidence that there is no adequate separation between the milk and/or colostrum storage area and the livestock housing	Off-farm where there has been a food/feed safety incident.		
A26	Refrigeration equipment not working to the required level.			

A27	You must ensure the surfaces of equipment that come into contact with milk and/or colostrum (utensils, containers, tanks etc.) are easy to clean, and disinfect where this is necessary.			
	Description of breach	Extent	Severity	Permanence
A27	The equipment that comes into contact with milk are not constructed of materials conducive to easy cleaning	On-farm	Very Low where there are minor problems with a small risk to human health (or contamination of milk)	Rectifiable
A27	The materials are not made of smooth, washable and non-toxic materials		Low/Medium depending on the scale of the enterprise where there is contamination and a risk to human health (or contamination of milk)	

A28	You must clean (and disinfect where necessary) the surfaces of equipment that come into contact with milk and/or colostrum after use and maintain in a sound condition.			
	Description of breach	Extent	Severity	Permanence
A28	Dirty facilities and equipment	On-farm	Very Low where there are minor problems with a small risk to human health (or contamination of milk) Low/Medium depending on the scale of the enterprise where there is contamination and a risk to human health (or contamination of milk)	Rectifiable
A28	Milk contact surfaces in the milking or storage area are contaminated (e.g stale milk residues, milk stone/mould)			
A28	The surfaces of milking equipment intended to come into contact with milk are not in a sound condition			

A29	You must carry out milking hygienically, especially making sure that: <ul style="list-style-type: none"> • before milking starts, the teats, udder and adjacent parts are clean; • you satisfactorily identify animals undergoing any medical treatment which is likely to transfer residues to the milk and/or colostrum; • milk and/or colostrum from such animals, or any that are still within the withdrawal period is not used for human consumption 			
	Description of breach	Extent	Severity	Permanence
A29	Teats and udders not clean before cluster attachment at milking time. Milking routine or facilities are not robust enough for the cleanliness of the animals.	On-farm	Low all situations except where the producer sells raw drinking milk and/or colostrum directly to the final customer High if producer sells raw drinking milk to the final customer	Rectifiable Permanent
A29	Animals that are undergoing medical treatment likely to transfer residues to the milk, or are still within the withdrawal period for that treatment are not adequately identified at milking	On-farm		
A29	Such animals are not milked last and with the delivery pipe removed from the bulk tank, or using separate equipment e.g. separate dump bucket and cluster. [if such practices are not followed it could lead to milk obtained from these animals being sold for human consumption]	On-farm		

A30	<p>You must immediately after milking, you must hold milk and/or colostrum in a clean place, designed and equipped to avoid contamination, immediately after milking. The milk must be cooled immediately to:</p> <ul style="list-style-type: none"> • not more than 8°C if it is collected daily • not more than 6°C if it is not collected daily <p>For the purposes of this requirement it is considered that “immediately” means within a reasonable and practicable time period (2 hours).</p>			
	Description of breach	Extent	Severity	Permanence
A30	Evidence of inappropriate storage of milk and/or colostrum. Storage facilities are not clean; and do not prevent contamination.	<p>On-farm</p> <p>Off-farm where there has been a food/feed safety incident.</p>	<p>Very Low inappropriate storage (no contamination)</p> <p>Low/Medium dependent upon the levels and location of any contamination and the likelihood of it leading to a direct impact on human health</p> <p>High dependent upon the levels and location of any contamination and the likelihood of it leading to a direct impact on human health</p>	Rectifiable or Permanent
A30	<p>Milk and/or colostrum has not been cooled immediately (2 hours) following the end of milking and prior to collection. (NB It may not be practical to cool milk and/or colostrum immediately in all situations)</p> <p>(this can be observed on the tanker dockets and/or by taking temperature of milk or colostrum stored).</p>	<p>On-farm the milk and/or colostrum will not be collected by the buyer</p> <p>Off-farm where there has been a food safety incident; milk and/or colostrum has left the premises.</p>	<p>Low non-compliance is unlikely to lead to a direct impact on human health.</p> <p>Low/Medium Very Low where there are minor problems with a small risk to human health (or contamination of milk)</p> <p>Low/Medium depending on the scale of the enterprise where breach is seen as to be a very recent development and little or no effort is being made to rectify situation</p> <p>High where it is obvious that the facilities are not in effective operational order or are not suitable for the volume of milk to be stored (extra tanks outside dairies without cooling equipment for example) and no action is being taken to rectify situation</p>	Rectifiable or Permanent

ADDITIONAL REQUIREMENTS FOR EGG PRODUCERS				
This hygiene requirement relates to all eggs in shell that are produced by farmed birds.				
A31	While they are on your premises, you must keep eggs clean and dry, free of extraneous odour, effectively protected from shocks and out of direct sunshine			
	Description of breach	Extent	Severity	Permanence
	<p>Eggs kept in unsuitable conditions. For example close to moving agricultural machinery, in the tractor shed, close to bleach or diesel</p> <p>This hygiene requirement relates to all eggs in shell that are produced by farmed birds.</p>	<p>On-farm where eggs have not left the premises.</p> <p>Off-farm where there has been a food safety incident; eggs have left the premises.</p>	Low	Rectifiable or Permanent

SMR 5: Restrictions on the use of substances having hormonal or thyrostatic action and beta-agonists in farm animals

The aim of these requirements is to prohibit the illegal use in stock farming of substances that have a hormonal or thyrostatic action and beta-agonists, and to prevent the residues that these substances leave in meat and other foodstuffs from entering the human or animal food chain (they apply to you if you keep farmed animals)

A1	You must observe the relevant withdrawal period if your food-producing animals have been given any of the restricted substances in line with the permitted exceptions			
	Description of breach	Extent	Severity	Permanence
	<p>The farmer has not observed the relevant withdrawal periods where food producing animals have been administered any of the restricted substances.</p> <p>Currently there are no authorised medicines containing thyrostats for farm animals.</p> <p>Failure to observe withdrawal periods only applies to slaughtered animals or to live animals from which products (usually eggs and milk) are taken.</p>	<p>On-farm If the animal is still present.</p> <p>Off-farm Where animal has left the holding.</p>	High	Permanent

A2	You must make veterinary medicinal records relating to restricted substances available to the competent authority, or anyone acting on behalf of the competent authority, on request			
	Description of breach	Extent	Severity	Permanence
	<p>Non-maintenance of records of permitted animal treatment with substances with hormonal or beta-agonists to food-producing animals contrary to Regulations 18 (if the administration is by the vet) or 19 (administration is by the farmer) of the Veterinary Medicines Regulations.</p> <p>Assessment of medicines records is often part of the procedure for Animal Health when they inspect farms.</p> <p>Where administration of the substances covered by SMR 5 is permitted under an exception, keeping the records required by the Veterinary Medicines Regulations is also required and failure to do so is a breach of SMR 5.</p> <p><i>Farmers must keep proof of purchase of all veterinary medicinal products for 5 years. This will include proof of purchase of any treatments relating to SMR 5. Therefore if a farmer has the appropriate proof of purchase but no or an incomplete record of use of an SMR 5 product this may provide evidence of an offence.</i></p>	On-farm	<p>Low: minor omissions in records of administration of SMR 5 substances or mistakes but inspector still able to make an assessment of compliance with withdrawal periods or trace treated animals.</p> <p>Medium: records of administration of SMR 5 substances incomplete - only sufficient for inspector to make a partial assessment of compliance with withdrawal periods or trace treated animals.</p> <p>High: no records of administration of SMR 5 substances – or inspector unable to make an assessment of compliance with withdrawal periods or trace treated animals</p>	<p>Rectifiable</p> <p>Permanent Depending on time-lag between suspected treatment and whether farmer is in possession of any information that would enable him to make a record</p>

B1	You must not give food-producing animals restricted substances (unless in line with any permitted exceptions)			
	Description of breach	Extent	Severity	Permanence
	<p>The farmer has administered restricted substances with hormonal or thyrostatic action or beta-agonists to food-producing animals</p> <p>Note: some exemptions exist:</p> <ul style="list-style-type: none"> • Authorised veterinary medicinal products (VMPs) containing betaagonists prescribed by a veterinary surgeon may be administered by a vet, or by a farmer under direction of a vet, to equidae and pets. • Authorised VMPs containing beta-agonists prescribed by a veterinary surgeon may be administered by a vet by injection to treat or induce tocolysis in cows during calving. • Authorised VMPs with a gestogenic, oestrogenic (other than oestradiol 17β and its ester-like derivatives) or androgenic action prescribed by a veterinary surgeon may be administered by a vet, or by a farmer under direction of a vet, for the synchronisation of oestrus or for the preparation of donors or recipients for the implantation of embryos <p>Note: Evidence for this breach may come from the detection in samples taken from live animals or from samples taken at slaughterhouses. Evidence may also come from the detection in feed or water of unauthorised substances having hormonal or thyrostatic action or betaagonists</p> <p>Only the farmer's own veterinary surgeon or a UK registered pharmacy acting in accordance with a veterinary prescription should have supplied drugs covered by SMR10. However, obtaining such products from a non-authorised source may not in itself constitute a breach of SMR 5, if it is a UK authorised product and is covered by a prescription.</p>	<p>On-farm</p> <p>Off-farm If the animals have left the farm</p>	<p>High</p>	<p>Rectifiable Only where animals are found on farm and it can be established that no products have entered the food chain</p> <p>Permanent</p>

B2	You must not have substances on your farm that contain beta-agonists to induce tocolysis in cows when calving			
	Description of breach	Extent	Severity	Permanence
	<p>The farmer is in possession of any substance containing a beta-agonist that may be used for induction purposes in the treatment of tocolysis.</p> <p><i>Note: Any prescription may not be available in written form on the farm. But the farmer should be able to demonstrate who prescribed the medicinal product and this should be followed up to verify. As farmers are required to keep the proof of purchase of all veterinary medicinal products for 5 years this should be available to identify the supplier of the source of the medication.</i></p> <p>Some banned substances have legitimate uses as medicines for humans and companion animals. If the inspector is satisfied that any products found are for these purposes, no breach of SMR 5 has occurred. Where illegal possession is suspected or has been established, an assessment will have to be made as to whether illegal administration has also taken place (see above).</p> <p><i>Inspectors may also have to take into account that medicines may be found that were legally obtained, but have since ceased to be authorised. The continued possession of such products is unlawful.</i></p>	On-farm	High	Rectifiable As any illegally possessed products can be seized by an inspector appointed under the Veterinary Medicines Regulations

B3	You must not have food producing animals on your farm to which a restricted substance has been administered (unless given in line with any permitted exceptions)			
	Description of breach	Extent	Severity	Permanence
B3	The farmer is in possession of animals with residues in any tissues or body fluids at concentrations that indicate illegal administration to food producing animals of substances with hormonal or thyrostatic action or beta-agonists	On-farm Where it is found that an animal and/or animal products have left the farm it will be necessary to consider whether a breach has occurred under SMR 5 breach B4 and/or B5	High	Rectifiable
B3	The farmer is in possession of animals with residues in any tissues or body fluids at concentrations that indicate non-compliance with an authorised SMR 5 product's stated dosing instructions			

B4	You must not place on the market or send to slaughter for human consumption any animal to which a restricted substance has been administered (unless given in line with any permitted exceptions)			
	Description of breach	Extent	Severity	Permanence
	<p>The farmer has placed on the market or sent to slaughter for human consumption animals with residues in any tissues or body fluids at concentrations that indicate illegal administration to food-producing animals of substances with hormonal or thyrostatic action or beta-agonists.</p> <p>Certain exemptions apply - see Regulation 9 of SI 1997 No.1729 as amended.</p>	<p>On-farm</p> <p>Off-farm If the animals have left the farm</p>	High	<p>Rectifiable In cases where the animals can be prevented from entering the food chain</p> <p>Permanent In cases where the animals cannot be prevented from entering the food chain.</p>

B5	You must not place on the market meat, or any other animal product, derived from an animal to which any restricted substance has been administered (unless given in line with any permitted exceptions)			
	Description of breach	Extent	Severity	Permanence
	<p>The farmer placed on the market meat or animal products from animals with residues at concentrations that indicate illegal administration of substances with hormonal or thyrostatic action or beta-agonists.</p>	Off-farm	High	<p>Rectifiable In cases where the produce can still be prevented from entering the food chain;</p> <p>Permanent In cases where the produce cannot be prevented from entering the food chain.</p>

SMR 6: Livestock Identification and Traceability - Pigs

The aim of these requirements is to establish a system for the identification and registration of pigs to facilitate their traceability, in particular in the event of a disease outbreak (they apply to you if you keep pigs)

For cross compliance purposes, you do not need to do anything more than you are already required to do by law for the identification and registration of pigs. The key elements of the pig tracing system, that applies specifically for cross compliance purposes, are listed below. This is a summary only. For a full explanation of your legal obligations, you should refer to the relevant legal provisions

Requirement 1- Identification of pigs. You must,

Identify your pigs before they leave your holding in one of the following ways:

- For movements out with the UK, to an exhibition, show, semen collection centre, under a walking licence or for breeding purposes where return is intended, pigs must be permanently identified with an approved ear tag or tattoo including unique identifier
- For movements to a market or slaughterhouse, pigs may either be permanently identified with an approved ear tag, tattoo or a slap mark.
- For farm to farm movements of pigs under 12 months old pigs may either be permanently identified with an approved eartag, tattoo, slap mark or a temporary mark which must last at least until the pig reaches its destination.
- Permanent identification that has become illegible or has been lost must be replaced as required.

An animal's identification must not be removed or replaced without authority issued by Scottish Ministers. Further information on the pig keeper requirements can be found on Scottish Government web pages.

Description of breach	Extent	Severity The highest severity that applies is used. This is dictated by either the number of animals or percentage of animals sampled	Permanence
Evidence that movements have taken place without the required identification	<p>On-farm Where the animals are still on the holding</p> <p>Off-farm Where there is evidence the animals have moved off the holding</p>	<p>Very low Up to 10 pigs or up to and including 20% of pigs not correctly identified</p> <p>Low Greater than 10 pigs or over 20% up to and including 60% of the pigs sampled had not been correctly identified.</p> <p>Medium Over 60% up to and including 80% of pigs had not been correctly identified</p> <p>High Over 80% of pigs had not been correctly identified</p>	Rectifiable

Description of breach	Extent	Severity The highest severity that applies is used. This is dictated by either the number of animals or percentage of animals sampled	Permanence
Pigs with lost or illegible identification and the identification has not been replaced	On-farm	Medium Keeper has failed to comply with a notice, issued at inspection, requiring identification to be replaced and the replacement recorded (if applicable).	Rectifiable
Identification has been removed or replaced without authority issued by Scottish Ministers	On-farm Where the animals are still on the holding Off-farm Where there is evidence the animals have moved off the holding	High Where any pig is found to have had permanent identification removed or replaced without authority.	Rectifiable

Requirement 2- Record Keeping

You must,

Maintain a separate register for each holding (CPH) that you keep pigs on, make your records available to SGRPID or local authority on request and retain records for a minimum period of three years from the last record entry.

You must record

- The holding address including CPH and the name and address of the keeper

You must record details of the movement of pigs on and off your holding within 48 hours of the movement date, including

- The date of the movement
- The number of pigs moved
- The identification of the pigs moved (either temporary mark or identification number, including unique individual identification if applicable)
- The address and CPH number where the pigs were moved from / to

You must record the number of pigs on the holding at least once a year

You must record the details of replacement identification as a result of identification becoming lost or illegible, cross referencing the new identifier to the original identifier (unless the replacement used is identical to the original)

Description of breach	Extent	Severity	Permanence
Failure to keep records or failure to provide the records for inspection.	On-farm	High No verifiable records	Rectifiable
Failure to record complete movement details	On-farm	Movement records incomplete Very low Up to 10 movement records did not have all the required information. Low 11 or more movement records do not have all the required information No records Low Up to 5 movements have not been recorded Medium 6 or more movements have not been recorded	Rectifiable
Failure to record the number of pigs on your holding in the register at least once per year	On-farm	Very low Failure to record the number of pigs on the holding in the previous year	Rectifiable
Failure to maintain a record of replacement identification	On-farm	Medium Evidence that new identifiers have been inserted but no record of replacement identification has been kept	Rectifiable

Requirement 3 – Movement Notification.

You must,

Notify Scottish Ministers via the ScotEID database of movements onto and off your holding (except for movements for veterinary treatment). Note where the movement on/off is notified electronically to ScotEID, no movement document is required (except for movement of pigs that are under 12 months old and identified with a temporary mark, or where the pigs are moving to England, Wales or Northern Ireland).

For movements off you must provide the following details either prior to the movement or on the day of the movement -

- Address details, including postcode and CPH number of the holdings from and to which the pigs are being moved (except when the pig is moving to a show but the holding which it will be moved after the show is not known, notification must take place within 3 days commencing on the day of the move from the show)
- The date of the movement
- The number of pigs moved
- The identification mark of each pig moved

For movements on you must confirm to ScotEID the following details within 3 days (including day of arrival) of the pigs arriving on the holding -

- Address details, including postcode and CPH number of the holdings from and to which the pigs are being moved
- The date of the movement
- The number of pigs moved
- The identification mark of each pig moved
- And where the pig is being moved from a market, the lot number of the pigs being moved

Description of breach	Extent	Severity	Permanence
Failure to notify movements and/or all required information notified to ScotEID	<p>On-farm Where the animals are still on the holding</p> <p>Off-farm Where there is evidence the animals have moved off the holding</p>	<p>Incomplete movement notifications</p> <p>Very low Up to 10 movement notifications did not have all the required information</p> <p>Low Over 10 movement notifications did not have all the required information</p> <p>No movement notification</p> <p>Very low Up to 5 movements had not been notified</p> <p>Low Over 5 movements had not been notified</p>	Rectifiable

Description of breach	Extent	Severity	Permanence
Mandatory information for movements supplied to ScotEID prior to announcement of inspection but out with legislative deadline	On-farm Where the animals are still on the holding Off-farm Where there is evidence the animals have moved off the holding	Very low Up to 15 movement notifications reported out with legislative deadline	Rectifiable
		Low Over 15 movement notifications reported out with legislative deadline	

Requirement 4 – Registration as a keeper of pigs.

You must,

- Register your details with your local Animal and Plant Health Agency (APHA) office, as a keeper of pigs, within one month of establishing your holding.
- Notify your local Animal and Plant Health Agency (APHA) office of any change to your details, within one month of the change

Description of breach	Extent	Severity	Permanence
Failure to have up to date details registered with APHA	Off-farm	Very low Registration details had not been updated within one month	Rectifiable
		Low No registration	

SMR 7: Livestock Identification and Traceability - Cattle

The aim of these requirements is to establish a system for the identification and registration of cattle to facilitate their traceability, in particular in the event of a disease outbreak. Within this SMR, 'cattle' means all bovine animals.

For cross compliance purposes, you do not need to do anything more than you are already required to do by law for the identification and tracing of cattle. The key elements of the cattle identification and traceability system (CID&T), which applies specifically for cross compliance purposes, are listed below. This is a summary only. For a full explanation of your legal obligations, you should refer to the relevant legal provisions and guidance on the Scottish Government and ScotEID webpages. Note the CID&T system includes the information held on the ScotEID database – accessed via ScotMoves+ ScotMoves+ systems – (referred to as 'the database' thereafter).

Eartags

- Each calf born on your holding (or cattle imported from outside the European Union - EU) must be double tagged with Scottish Minister approved eartags with the same unique identification code.
- Dairy calves must be tagged with one eartag within 36 hours of birth and within 20 days of birth for the second eartag. Bison calves to be tagged within 9 months of birth or when they are separated from their mother, if this is earlier. Any other calves must be tagged within 20 days of birth, or before they leave the holding, if this is sooner.
- Eartags must not be removed or replaced without permission from Scottish Ministers. Illegible or lost tags must be replaced within 28 days of discovery of the loss, or before the animal leaves the holding, if this is sooner.
- You must not alter, obliterate or deface an eartag.

Notifications

- Births must be notified to the database within seven days of tagging
- Deaths on your holding must be notified to the database within seven days.
- Movements of cattle on and off a holding must be notified to the database within three days. Note - if your animals move directly from or to a market or (most) abattoirs in Scotland, the movement 'on' and 'off' farm will be electronically transmitted to the database on your behalf. It is your responsibility to ensure the market/abattoir will complete the move and movement details accurately and timeously on your behalf.

Description of breach	Extent	Severity	Permanence
Breaches to be assessed in line with the CII discrepancy tables.	On-Farm	Very low	Rectifiable
	Off-Farm	Low Medium High	Permanent

Refer to the Cattle Penalty Calculator in the following Section

Holding registers

- You must keep an up-to-date on farm holding register, which includes for each animal: official eartag number; dam's official eartag number; date of birth; sex; breed, date of movements on and off holding; details of where the animal has moved to or from (including previous and next keeper information) and date of death if animal dies on holding.
- The register must be completed within 48 hours of a movement, within seven days of a death and within seven days of a birth in a dairy herd and within 30 days of the birth of any other calf.
- The register must be kept for 10 years if you are still a cattle keeper, and three years in any other case from the end of the calendar year in which the last entry was made and be available to SGRPID or local authority on request.
- Note - If you elect to use ScotMoves to notify within business movements you can use the ScotMoves database movement information to comply with your holding register movement recording requirements. For all other mandatory information as per first bullet point you must still keep a separate (paper or electronic) on farm holding register containing the information.

Description of breach	Extent	Severity	Permanence
Breaches to be assessed in line with the CII discrepancy tables.	On-Farm Off-Farm	Very low Low Medium High	Rectifiable or Permanent
Refer to the Cattle Penalty Calculator in the following Section			

Penalty procedures for breaches of SMR 7 - Animal Identification and Registration - Cattle

Breaches of Cross Compliance are assessed against the following criteria:

- **Intent** whether errors are attributed to negligence or intentional non-compliance
- **Extent** whether effects are confined to on-farm or have a far reaching impact off-farm
- **Severity** the highest determined severity level is applied
- **Permanence** whether the errors are rectifiable in a reasonable period of time, or are permanent
- **Repetition** the same CII error found at inspection within a 3 calendar year period

During cattle identification inspections, checks are made to ensure compliance with current regulations. Any area of non-compliance (discrepancy) which is identified is allocated a Cattle Identification Inspection (CII) error code.

Each CII error code has been allocated a Severity score for Cross Compliance purposes depending on its relative seriousness.

Each CII error code has also been defined as having either “On-farm” or “Off-farm” extent, which is dependent on whether the breach is classed as having a far reaching impact or limited to the farm itself.

The individual codes are also classified according to Permanence as either Rectifiable or Permanent.

Cattle Penalty Calculator

The table below shows the 18 CII error codes, their scores, Extent and also the Permanence.

Code	Discrepancy Description	Score Scot- Moves	Score Scot- Moves+	Extent	Permanence
FB	Failure to notify birth to database within legislative deadline	NA	1.0	Off-farm	Rectifiable
FM	Failure to notify movement to database within legislative deadline	0.1	1.0	Off-farm	Rectifiable
FD	Failure to notify death to database within legislative deadline	NA	1.0	Off-farm	Rectifiable
LB	Birth notification supplied to database prior to announcement of inspection but outwith the legislative deadline	NA	0.1	Off-farm	Rectifiable
LM	Movement notification supplied to database prior to announcement of inspection but outwith the legislative deadline	0.1	0.1	Off-farm	Rectifiable
LD	Death notification supplied to database prior to announcement of inspection but outwith the legislative deadline	NA	0.1	Off-farm	Rectifiable
IB	Incorrect birth date notified to database	NA	0.7	On-farm / Off-farm	Rectifiable
IM	Incorrect movement date notified to database	0.1	0.4	On-farm / Off-farm	Rectifiable
ID	Incorrect death date notified to database	NA	0.4	On-farm / Off-farm	Rectifiable
IDAM	Incorrect Dam id notified to database (other than space or leading zero issues)	NA	0.3	On-farm / Off-farm	Rectifiable
LZ	Incorrect Dam id notified to database (space or leading zeros issues)	NA	0.0	On-farm / Off-farm	Rectifiable
ISB	Incorrect sex or breed notified to database	NA	0.1	On-farm / Off-farm	Rectifiable
NF	Animal details not found in farm records	0.1	1.0	Off-farm	Rectifiable / Permanent
LR	Animal details found in farm records and notified to database prior to announcement of inspection but outwith the legislative deadline	0.1	0.1	Off-farm	Rectifiable
NA	Animal expected to be present on holding but no animal presented	NA	1.0	Off-farm	Rectifiable
TG1	Animal has lost 2 tags but can still be identified by other means.	NA	0.3	On-farm / Off-farm	Rectifiable / Permanent
TG2	Animal incorrectly tagged for age, not tagged within timescale or has been tagged previously but has lost 2 tags and cannot be identified by other means	NA	1.0	On-farm / Off-farm	Rectifiable / Permanent
TG3	Animal has lost 1 tag but still identifiable	NA	0.1	On-farm / Off-farm	Rectifiable / Permanent

The scores allocated to each CII discrepancy code are added up, which is known as the **absolute severity score**.

The absolute severity score is then converted to a **percentage severity score**, which is established by dividing the absolute score by the number of “animals inspected” and multiplying that figure by 100.

These two figures are then assessed against the threshold severity levels listed in the table below and the highest is taken forward in determining the level of financial penalty.

Absolute Severity Table	
Score	Absolute Severity
0.01 - 10.00	Very low
10.01 - 20.00	Low
20.01 – 30.00	Medium
30.01 +	High

% Severity Table	
Score	Percentage Severity
0.01 – 20.00	Very low
20.01 – 60.00	Low
60.01 – 80.00	Medium
80.01 +	High

Extent and Permanence is determined using the table above per CII discrepancy code.

The following example demonstrates how a breach of CII requirements can result in a Cross Compliance penalty.

Example:

Following an inspection it is determined that:

- 11 animals have died and the deaths have not been notified to the database.
- 3 animals moved onto the holding but the incorrect date of movement has been reported to the database.
- 1 animal present at inspection was discovered to have been tagged previously but has lost its official identifiers and cannot be identified by other means
- 1 animal present at inspection correctly identified, however animal over 27 days of age and no birth notification made to the database.
- 1 animal present at inspection with mandatory birth information missing in the farm records
- The number of “animals inspected” (seen and / or record checked) was 66

The discrepancies identified attracted the following score:

Code	Discrepancy Description	Score	Extent	Permanence
FD	Failure to notify death to database within legislative deadline	11.0	Off-farm	Rectifiable
IM	Incorrect movement date notified to database	1.2 (0.4 x 3)	On-Farm	Rectifiable
TG2	Animal incorrectly tagged for age, not tagged within timescale or has been tagged previously but has lost 2 tags and cannot be identified by other means	1.0	On-Farm	Rectifiable
FB	Failure to notify birth to database within legislative deadline	1.0	Off-farm	Rectifiable
NF	Animal details not found in farm records	1.0	Off-farm	Permanent

The Absolute Scores are calculated as follows: FD- 11, IM- 1.2 TG2– 1, FB– 1, NF- 1

The Percentage is calculated as follows: FD- 11 / 66 = 16.66%, IM- 1.2/66 = 1.8%, TG2– 1/66 = 1.5%, FB– 1/66 = 1.5%, NF– 1/66 = 1.5%

These scores are assessed against the absolute and percentage severity tables, with the assessments as follows –

FD	Extent – Off farm, Severity – Low, Permanence – Rectifiable, Cross Compliance reduction – 3%
IM	Extent – On farm, Severity – Very low, Permanence – Rectifiable, Cross Compliance reduction – warning letter
TG2	Extent – On farm, Severity – Very low, Permanence – Rectifiable, Cross Compliance reduction – warning letter
FB	Extent – Off farm, Severity – Very low, Permanence – Rectifiable, Cross Compliance reduction – warning letter
NF	Extent – Off farm, Severity – Very low, Permanence – Permanent, Cross Compliance reduction – 1%

In this example the errors found would lead to a **3%** reduction in payments.

SMR 8: Livestock Identification and Traceability - Sheep & Goats

The aim of these requirements is to establish a system for the identification and registration of sheep and goats to facilitate their traceability, in particular in the event of a disease outbreak. They apply to you if you keep sheep or goats.

For cross compliance purposes, you do not need to do anything more than you are already required to do by law for the identification and traceability of sheep and goats. The key elements of the sheep tracing system, that apply specifically for cross compliance purposes, are listed below. These elements do not cover all the legal requirements. For a full explanation of your legal obligations, you should refer to the relevant legal provisions. Further information on the sheep keeper requirements can be found on Scottish Government web pages.

Requirement 1 – Identification of sheep and goats

You must,

- Identify all sheep and goats, born after 7th July 2005, with the correct means of identification within 6 months of birth for intensively farmed animals and 9 months for extensively farmed animals, or before they move off the holding of birth, whichever is sooner.
- Identify animals that are under 12 months of age and are intended for slaughter in the UK before 12 months of age with a single electronic tag showing only the flock mark of the animal. You may choose to use two matching identifiers, with individual numbers, for these animals.
- Identify all other animals born on or after 31st Dec 2009 with two matching means of identification. One means of identification must be electronic. One means of identification must be an ear tag. The second means of identification can be a matching ear tag, pastern tag, bolus or tattoo.

	Description of breach	Extent	Severity The highest severity that applies is used. This is dictated by either the number of animals or percentage of animals sampled	Permanence
1	Animals have been incorrectly tagged before leaving a holding or reaching the appropriate age	<p>On-farm Where animals incorrectly tagged are still on the holding</p> <p>Off-farm Where there is evidence animals incorrectly tagged have moved off the holding</p>	<p>Incorrectly tagged</p> <p>Very Low Up to and including 10 animals or up to and including 20% of the animals sampled have been incorrectly tagged</p> <p>Low Greater than 10 animals or over 20% up to and including 60% of the animals sampled have been incorrectly tagged</p> <p>Medium Over 60% up to and including 80% of the animals sampled have been incorrectly tagged</p> <p>High Over 80% of the animals sampled have been incorrectly tagged</p>	Rectifiable

	Description of breach	Extent	Severity The highest severity that applies is used. This is dictated by either the number of animals or percentage of animals sampled	Permanence
2	Animals have not been tagged before leaving a holding or reaching the appropriate age	<p>On-farm Where animals not tagged are still on the holding</p> <p>Off-farm Where there is evidence animals not tagged have moved off the holding</p>	<p>Never been tagged</p> <p>Very Low Up to and including 5 animals or up to and including 10% of the animals sampled have never been tagged</p> <p>Low Greater than 5 animals or over 10% up to and including 40% of the animals sampled have never been tagged</p> <p>Medium Over 40% up to and including 60% of the animals sampled have never been tagged</p> <p>High Over 60% of the animals sampled have never been tagged</p>	Rectifiable

Requirement 2 – Replacement of Identification

You must,

- Replace any lost or illegible means of identification within 28 days of discovery or before the animal leaves the holding, if this is sooner.
- You must record, within 48 hours, the date of replacement and the replacement number with cross reference to the previous mark, if known.

You must not,

- Remove or replace official ear tags without permission from the Scottish Government, unless for the purpose of preventing unnecessary pain or suffering to an animal.

	Description of breach	Extent	Severity (The highest severity that applies is used. This is dictated by either the number of animals or percentage of animals sampled)	Permanence
3	Animals that had lost one official identifier were discovered at inspection.	On-farm	<p>Apply as a result of findings at physical inspection</p> <p>Very Low Up to and including 11 animals or up to and including 20% of animals sampled had lost one official identifier</p> <p>Low Greater than 11 animals or over 20% up to and including 60% of animals sampled had lost one official identifier</p> <p>Medium Over 60% of the animals sampled had lost one official identifier</p>	Rectifiable
4	Animals that had lost both official identifiers were discovered at inspection.	On-farm	<p>Apply as a result of findings at physical inspection</p> <p>Very Low Up to and including 7 animals or up to and including 10% of animals sampled have lost both official identifiers</p> <p>Low Greater than 7 animals or over 10% up to and including 40% of animals sampled have lost both official identifiers</p> <p>Medium Over 40% of the animals sampled have lost both official identifiers</p>	Rectifiable

	Description of breach	Extent	Severity (The highest severity that applies is used. This is dictated by either the number of animals or percentage of animals sampled)	Permanence
5A	The record of replacement identification has not been maintained	On-farm	Apply as a result of findings at physical inspection Very Low Animals with replacement identification fitted, but details have not been entered in the record of replacement identification.	Rectifiable
			Apply as a result of findings at the record check Low There were no entries in the record of replacement identification for the previous 3 calendar years.	
5B	The keeper has not replaced lost or illegible identification following inspection	On-farm where the animals are still on the holding Off-farm where there is evidence the animals have moved off the holding	Medium Keeper has failed to comply with a request issued at inspection, requiring that they order and fit tags within 28 days.	Rectifiable
6	Ear tags have been removed or replaced without the permission of the Scottish Government.	On-farm where the animals are still on the holding Off-farm where there is evidence the animals have moved off the holding	High Where any animal is found to have had official ear tags removed or replaced, without permission.	Rectifiable

Requirement 3 – Record Keeping

You must:-

Keep up-to-date records, for every holding (CPH) that you use, make your records available to SGRPID or local authority on request and available for a minimum of three years from the last day an animal referred to in the register dies or leaves the holding. Records must contain at least the following details,

- the CPH of the holding;
- the holding address;
- the type of production (e.g. meat, wool, pet)
- the name and address of the keeper.

The following details of the movement of sheep and goats off your holding must be recorded within 48 hours of the event taking place,

- the date of the movement;
- the number of animals moved;
- the destination of the animals;
- the haulier's name and vehicle registration;
- the individual numbers of animals born or identified on or after 31st Dec 2009;
- the flock marks and the number of animals with each flock mark for slaughter animals.

The following details of the movement of sheep and goats on to your holding must be recorded within 48 hours of the event taking place,

- the date of the movement;
- the number of animals moved;
- the origin of the animals;
- the individual numbers of animals born or identified on or after 31st Dec 2009;
- the flock marks and the number of animals with each flock mark for slaughter animals

The following details for each animal born or first identified on or after 31st Dec 2009 must be recorded within 48 hours of the event taking place,

- the identification code of the animal;
- the year of birth;
- the date of identification;
- the breed and genotype if known;
- the month and year of death.

The annual inventory, as at 1st December each year, must record the number of sheep/goats present on each permanent holding (unless the land is within the same crofting township and/or used on a seasonal basis and is less than 5 miles from the main holding) This must be recorded by 30th December.

	Description of breach	Extent	Severity The highest severity that applies is used. This is dictated by either the number of animals or percentage of animals sampled	Permanence
7	Failure to keep records or failure to provide the records for inspection.	On-farm	High No verifiable records	Rectifiable
8A	General information missing in holding register (Any or all of the following requirements are missing: ID of holding; address and geographical co-ordinates (CPH); production type)	On-farm	Very low - Holding register has missing general information	Rectifiable
8B	Failure to record complete movement details	On-farm	<p><u>Movement records</u></p> <p>Very low Up to and including 10 movement records do not have all the required information</p> <p>Low 11 or more movement records do not have all the required information</p> <hr/> <p><u>No record</u></p> <p>Low Up to and including 5 movements have not been recorded</p> <p>Medium 6 or more movements have not been recorded</p>	Rectifiable
9	Failure to record death details of an animal born or identified after 31/12/2009	On-farm	Very Low The record of deaths is incomplete / No record of deaths has been kept	Rectifiable
10	Annual inventory as at 1 st December not recorded by 30 th December	On-farm	Very Low The annual inventory has not been recorded	Rectifiable

	Description of breach	Extent	Severity	Permanence
11	The number of animals counted on the holding indicates the records are not accurate, taking account of specific farming systems.	On-farm	<p>The difference between the number of animals expected from the records and counted at inspection is</p> <p>Very low - Up to and including 10%</p> <p>Low Over 10% up to and including 40%</p> <p>Medium Over 40% up to and including 60%</p> <p>High Over 60%</p>	Rectifiable
12	Official identities of home bred animals found at the physical inspection, are not in the records indicating the record of identification or the record of replacement identification have not been maintained.	On-farm	<p>Apply as a result of findings at physical inspection</p> <p>Very Low Up to and including 10% of the animals whose identities are checked are not present in the records</p> <p>Low Over 10% of the animals whose identities are checked are not present in the records</p>	Rectifiable
13	A record of identification has not been maintained	On-farm	<p>Apply as a result of the findings during the record check</p> <p>Very Low Failure to maintain an identification record for one or two of the previous 3 calendar years</p> <p>Low A record of identification has not been kept for each of the previous 3 calendar years</p>	Rectifiable

SMR 9: Prevention and control of Transmissible Spongiform Encephalopathies (TSEs)

The aim of these requirements is to minimise the risk posed to human and animal health by certain transmissible spongiform encephalopathies (TSEs). They apply to you if you keep farmed animals

A1	You must notify the duty veterinary officer of your local Animal and Plant Health Agency office immediately if you know or suspect that an animal or carcass in your possession, or under your charge, is infected with a transmissible spongiform encephalopathy (TSE)			
	Description of breach	Extent	Severity	Permanence
	The farmer has not notified the APHA of an animal or carcass in his/her possession, or under his/her charge known or suspected of being infected by a TSE.	On-farm Off-farm In cases where an animal suspected of being infected have moved off farm	High	Rectifiable If the animal/carcass can be traced and eliminated Permanent

A2	You must fully comply with any movement restrictions imposed			
	Description of breach	Extent	Severity	Permanence
	The farmer has failed to comply with movement restrictions imposed	On-farm Off-farm In cases where an animals suspected of being infected have moved off farm	High	Rectifiable If the animal/product can be traced and eliminated Permanent

A3	You must fully comply with any order to slaughter and destroy any animal			
	Description of breach	Extent	Severity	Permanence
	The farmer has failed to comply with the order to slaughter and destroy any animal	On-farm Off-farm In cases where an animals suspected of being infected have moved off farm	High	Rectifiable If the animal/product can be traced and eliminated Permanent

A4	You must fully comply with any other notices served by an inspector			
	Description of breach	Extent	Severity	Permanence
	The farmer has failed to comply with other notices served by an inspector	On-farm Off-farm effect In cases where an animals suspected of being infected have moved off farm	High	Rectifiable If the animal/product can be traced and eliminated Permanent

A5	You must comply with the inquiry carried out by an inspector to identify all animals at risk			
	Description of breach	Extent	Severity	Permanence
	The farmer has failed to comply with the inquiry carried out by the inspector to identify all animals at risk.	On-farm Off-farm In cases where an animals suspected of being infected have moved off farm	High	Rectifiable If the animal/product can be traced and eliminated Permanent

B1	You must not feed animal protein, or any feeding stuff that contains animal protein, to ruminants, with the exception of the following (subject to required sourcing and processing, e.g. it cannot be catering waste): <ul style="list-style-type: none"> • milk, milk-based products and colostrum's • eggs and egg products • gelatine from non-ruminants • hydrolysed proteins derived from non-ruminants or from ruminant hides and skins • liquid milk replacers for unweaned ruminants containing fishmeal, if registered to do so. 			
	Description of breach	Extent	Severity	Permanence
	There is evidence that the farmer is feeding animal protein or products containing animal protein to ruminants	On-farm Off-farm In cases where animals have moved off since being fed protein	High	Permanent

B2	You must not feed products containing prohibited proteins to any farmed animals, or mix prohibited proteins with feed stuffs			
	Description of breach	Extent	Severity	Permanence
	<p>There is evidence that the farmer is feeding prohibited proteins to farmed animals, or mixing prohibited proteins with animal feeding stuffs</p> <p><i>'Prohibited proteins' are gelatine from ruminants and processed animal protein (such as mammalian meat and bone meal, poultry meal, feather meal)</i></p>	<p>On-farm</p> <p>Off-farm In cases where animals have moved off since being fed protein</p>	High	Permanent

B3	You must not use restricted proteins to produce feed for non-ruminants unless you have received authorisation from the competent authority			
	Description of breach	Extent	Severity	Permanence
	<p>The farmer is producing feed for non-ruminants which contains restricted proteins and does not have authorisation from the competent authority to do so.</p> <p><i>Requirement applies to all farms producing feed using restricted proteins</i></p> <p><i>'Restricted proteins' are animal proteins restricted to non-ruminant feed production: fishmeal; blood products; bloodmeal (for feeding to farmed fish); dicalcium phosphate and tricalcium phosphate of animal origin.</i></p>	<p>On-farm</p> <p>Off-farm</p>	<p>Low If ruminants not kept</p> <p>Medium If ruminants present</p>	<p>Rectifiable</p> <p>Permanent</p>

B4	You must not use feed products containing restricted proteins on a farm where there are ruminants present unless you have received registration from the competent authority			
	Description of breach	Extent	Severity	Permanence
	<p>The farmer does not have registration/permission to store or use feed containing restricted proteins where required</p> <p>Note: Requirement applies to farms where ruminants are present</p>	On-farm	<p>Low If there is no evidence that ruminants have been exposed to feed containing restricted proteins</p> <p>Medium If there is evidence that ruminants have been exposed to feed containing restricted proteins</p>	<p>Rectifiable</p> <p>Permanent</p>

B5	You must not export from the UK any bovine animal born or reared in the United Kingdom before 1 August 1996			
	Description of breach	Extent	Severity	Permanence
	The farmer has exported a bovine animal born or reared in the United Kingdom before 1 August 1996.	<p>On-farm</p> <p>Off-farm If animal/product moved off</p>	High	Permanent

B6	You must not place on the market or export any products consisting of or incorporating any material (other than milk) derived from a bovine animal born or reared in the United Kingdom before 1 August 1996.			
	Description of breach	Extent	Severity	Permanence
	The farmer has placed on the market or exported products consisting of or incorporating material (other than milk or hides tanned according to official protocol) derived from a bovine animal born or reared in the United Kingdom before 1 August 1996.	<p>On-farm</p> <p>Off-farm If animal/product moved off</p>	High	<p>Rectifiable If the animal/product can be traced and eliminated</p> <p>Permanent</p>

B7	You must not place on the market or export first generation offspring, the semen, ova or embryos of cattle, sheep or goats (of any age) without fully complying with the documentation requirements and restrictions applying to the sale or export of such products.			
	Description of breach	Extent	Severity	Permanence
B7	The farmer has placed on the market or exported the offspring of a TSE (e.g BSE in Cattle or Scrapie in sheep)	On-farm Off-farm If animal/product moved off	High	Permanent
B7	The farmer has placed on the market/exported semen/embryo/ova without the correct certificate.	On-farm Off-farm If animal/product moved off	High	Permanent Rectifiable If animal/product can be traced and eliminated.

B8	You must not move any cattle born or reared in the UK before 1 August 1996 from their registered premises unless you have obtained a movement licence from the Animal and Plant Health Agency Specialist Service Centre in Worcester.			
	Description of breach	Extent	Severity	Permanence
	"The farmer has moved cattle which were born or reared in the UK before 1 August 1996 from their registered premises without obtaining a movement licence from the Animal and Plant Health Agency Specialist Service Centre in Worcester.	On farm Off farm	High	Permanent Rectifiable If the animal can be traced and eliminated

SMR 10: Restrictions on the use of plant protection products

The aim of these requirements is to ensure that plant protection products (PPPs) are used correctly and to minimise their risk to humans, animals and the environment (they apply to you if you use these products on your land)

A1	You must use authorised or permitted plant protection products in accordance with any requirements or condition which is: <ul style="list-style-type: none"> specified in the authorisation, permit or in any extension of use or on the label of the product as required by the authorisation, permit or extension of use. 			
	Description of breach	Extent	Severity	Permanence
A1	The farmer has used an authorised or permitted plant protection product but has not complied with the conditions of authorisation, permit or in any extension of use, e.g. <ul style="list-style-type: none"> Products not authorised or permitted for use on the crop, land or situation; Products not authorised for method of application; Max. dose/concentration exceeded; Max. number of applications exceeded; Application dates/harvest intervals not observed. 	On-farm Off-farm e.g. there is environmental contamination and/or damage to human health as a result of the non-compliance	Very low for technical breaches e.g. <ul style="list-style-type: none"> product not authorised for the crop but the same active ingredient is included in another product which is approved for the crop. over application $\leq 10\%$ 	Rectifiable for technical breaches Permanent
A1	The farmer has used an authorised or permitted plant protection product but has not complied with other label conditions e.g. <ul style="list-style-type: none"> Safe storage (keep out of reach of children, in original containers, protected from frost and stored to prevent environmental contamination) Safe disposal (empty containers disposed of safely and containers not reused) Operator safety (Personal Protective Equipment (PPE) available for use when handling concentrate) General warnings (e.g. extreme care should be taken to avoid spray drift) 		Low / Medium (depending on circumstances) e.g. <ul style="list-style-type: none"> over applications $> 10\%$ spray drift affecting other land High where the breach may have consequences for human health or the environment	

B1	You must not use any plant protection product unless it is authorised or has a valid parallel trade permit.			
	Description of breach	Extent	Severity	Permanence
	The farmer has used an unauthorised product and/or a product for which a permit is required (e.g. a product whose authorisation has lapsed, been revoked; an imported product that does not have a permit for use in this country or 'own-use' parallel imports where an equivalent UK label in English is not available).	<p>On-farm</p> <p>Off-farm where environmental contamination or residues in foodstuffs arise from illegal use</p> <p>The impact of the use of an illegal product will vary dependent on the product but may pose a risk to human health and or the environment.</p>	<p>Medium e.g. where the product expiry date is within the current calendar year</p> <p>High</p>	Permanent

SMR 11: Welfare of Calves

The aim of these requirements is to protect the welfare of calves by setting minimum standards for their care and husbandry. If you keep calves, they apply to you in addition to the requirements for the welfare of all farmed animals (SMR 13)

Note: Where breaches are referred to as “rectifiable or permanent” this is dependent on the individual circumstances of the breach for the animal(s) concerned. If welfare for individual animals can be improved then this should be regarded as rectifiable where the animal’s pain and distress caused cannot be reduced e.g. injury is permanent or animal has to be euthanised then this must be regarded as permanent

A1	You must inspect all housed calves at least twice a day, and those kept outside at least once a day			
	Description of breach	Extent	Severity	Permanence
	Housed calves have not been inspected twice each day	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent
	Calves kept outside have not been inspected once each day	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A2	You must ensure that each of your calves can stand up, turn around, lie down, rest and groom itself without difficulty			
	Description of breach	Extent	Severity	Permanence
	Calf unable to stand up, turn around, lie down, rest and/or groom itself without hindrance/ difficulty	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

B1	You must not tether your calves			
	Description of breach	Extent	Severity	Permanence
B1	Calf tethered for reasons other than feeding group housed calves milk/ milk substitute	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent
	Calf tethered for longer than one hour at each feed	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent
B1	Tether prevents calf from lying down, resting, standing up and grooming itself without hindrance	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent
	Tether has caused pain or injury to calf	On-farm	High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

B2	You must not muzzle your calves			
	Description of breach	Extent	Severity	Permanence
	Calves are muzzled or evidence that calves have been muzzled	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

B3	You must not keep a calf in an individual stall or pen after the age of 8 weeks (unless it needs to be isolated to receive treatment)			
	Description of breach	Extent	Severity	Permanence
	Calves over 8 weeks old penned singly, without appropriate veterinary advice	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A3	You must ensure that individual stalls or pens satisfy the minimum width and length requirements and that they have perforated walls which allow the calves to have direct visual and physical contact with each other			
	Description of breach	Extent	Severity	Permanence
A3	Pen size too small in either length or width	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent
A3	No perforated walls for individual pens so calves have no direct and/or visual contact with other calves	On-farm	Medium <i>It is unlikely that a breach of this requirement would result in UPUD, hence no "High" rated severity</i>	Rectifiable

A4	You must ensure that each calf, when kept in a group, has its minimum allowance of unobstructed floor space			
	Description of breach	Extent	Severity	Permanence
	Unobstructed floor space too small for the weight of the calves	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A5	You must provide flooring, for those calves kept in buildings, that is - smooth but not slippery; designed so there is no injury or suffering to the calves standing or lying on it; suitable for the size and weight of the calves; rigid, even and stable			
	Description of breach	Extent	Severity	Permanence
	Flooring is found to be any one or more of <ul style="list-style-type: none"> • not smooth • slippery • not designed to prevent injury or suffering to calves when standing or lying on it • unsuitable for size & weight of calves • uneven/ unstable • wholly slatted 	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A6	You must keep all housed calves on – or at all times give them access to – a lying area that is clean, comfortable, well-drained and has dry bedding			
	Description of breach	Extent	Severity	Permanence
	Calf does not have access to a lying area which is clean, comfortable and/or well-drained and does not adversely affects it	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A7	You must give all calves appropriate bedding			
	Description of breach	Extent	Severity	Permanence
	Insufficient or no bedding for all calves	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A8	You must for calves kept in an artificially lit building, provide artificial lighting for a period that is at least equal to the period of natural light normally available between 9am and 5pm			
	Description of breach	Extent	Severity	Permanence
	Inspector observation and/or farmer admission that artificial light provided between 9am and 5 pm for housed animals is not equivalent to natural light during this time	On-farm	Medium	Rectifiable

A9	You must clean and disinfect housing and equipment used for your calves; remove dung, urine and left-over food as often as necessary to reduce smells and avoid attracting flies or rodents			
	Description of breach	Extent	Severity	Permanence
A9	Evidence that cleaning and disinfection procedures are inadequate	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent
A9	Evidence that faeces, urine and uneaten or spilt food has not been removed frequently enough to avoid attracting flies or rodents	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A10	You must feed all weaned calves at least twice a day			
	Description of breach	Extent	Severity	Permanence
	Calves are fed less than twice per day (if not fed ad libitum)	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A11	You must ensure that when feeding group-housed calves each calf either: has access to feed at the same time as the others in the feeding group; has continuous access to feed; is fed by an automatic feeding system			
	Description of breach	Extent	Severity	Permanence
	For feeding systems that are not adlib, or where animals are not fed by an automatic feeding system feeding individually, calves are not able to access the feed at the same time as others in the feeding group	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A12	You must give all your calves fresh drinking water at all times in hot weather conditions or when they are ill			
	Description of breach	Extent	Severity	Permanence
	Sick calves do not have continuous access to water <i>This requirement is additional to the general requirement to provide animals with water in SMR 13</i>	On-farm	High	Rectifiable Permanent
	In hot weather calves do not have continuous access to water <i>This requirement is additional to the general requirement to provide animals with water in SMR 13</i>	On-farm	High	Rectifiable Permanent

A13	You must give all calves food that contains enough iron			
	Description of breach	Extent	Severity	Permanence
	Clinical anaemia in calves, associated with blood haemoglobin level < 4.5 mmol/l	On-farm	High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A14	You must provide the specified minimum daily ration of fibrous food for each calf over 2 weeks old			
	Description of breach	Extent	Severity	Permanence
	Evidence of no or insufficient fibrous food provision (less than 50g per day per calf at 8 weeks to less than 250g per day per calf at 20 weeks)	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent
	Diet present during inspection not suitable for calves	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A15	You must ensure that each calf receives bovine colostrum as soon as possible after it is born and within the first six hours of life			
	Description of breach	Extent	Severity	Permanence
	Stock keeper does not ensure that calves receive bovine colostrum within 6 hours of birth	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

SMR 12: Welfare of Pigs

The aim of these requirements is to protect the welfare of pigs by setting minimum standards for their care and husbandry. If you keep pigs, they apply to you in addition to the requirements for the welfare of all farmed animals (SMR 13).

ALL PIGS

A1	You must ensure that each of your pigs is free to turn around without difficulty at all times, including while tethered (where this is allowed)			
	Description of breach	Extent	Severity	Permanence
	Not all pigs can turn around without difficulty at all times <i>If this breach is observed it is likely to be because of inadequate tethering arrangements or accommodation – these breaches are detailed below</i>	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

B1	You must not tether pigs at any time			
	Description of breach	Extent	Severity	Permanence
	Pig tethered unnecessarily (i.e. not tethered for imminent or recent examination, treatment, operation) <i>The farmer will not be in breach of this requirement if it is for veterinary purposes. In this case any tether must be regularly inspected and adjusted to ensure that it does not cause pain or injury to the pig and allows it to lie down, rest, stand up and groom itself.</i>	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent
	Tether prevents pig from lying down, resting, standing up and grooming itself without hindrance	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent
	Tether has caused pain or injury to pig	On-farm	High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A2	<p>You must ensure that the accommodation for your pigs allows them to:</p> <ul style="list-style-type: none"> stand up, lie down and rest without difficulty have a clean, comfortable and adequately drained place in which to rest (including making sure that any bedding is clean, dry and not harmful to the pigs) see other pigs (unless the pig is isolated for veterinary reasons or for farrowing) have enough space to allow all of them to lie down at the same time maintain a comfortable temperature, including the requirement that you <u>must not</u> keep pigs in the high temperature/high humidity environment known as the 'sweat box system' (B2) 			
	<p>B2 You must not keep pigs in high temperature/high humidity environment known as the 'sweat-box system' – to classify this type of breach please see point A2</p>			
	Description of breach	Extent	Severity	Permanence
A2	Pig(s) unable to stand up and/or lie down and/or rest without difficulty	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent
A2	Pig(s) do not have a clean, and/or physically comfortable and/or adequately drained lying area to rest	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent
A2	Pig(s) are unable to see other pigs (unless the pig is isolated for farrowing or for veterinary reasons)	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent
A2	Pig(s) cannot maintain a comfortable temperature; includes the use of accommodation defined as the sweat box system	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent
A2	Insufficient space for all pigs to lie down at the same time	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A3	You must ensure that individual stalls or pens satisfy the minimum size requirements (these do not apply in certain excepted situations)			
	Description of breach	Extent	Severity	Permanence
	<p>Internal area of stall/ pen is less than the square of the length of the pig; any internal side is less than 75% of the length of the pig</p> <p><i>The length of a pig is measured from the tip of its snout to the base of its tail while it is standing with its back straight</i></p> <p><i>Important: the following circumstances are permitted exceptions and are NOT classed as a breach of requirements for the size of an individual pen:</i></p> <ul style="list-style-type: none"> • <i>Those used for holding a female pig for the period between seven days before the predicted day of her farrowing and the day on which her piglets are weaned (including any piglets fostered by her)</i> • <i>When keeping a pig in a stall or pen for veterinary purposes.</i> • <i>When keeping a pig in a stall or pen for the purposes of servicing, artificial insemination or collecting semen.</i> • <i>When keeping a pig in a stall or pen while it is fed.</i> • <i>When keeping a pig in a stall or pen for the purposes of marking, washing or weighing it.</i> • <i>When keeping a pig in a stall or pen while its accommodation is being cleaned.</i> • <i>When keeping a pig in a stall or pen while it is waiting to be loaded for transportation. However, the period the pig is kept in this accommodation must not be longer than needed for that purpose.</i> <p><i>The requirements for a minimum size of stall or pen also do not apply if it is referring to a stall or pen that the pig can enter or leave when it wants. In this case the stall must be entered from another stall or pen where the pig is normally kept and which does comply by the minimum standards</i></p>	On-farm	<p>Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)</p>	Rectifiable
			<p>High where there is unnecessary pain, injury, suffering or distress to animal(s)</p>	<p>Rectifiable</p> <p>Permanent</p>

A4	You must provide flooring, for those pigs kept in buildings, that is: smooth but not slippery suitable for the size and weight of the pigs rigid, even and stable, if there is no litter designed so there is no injury or suffering to the pigs standing or lying on it			
	Description of breach	Extent	Severity	Permanence
	Flooring is found to be one or more of: - not smooth - slippery - not suitable for size and weight of pigs - uneven/ unstable (when no litter has been provided) - not designed, constructed or maintained to prevent injury or suffering to pigs when standing or lying on it.	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A5	You must provide flooring of the correct measurements (for openings and slats) if you use concrete slatted floors. This applies for pigs kept in groups and if your holding has been newly built, rebuilt or brought into use for the first time after 1 January 2003. It will apply to all holdings from 1 January 2013			
	Description of breach	Extent	Severity	Permanence
	Openings are too wide between slats for category of pig <i>This flooring requirement applies only if the holding was newly built, rebuilt or brought into use for the first time after 1 January 2003. (It shall apply to all holdings from 1 January 2013)</i>	On-farm	Medium -evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent
	Slat width too small for category of pig <i>This flooring requirement applies only if the holding was newly built, rebuilt or brought into use for the first time after 1 January 2003. (It shall apply to all holdings from 1 January 2013)</i>	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A6	You must provide artificial lighting of at least 40 lux for at least 8 hours each day, for pigs kept in an artificially lit building			
	Description of breach	Extent	Severity	Permanence
	<p>Pigs exposed to light of less than 40 lux in buildings where pigs are dependent on artificial lighting</p> <p>Pigs exposed to less than 8 hours of light in buildings where pigs are dependent on artificial lighting</p>	On-farm	Medium <i>There are general lighting requirements under SMR 13 (requirements A 12 and B3); any breach of lighting requirements resulting in UPUD are described under SMR 13</i>	Rectifiable

B3	You must not expose your pigs to constant or sudden noise, or levels above 85 decibels in any building where you keep your pigs			
	Description of breach	Extent	Severity	Permanence
	Exposure of pigs to continuous levels of 85 decibels and above	On-farm	Medium <i>It is unlikely that a breach of this requirement would result in UPUD, hence no "High" rated severity</i>	Rectifiable
	Exposure of pigs to continuous or sudden loud noises that could be reasonably avoided or minimised	On-farm	Medium <i>It is unlikely that a breach of this requirement would result in UPUD, hence no "high" rated severity</i>	Rectifiable

A7	You must give permanent access to enough manipulable material which allows proper investigation and manipulation, for example, straw, hay, wood, sawdust, mushroom compost, peat or a mixture of such, which does not upset the health of your animals			
	Description of breach	Extent	Severity	Permanence
	No or insufficient manipulable material available to enable proper investigation and manipulation activities	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent
	Material provided which compromises pig health	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A8	You must take measures to prevent fighting which goes beyond normal behaviour, if you keep your pigs together, keeping separate those pigs which show persistent aggression or are victims of that aggression			
	Description of breach	Extent	Severity	Permanence
	Inadequate measures are taken to minimise aggression in groups of pigs	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
	Persistent aggressors, or their victims, are not isolated from the rest of the group		High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A9	You must ensure that when feeding group-housed pigs each pig either: has access to feed at the same time as the others in the feeding group; has continuous access to feed; is fed by an automatic feeding system			
	Description of breach	Extent	Severity	Permanence
	For feeding systems that are not adlib, or where animals are not fed by an automatic feeding system feeding individually, pigs are not able to access the feed at the same time as others in the feeding group <i>There are specific requirements for sows and gilts detailed later</i>	On-farm	Medium <i>It is unlikely that a breach of this requirement would result in UPUD, hence no "High" rated severity</i>	Rectifiable

A10	You must give all pigs over 2 weeks old permanent access to a sufficient supply of fresh drinking water			
	Description of breach	Extent	Severity	Permanence
	Pigs over 2 weeks old have not been given permanent access to an adequate supply of fresh water <i>This requirement is additional to the general requirement to provide animals with water in SMR 13</i>	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

PIGLETS

A1	You must provide piglets with a source of heat and a dry and comfortable lying area away from the sow where all of them can rest at the same time			
	Description of breach	Extent	Severity	Permanence
	Piglets have not been provided with a source of heat and a dry and comfortable lying area away from the sow where all of them can rest at the same time (where it is considered necessary in order to meet all accommodation requirements)	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A2	You must ensure that a part of the total floor where you keep the piglets is large enough to allow the animals to rest together at the same time and is solid, covered with a mat or littered with straw or any other suitable material			
	Description of breach	Extent	Severity	Permanence
	No or insufficient area for the piglets, which is solid or covered with a mat or littered with straw or other suitable material that allows all piglets to lie together at the same time	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A3	You must give the piglets enough space to be able to be suckled without difficulty if you use a farrowing crat			
	Description of breach	Extent	Severity	Permanence
	Piglets do not have sufficient space to suckle without difficulty	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

B1	You must not wean piglets from the sow at an age of less than 28 days (unless there is a risk of adverse welfare or health of the dam or piglets). You will not be in breach of the requirement relating to the weaning of piglets if they are weaned up to 7 days earlier, provided that you move them into specialised housing which you empty and thoroughly clean and disinfect before you introduce a new group and which is separate from housing where you keep sows			
	Description of breach	Extent	Severity	Permanence
	Piglets are weaned earlier than 28 days, where there is no reasonable justification based on sow and/or piglet health or welfare grounds AND where there is not appropriate specialised housing for early weaning of pigs	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent
	Specialised accommodation is available for early weaned piglets but the housings are not emptied and thoroughly cleansed and disinfected before introduction of a new group and/or the accommodation is not separated from housing where sows are kept	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

SOWS and GILTS

A2	You must treat pregnant gilts and sows against internal and external parasites, if necessary			
	Description of breach	Extent	Severity	Permanence
	Sows and/ or gilts have not, where necessary, been treated against external and internal parasites (unacceptable parasite burden)	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A3	You must thoroughly clean pregnant sows and gilts before they are placed in farrowing crates			
	Description of breach	Extent	Severity	Permanence
	Evidence and/or farmer admission that sows and/or gilts are not cleaned prior to placement in farrowing crates	On-farm	Medium	Rectifiable

A4	You must give sows and gilts enough suitable nesting material in the week before the expected farrowing time (unless it is not technically practical because of the slurry system you use)			
	Description of breach	Extent	Severity	Permanence
	Lack of sufficient quantity of suitable nesting material provided for sows and/or gilts one week prior to farrowing, where it is reasonably possible to provide such material	On-farm	Medium	Rectifiable

A5	You must keep sows and gilts in groups (except during the period between 7 days before the predicted day of farrowing and the day on which the weaning of piglets is complete). <i>You will not be in breach of the requirement relating to keeping sows and gilts in groups if they are kept on holdings of fewer than 10 sows provided that the individual accommodation keeps to the general requirements for pig accommodation</i>			
	Description of breach	Extent	Severity	Permanence
	Sows and gilts housed singly other than during the period 1 week prior to farrowing up to 4 weeks following service <i>On holdings of fewer than 10 sows, sows and gilts may be kept individually as long as their accommodation keeps to the general requirements for pig accommodation</i>	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A1	You must ensure that each female pig after service, when kept in groups, has its minimum allowance of unobstructed floor space, continuous solid floor and pens of correct dimensions. <i>This applies if your holding has been newly built, rebuilt or brought into use for the first time after 1 January 2003. It will apply to all holdings from 1 January 2013</i>			
	Description of breach	Extent	Severity	Permanence
	Insufficient unobstructed floor space for the gilts and/or sows assessed <i>This requirement applies only if the holding was newly built, rebuilt or brought into use for the first time after 1 January 2003. (It shall apply to all holdings from 1 January 2013)</i>	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent
	Insufficient continuous solid floor area for the gilts and/or sows assessed <i>This requirement applies only if the holding was newly built, rebuilt or brought into use for the first time after 1 January 2003. (It shall apply to all holdings from 1 January 2013)</i>	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent
	Pen length < than 2.8m (or <2.4m where there are less than 6 pigs) <i>This requirement applies only if the holding was newly built, rebuilt or brought into use for the first time after 1 January 2003. (It shall apply to all holdings from 1 January 2013)</i>	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A6	You must provide an unobstructed area behind the sow or gilt during farrowing			
	Description of breach	Extent	Severity	Permanence
	No unobstructed area available behind sow(s) or gilt(s) for the ease of natural or assisted farrowing	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A7	You must provide some method of protecting the piglets, such as farrowing rails, if you keep sows loose in farrowing pens			
	Description of breach	Extent	Severity	Permanence
	When sows are kept loose in farrowing pens there is no method of protecting the piglets (e.g. farrowing rails)	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A8	You must feed sows and gilts using a system that ensures each pig can get enough food even when other pigs are competing for food			
	Description of breach	Extent	Severity	Permanence
	Sows and gilts kept in groups are not fed using a system which ensures each individual can obtain sufficient food in the presence of competitors	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A9	You must give all dry pregnant sows and gilts enough bulky or high-fibre food, as well as high-energy food, to satisfy their hunger and need to chew			
	Description of breach	Extent	Severity	Permanence
	Dry pregnant sows or gilts are not provided with a sufficient quantity of bulky or high fibre food	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

BOARS

A1	You must place and build boar pens to allow the boars to turn round and to hear, see and smell other pigs			
	Description of breach	Extent	Severity	Permanence
	Boar unable to turn around in pen	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
	Boar unable to hear and/or see and/or smell other pigs		High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent
A2	You must provide clean resting areas in the boar pens and ensure that the lying area is dry and comfortable			
	Description of breach	Extent	Severity	Permanence
	Boar pen does not contain clean resting areas and the lying area is not dry and comfortable.	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A3	You must ensure that each boar has its minimum allowance of unobstructed floor space			
	Description of breach	Extent	Severity	Permanence
A3	Pen, which is not used for natural service, is less than 6 m ²	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent
A3	Pen, which is also used for natural service, is less than 10 m ²	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent
	Pen, which is also used for natural service, contains obstacles	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A1	You must ensure that each weaner or rearing pig, when kept in groups, has its minimum allowance of unobstructed floor space			
	Description of breach	Extent	Severity	Permanence
	Insufficient floor area for the weaners or rearers assessed by inspector	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A2	You must place pigs in groups as soon as possible after weaning and keep these groups stable with as little mixing as possible			
	Description of breach	Extent	Severity	Permanence
	Pigs mixed at inappropriate age or time which does not prevent fighting that goes beyond normal behaviour	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A3	You must provide opportunities for the animals to escape and hide from unfamiliar pigs if mixing is necessary. This must also be done at as young an age as possible, preferably before, or up to 1 week after, weaning			
	Description of breach	Extent	Severity	Permanence
	When pigs are mixed adequate opportunities are not provided for pigs to escape and hide from other pigs	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

WEANERS and REARING PIGS

B1	You must not use tranquilising medication to help with mixing, unless there are exceptional circumstances and is on the advice of a vet			
	Description of breach	Extent	Severity	Permanence
	Tranquillising medication has been used to facilitate mixing where there are no exceptional conditions and without - or contrary to - consultation with veterinary surgeon	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

SMR 13: Welfare of Farmed Animals

The aim of these requirements is to protect the welfare of farmed animals by setting minimum standards for their care and husbandry. They apply to you if you keep any species for farming purposes.

The aim of these requirements is to protect the welfare of farmed animals by setting minimum standards for their care and husbandry. They apply to you if you keep any species for farming purposes.

Staffing				
A1	You must ensure that your animals are looked after by enough staff who have the correct skills and knowledge			
	Description of breach	Extent	Severity	Permanence
	Number of staff available insufficient to prevent welfare problems occurring	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent
	Evidence that stockperson demonstrates lack of professional competence and/ or ability in livestock care, <i>which is not covered by any other specific criteria listed in the schedule</i> For example: 1) Where any animals (other than poultry) are kept in a building and do not have access at all times to, a lying area which either has well-maintained dry bedding or is well-drained); 2) Where animals are kept in a building where the maintenance of bedding etc. restricts their freedom of movement but US has not been caused. Note: from 2012 these situations will be a breach for cross compliance purposes even without evidence of US. Where US is disclosed in example 2 the breach should be recorded under 7 (freedom of movement)."	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A2	You must inspect your animals thoroughly at least once a day where the husbandry system depends on frequent human attention and in other systems as often as necessary to avoid suffering			
	Description of breach	Extent	Severity	Permanence
	Livestock have not been inspected to the required frequency <i>There are specific requirements relating to calves in SMR 16 (requirement 1)</i>	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A3	You must ensure that you have enough lighting so that you can carry out a thorough inspection at any time			
	Description of breach	Extent	Severity	Permanence
	No or inadequate fixed or portable lighting available to enable thorough inspection of animals	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A4	You must ensure that you care for ill or injured animals immediately, and if they do not respond to this care then seek veterinary advice			
	Description of breach	Extent	Severity	Permanence
	Animal has not been cared for appropriately	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent
	There has been an unacceptable delay in the care of the sick animal (this may relate to the inspector's subjective assessment of how frequently such animals should be inspected)	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent
	Stockperson has failed to seek veterinary advice if inspector believes that any competent stockperson would have done so	On-farm or Off-farm (e.g. appropriate advice relating to disease treatment may extend to other farms)	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A5	You must if necessary, isolate sick or injured animals in suitable accommodation with dry comfortable bedding			
	Description of breach	Extent	Severity	Permanence
	Animal not isolated when, in the inspector's opinion on the day of inspection, the animal required isolation in suitable accommodation with, where appropriate, dry comfortable bedding	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent
	Isolation facilities are not suitable (taking into account sick animals' injury/ illness)	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

Record keeping				
A6	You must make a record of any medicinal treatment given to your animals, and keep these records for at least 3 years from the date of the treatment and make these records available to any authorised person at inspection or when otherwise asked for			
	Description of breach	Extent	Severity	Permanence
	<p>The farmer will be in breach if one or more of the following points relating to medicine records are found:</p> <ul style="list-style-type: none"> no records are kept or are not made available to the inspector at the time of inspection; records kept but are inaccurate or missing information; records have not been kept for the required period of time from the date of treatment. <p><i>Records for medicines are not kept/kept but do not agree with products/veterinary invoices/animals undergoing treatment found on farm at the time of inspection.</i></p> <p><i>NB Where more than one bulleted breach is identified each should be recorded separately on the Control Report Form under the summary of breach findings along with an appropriate justification for each.</i></p>	On-farm	Low	Rectifiable Permanent

A7	You must make a record of the number of deaths found when the animals are inspected, and keep these records for at least 3 years from the date of the relevant inspection and make these records available to any authorised person at inspection or when otherwise asked for			
	Description of breach	Extent	Severity	Permanence
	<p>The farmer will be in breach if one or more of the following points relating to mortality records are found:</p> <ul style="list-style-type: none"> no records are kept or are not made available to the inspector at the time of inspection; records kept but are inaccurate or missing information; records of the number of deaths have not been kept for the required period of time from the date of the relevant inspection. <p><i>Records for mortality are not kept/kept but do not agree with evidence found on farm; e.g. carcasses and/or relevant database information.</i></p> <p><i>NB Where more than one bulleted breach is identified each should be recorded separately on the Control Report Form under the summary of breach findings along with an appropriate justification for each.</i></p>	On-farm	Low	<p>Rectifiable</p> <p>Permanent</p>

B1	You must not restrict your animals' freedom of movement if this causes them unnecessary suffering or injury			
	Description of breach	Extent	Severity	Permanence
	<p>Animal(s) caused unnecessary suffering or injury due to restricted freedom of movement</p> <p>Note: Where animals are kept in a building where the maintenance of bedding etc. restricts their freedom of movement but US has not been caused the breach should be recorded under 1."</p>	On-farm	High (only one breach level as by definition there is UPUD)	<p>Rectifiable</p> <p>Permanent</p>

Freedom of movement				
A8	You must give your animals enough space to avoid unnecessary stress if they are continuously or regularly tethered or confined and also allow them to exhibit their normal behaviour in line with established experience and scientific knowledge			
	Description of breach	Extent	Severity	Permanence
	Animal(s) caused unnecessary suffering or injury by method of tethering or confinement <i>There are specific tethering requirements relating to calves in SMR 11 and pigs in SMR 12</i>	On-farm	High (only one breach level as by definition there is UPUD)	Rectifiable Permanent

Buildings and accommodation				
B2	You must not use materials and/or equipment for accommodation purposes that is harmful to your animals			
	Description of breach	Extent	Severity	Permanence
	Harmful materials have been used in the construction of accommodation, pens and/or equipment	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High- where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

Buildings and accommodation				
A9	You must use materials for animals' accommodation that can be thoroughly cleaned and disinfected			
	Description of breach	Extent	Severity	Permanence
	Material used means that accommodation is not capable of being thoroughly cleaned and disinfected	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A10	You must build and maintain accommodation so that there are no sharp edges or protrusions which could injure your animals			
	Description of breach	Extent	Severity	Permanence
	Sharp edges or protrusions in accommodation or fittings likely to cause injury	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A11	You must keep air circulation, dust levels, temperature, relative air humidity and gas concentrations within limits that will not harm your animals			
	Description of breach	Extent	Severity	Permanence
	Air circulation, dust levels, temperature, relative air humidity or gas concentrations either singly or in combination are harmful to the animals	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A12	You must provide artificial lighting if there is not sufficient natural light in a building			
	Description of breach	Extent	Severity	Permanence
	No supplementary lighting provided when natural light provided is insufficient to meet the physiological and ethological needs of animals	On-farm	Medium	Rectifiable

B3 You must not keep animals in permanent darkness or without an appropriate rest from artificial lighting				
	Description of breach	Extent	Severity	Permanence
	Animals kept in permanent darkness <i>There are specific requirements relating to calves in SMR 11 and pigs in SMR 12</i>	On-farm	High	Rectifiable
	Animals kept without appropriate rest from artificial lighting <i>There are specific requirements relating to calves in SMR 11 and pigs in SMR 12</i>	On-farm	High	Rectifiable

Animals not kept in buildings				
A13 You must give your animals that are not kept in buildings access to a well-drained lying area at all times and, if necessary, protection from adverse weather conditions, predators and risks to their health				
	Description of breach	Extent	Severity	Permanence
A13	Evidence of no well drained lying area for stock that are not kept in buildings	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent
A13	Lack of protection from adverse weather conditions, predators and/or other risks to health	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

Automatic or mechanical equipment				
A14	You must check automated/mechanical equipment that is essential for the health and well-being of your animals at least once a day and put right any faults immediately (or take appropriate steps to protect the health and well-being of your animals until you can get the fault put right)			
	Description of breach	Extent	Severity	Permanence
A14	Automated and/or mechanical equipment essential to animal health and well-being is not inspected at least once a day	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent
A14	Defects are found in automated or mechanical equipment essential for health and well-being and farmer has not taken appropriate action	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A15	You must provide an appropriate back-up to the main system if your animals' health and well-being depends upon artificial ventilation and an alarm to warn you if the ventilation system fails. Inspect and test these at least once every 7 days.			
	Description of breach	Extent	Severity	Permanence
A15	Lack of appropriate back-up system and/ or alarm system	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent
	Lack of evidence and response from stockperson indicates that back-up system and/ or alarm system is not inspected at least every 7 days	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent
A15	Back-up system and/or alarm system is present but fails to operate when inspector requests demonstration at time of inspection (i.e. there are faults in the system(s).	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

Feed, water and other substances				
A16	You must feed your animals a wholesome diet, ensuring that they have access to feed at intervals appropriate to their needs (and, in any case, at least once a day)			
	Description of breach	Extent	Severity	Permanence
	Feed that is available is not wholesome and/or is inappropriate for the age and species of livestock inspected	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent
	Feed has failed to maintain good health and satisfy nutritional needs	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent
	Animals are being fed less frequently than once per day and/or not as appropriate to their physiological needs, and this is not because of veterinary advice <i>There are specific requirements relating to calves in SMR 11</i>	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A17	You must give all animals access to a suitable water supply and enough fresh drinking water or other fluid each day			
	Description of breach	Extent	Severity	Permanence
	Insufficient or no water supply (or other suitable means) such that animals cannot meet their fluid intake needs	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

A18	You must minimise any contamination of food and water and the harmful effects of competition between animals through the design and location of feeding and watering equipment			
	Description of breach	Extent	Severity	Permanence
	Contamination of feed and/or water due to design, construction or location of equipment	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent
	Direct observation of harmful/ excessive competition between animals for feed and/or water resource	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

Feed, water and other substances				
B4	You must not give your animals food or liquid in any way, or containing any substance, that could cause them unnecessary harm			
	Description of breach	Extent	Severity	Permanence
	Provision of feed and/or liquid that may cause unnecessary suffering or injury	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

B5 You must not administer any substance to your animals which is harmful to their health or welfare				
	Description of breach	Extent	Severity	Permanence
	Use of treatment administered in/ onto animal that is not licensed	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent
	Use of treatment that is not an accepted therapy for that condition in that species	On-farm	Medium -evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

Mutilations				
B6	You must not carry out any mutilation or intervention on your animals, unless the action is listed as a prohibited procedure exemption. <i>(Many of these have conditions attached, including the need to be reasonably justified and be a measure of 'last resort')</i>			
	Description of breach	Extent	Severity	Permanence
	Mutilation that is not listed as a prohibited procedure exemption has been carried out on farmed animal	On-farm	High	Permanent
	A prohibited procedure exemption has been carried out but not by a veterinary surgeon or an experienced / adequately trained person as required by law	On-farm	High	Permanent
	A prohibited procedure exemption which has specific requirements attached to it has been carried out without those specific requirements e.g.: <ul style="list-style-type: none"> • Need for anaesthetic • Age at which procedure is permitted • Method used to carry out the procedure • Absolute requirement for veterinary surgeon to carry out procedure • That procedure should be a last resort • Procedure carried out at appropriate stage of breeding cycle 	On-farm	High	Permanent

Breeding procedures				
B7	You must not carry out breeding procedures (either natural or artificial) that cause, or are likely to cause, harm to your animals			
	Description of breach	Extent	Severity	Permanence
	Inappropriate breeding has taken place which is likely to cause or has caused suffering or injury	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent

B8	You must not keep animals for farming purposes unless it can be reasonably expected that the normal breed characteristics (genetic and physical) means that they can be kept without harm to their health and welfare			
	Description of breach	Extent	Severity	Permanence
	Animals kept for farming purposes whose genotype or phenotype is likely to have a detrimental effect on their health or welfare	On-farm	Medium evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
			High -where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Permanent
