Chough Mown Grassland	Application Requirements section: Updated Chough Management Plan template.	19 October 2023

Eligibility
Added text:

14 February 2024

This item can stand alone or be part of a wider application. Standalone irrigation applications will be assessed on their own merits and against other standalone irrigation lagoon applications if budget pressures constrain our ability to approve applications.

Standalone Irrigation Lagoon applications (lagoon and underground drainage only) must be submitted in the period 15 February 2024 to 19 April 2024. Successful applications will receive contracts from May 2024 onwards.

Applications for Irrigation Lagoons that also include AECS management proposals should be submitted in the main Agri-Environment window 1st February to 10th June 2024

Water-use Efficiency – Irrigation Lagoon Application requirements

You must produce a diffuse pollution steading assessment if the lagoon will be filled from water collected from steading roofs.

If the lagoon is distant from the steading and not filled from water collected at a steading then there is no need for a diffuse pollution steading assessment, although you must provide full detail of how the lagoon is to be filled

The application must also contain details of the crops to be irrigated and any existing water storage facilities that are used for irrigation purposes.

Payment

The maximum payment for this option is restricted to £40,000 per business:

- £2.94 per cubic metre without a proprietary liner
- £8.20 per cubic metre with a proprietary liner

Organic Conversion	Requirements section:	14 February 2024
	Added text covering the early notification of organic conversion application outcome	
	Payment Section:	
	Added text to explain that while there is no upper limit for land in organic maintenance you must be able to demonstrate that the land is used for agricultural purposes.	
Organic Maintenance	Payment Section:	6 October 2023
	Added text to explain that while there is no upper limit for land in organic maintenance you must be able to demonstrate that the land is used for agricultural purposes.	
Slurry Storage	Important Notice New section – introducing requirements of the Water Environment (Controlled Activities) (Scotland) Amendment Regulations 2021	14 February 2024
	Eligibility Clarification that previous recipients of funding for slurry storage under Rural Priorities from the 2007 – 2013 Scottish Rural Development Programme are now eligible to apply to AECs slurry storage.	
	Spatial Targeting Slurry storage is available throughout Scotland out with designated Nitrate Vulnerable Zones	
	Application Requirements Clarification that we will only accept applications that have used the provided slurry storage calculator for slurry production and storage calculations.	
	Requirements Clarification on where pre 1991 stores need to be removed. New information on planning permission process	
	Timing of work Flexibility of build and claim period.	
	Payment rate Rate per m³ increases to £20/m³. Successful applicants from the islands can expect a 10% uplift on the above	

	rates for slurry storage and slurry ancillary equipment	
Rhododendron Control – Foliar Spray / Treatment	Spatial Targeting – amended text stating: It may be possible to apply for this option outside this area where there is strong justification and you have an endorsement from NatureScot submitted alongside your application	8 November 2023
	Application Requirements – amended text in regard to Rhododendrons density – light medium or <i>difficult</i>	
	Payment section: Change of name from Natura to European Sites	
Rhododendron Control – Manual Eradication – Light, Medium or Difficult	Spatial Targeting – amended text stating: It may be possible to apply for this option outside this area where there is strong justification and you have an endorsement from NatureScot submitted alongside your application	8 November 2023
	Application Requirements – amended text in regard to Rhododendrons density – light medium or difficult	
	Payment section: Change of name from Natura to European Sites	
Rhododendron Control – Mechanised Eradication – Light, Medium or Difficult	Spatial Targeting – amended text stating: It may be possible to apply for this option outside this area where there is strong justification and you have an endorsement from NatureScot submitted alongside your application	8 November 2023
	Application Requirements – amended text in regard to Rhododendrons density – light medium or difficult	
	Payment section: Change of name from Natura to European Sites	
.Rhododendron Control – Stem Injection Eradication – Medium or Difficult	Spatial Targeting – amended text stating: It may be possible to apply for this option outside this area where there is strong justification and you have an endorsement from NatureScot submitted alongside your application	8 November 2023

	Application Requirements – amended text in regard to Rhododendrons density –medium or difficult	
	Payment section: Change of name from Natura to European Sites	
Restoring Drystone or Flagstone Dykes	Removal of Note relating to 2023 round indicating Restoring Drystone or Flagstone Dykes is currently suspended for new applications	14 September 2023
Muirburn and Heather Cutting	Note at top of page stating Muirburn is currently suspended for new applications therefore, only heather cutting can be included in new applications. You can only carry out the muirburn on an SSSI if you have NatureScot consent. For all proposed heather cutting, detail should be provided in the Muirburn & Heather Cutting Plan Aim section: Removal of 'year round forage' and 'livestock' in terms of what well-managed muirburn or cutting will help provide. Application Requirements section: 'Muirburn Plan' renamed to 'Muirburn and	3 October 2023
	Heather Cutting' Plan 'or cut' added to fourth bullet	0.0
Pond Creation and Restoration for Wildlife	Deletion of 'Note' indicating 'Pond creation and restoration for wildlife currently suspended for new applications' Claims section: Note inserted: Pond creation and restoration is restricted to 2000 square metres per application with no single pond greater than 600 square metres (Please refer to detail in supporting guidance) Whole page: References to Scottish Natural Heritage changed to NatureScot	3 October 2023
Primary Treatment of Bracken – Mechanised or Chemical	Heading: Title changed to Primary Treatment of Bracken – Mechanised (Formerly Mechanised or Chemical)	7 November 2023
	Note For 2024, you may only apply for mechanised treatment of bracken under this capital item	

	Aim section: Edits to cater for changes relating to capital item now it relates to Primary Treatment of Bracken -Mechanised only.	
	Application Requirements	
	Edits to cater for changes relating to capital item now it relates to Primary Treatment of Bracken -Mechanised only. Updated Bracken Control Plan template.	
	Requirements section: Edits to cater for changes relating to capital item now it relates to Primary Treatment of Bracken -Mechanised only	
	Inspections section:	
	Edits to cater for changes relating to capital item now it relates to Primary Treatment of Bracken -Mechanised only	
Follow of treatment of Bracken – Mechanised or Chemical	,	7 November 2023
	Mechanised (Formerly Mechanised or Chemical)	
	Note For 2024, you may only apply for mechanised treatment of bracken under this capital item	
	Aims section: Edits to cater for changes relating to follow up treatment of bracken capital item	
	Eligibility section: Change of name from Scottish Natural Heritage to Nature Scot	
	Application requirements section: Updated Bracken Control Plan template and Edits to cater for changes relating to follow up treatment of bracken capital item	
	Requirements section: Edits to cater for changes relating to follow up treatment of bracken capital item. Inspections section: Edits to cater for changes relating to follow up	
Primary Treatment of Bracken – Manual (ruralpayments.org)	Application requirements section: Updated Bracken control plan template	7 November 2023

Creation of Hedgerows	'Note' at top of page:	3 October 2023
	This option is limited to 1000m of new hedge creation per AECS application.	
Heath Management (Coastal, Serpentine, Lowland and Special Interest) (ruralpayments.org)	Eligibility section: Added text to first bullet stating coastal heath eligibility predominantly located on Orkney, Shetland, the north coast and some of the Western Isles) Reference to consult the supporting guidance for additional help on the definition of eligibility heath types	13 November 2023
	Management requirements section:	
	Insertion of 'type' to sentence in sub section 'For coastal heath, serpentine heath and special interest heath': "Or, you must adhere to an approved grazing	
	regime defining the livestock units/type and grazing dates."	
Habitat Mosaic Management (ruralpayments.org)	Application requirement section: Added text re. Endorsement Request Form and change from Scottish Natural Heritage to NatureScot.	14 September 2023
Species-rich Grassland Management (ruralpayments.org)	Application requirement section: Added text re. Endorsement Request Form	14 September 2023
Wader Grazed Grassland	Revised text at Aim and Eligibility sections. Application requirements section: Revised/added text regarding scoring points for waders Updated Vulnerable Priority Species recording form Updated Wader management template and wader survey form from 2024 onwards	28 November 2023
Wader and Wildlife Mown Grassland	Aim section: Small additions to text Application requirements section: Revised/added text regarding scoring points for waders Updated Vulnerable Priority Species recording form Updated Wader management template and wader survey form from 2024 onwards	28 November 2023
Management or Restoration of Hedgerows (ruralpayments.org)	Spatial Targeting: Added text covering possibility of applying outside Targeting area following endorsement request procedures. Change of name from Scottish Natural Heritage to NatureScot	9 November 2023
Restoration of Species-rich Grassland (ruralpayments.org)	Eligibility section: Reference to checking the supporting guidance for information on eligible fields.	14 September 2023

Ditch Blocking Plastic Piling Dams	Application requirements section: Updated Ditch Blocking plan template	15 November 2023
<u>Ditch blocking – Peat Dams</u>	Application requirements section:	15 November 2023
	Updated Ditch Blocking plan template	
Lowland Bog Management	Application requirements section: Updated Lowland Bog Management Plan.	6 October 2023
Upland Habitat Impact Assessment for deer management	Application requirements section:	21 November 2023
	Updated Deer Management Plan.	
Deer Census Helicopter Counts	Application requirements section:	21 November 2023
	Updated Deer Management Plan.	
Open Range Deer Management	Application requirements section:	21 November 2023
	Updated Deer Management Plan.	
Moorland management	Application requirements section:	19 December 2023
	Updated moorland management template, Deer Management Plan template, Bracken management and Ditch Blocking Plan templates.	
	Updated guidance for Deer Management: You must seek advice from a NatureScot Wildlife Management Officer before applying. We advise you do this as soon as the application round opens to allow enough time. The deadline for NatureScot advice on deer is 30 April.	
	Updated guidance for Muirburn and Heather cutting: Muirburn cannot be funded through AECS. Only the Heather Cutting element of the capital item is available in the 2024 AECS round	
	Updated guidance for Bracken Management: Only mechanical or manual control of bracken are available for funding in the 2024 AECS round. Meorland Management Plan example.	
	Moorland Management Plan example - A revised version of the completed template will be uploaded to the Essential information for applications page.
