Notes: \*Projects with average cost is £6,000/ha or higher. \*\*Projects must be completed and paid in the approved claim year, the next deadline for applications is 31 January 2023, contracts will not be issued until April 2023. \*\*\* Projects limited up to £100k/BRN. N = current calendar year. #Includes £250k for landscape scale deer management and woodland restoration.

Indicative Headroom Colour Key:

There is currently good availability of funds within this FGS clearing category and we will be able to support most good quality applications

It is likely the demand for funds within this FGS Clearing Category will exceed the available budget and there will be strong competition for funds

There are no longer any funds available within this FGS clearing category

**Claim Years Available** - Our approach to claim years is set out in Table 1 and depends on the grant type. This has been structured to ensure applications go through the competitive clearing process whilst at the same time manage the grant budget without a long forward booking of projects.

**Please note that for an application proposal with multiple claim years, the application score must meet the higher of the threshold scores for each claim year to obtain full approval.**

**Woodland Creation** - capital items such as fencing and initial planting - up to 3 claim years (i.e. within N+2, where N = the current calendar year at time of application submission) with work having to start in the first 2 years e.g. one option is to apply in 2022, start work in year 2022 and complete in 2023. Another option is to apply in 2022, start work in 2023 and complete work in claim year 2024. In exceptional circumstances multiple claim years up to N+4 may be allowable, but only where significant areas of woodland creation are proposed **and** initial planting capital items are claimed in each preceding year, by prior agreement with Scottish Forestry National Office.

**Woodland Improvement Grant** - up to 3 year claim years (within N+2, where N = the current calendar year at time of application submission) with work having to start in the first 2 years except for WIG Restructuring Regeneration where a delay until year 3 is acceptable to meet species diversity rules.

**Sustainable Management of Forests** – next claim year is available as the first annual management claim year.

**Agroforestry** – as for woodland creation up to 3 claim years (within N+2, where N = the current calendar year at time of application submission) with work having to start in the first 2 years.

**Tree health** – current and next year claim year (within N+1 where N = the current calendar year at time of application submission)

**Forest Infrastructure** – current and next claim year available (within N+1, where N = the calendar year of the application round)

**Harvesting & Processing** – one claim year available (within N, where N = the calendar year of the application round)

**Co-operation** – current and next claim year available (within N +1, where N = the calendar year of the application round)
