

Cross Compliance Verifiable Standards 2016

Verifiable standards for classifying breaches of:

Good Agricultural and Environmental Conditions (GAEC) and Statutory Management Requirements (SMR)

SECTION	PAGE
Introduction	3
Good Agricultural and Environmental Condition (GAEC 1-7)	<u>14</u>
SMR 1 – Protection of water in Nitrate Vulnerable Zones (NVZ)	<u>21</u>
SMR 2 – Conservation of wild birds	<u>30</u>
SMR 3 – Conservation of wild flora and fauna	<u>32</u>
SMR 4 – Food and feed law	<u>34</u>
SMR 5 – Restrictions on the Use of Substances having Hormonal or Thyrostatic action and	<u>52</u>
Beta-agonists in Farm Animals	
SMR 6 – Livestock Identification and Traceability – Pigs	<u>57</u>
SMR 7 – Livestock Identification and Traceability – Cattle	<u>61</u>
SMR 7 – Penalty procedures for breaches of SMR 7 - Animal Identification and Registration -	<u>63</u>
Cattle	
SMR 7 – Cattle Penalty Calculator	<u>64</u>
SMR 8 – Livestock Identification and Traceability – Sheep and Goats	<u>68</u>
SMR 9 – Prevention and Control of transmissible Spongiform Encephalopathies (TSEs)	<u>73</u>
SMR 10 – Restrictions on the Use of Plant Protection Products	<u>78</u>
SMR 11 – Welfare of Pigs	80
SMR 12 – Welfare of Calves	88
SMR 13 – Welfare of Farmed Animals	<u>107</u>

* Amendments to the 2016 verifiable standards – page 118

You can see a record of any changes made to this document, during the calendar year, on this page.

Introduction

As a condition of receiving support scheme payments farmers have to comply with a number of requirements and if a farmer is found to have breached a requirement their payments are reduced, recovered or withheld. The Verifiable Standards tables provide details of the requirements and how breaches are classified in terms of Extent, Severity and Permanence. The classification of a breach, in conjunction with the Penalty Tables, determines the level of penalty that's applied to a support scheme payments. The following annotated table explains the format of the Verifiable Standards and the terms that are used to classify breaches of the requirements.

requ	n – tells you wha uirement sets o iieve.	ut to I here ar			uirements), based on ex nd Environmental Condi	
The		ain land management reflecting			osion ent details: What you h	ave to do.
A1		ist prevent the erosion of the banks of water c	ourses, watering points and fe	eding areas from ove	rgrazing or heavy poaching by	livestock
		Description of breach	.	Extent	Severity	Permanence
	The farmer has cau or heavy poaching	sed significant soil erosion by failing to prevent by livestock.	overgrazing, heavy trampling	On farm effect ^{Or} Off farm effect	Low - up to 0.5ha Medium - more than 0.5 ha but less than 5ha High - more than 5ha.	Rectifiable – if there is a high risk of erosion Permanent – erosion has occurred
A2		ops: You must put in place appropriate measur measures could include grubbing, sediment t		-		
		Description of breach put in place appropriate measures to limit soil ero have prevented the subsequent crop or a cover cr		On farm effect or Off farm effect	Severity Low - up to 0.5ha Medium - more than 0.5 ha but less than 5ha High - more than 5ha.	Permanence Rectifiable – if there is a high risk of erosion Permanent – erosion has occurred
useo Sco Gov RPI	s coding is d by ottish vernment D. rsion 2016 2.0	Description of breach: If you fail requirement this gives details of th possible cross compliance breach	ie is th confir farm or	xtent – e breach ned to your does it have mplications?	Severity – how significant are the consequences of the breach?	Permanence – does the breach have a lasting effect? Can the effect be remedied by reasonable means?

GAEC 1 – Buffer strips along watercourses

The aim of this is to protect water against pollution and run-off. The requirements restrict storage, application of fertilisers and pesticides and cultivations along water courses

* Severity relates to the shortfall in the buffer strip and the total distance within the business over which the shortfall occurs.

ו 1	 You must not apply organic manure to land situated within: 10 metres of any surface water or 50 metres of any well, borehole etc. 			
	Description of breach	Extent	Severity *	Permanence
			 <u>Application of organic manure (surface</u> <u>water)</u> Directly entering surface water <u>Medium</u> – up to 50m <u>High</u> – over 50m 	Permanent if there is pollution
	 The farmer has applied organic manure to land situated within 10 metres of any surface water or 50 metres of any well, borehole etc 	On-farm effect	 Within 5m of any surface water Very low – up to 50m Low – over 50m up to 250m Medium – over 250m up to 500m High – over 500m 	Rectifiable
		or Off farm effect	 Between 5 and 10m of any surface water Very low – up to 75m Low - over 75m up to 400m Medium – over 400m up to 750m High – over 750m 	Permanent if there is pollution
			<u>Application of organic manure (borehole)</u> Medium - between 25m and 50m High – within 25m	Rectifiable or Permanent if there is pollutio

Description of breach	Extent	Severity *	Permanence
The farmer has located a field heap within: 10 metres of any surface water or 	On-farm effect or	Location of field heap (surface water) Medium – between 5m and 10m of any surface water High – within 5m of any surface water	Rectifiable or Permanent if there is pollution
50 metres of any well, borehole etc	Off farm effect	<u>Location of field heap (borehole)</u> Medium – between 25m and 50m High – within 25m	Rectifiable or Permanent if there is pollutio
 water, taking into account: the slope of the land, particularly if greater that any ground cover 	n 12 degrees	o any land if there is a significant risk of the fertilise	
• the slope of the land, particularly if greater than	n 12 degrees Extent	Severity *	Permanence
 the slope of the land, particularly if greater that any ground cover the proximity of the land to any surface water weather conditions the type of fertiliser being applied 			

B4	 the slope of the land, particularly if greater than 12 degrees any ground cover the proximity of the land to any surface water weather conditions the type of fertiliser being applied 				
	Description of breach	Extent	Severity *	Permanence	
	The farmer has applied nitrogen fertiliser to land, with a significant risk of the fertiliser entering surface water taking into account:		 Directly entering surface water Medium – up to 50m High – over 50m 	Permanent if there is pollution	
	 the slope of the land, particularly if greater than 12 degrees any ground cover the proximity of the land to any surface water weather conditions the type of fertiliser being applied 	On-farm effect or Off farm effect	 Risk of entering surface water Very low – up to 50m Low – over 50 up to 250m Medium – over 250m up to 500m High – over 500m 	Rectifiable or Permanent if there is pollution	

B5	apply		ers of the top of the bank of any surface water, unless e	xemptions
	Description of breach	Extent	Severity *	Permanence
			 <u>Cultivations</u> Directly resulting in soil entering surface water <u>Medium – up to 50m</u> <u>High – over 50m</u> 	Permanent if soil enters surface water
B5	 The farmer has cultivated land within two metres of the top of the bank of surface water, and the following exemptions do not apply; Creating a green cover where one does not already exist Establishing a new hedge 	On-farm effect or Off farm effect	 Within 1m of the top of the bank Very low – up to 50m Low – over 50m up to 250m Medium – over 250m up to 500m High – over 500m 	Rectifiable or
			Between 1m and 2m of the top of the bank Very low – up to 75m Low – over 75m to 400m Medium – over 400 up to 750m High – over 750m	Permanent if soil enters surface water
	The farmer has applied pesticides within two metres of the top of the bank of surface water, and the following exemptions do not apply; — Controlling injurious weeds, invasive species and, after prior written consent certain other weed species		 <u>Applications of Pesticide</u> Pesticides directly entering surface water <u>Medium – up to 50m</u> <u>High – over 50m</u> 	Permanent if there is pollution
B5			 Within 1m of the top of the bank Very low – up to 50m Low – over 50m up to 250m Medium – over 250m up to 500m High – over 500m 	Rectifiable or Permanent if
			 Between 1m and 2m of the top of the bank Very low – up to 75m Low – over 75m to 400m Medium – over 400 up to 750m High – over 750m 	there is pollution

GAEC 2 – Abstraction of water for irrigation

The aim of these rules is to protect water resources by licensing abstraction of water for irrigation

1	You must comply with the authorisation procedures involved: If you abstract less than (<) 10 cubic metres of wate there is no requirement to contact the Scottish Envi	ollow General Binding Rule 2 (GBR 2). Complyir		
	Description of breach	Extent	Severity	Permanence
			Very low - (warning letter, 0% penalty) for failing to submit a complete record of the volumes of water abstracted under the licence	Rectifiable
	The farmer does not have an irrigation licence	On farm effect or Off farm effect	 Low - Failure to have an appropriate valid registration at the time of abstraction. Medium - Failure to have an appropriate valid simple licence at the time of abstraction. High - Failure to have an appropriate valid complex licence at the time of abstraction. 	Rectifiable or Permanent

submitting an annual data return even if you do Description of breach	Extent	Severity	Permanence
The farmer has failed to comply with the conditions of an abstraction licence.	On farm effect or Off farm effect	 Very low – Failure to comply with the conditions of a licence. Potential impact assessed as Category 4 (see below). Low - Failure to comply with the conditions of a licence. Potential impact assessed as Category 3 (see below). Medium - Failure to comply with the conditions of a licence. Potential impact assessed as Category 2 (see below). High - Failure to comply with the conditions of a licence. Potential impact assessed as Category 1 (see below). High - failure to comply with any condition set in a Notice issued under the Water Environment (Controlled Activities) (Scotland) Regulations 2005 (as amended). 	Rectifiable if there is environmental impa- or Permanent
GAEC 2: Abstraction of water for irrigation – categorie	s for assessing the p	otential impact on the environment.	

GAEC 3 – Protection of groundwater against pollution

The aim of these	rules is to	protect	groundwater	against pollution
	1 4100 10 10	p. 0.000	groundhator	againet penation

Υοι	You must					
A1	You must ensure that a licence is in place to allo washings to land.	w or carry out a dis	sposal of list I and list II substances, such as waste sheep dip an	d/or pesticide		
	Description of breach	Extent	Severity	Permanence		
	The farmer has carried out or permitted unauthorised disposal of list I or list II substances, such as waste sheep dip or pesticide washings	On-farm effect or Off-farm effect	High	Permanent		

A2	sheep dip and/or pesticide washings to land.		PA to allow or carry out a disposal of list I and list II substances,	
	Description of breach	Extent	Severity	Permanence
			Records Low - Incomplete records (minor omissions but a full assessment is still possible	Rectifiable
			Records High - No records or incomplete records which prevent a full assessment	Permanent
A2	The farmer has failed to comply with the conditions of the CAR authorisation.	On-farm effect or Off-farm effect – if disposals relate to	 Maximum volume exceeded - Very Low - the excess can be accommodated by a variation to the disposal volume on the existing site Medium - the excess cannot be accommodated without adding a new disposal site High - the excess cannot be accommodated by adding a new disposal site 	
		unsuitable sites	The number of permitted disposals on authorised sites has been exceeded – Very Low - The existing disposal site can be sub divided to accommodate the additional disposals Medium - At least one new disposal site has to be added to accommodate the additional disposals	Permanent
			 Disposal on an unauthorised site – Medium - the disposal site is suitable and can be added to the authorisation High - The disposal site is not suitable 	
A2	The farmer has failed to comply with the conditions of a Notice served under The Water Environment (Controlled Activities) (Scotland) Regulations 2011 in relation to List I and List II substances.	On-farm effect	Medium	Permanent
	Failure to comply with a notice issued in relation to a groundwater activity will usually be regarded as intentional but may depend on the nature of the failure; e.g. recipient has tried to comply but has not done so word for word.	Off-farm effect	High - SEPA description of major pollution incident	

Υοι B1	must not You must not carry out or permit an activity which is likely to cause pollution of groundwater by an indirect or direct discharge of List I or List II substances from any non-disposal activity						
	Description of breach	Extent	Severity	Permanence			
	The farmer has carried out or permitted an activity that is likely to cause pollution of groundwater by an indirect or direct discharge of List I or List II substances from any non-disposal activity	Off-farm effect	Medium High - SEPA description of major pollution incident	Permanent			

GAEC 4 – Minimum soil cover

The aim of this rule is to protect soil against erosion after harvest until the end of winter ('winter' is up to and including the last day of February)

 The land after harvest must be covered by the stubble of the previous crop, by another crop or by grass unless: agronomic or weather conditions are such that cultivating land would be detrimental to the use for the land for agricultural produc the land is being prepared for sowing the subsequent crop. Secondary cultivations and final seed beds must only be created very sowing 						
Description of breach	Extent	Severity	Permanence			
 Soil erosion has occurred or there is a high risk of soil erosion because after harvest land is not covered by the stubble of the previous crop, by another crop or by grass The farmer will not break this rule where; agronomic or weather conditions are such that cultivating land would be detrimental to the use for the land for agricultural production or the land is being prepared for sowing the subsequent crop. Secondary cultivations and final seed beds must only be created very close to sowing 	On farm effect or Off farm effect	Low - up to 5ha Medium - more than 5ha up to 10ha High - more than 10ha.	Rectifiable – if there is a high ris of erosion Permanent – erosion has occurred			

GAEC 5 – Maintain land management reflecting site specific conditions to limit erosion

The aim of these rules is to protect soil against erosion in certain situations

	You must						
A1	Livestock: You must prevent the erosion of the banks of water cour livestock	ses, watering point	s and feeding areas from overg	razing or heavy poaching by			
	Description of breach	Extent	Severity	Permanence			
			Very Low – limited erosion confined to occasional sites.	Rectifiable – Warning letter to be issued detailing follow up action required and the time in which this has to be completed. Timescales for follow up action should be kept to a <u>minimum</u> to ensure the effectiveness of the control.			
	The farmer has caused significant soil erosion by failing to prevent overgrazing, heavy trampling or heavy poaching by livestock.	On farm effect or Off farm effect	Low – moderate erosion identified across multiple sites where the banks of water courses etc. have predominately shallow sloping sides.				
			Medium – moderate erosion identified across multiple sites where the banks of water courses etc have predominately steeply sloping sides.	Permanent			
			High – severe erosion identified at single or multiple sites.				

A2	Late harvested crops: You must put in place appropriate measures to limit soil erosion if agronomic or weather conditions prevent the subseque crop or a cover from being sown (appropriate measures could include grubbing, sediment traps and sediment fences)							
	Description of breach	Extent	Severity	Permanence				
	The farmer has not put in place appropriate measures to limit soil erosion, when agronomic or weather conditions have prevented the subsequent crop or a cover crop from being sown.	On farm effect or Off farm effect	Low - up to 5ha Medium - more than 5ha up to 10ha High - more than 10ha.	Rectifiable – if there is a high risk of erosion Permanent – erosion has occurred				

GAEC 6 – Maintenance of soil organic matter

The aim of these rules is to maintain soil organic matter levels

You A1	Du must You must comply with the requirements of the Muirburn code as they relate to the maintenance of soil organic matter. The following would be considered to be a breach of the requirements: leaving a fire unattended being unable to control a fire or having not made provision for its proper control causing damage to any woodland 					
	Description of breach	Extent	Severity	Permanence		
	 The farmer has not followed the requirements of the Muirburn code. Whereby - the fire has been left unattended the fire has not been able to be controlled or no provisions were made for its proper control the fire has caused damage to woodland 	On farm effect or Off farm effect	 Low – unintentional burning up to 10ha Medium - unintentional burning more than 10ha up to 50ha High - unintentional burning more than 50ha. 	Permanent		

You	must not						
B1	You must not burn arable stubble except for reasons other than	You must not burn arable stubble except for reasons other than plant disease or pest control					
	Description of breach	Extent	Severity	Permanence			
	The farmer has burned arable stubble (the farmer will not break this rule if he has carried this out for the purposes of plant disease or pest control)	On farm effect or Off farm effect	Low - burning up to 1ha Medium - burning more than 1ha up to 5ha High - burning more than 5ha.	Permanent			
B2	You must not plough rough grazing or other semi-natural areas u	Inless approved as part	of an Environmental Impact Assess	ment (EIA)			
JL	Description of breach	Extent	Severity	Permanence			
	The farmer has ploughed up rough grazings and other semi-natural areas without approval under the Environmental Impact Assessment (Agriculture) (Scotland) Regulations 2006	On farm effect or Off farm effect	Low - ploughing up to 1ha Medium – ploughing more than 1ha up to 5ha High – ploughing more than 5ha.	Permanent			

GAEC 7 – Retention of landscape features

The aim of these rules is to protect landscape features

31	You must not remove or destroy any of the follow	ving without the pr	ior written consent of the Scottish Ministers:					
	 drystane or flagstone dykes; ponds, watercourses or; turf and stone-faced banks; walls; hedges; trees (in line, in a group or isolated). 							
	Consent is not required to: widen field entrances insecurely rooted and are likely to cause a dange		for livestock or farm machinery or fell trees that are dead, dise	ased, damaged o				
	Description of breach	Extent	Severity	Permanence				
	The farmer has removed or destroyed a landscape	On farm effect	Dykes, banks, walls, hedges and watercourses Low - up to 100m of feature affected. Medium - more than 100m up to 500m of feature affected. High - more than 500m of feature affected. Ponds Medium - one pond High - two or more ponds	Rectifiable or Permanent if the feature can't be reinstated by reasonable means.				
	feature without written consent of the Scottish Ministers	or Off farm effect	<u>Trees (in line, in a group or isolated)</u> Very Low – tree(s) felled which were exempt from requiring a felling licence	Rectifiable				
			Low – tree(s) felled which would have been granted a felling licence if applied for					
			Medium – tree(s) felled which would not have been granted a felling licence if applied for and not subject to a tree preservation order (TPO)	or Permanent if mature tree(s) have been felled				
			High – tree(s) felled subject to a tree preservation order (TPO)					

B2 You must not trim hedges or lop branches off trees during the bird nesting and rearing season starting on March 1 and ending on Augus except for road safety reasons. Hedgelaying can be carried out up to and including March 31							
	Description of breach	Extent	Severity	Permanence			
	The farmer has carried out hedge trimming and/or lopped branches off trees between 1 March and 31 August (inclusive)	On farm effect or Off farm effect	Low - one length cut Medium - two to four lengths cut High – five or more lengths cut	Rectifiable or Permanent if there is evidence nests have been destroyed or birds have been disturbed			

B3	B3 You must not cultivate land or apply fertilisers or pesticides within two metres of the centre line of a hedge, unless the exemptions apply					
5	Description of breach	Extent	Severity*	Permanence		
B3	The farmer has cultivated land within 2m of the centre line of a hedge, and the following exemptions do not apply; — Creating a green cover where one does not already exist — Establishing a new hedge	On farm effect	 <u>Cultivations</u> Within 1m of the centre line Very low – up to 100m Low – over 100m up to 500m Medium – over 500m up to 1000m Between 1m and 2m of the centre line Very low – up to 150m Low – over 150m to 800m Medium – over 1500m 	Rectifiable or Permanent if there is evidence the hedge has been damaged		
В3	The farmer has applied pesticides within 2m of the centre line of a hedge, and the following exemptions do not apply; — Establishing a new hedge — Controlling injurious weeds, invasive species and, after prior written consent certain other weed species	Off farm effect	 Applications of pesticides Within 1m of the centre line Very low – up to 100m Low – over 100m up to 500m Medium – over 500m up to 1000m High – over 1000m Between 1m and 2m of the centre line Very low – up to 150m Low – over 150m to 800m Medium – over 800 up to 1500m High – over 1500m 	Rectifiable or Permanent if there is evidence the hedge has been damaged		

(B3 continued on next page)

B3	The farmer has applied fertilisers within 2m of the centre line of a hedge, and the following exemptions do not apply; — <i>Establishing a new hedge</i>	On farm effect or Off farm effect	 <u>Applications of fertilisers</u> Within 1m of the centre line Very low – up to 100m Low – over 100m up to 500m Medium – over 500m up to 1000m High – over 1000m Between 1m and 2m of the centre line Very low – up to 150m Low – over 150m to 800m Medium – over 800 up to 1500m High – over 1500m 	Rectifiable or Permanent if there is evidence the hedge has been damaged
B4	You must not alter, damage or destroy a Schedule Scheduled Monument Consent (SMC) Description of breach	ed Ancient Monum	ent without prior written consent of the Scottish Ministers (known	n as Permanence
	The farmer has altered, damaged and/or destroyed any SAMs without prior consent of the Scottish Ministers (known as Scheduled Monument Consent (SMC)	On farm effect or Off farm effect	 Low – SAM altered or damage caused but does not affect integrity of SAM and can be rectified. Medium - Permanent damage caused but does not affect integrity of SAM. High - Damage affected the integrity of the SAM. 	Rectifiable or Permanent

SMR 1 – Protection of water in Nitrate Vulnerable Zones (NVZ)

The aim of these requirements is to reduce pollution of water caused or induced by nitrates from agricultural sources and to prevent further pollution from arising. They apply if you farm land within a Nitrate Vulnerable Zone NVZ).

A1	You must prepare an annual Fertiliser and Manure	Management Plar	n by 1 st March	
	Description of breach	Extent	Severity	Permanence
A1	The farmer has not prepared a plan by 1 st March	On-farm effect or Off-farm effect	High	Permanent
A1	The farmer has not completed a storage calculation (where required)	On-farm effect or Off-farm effect	High	Permanent
	The farmer has not carried out a risk assessment for organic manures (if applied on farm) or The farmer has carried out an inaccurate risk assessment for organic manures		Medium - Organic Manure applied but no obvious sign of pollution and other AP rules not breached as a result	Rectifiable
			High - Organic manure applied and pollution occurs as a result, or other AP rules breached as a result	Permanent
A1			Very low - Risk assessment completed, but wrongly assessed (No actual pollution or breach of AP occurred as a result)	Rectifiable
			High - Risk assessment completed, but wrongly assessed (Actual pollution or breach of AP occurred as a result)	Permanent

(A1 continued on next page)

A1 cont	You must prepare an annual Fertiliser and Manure Management Plan by 1 st March						
	Description of breach	Extent	Severity	Permanence			
	The farmer has not completed an Nmax calculation	On-farm effect	Medium - No nitrogen fertiliser has been applied to the crop type	Rectifiable			
A1		or Off-farm effect	High - Nitrogen fertiliser has been applied to the crop type	Permanent			
		· Of	Very low - Nmax calculated incorrectly, nitrogen already applied to the crop type but does not exceed actual Nmax. i.e. Crop type nitrogen fertiliser programme is complete or Nmax for crop type is never likely to be exceeded	Rectifiable			
A1	The farmer has completed an incorrect Nmax calculation for a crop type		Medium - Nmax calculated incorrectly, nitrogen already applied to the crop type but does not exceed actual Nmax. Crop type nitrogen fertiliser programme is not complete. i.e. further nitrogen fertiliser applications are required for crop type or is likely to exceed the Nmax limit for a crop type	Rectifiable			
			High - Nmax calculated incorrectly and nitrogen already applied to the crop type results in a breach of Nmax	Permanent			

A2	 You must prepare a fertiliser and manure plan annually, which must contain areas of farm & fields, soil types, quantity of nitrogen fertiliser applied to each crop, type & date of crop sown, type and date of each application of nitrogen fertiliser to crops, number of livestock, their species and type, and length of time kept on the farm, quantity type and nitrogen content of livestock manures retained and used on the farm, quantity, type and nitrogen content of livestock manures moved off the farm, the date of the movement and the name and address of the person receiving it; quantity, type and nitrogen content of organic manures imported moved onto the farm, the date of the movement and the name and address of the pushier; and the quantity and type of chemical fertilisers brought onto, used and retained on farm. 				
	Description of breach	Extent	Severity	Permanence	
	The farmer has no records or missing essential elements - unable to determine compliance with specific requirements of the Action Programme	On-farm effect or Off-farm effect	High	Permanent	
A3	Storage of livestock manure You must have sufficient storage to meet the minimum stage requirements for your farm, taking into account any exclusions which apply. 				
	Description of breach	Extent	Severity	Permanence	
	The farmer has insufficient storage to meet the minimum requirements	On-farm effect or Off-farm effect	High	Permanent	

A4	You must comply with closed period restrictions for che	You must comply with closed period restrictions for chemical and organic nitrogen fertilisers				
	Description of breach	Extent	Severity	Permanence		
A4	The farmer has applied organic manures with high available N content during the relevant closed period.	On-farm effect or Off-farm effect	High	Permanent		
A4	The farmer has applied chemical nitrogen fertiliser during the relevant closed period.	On-farm effect or High Off-farm effect		Permanent		
A4	The Farmer has applied Organic Manure with high available N content to bare ground or stubble during July, August or September and crop not sown within 6 weeks of the first application (subject to general compliance with the closed periods)	On-farm effect or Off-farm effect	 Very low - No crop sown but able to demonstrate intention to sow and was prevented by severe weather conditions Medium - Crop sown late, unable to justify late sowing of crop due to severe weather conditions following application High - Crop not sown, unable to demonstrate intention to sow crop (no seed on farm or invoice to support intention to sow) 	Permanent		
A4	The farmer has exceeded the Quantitative Restrictions either side of the closed period	On-farm effect or Off-farm effect	Medium	Permanent		
A4	The farmer has applied livestock manure to any area of the farm within 3 weeks of a previous application	On-farm effect or Off-farm effect	 Low - No Risk of pollution to the water environment Medium - Risk of Pollution to water environment or on an area which should be designated as high risk for livestock manure application 	Permanent		

A5	You must maintain the structural integrity of manure an the water environment	nd silage effluent stores	and provide appropriate facilities at stores	to prevent pollution of		
	Description of breach	Extent	Severity	Permanence		
<u>۸</u> –	The farmer's existing storage facility for manure or silage	On-farm effect	Medium – No actual pollution of water Environment	Rectifiable		
A5	has structural defects or is leaking	or Off-farm effect	High – Actual pollution of water environment occurring, has occurred	Permanent		
	The farmer is storing silage (except wrapped or bagged silage) in a facility that does not have an impermeable base, or does not have facilities for collecting run-off.	On-farm effect	Medium – No actual pollution of water Environment	Rectifiable		
A5	 The farmer's permanent storage facility for livestock manure (other than slurry) is either: not sited on an impermeable surface on impermeable surface but not covered by waterproof covering, or does not have collection facilities for collecting run-off etc 	or Off-farm effect	High – Actual pollution of water environment occurring, has occurred	Permanent		
A6	You must comply with farm and field based limits					
	Description of breach	Extent	Severity	Permanence		
A6	The whole farm limit for livestock manure N breached	On-farm effect or Off-farm effect	High	Permanent		
A6	The Individual field limit for organic manure, other than compost, breached	On-farm effect or Off-farm effect	Medium	Permanent		
A6	The individual field limit for compost breached	On-farm effect or Off-farm effect	Medium	Permanent		

Υοι	You must not				
B1	You must not apply slurry with a raised splash plate (except on growing arable crops)				
	Description of breach	Extent	Severity	Permanence	
	The farmer has applied slurry with raised splash-plate spreader (except on growing arable crops)	On-farm effect or Off-farm effect	Low or High – if pollution has occurred	Permanent	

B2	You must not inappropriately use or locate field middens				
	Description of breach	Extent	Severity	Permanence	
	32 The farmer has temporary field heap containing non-solid manure On-farm effect 0r 0ff-farm effect	On-farm effect	Very low – No actual pollution of water environment	Rectifiable	
B2		High – Actual pollution of water environment occurring or has occurred	Permanent		
50	The farmer has stored neat noultry manure in temporary field heap	On-farm effect	Medium – No actual pollution of the water environment	Rectifiable	
	B2	without an impermeable cover	or Off-farm effect	High – Actual pollution of water environment occurring or has occurred	Permanent

(B2 continued on next page)

B2	You must not inappropriately use or locate field middens			
cont	Description of breach	Extent	Severity	Permanence
В2	The farmer has located a field heap within 10 metres of any surface water or 50 metres of any well, borehole etc 	On-farm effect or	 <u>Location of field heap (surface</u> <u>water)</u> Medium – between 5m and 10m of any surface water High – within 5m of any surface water 	Permanent Permanent Permanent Rectifiable Rectifiable or
	Or on any other site that is a high risk or no spreading area	Off-farm effect	 Location of field heap (borehole) Medium – between 25m and 50m of a borehole High – within 25m of a borehole 	Permanent
	The farmer has not used the contents of a temporary field heap	On-farm effect	Very low - (if very low risk of pollution and the heap is identified on the RAMS map to confirm this).	Rectifiable
B2	within 12 months of manure first being placed there	or Off-farm effect	High – (if high risk of pollution, and/or the heap is not identified on the RAMS map so low risk cannot be verified)	
B2	The farmer has created a temporary field heap on the site of a previous heap within 24 months	On-farm effect or Off-farm effect	Very Low	Rectifiable

	Description of breach	Extent	Severity	Permanence
B3	The farmer has applied Nitrogen fertiliser in an inaccurate manner.	On-farm effect or Off-farm effect	Low or High — if pollution has occurred	Permanent
B3	 The farmer has applied Nitrogen fertiliser to land when: the soil is waterlogged or the land is flooded the soil has been frozen for 12 hours or longer in the preceding 24 hours or the land is covered by snow 	On-farm effect or Off-farm effect	Medium	Permanent
33	The farmer has applied organic manure to land situated within • 10 metres of any surface water or • 50 metres of any well, borehole etc	On-farm effect or Off-farm effect	 <u>Application of organic manure (surface water)</u> Directly entering surface water Medium – up to 50m High – over 50m Within 5m of any surface water Very low – up to 50m Low – over 50m up to 250m Medium – over 250m up to 500m High – over 500m Between 5 and 10m of any surface water Very low – up to 75m Low over - 75m up to 400m Medium – over 400m up to 750m High – over 750m <u>Application of organic manure (borehole)</u> Medium - between 25m and 50m High – within 25m 	Permanent

В3	The farmer has allowed nitrogen fertiliser of any type to enter a watercourse	On-farm effect or Off-farm effect	High	Permanent
В3	 The farmer has applied nitrogen fertiliser (organic manures or chemical fertiliser) to land, with a significant risk of the fertiliser entering surface water taking into account: the slope of the land, particularly if greater than 12 degrees any ground cover the proximity of the land to any surface water weather conditions the type of fertiliser being applied 	On-farm effect or Off farm effect	Medium – Risk of Nitrogen fertiliser entering surface water High – Nitrogen fertiliser has entered surface water	Permanent
B4	You must not exceed the Nmax limit as calculated for any crop	type		
	Description of breach	Extent	Severity	Permanence
	Nitrogen available to any crop type exceeds Nmax	On-farm effect or Off-farm effect	High	Permanent

SMR 2 - Conservation of wild birds

The aim of these rules is to protect wild birds, their eggs and nests if you have land classified as a Special Protection Area (SPA). They apply to all wild birds

Breaches of SMR 2 can vary greatly. The Extent, Severity and Permanence of each breach will be assessed individually taking into account all the facts surrounding the breach. SGRPID may require to seek advice from Scottish National Heritage to obtain technical information to decide the categorisation of the breach.

Υοι	u must				
A1	You must notify Scottish Natural Heritage in writing of any proposal to carry out, cause or permit any specified operation (i.e. ORC) (or where a special nature conservation order applies (unless covered by the terms of a management agreement, scheme or notice) and obtain consent before starting that operation				
	Description of breach	Extent	Severity	Permanence	
A1	The farmer has carried out, caused or permitted a specified operation for which no notice/consent has been given	On-farm effect or Off-farm effect	Low or Medium or High	Rectifiable or Permanent	
A1	The farmer has carried out, caused or permitted a specified operation on land where a special nature conservation order is in force for which no notice/consent has been given	On-farm effect or Off-farm effect	Low or Medium or High	Rectifiable or Permanent	
A1	The farmer has carried out, caused or permitted a specified operation with notice/consent but has failed to adhere to the terms of the consent	On-farm effect or Off-farm effect	Low or Medium or High	Rectifiable or Permanent	

A2	A2 You must comply with any nature conservation, management, restoration orders relevant to the purpose of the SPA				
	Description of breach	Extent	Severity	Permanence	
A2	The farmer has failed to comply with a nature conservation order(Nature Conservation Act s. 23-27)		Low		
A2	The farmer has failed to comply with a land management order (Nature Conservation Act s. 29-36)	On-farm effect or Off-farm effect	or Medium or	Rectifiable or Permanent	
A2	The farmer has failed to comply with a restoration order (Nature Conservation Act s. 40)		High	- crimanent	

	I must not					
31	You must not intentionally or recklessly destroy or damage the special interest features of the area or disturb any fauna that are a special interest feature. (This requirement can apply to actions that take place other than on the SPA itself but which have the same consequences)					
	Description of breach	Extent	Severity	Permanence		
	The farmer has intentionally or recklessly caused damage or destruction of the special interest or disturbance of the fauna (that is also an interest feature of the SPA)					
	You will not break the rules above, if:	On-farm effect	Low			
	 you have a planning permission to carry out the work 	or	or Medium	Permanent		
	 you have consent from a public body or statutory authority that has complied with its duty to consult Scottish Natural Heritage before giving it consent 	Off-farm effect	or High			
	• it is an emergency operation (provided that Scottish Natural Heritage is told as soon as possible after the emergency)					

SMR 3 - Conservation of flora and fauna

The aim of these requirements is to protect species of flora and fauna, if you have land designated as a Special Area of Conservation (SAC)

Breaches of SMR 3 can vary greatly. The Extent, Severity and Permanence of each breach will be assessed individually taking into account all the facts surrounding the breach. SGRPID may require to seek advice from Scottish National Heritage to obtain technical information to decide the categorisation of the breach.

A1	You must notify Scottish Natural Heritage in writing of any proposition order applies (unless covered by the starting that operation.			
	Description of breach	Extent	Severity	Permanence
A1	The farmer has carried out, caused or permitted a specified operation for which no notice / consent has been given.	On-farm effect or Off-farm effect	Low Medium High	Rectifiable or Permanent
A 1	The farmer has carried out, caused or permitted a specified operation on land where a Special Conservation Order (or Nature Conservation Order) applies for which no notice / consent has been given.	On-farm effect or Off-farm effect	Low Medium High	Rectifiable or Permanent
1	The farmer has carried out, caused or permitted a specified operation with notice / consent but has failed to adhere to the terms of the consent.	On-farm effect or Off-farm effect	Low Medium High	Rectifiable or Permanent

A2	A2 You must comply with any nature conservation, management, restoration orders relevant to the purpose of the SAC				
	Description of breach	Extent	Severity	Permanence	
A2	The farmer has failed to comply with a nature conservation order (Nature Conservation Act s. 23-27)		Medium or High	Rectifiable or Permanent	
A2	The farmer has failed to comply with a land management order (Nature Conservation Act s. 29-36)	On-farm effect or Off-farm effect			
A2	The farmer has failed to comply with a restoration order (Nature Conservation Act s. 40)		_		

You must not intentionally or recklessly destroy or damage the protected fauna that are a special interest feature. (This requirer which have the same consequences).			
Description of breach	Extent	Severity	Permanence
 The farmer has intentionally or recklessly caused damage or destruction of the special interest or disturbance of the fauna that are also a special feature of the SAC You will not break the rules above, if: you have a planning permission to carry out the work you have consent from a public body or statutory authority that has complied with its duty to consult Scottish Natural Heritage before giving it consent it is an emergency operation (provided that Scottish Natural Heritage is told as soon as possible after the emergency) 	On-farm effect or Off-farm effect	Low or Medium or High	Rectifiable or Permanent

SMR 4 – Food and Feed Law

The aim of these requirements is to ensure the safe production of food for human consumption and food or feed that is fed to food producing animals (these requirements apply if you are a food or feed producer or keep food producing animals)

A1	You must arrange for unsafe food or unsafe feed to be withdrawn from the market if you believe you have supplied it and inform both your local authority and the Food Standards Scotland (FSS)					
A2	You must destroy unsafe feed unless the competent authority tells you to do otherwise					
A3						
A4	You must arrange for unsafe food or unsafe feed to be recalled if there is no other way of achieving a sufficiently high level of health protection					
	Description of breach	Extent	Severity	Permanence		
A1 A2 A3 A4	Where there has been a feed safety incident and the farmer has not followed the due processes. "Due processes" - procedures to withdraw feed include holding any unused stock and not using it for feed. Recall would include contacting customers receiving non-complying feed. The competent authorities that must be informed of a withdrawal or recall are either the local authority (the trading standards department) or the Food Standards Scotland. Destruction would probably be under the direction of a local authority inspector and would often be as a result of a sample of feed having been tested positive for a contaminant, which breached a statutory maximum permitted level. Other acceptable uses might be considered depending on the case as long as these did not have implications for the food chain (e.g. industrial use)	Off-farm effect The breach might be in relation to a nationwide recall of batches. A farmer must keep records of those they have immediately supplied with a feed but not other parties, which might receive the feed subsequently	Medium – if feed is unlikely to have an adverse affect on animal or consumer health High – if feed is likely to have an adverse affect on animal or consumer health	Permanent		
A5	You must immediately tell both your local authority and the FSS if food which you have supplied, or is in your possession and you intend to sell, could be injurious to health and of the actions you have taken to prevent risks to the final consumer Description of breach Extent Severity Permanence					
	Where there has been a food safety incident and the farmer has not	Extent	Seventy	remanence		
	followed the requirements concerning notification, recall and withdrawal.	On Farm or Off-farm effect	High	Permanent		

	eability						
6	You must put in place systems and procedures related to the traceability of inputs* to your farm. These systems must identify: • The name and address of your supplier						
	 The name and address of your supplier The nature and quantity of the products that were supplied to you The date of the transaction (delivery) 						
	*Inputs are: food, feed, food-producing animals, and any other substance intended/ expected to be incorporated into a feed. Description of breach Extent Severity						
	Traceability of inputs - Key pieces of	On-farm effect Although limited to on-farm the consequences of poor traceability	Low - Information largely available but incomplete (where records can be completed using information available on farm) Medium –Poor or inadequate system of	Permanence			
	information are missing, or information is not kept at all.	systems could affect entire food chain. This would only raise serious implications in the event of a recall/ withdrawal where records were unavailable and there was a serious risk to human health	keeping the required information. (A17 continued on next page)

	Description of breach	Extent	itted maximum residue level (MRL) for the pesticide or medicine used Severity	Permanence
A17	The farmer has placed food on the market that, on analysis of a sample, and taking account of measurement uncertainty, has been found to contain a pesticide residue that exceeds the statutory maximum residue level (MRL) for a pesticide found in the food tested.	On farm or Off farm	 Low - there is approval for the use of a pesticide on the crop, but the MRL set from residues of that pesticide has been exceeded. No safety or health concern arises from the breach of the MRL. High - there is no authorisation for the use of the pesticide concerned on any crops in the UK. There is no authorisation for the use of the pesticide on the crop concerned. Safety concerns arise from the level of pesticide residue found; 	Permanent
A17	The farmer has sold or supplied an animal for slaughter, or has sold/supplied milk, eggs or honey that, on analysis of a sample, has been found to contain residues of authorised veterinary medicinal products that exceed the maximum residue level (MRL) for the medicine used or an unauthorised substance.	Off farm	 Low - The medicine used was a UK authorised product or a product prescribed by a Veterinary Surgeon under the terms of the cascade. However the MRL set for residues of that medicine has been exceeded but complete (re origin of medicine + batch number + identity of animals treated) and contemporaneous medicine records kept show that the withdrawal period for the medicine concerned has been complied with. Medium - The medicine used was a UK authorised product or a product prescribed by a Veterinary Surgeon under the terms of the cascade. However the MRL set for residues of that medicine has been exceeded and complete (re origin of medicine + batch number + identity of animals treated) and contemporaneous medicine records kept show that the withdrawal period for the medicine + batch number + identity of animals treated) and contemporaneous medicine records kept show that the withdrawal period for the medicine concerned has not been complied with. High - The medicine used did not carry UK authorisation and has not been prescribed by a Veterinary Surgeon under the terms of the cascade or the medicine concerned has been prohibited for use in food producing animals or The medicine used was a UK authorised product or a product prescribed by a Veterinary Surgeon under the terms of the cascade but the MRL set for residues of that medicine has been exceeded and there are no complete (re origin of medicine + batch number + identity of animals treated) and contemporaneous medicine records kept to show that the withdrawal period for the medicine concerned has been exceeded and there are no complete (re origin of medicine + batch number + identity of animals treated) and contemporaneous medicine records kept to show that the withdrawal period for the medicine concerned has been complied with 	Permanent

A18 You must take adequate measures to prevent the introduction and spread of contagious diseases transmissible to humans through food.

Which include:

- ensure that all eligible animals conform to national herd / flock health surveillance and testing intervals for Tb
- have a system in place regarding precautionary measures when new animals are introduced on-farm (e.g.; keep separate from rest of herd/flock to verify whether they carry disease or not)
- inform the relevant authority of a disease incident on farm (Note: diseases referred to here are the notifiable zoonotic diseases)
- report indicators of potential outbreaks (abortions) to relevant authorities

	Description of breach	Extent	Severity	Permanence
A18	Failure to ensure that all eligible animals conform to national herd / flock health surveillance and testing intervals for Tb.	On-farm effect or Off-farm effect (i.e. when there has been a food/ feed safety incident)	 Very Low - where testing is overdue by between 1 and 10 days. Low - where testing is overdue by between 11 and 30 days. Medium – where testing is overdue by between 31 and 60 days. High - where testing is overdue by 61 days or more. 	Rectifiable if the animals(s) are still on the farm and the test can still be completed Permanent if the animal(s) have been moved off the farm.
A18	Clear evidence that farmer has no system in place regarding precautionary measures when new animals are introduced on-farm (e.g.; not kept separate from rest of herd/flock to verify whether they carry disease or not)	On-farm effect or Off-farm effect (i.e. when there has been a food/ feed safety incident)	 Medium - where non-compliance has not led to, or can be linked to a food-borne disease with a direct impact on human health. High - where non-compliance has led to, or can be linked to , a food-borne disease with a direct impact on human health 	Permanent
A18	The farmer has not informed APHA of a notifiable disease outbreak	On-farm effect	Medium - where non-compliance has not led to, or can be linked to a food-borne disease with a direct	
A18	Evidence that the farmer has failed to report indicators of potential outbreaks (abortions)	or Off-farm effect (i.e. when there has been a food/ feed safety incident)	impact on human health. 			• *	Ir local authority Permanence		
	Description of breach	Extent	Severity	Permanence		
	Evidence that the farmer is sourcing and/ or using feed from establishments that are not registered/ approved	On-farm effect or Off-farm effect - where there has been a food/ feed safety incident	 Low - feed has been sourced from establishment not registered/approved in accordance with 183/2005 but there has been no contamination or risk to animal health or human health High - feed has been sourced from establishment not registered /approved in accordance with 183/2005 and has led to, or can be linked to, food- borne disease with a direct impact on human health; linked to animal illness death 	Permanent		
20	You must take appropriate remedial action when informed of problems identified during official controls.					
	Description of breach	Extent	Severity	Permanence		
	Farmer has not implemented the remedial action highlighted during previous official controls.	On farm Off farm: where there has been a food/ feed safety incident.	Medium: unlikely to have an adverse effect on human and/or animal health. High: likely to have an adverse effect on human and/or animal health	Permanent		

A21 You must keep records on all of the following areas if they are relevant to your business:

- veterinary medicinal products, or other treatments, administered to your animals; the dates of the treatment and the withdrawal period.
- the results of any analyses carried out on samples taken from food producing animals, plants or other samples taken for diagnostic purposes, that have importance for human health;
- use of plant protection products and biocides.
- any use of genetically modified seeds (in feed production)

Description of breach	Extent	Severity	Permanence
No records kept or records incomplete	On-farm effect	 Low - missing information or errors that can be rectified and a full assessment is possible Medium - sufficient partial records/incomplete records. Only information to allow a partial assessment. High - no records. 	Rectifiable - if records can be corrected. Permanent - if records cannot be corrected.

You	You must not						
Food	Food and feed safety, withdrawal and recall:						
B1	You must not place unsafe food or unsafe feed on the ma	arket.					
	Description of breach	Permanence					
	There is evidence that food that is unfit for consumption and/or injurious to health (for example, mould growth or pest infestation of grain) has been placed on the market and is not to be disposed of or used as feed.	On Farm or Off-farm effect	High	Rectifiable - If products still on farm and no evidence of sales or Permanent			
B2	You must not feed unsafe feed to food-producing animal	S.					
	Description of breach	Extent	Severity	Permanence			
	There is evidence that feed that is held for placing on the market or feed to food producing animals is obviously unsafe e.g. there are visible signs or other evidence of gross contamination such as mould or pest infestation.	On Farm or Off-farm effect	 Medium – Clear visible signs or other evidence of gross contamination, feed has not been fed to animals but producer has failed to take steps to destroy or treat contamination. High – Unsafe feed has been fed to food producing animals resulting in animal deaths or sickness, or food products have become contaminated. 	Rectifiable - If products still on farm and no evidence of sales or Permanent			

DAIR	HYGIENE REQUIREMENTS				
You	must				
A22	 You must The following additional hygiene requirements apply where you are a producer of raw milk and/or colostrum (from any species). You must ensure that raw milk and/or colostrum comes from animals that: are in a good general state of health present no sign of disease that might result in the contamination of milk and/or colostrum and, in particular, are not suffering from any infection of the genital tract with discharge, enteritis with diarrhoea and fever, or a recognisable inflammation of the udder; do not have any udder wound likely to affect the milk and/or colostrum; are not within the prescribed withdrawal period following the administration of authorised products or substances have not been administered with any unauthorised substances or products 				
	Description of breach	Extent	Severity	Permanence	
A22	(BP 1-3) Evidence that milk and/or colostrum from animals showing signs of ill health (as could reasonably be determined by a non-vet, e.g. discharge, inflammation, udder wounds) has been included in the bulk tank.	On Farm or Off-farm effect	Low – where milk is going for heat treatment. Medium – where milk will not be heat treated	Rectifiable - if in tank on farm or Permanent - if found at processors	
A22	(BP 4) Evidence of milk and/or colostrum from treated animals that have not observed the required withdrawal time has been included in the bulk tank	On Farm or Off-farm effect	High	Rectifiable - if in tank on farm or Permanent - if found at processors	
A22	(BP 5) Evidence of milk and/or colostrum from animals treated with an unauthorised substance has been included in the milk tank	On Farm or Off-farm effect	High	Rectifiable - if in tank on farm or Permanent - if found at processors	

A23 As regards to tuberculosis and brucellosis, you must ensure that raw milk and/or colostrum comes from animals belonging to herds which have disease-free status.

Where your herd/ holding is not free from tuberculosis or brucellosis, you may sell milk and/or colostrum from your non-reactor animals if:

- you are selling to a wholesaler who will heat treat the milk and/or colostrum before marketing it for human consumption, or
- the raw milk is from sheep/ goats and is intended to be made into cheese that has a maturation period of at least two months.

Where your herd/holding is not free from tuberculosis or brucellosis, you must ensure that raw milk and/or colostrum from any reactor animal is not placed on the market for human consumption

	Description of breach	Extent	Severity	Permanence
A23	Evidence that milk and/or colostrum from non-reactor animals from herds or flocks that have lost their disease free status has been marketed for human consumption without being pasteurised (e.g. heat treated or the raw milk is from sheep or goats and is intended to be made into cheese that has a maturation period of at least two months)	Off-farm effect	Medium – all situations except where the producer sells raw milk directly to the final customer. High – only if producer retails raw	Permanent
A23	Evidence that milk and/or colostrum from reactor animals has been marketed for human consumption		drinking milk directly to the final customer.	

A24	You must isolate animals that are infected, or suspected of being infected, with tuberculosis and brucellosis must be effective in order to avoid any adverse effect on other animals' milk and/or colostrum					
	Description of breach	Extent	Severity	Permanence		
	Evidence of failure to isolate animals that are infected or suspected to be infected	On farm	 Low – contact with herd mates and milk and/or colostrum has been heat treated High – contact with susceptible livestock on neighbouring holdings and milk and/or colostrum has not been heat treated 	Permanent		

	Description of breach	Extent	Severity	Permanence
	Inadequate location or construction of such premises that is within the farmer's ability to do something about. Evidence that there is a significant risk of contamination occurring due to location of the milking equipment close to hazardous materials and/or due to poor construction and/or practices in maintenance of the milking shed or milk/colostrum storage area	On-farm effect	Very low – where there are minor problems with small risk of contamination Medium – where the problems found show a higher risk of contamination of the milk and/or colostrum	Rectifiable or Permanent
426	 You must ensure that premises used for the storage of m be protected against vermin - including birds and b have adequate separation from premises where ani have suitable refrigeration equipment in order to me 	irds' nests; mals are housed eet the post-milking (cooling rules	
426	 be protected against vermin - including birds and b have adequate separation from premises where ani 	irds' nests; mals are housed		Permanence
A26	 be protected against vermin - including birds and b have adequate separation from premises where ani have suitable refrigeration equipment in order to me 	irds' nests; mals are housed eet the post-milking of Extent On-farm effect Or	cooling rules	
	 be protected against vermin - including birds and b have adequate separation from premises where ani have suitable refrigeration equipment in order to me Description of breach 	irds' nests; mals are housed eet the post-milking of Extent On-farm effect	Medium - gross infestation, inadequate separation or poor refrigeration and milk and/or colostrum is still on farm. The non-compliance is unlikely to lead to a direct impact on human	Permanence

A27	You must ensure the surfaces of equipment that come into contact with milk and/or colostrum (utensils, containers, tanks etc.) are easy to clean, and disinfect where this is necessary.						
	Description of breach	Extent	Severity	Permanence			
A27	The equipment that comes into contact with milk are not constructed of materials conducive to easy cleaning		Low - where there are minor problems with a small risk to human health (or contamination of milk)				
A27	The materials are not made of smooth, washable and non-toxic materials	On-farm effect	Medium - where there is contamination and a risk to human health (or contamination of milk)	Rectifiable			

A28	You must clean (and disinfect where necessary) the surfaces of equipment that come into contact with milk and/or colostrum a maintain in a sound condition.				
	Description of breach	Extent	Severity	Permanence	
A28	Dirty facilities and equipment				
A28	Milk contact surfaces in the milking or storage area are contaminated (e.g stale milk residues, milk stone/mould)	On-farm effect	Low - where there are minor problems with a small risk to human health (or contamination of milk) Medium - where there is contamination and a risk	Rectifiable	
A28	The surfaces of milking equipment intended to come into contact with milk are not in a sound condition		to human health (or contamination of milk)		

A29 You must carry out milking hygienically, especially making sure that:

• before milking starts, the teats, udder and adjacent parts are clean;

• you satisfactorily identify animals undergoing any medical treatment which is likely to transfer residues to the milk and/or colostrum;

• milk and/or colostrum from such animals, or any that are still within the withdrawal period is not used for human consumption

	Description of breach	Extent	Severity	Permanence
A29	Teats and udders not clean before cluster attachment at milking time. Milking routine or facilities are not robust enough for the cleanliness of the animals.	On-farm effect	Low - all situations except where the producer sells raw drinking milk and/or colostrum directly to the final customer	Rectifiable
A29	Animals that are undergoing medical treatment likely to transfer residues to the milk, or are still within the withdrawal period for that treatment are not adequately identified at milking	On-farm effect	High - if producer sells raw drinking milk to the final customer	or Permanent
A29	Such animals are not milked last and with the delivery pipe removed from the bulk tank, or using separate equipment e.g. separate dump bucket and cluster. [if such practices are not followed it could lead to milk obtained from these animals being sold for human consumption]	On-farm effect	High	Rectifiable or Permanent

A30	You must immediately after milking, you must hold milk and/or colostrum in a clean place, designed and equipped to avoid contamination, immediately after milking. The milk must be cooled immediately to: • not more than 8°C if it is collected daily • not more than 6°C if it is not collected daily For the purposes of this requirement it is considered that "immediately" means within a reasonable and practicable time period (2 hours).					
	Description of breach	Extent	Severity	Permanence		
A30	Evidence of inappropriate storage of milk and/or colostrum. Storage facilities are not clean; and do not prevent contamination.	On-farm effect or Off-farm effect (where there has been a food safety incident).	Low – inappropriate storage (no contamination) Medium - dependent upon the levels and location of any contamination and the likelihood of it leading to a direct impact on human health High - dependent upon the levels and location of any contamination and the likelihood of it leading to a direct impact on human health	Rectifiable or Permanent		
A30	Milk and/or colostrum has not been cooled immediately (2 hours) following the end of milking and prior to collection. (NB It may not be practical to cool milk and/or colostrum immediately in all situations) (this can be observed on the tanker dockets and/or by taking temperature of milk or colostrum stored).	On-farm effect -the milk and/or colostrum will not be collected by the buyer or Off-farm effect - where there has been a food safety incident; milk and/or colostrum has left the premises.	 Low - non-compliance is unlikely to lead to a direct impact on human health. Medium - where breach is seen as to be a very recent development and little or no effort is being made to rectify situation High - where it is obvious that the facilities are not in effective operational order or are not suitable for the volume of milk to be stored (extra tanks outside dairies without cooling equipment for example) and no action is being taken to rectify situation 	Rectifiable or Permanent		

ADDITIONAL REQUIREMENTS FOR EGG PRODUCERS

This hygiene requirement relates to all eggs in shell that are produced by farmed birds.

You must

A31 You must While they are on your premises, you must keep eggs clean and dry, free of extraneous odour, effectively protected from shocks and out of direct sunshine

Description of breach	Extent	Severity	Permanence	
Eggs kept in unsuitable conditions. For example close to moving agricultural machinery, in the tractor shed, close to bleach or diesel This hygiene requirement relates to all eggs in shell that are produced by farmed birds.	On-farm effect where eggs have not left the premises Off-farm effect: where there has been a food safety incident; eggs have left the premises	Low	Rectifiable or Permanent	

SMR 5 – Restrictions on the use of substances having hormonal or thyrostatic action and beta-agonists in farm animals

The aim of these requirements is to prohibit the illegal use in stock farming of substances that have a hormonal or thyrostatic action and betaagonists, and to prevent the residues that these substances leave in meat and other foodstuffs from entering the human or animal food chain (they apply to you if you keep farmed animals)

41	You must observe the relevant withdrawal period if your food-producing animals have been given any of the restricted substances in line with the permitted exceptions					
	Description of breach	Extent	Severity	Permanence		
	The farmer has not observed the relevant withdrawal periods where food producing animals have been administered any of the restricted substances.	On farm: if the animal is still present.				
	Currently there are no authorised medicines containing thyrostats for farm animals.	Off farm: where animal has left the	High	Permanent		
	Failure to observe withdrawal periods only applies to slaughtered animals or to live animals from which products (usually eggs and milk) are taken.	holding.				

Description of breach	Extent	Severity	Permanence
Non-maintenance of records of permitted animal treatment with substances with hormonal or beta-agonists to food-producing animals contrary to Regulations 18 (if the administration is by the vet) or 19 (administration is by the farmer) of the Veterinary Medicines Regulations. Assessment of medicines records is often part of the procedure for Animal Health when they inspect farms. Where administration of the substances covered by SMR 5 is permitted under an exception, keeping the records required by the Veterinary Medicines Regulations is also required and failure to do so is a breach of SMR 5. <i>Farmers must keep proof of purchase of all veterinary medicinal products for 5 years. This will include proof of purchase of any treatments relating to SMR 5. Therefore if a farmer has the appropriate proof of purchase but no or an incomplete record of use of an SMR 5 product this may provide evidence of an offence.</i>	On farm effect	 Low: minor omissions in records of administration of SMR 5 substances or mistakes but inspector still able to make an assessment of compliance with withdrawal periods or trace treated animals. Medium: records of administration of SMR 5 substances incomplete - only sufficient for inspector to make a partial assessment of compliance with withdrawal periods or trace treated animals. High: no records of administration of SMR 5 substances – or inspector unable to make an assessment of compliance with withdrawal periods or trace treated animals. 	Rectifiable or Permanent: depending on time lag between suspected treatme and whether farme in possession of al information that we enable him to mak record.

Description of breach	Extent	Severity	Permanence
 The farmer has administered restricted substances with hormonal or thyrostatic action or beta-agonists to food-producing animals Note: some exemptions exist: Authorised veterinary medicinal products (VMPs) containing betaagonists prescribed by a veterinary surgeon may be administered by a vet, or by a farmer under direction of a vet, to equidae and pets. Authorised VMPs containing beta-agonists prescribed by a veterinary surgeon may be administered by a vet by injection to treat or induce tocolysis in cows during calving. Authorised VMPs with a gestogenic, oestrogenic (other than oestradiol 17ß and its ester-like derivatives) or androgenic action prescribed by a veterinary surgeon may be administered by a vet, or by a farmer under direction of a vet, for the synchronisation of oestrus or for the preparation of donors or recipients for the implantation of embryos Note: Evidence for this breach may come from the detection in samples taken from live animals or from samples taken at slaughterhouses. Evidence may also come from the detection or betaagonists Only the farmer's own veterinary surgeon or a UK registered pharmacy acting in accordance with a veterinary prescription should have supplied drugs covered by SMR10. However, obtaining such products from a non-authorised source may not in itself constitute a breach of SMR 5, if it is a UK authorised product and is covered by a prescription. 	On farm Off farm: if the animals have left the farm.	High	Rectifiable: only where animals are found on farm and it can be established that no products have entered the food chain; or Permanent

B2	You must not have substances on your farm that contain beta-agonists to induce to	colysis in cows when calv	ing	
	Description of breach	Extent	Severity	Permanence
	 The farmer is in possession of any substance containing a beta-agonist that may be used for induction purposes in the treatment of tocolysis. Note: Any prescription may not be available in written form on the farm. But the farmer should be able to demonstrate who prescribed the medicinal product and this should be followed up to verify. As farmers are required to keep the proof of purchase of all veterinary medicinal products for 5 years this should be available to identify the supplier of the source of the medication. Some banned substances have legitimate uses as medicines for humans and companion animals. If the inspector is satisfied that any products found are for these purposes, no breach of SMR 5 has occurred. Where illegal possession is suspected or has been established, an assessment will have to be made as to whether illegal administration has also taken place (see above). Inspectors may also have to take into account that medicines may be found that were legally obtained, but have since ceased to be authorised. The continued possession of such products is unlawful. 	On-farm effect	High	Rectifiable - as any illegally possessed products can be seized by an inspector appointed under the Veterinary Medicines Regulations
3	You must not have food producing animals on your farm to which a restricted substa permitted exceptions)			
	Description of breach	Extent	Severity	Permanence
33	- The farmer is in possession of animals with residues in any tissues or body fluids at concentrations that indicate illegal administration to food producing animals of substances with hormonal or thyrostatic action or beta-agonists	On-farm: where it is found that an animal and/or animal products		
33	The farmer is in possession of animals with residues in any tissues or body fluids at concentrations that indicate non-compliance with an authorised SMR 5 product's stated dosing instructions	have left the farm it will be necessary to consider whether a breach has occurred under SMR 5 breach B4 and/or B5.	High	Rectifiable

	Description of breach	Extent	Severity	Permanence	
	The farmer has placed on the market or sent to slaughter for human consumption animals with residues in any tissues or body fluids at concentrations that indicate illegal administration to food-producing animals of substances with hormonal or thyrostatic action or beta- agonists. Certain exemptions apply - see Regulation 9 of SI 1997 No.1729 as amended.	On-farm Off farm: if the animals have left the farm	High	 Rectifiable: in cases where the animals can be prevented from entering the food chain; or Permanent: in cases where the animals cannot be prevented from entering the food chain. 	
5	You must not place on the market meat, or any other animal product, derived from an animal to which any restricted substance has been administered (unless given in line with any permitted exceptions)				
	Description of breach	Extent	Severity	Permanence	
	The farmer placed on the market meat or animal products from animals			Rectifiable: in cases where the produce can still be prevented from entering the food chain;	

SMR 6 – Livestock Identification and Traceability - Pigs

The aim of these requirements is to establish a system for the identification and registration of pigs to facilitate their traceability, in particular in the event of a disease outbreak (they apply to you if you keep pigs)

For cross compliance purposes, you do not need to do anything more than you are already required to do by law for the identification and registration of pigs. The key elements of the pig tracing system, that applies specifically for cross compliance purposes, are listed below. This is a summary only. For a full explanation of your legal obligations, you should refer to the relevant legal provisions.

Requirement 1- Identification of pigs. You must identify your pigs before they leave your holding in one of the following ways:

- For movements out with the UK, to an exhibition, show, semen collection centre, under a walking licence or for breeding purposes where return is intended, pigs must be permanently identified with an approved ear tag or tattoo including unique identifier
- For movements to a market or slaughterhouse, pigs may either be permanently identified with an approved ear tag, tattoo or a slap mark.
- For farm to farm movements of pigs under 12 months old pigs may either be permanently identified with an approved eartag, tattoo, slap mark or a temporary mark which must last at least until the pig reaches its destination.
- Permanent identification that has become illegible or has been lost must be replaced as required.

An animal's identification must not be removed or replaced without authority issued by Scottish Ministers, details of which can be found in the Pig Identification and Registration – Guidance for keepers in Scotland (issued October 2011)

Description of breach	Extent	Severity The highest severity that applies is used. This is dictated by either the number of animals or percentage of animals sampled	Permanence
Evidence that movements have taken place without the required identification	 On farm effect: where pigs are on the holding and should be identified, but are not Off farm effect: where there is evidence that pigs have moved off the holding without being correctly identified 	 Low: Less than 5 pigs or less than 10% of pigs not correctly identified Medium: 5 or more pigs or between 10% and 20% (inclusive) of pigs not correctly identified High: More than 20% of pigs not correctly identified 	Rectifiable or Permanent
Pigs with lost or illegible identification and the identification has not been replaced	 On farm effect: where animals which should have an ear tag or tattoo but do not, are on the holding Off farm effect: where there is evidence that animals which should have had an ear tag or tattoo but did not, have moved off the holding 	Medium: Keeper has failed to comply with a notice, issued at inspection, requiring identification to be replaced and the replacement recorded (if applicable).	Rectifiable or Permanent
Identification has been removed or replaced without authority issued by Scottish Ministers	On farm effect Or Off farm effect	High: where any pig is found to have had permanent identification removed or replaced without authority.	Rectifiable or Permanent

Requirement 2- Record Keeping. You must maintain a separate register for each holding (CPH) that you keep pigs on, make your records available to SGRPID or local authority on request and retain records for a minimum period of three years from the last record entry. You must record

• The holding address including CPH and the name and address of the keeper

You must record details of the movement of pigs on and off your holding within 48 hours of the movement date, including

- The date of the movement
- The number of pigs moved
- The identification of the pigs moved (either temporary mark or identification number, including unique individual identification if applicable)
- The address and CPH number where the pigs were moved from / to

You must record the number of pigs on the holding at least once a year

You must record the details of replacement identification as a result of identification becoming lost or illegible, cross referencing the new identifier to the original identifier (unless the replacement used is identical to the original)

Description of breach	Extent	Severity	Permanence
Failure to keep records or failure to provide the records for inspection.	On farm effect: evidence suggests no pig movements have taken place Off farm effect: evidence suggests pig movements have taken place	High- no verifiable records	Rectifiable or Permanent
Failure to record complete movement details	On farm effect: where the missing information relates to pigs moved onto the holding Off farm effect: where the missing information relates to pigs that have moved off the holding	Records incomplete Very Low: Less than 5 movement records do not have all the required informationLow: 5 to 10 movement records do not have all the required informationMedium: greater than 10 movement records do not have all the required informationMedium: greater than 10 movement records do not have all the required informationMedium: Less than 5 movements are not recordedHigh: 5 or more movements are not recorded	Rectifiable or Permanent
Failure to record the number of pigs on your holding in the register at least once per year	On farm effect	low: Failure to record the number of pigs on the holding in the previous year	Rectifiable or Permanent
Failure to maintain a record of replacement identification	 On farm effect: where the animals are still on the holding Off farm effect: where there is evidence that animals may have moved off the holding 	Medium : Evidence that new identifiers have been inserted but no record of replacement identification has been kept	Rectifiable or Permanent

Requirement 3 - Movement Notification. You must notify Scottish Ministers via the ScotEID database of movements onto and off your holding (except for movements for veterinary treatment). Note where the movement on/off is notified electronically to ScotEID, no movement document is required (except for movement of pigs that are under 12 months old and identified with a temporary mark, or where the pigs are moving to England, Wales or Northern Ireland

For movements off you must provide the following details either prior to the movement or on the day of the movement -,

- Address details, including postcode and CPH number of the holdings from and to which the pigs are being moved (except when the pig is moving to a • show but the holding which it will be moved after the show is not known, notification must take place within 3 days commencing on the day of the move from the show)
- The date of the movement
- The number of pigs moved
- The identification mark of each pig moved •

For movements on you must confirm to ScotEID the following details within 3 days (including day of arrival) of the pigs arriving on the holding -

- Address details, including postcode and CPH number of the holdings from and to which the pigs are being moved •
- The date of the movement •
- The number of pigs moved
- The identification mark of each pig moved ٠
- And where the pig is being moved from a market, the lot number of the pigs being moved

Description of breach	Extent	Severity	Permanence
Failure to notify movements and/or all required information notified to ScotEID	Off farm effect	Movement records Low: Up to 5 movement notifications do not have all the required information Medium: Over 5 movement notifications do not have all the required information No record Medium: Up to 5 movements have not been notified High: Over 5 movements have not been notified	Rectifiable or Permanent
Mandatory information for movements supplied to ScotEID prior to announcement of inspection but outwith legislative deadline	On farm effect	Very Low: Up to 5 movement notifications reported outwith legislative deadline	
	Off farm effect	Very Low: Between 6 and 10 movement notifications reported outwith legislative deadline	Rectifiable
	On farm or off farm effect	Low: 10 or more movement notifications reported outwith legislative deadline	

Requirement 4 – Registration as a keeper of pigs. You must,

- Register your details with your local Animal and Plant Health Agency (APHA) office, as a keeper of pigs, within one month of establishing your holding.
- Notify your local Animal and Plant Health Agency (APHA) office of any change to your details, within one month of the change

Description of breach	Extent	Severity	Permanence
Failure to have up to date details registered with APHA	ff farm effect	Medium : Registration details have not been updated within one month High: No registration	Rectifiable or Permanent

SMR 7 – Livestock Identification and Traceability - Cattle

The aim of these requirements is to establish a system for the identification and registration of cattle to facilitate their traceability, in particular in the event of a disease outbreak. Within this SMR, 'cattle' means all bovine animals.

For cross compliance purposes, you do not need to do anything more than you are already required to do by law for the identification and tracing of cattle. The key elements of the cattle tracing system (CTS), which applies specifically for cross compliance purposes, are listed below. This is a summary only. For a full explanation of your legal obligations, you should refer to the relevant legal provisions and the British Cattle Movement Service (BCMS) Cattle Keeper's handbook.

Eartags

- Each calf born on your holding (or cattle imported from outside the European Union EU) must be double tagged with Scottish Minister approved eartags with the same unique identification code.
- Dairy calves must be tagged with one eartag within 36 hours of birth and within 20 days of birth for the second eartag. Bison calves to be tagged within 9 months of birth or when they are separated from their mother, if this is earlier. Any other calves must be tagged within 20 days of birth, or before they leave the holding, if this is sooner.
- Eartags must not be removed or replaced without permission from Scottish Ministers. Illegible or lost tags must be replaced within 28 days of discovery of the loss, or before the animal leaves the holding, if this is sooner.
- You must not alter, obliterate or deface an eartag.

Cattle passports and registration

- An application must be made for a cattle passport within seven days of a calf being tagged (that is, within 27 days of birth).
- Cattle imported from within the EU, but outside Great Britain, must be registered within 15 days of its arrival on your holding by sending the foreign passport/movement document to BCMS and making an application for a passport.
- Cattle imported from outwith the EU must be registered within 15 days of tagging the animal and no later than 35 days from the animals release from import checks by making an application for a passport to BCMS.
- When cattle are moved, you must ensure that they are accompanied by their cattle passports, which must be completed and signed.
- You must not alter or deface any information entered on a cattle passport in your possession.
- You must produce a signed and valid passport for every animal in your care on request.

Notification

- Births must be notified to BCMS by an application for a cattle passport within seven days of tagging (that is, within 27 days of birth).
- Deaths on your holding must be notified to BCMS within seven days. For all animals send passport back to BCMS.
- Movements of cattle on and off a holding must be notified to BCMS within three days. (Note if your animals move directly from or to a market or (most) abattoirs in Scotland, the movement 'on' and 'off' farm will be electronically transmitted to BCMS on your behalf. It is your responsibility to ensure the market/abattoir will complete the move and movement details accurately and timeously on your behalf).

(SMR 7 continued on next page)

Description of breach	Extent	Severity	Permanence	
Breaches to be assessed in line with the CII discrepancy tables.	On Farm effect or Off Farm effect	Very Low or Low or Medium or High	Rectifiable or Permanent	
Refer to the Cattle Penalty Calculator in the following Section				

Cont.

On-farm registers

• You must keep an up-to-date herd register for your holding, which includes the following appropriate details for each animal: official eartag number; dam's official eartag number; date of birth; sex; date of movements on and off your holding; details of where the animal has moved to or from; breed; date of death.

- For movements, the details of keepers from whom cattle have been sent and to whom cattle are consigned must be recorded.
- The register must be completed within 36 hours of a movement, within seven days of a death and within seven days of a birth in a dairy herd (or within 30 days of the birth of any other calf).
- The register must be kept for 10 years if you are still a cattle keeper, and three years in any other case from the end of the calendar year in which the last entry was made and be available to SGRPID or local authority on request.

Description of breach	Extent	Severity	Permanence	
Breaches to be assessed in line with the CII discrepancy tables.	On Farm effect or Off Farm effect	Very Low or Low or Medium or High	Rectifiable or Permanent	
Refer to the Cattle Penalty Calculator in the following Section				

Penalty procedures for breaches of SMR 7 - Animal Identification and Registration - Cattle

Breaches of cross compliance are assessed against the following criteria -

- Intent whether errors are attributed to negligence or intentional non-compliance
- Extent whether effects are confined to on-farm or off-farm
- **Severity** the highest determined severity level is applied
- **Permanence** whether the errors are rectifiable in a reasonable period of time, or are permanent
- **Repetition** the same CII error found at inspection within a 3 calendar year period

During cattle inspections checks are made to ensure compliance with current regulations. Any area of non-compliance (discrepancy) which is identified is allocated a CII (Cattle Identification Inspection) code.

Each CII error has been allocated a Severity score for Cross Compliance purposes depending on its relative seriousness.

Each CII code has also been defined as having either "On farm" or "Off farm" extent, which is dependent on whether the breach is classed as having a far reaching impact or limited to the farm itself.

The individual codes are also classified according to Permanence as either Rectifiable or Permanent.

Cattle Penalty Calculator

The table below shows the 13 CII codes, their scores, Extent and also the Permanence.

Code	Discrepancy Description	Score	Extent	Permanence
FM	Failure to report movement to CTS within legislative deadline	1	Off farm	Rectifiable
ID	Dam id error (other than space or leading zero issues)	0.3	On farm / Off farm	Rectifiable
LZ	Dam id error (space or leading zeros issues)	0	On farm / Off farm	Rectifiable
NF	Animal details not found in farm records	1	Off farm	Permanent
MV	Movement details incorrectly reported to CTS	0.4	On farm / Off farm	Rectifiable
DB	Registered with an incorrect date of birth	0.7	On farm / Off farm	Rectifiable
NP	Animal found with no passport/COR	1	Off farm	Rectifiable
DD	Failure to report animal death to CTS within legislative deadline	1	Off farm	Rectifiable
NA	Documents present but animal not found	1	Off farm	Rectifiable
OP	Registered with an incorrect sex or breed	0.1	On farm / Off farm	Rectifiable
TG1	Post 1/1/98 animal that has lost both tags but can still be identified by other means.	0.3	On farm / Off farm	Rectifiable / Permanent
TG2	Animal incorrectly tagged for age	1	On farm / Off farm	Rectifiable / Permanent
TG3	Lost a tag but still identifiable (double or single)	0.1	On farm / Off farm	Rectifiable / Permanent
LB	Mandatory information for births supplied to CTS prior to announcement of inspection but outwith the legislative deadline	0.1	On farm / Off farm	Rectifiable
LM	Mandatory information for movements supplied to CTS prior to announcement of inspection but outwith the legislative deadline	0.1	On farm / Off farm	Rectifiable
LD	Mandatory information for deaths supplied to CTS prior to announcement of inspection but outwith the legislative deadline	0.1	On farm / Off farm	Rectifiable

The scores allocated to each discrepancy found are added up, (including multiple errors for a single animal), which is known as the **absolute severity score**.

The absolute severity score is then converted to a **percentage severity score**, which is established by dividing the absolute score by the number of "animals inspected" and multiplying that figure by 100.

These two figures are then assessed against the threshold severity levels listed in the table below and the highest is taken forward in determining the level of financial penalty.

Absolute Severity Table			
Score	Absolute Severity		
0.01 - 1.99	Very Low		
2.00 - 4.99	Low		
5.00 – 10.00	Medium		
10.01 +	High		

% Severity Table			
Score Percentage Severity			
0.01 – 10.00	Very Low		
10.01 – 40.00	Low		
40.01 - 60.00	Medium		
60.01 +	High		

If the inspection result includes at least one 'Off Farm' error then the inspection is considered to have an 'Off Farm' extent.

Similarly, if the inspection result includes at least one 'Permanent' error then the inspection is considered to have a 'Permanent' effect.

The following two examples demonstrate how a breach of CII requirements can result in a cross compliance penalty.

Example 1:

Following an inspection it is determined that:

- 1 animal has died and the death has not been notified to CTS,
- 3 animals moved onto the holding but the incorrect date of movement had been reported to CTS,
- 1 animal present at inspection was discovered to have incorrect dam details recorded on the CTS,
- The number of "animals inspected" (seen and / or record checked) was 66.

The discrepancies identified attracted the following score:

Code	Discrepancy Description	Score	Extent	Permanence
DD	Failure to report animal death to CTS within legislative deadline	1.0	Off farm	Rectifiable
MV	Movement details incorrectly reported to CTS	1.2 (0.4 x 3)	On Farm	Rectifiable
ID	Dam id error (other than space or leading zero issues)	0.3	On Farm	Rectifiable

The Absolute Score is calculated as follows: 1.0 + 1.2 + 0.3 = 2.5

The Percentage is calculated as follows: 2.5 (absolute score) ÷ 66 (animals inspected) = 0.037 x 100 = 3.79%

These scores are assessed against the threshold severity levels. In this example:

Absolute Score: 2.5 = Low Percentage: 3.79% = Very Low

The highest determined severity level is used to calculate the level of penalty. In this example the severity level would be Low. The Extent will be considered as 'Off Farm' as there is one off farm error (DD). The Permanence will be considered as 'Rectifiable'.

In this example the errors found would lead to a $\underline{3\%}$ reduction in payments. Version 2016 2.0

Example 2:

Following an inspection it is determined that:

- 1 animal, still on the holding, had no entry in the farm records,
- 1 animal, still on the holding, did not have its movement onto the holding reported to CTS,
- The number of "animals inspected" (seen and record checked) was 18.

The discrepancies identified attracted the following score:

Code	Discrepancy Description	Score	Extent Animals on the holding (Annex A)	Permanence
NF	Animal details not found in farm records	1	Off Farm	Permanent
FM	Failure to report movement to CTS within legislative deadline	1	Off Farm	Rectifiable

The Absolute Score is calculated as follows: 1.0 + 1.0 = 2.0

The Percentage is calculated as follows: 2.0 (absolute score) ÷ 18 (animals inspected) = 0.11 x 100 = 11.11%

These scores are assessed against the threshold severity levels. In this example:

Absolute Score: 2.0 = Low Percentage: 11.11% = Low

The highest determined severity level is used to calculate the level of penalty. In this example the severity level would be Low.

The Extent will be considered as 'Off Farm' as both errors were off farm (NF & FM).

The Permanence will be considered as 'Permanent' as there is at least one permanent error (NF).

In this example the errors found would lead to a $\underline{3\%}$ reduction in payments.

SMR 8 - Livestock Identification and Traceability- Sheep & Goats

The aim of these requirements is to establish a system for the identification and registration of sheep and goats to facilitate their traceability, in particular in the event of a disease outbreak. They apply to you if you keep sheep or goats.

For cross compliance purposes, you do not need to do anything more than you are already required to do by law for the identification and tracing of sheep and goats. The key elements of the sheep tracing system, that apply specifically for cross compliance purposes, are listed below. These elements do not cover all the legal requirements. For a full explanation of your legal obligations, you should refer to the relevant legal provisions. Summary of these provisions was supplied to you in the booklet titled 'Sheep and Goat Identification and Traceability- Guidance for Keepers in Scotland' in January 2010.

Requirement 1 - Identification of sheep and goats. You must,

- Identify all sheep and goats, born after 7th July 2005, with the correct means of identification within 6 months of birth for intensively farmed animals and 9 months for extensively farmed animals, or before they move off the holding of birth, whichever is sooner.
- Identify animals that are under 12 months of age and are intended for slaughter in the UK before 12 months of age with a single electronic tag showing only the flock mark of the animal. You may choose to use two matching identifiers, with individual numbers, for these animals.
- Identify all other animals born on or after 31 Dec 2009 with two matching means of identification. One means of identification must be electronic. One means of identification must be an ear tag. The second means of identification can be either a matching ear tag, pastern tag, bolus or tattoo.

Description of breach	Extent	Severity - The highest severity that applies is used. This is dictated by either the number of animals or percentage of animals sampled.	Permanence
Animals have not been tagged or have been incorrectly tagged before leaving a holding or reaching the appropriate age	On farm effect - where the animals that have never been tagged or are incorrectly tagged are still on the holding Off farm effect - where there is evidence that animals that have never been tagged or are incorrectly tagged have moved off the holding	 Incorrectly tagged Very Low: Less than 5 animals or up to and including 10% of the animals sampled have been incorrectly tagged Low: 5 or more animals or between 10% and 20% of the animals sampled have been incorrectly tagged Medium: Between 20% and 40% of the animals sampled have been incorrectly tagged High: More than 40% of the animals sampled have been incorrectly tagged Never been tagged Low: Less than 5 animals or up to and including 10% of the animals sampled have never been tagged Medium: 5 or more animals or between 10% and 20% of the animals sampled have never been tagged High: More than 20% of the animals sampled have never been tagged 	Rectifiable or Permanent

Requirement 2 - Replacement of Identification. You must,

- Replace any lost or illegible means of identification within 28 days of discovery or before the animal leaves the holding, if this is sooner.
- You must record, within 48 hours, the date of replacement and the replacement number with cross reference to the previous mark, if known.

You must not,

• Remove or replace official ear tags without permission from the Scottish Government, unless for the purpose of preventing unnecessary pain or suffering to an animal.

Description of breach	Extent	Severity	Permanence
The keeper has not recorded the replacement of identification details	On farm effect: where the animals and are still on the holding Off farm effect: where there is evidence the animals may have moved off the holding	Low: Animals with replacement identification fitted, but the details have not been entered in the replacement identification record. Medium: Animals with replacement identification fitted, but no record of replacement identification has been kept	Rectifiable or Permanent
The keeper has not replaced lost or illegible identification and/or the record of replacement identification has not been maintained.	On farm effect: where the animals are still on the holding Off farm effect: where there is	 Not replaced tags Very Low: Less than 10 animals with missing identification or up to and including 20% of animals sampled Low: 10 or more animals with missing identification or between 20% and 40% of the animals sampled Medium: More than 40% of the animals sampled with missing identification 	Rectifiable or Permanent
	Off farm effect: where there is evidence the animals may have moved off the holding	Record of replacementMedium: Animals with missing / illegible identification are presentat inspection and there are no entries in the record of replacementidentification within the last year.Medium: Keeper has failed to comply with a request, issued atinspection, requiring that they order and fit tags within 28 days.	
Ear tags have been removed or replaced without the permission of the Scottish Government.	On farm effect: where the animals are still on the holdingOff farm effect: where there is evidence the animals may have moved off the holding	High: where any animal is found to have had official ear tags removed or replaced, without permission.	Permanent

Requirement 3 – Record Keeping. You must, Keep up-to-date records, for every holding (CPH) that you use, make your records available to SGRPID or local authority on request and available for a minimum of three years from the last day an animal referred to in the register dies or leaves the holding. Records must contain at least the following details,

- the CPH of the holding;
- the holding address;
- the type of production (e.g. meat, wool, pet)
- the name and address of the keeper.

The following details of the movement of sheep and goats off your holding must be recorded within 48 hours of the event taking place,

- the date of the movement;
- the number of animals moved;
- the destination of the animals;
- the haulier's name and vehicle registration;
- the individual numbers of breeding animals born or identified on or after 31 Dec 2009;
- the flock marks and the number of animals with each flock mark for slaughter animals.

The following details of the movement of sheep and goats on to your holding must be recorded within 48 hours of the event taking place,

- the date of the movement;
- the number of animals moved;
- the origin of the animals;
- the individual numbers of breeding animals born or identified on or after 31 Dec 2009;
- the flock marks and the number of animals with each flock mark for slaughter animals

The following details for each animal born or first identified on or after 31 Dec 2009 must be recorded within 48 hours of the event taking place,

- the identification code of the animal;
- the year of birth;
- the date of identification;
- the breed and genotype if known;
- the month and year of death.

An annual inventory as at 1st January each year must be recorded for each permanent holding (unless the land is within the same crofting township and/or used on a seasonal basis and is less than 5 miles from the main holding) This must be recorded by 1st February.

(SMR 8 requirement 3 continued on next page)

Description of breach	Extent	Severity	Permanence
Failure to keep records or failure to provide the records for inspection.	On farm effect: evidence suggests no animal movements have taken place. Off farm effect: animal movements may have taken place	High- No verifiable records	Rectifiable or Permanent
Failure to record complete movement details (other than individual identifiers via a CCP)	On farm effect: where the missing information relates to animals moved on to the holding Off farm effect: where the missing information relates to animals that have moved off the holding	Movement recordsVery Low: Less than 5 movement records do not have all the required information.Low: 5 to 10 movement records do not have all the required information.Medium: 11 or more movement records do not have all the required information.Medium: 11 or more movement records do not have all the required information.Medium: 12 or more movement records do not have all the required information.Medium: 13 or more movement records do not have all the required information.High: 5 or more movements are not recorded.High: 5 or more movements are not recorded.	Rectifiable or Permanent
Failure to record individual EID or failure to record the number of animals moved with single slaughter tags with different flock / herd marks movement details via a CCP.	On farm effect: where the missing information relates to animals moved on to the holding	 Very Low: less than 5 movement records do not have all the required information. Low: 5 – 10 movement records do not have all the required information. Medium: 11 or more movement records do not have all the required information. 	Rectifiable or Permanent
Failure to record death details of an animal born or identified after 31/12/2009	On farm effect	Very Low: Failure to make individual entries in the record of deaths.Medium: No record of deaths has been kept.	Permanent
Failure to record identification details	On farm effect	Low: Failure to make individual entries in the record of identification. Medium: No record of identification has been kept.	Rectifiable or Permanent

Description of breach	Extent	Severity	Permanence
Annual inventory as at 1st January not recorded by 1st February	On farm effect	Very low: The annual inventory has not been recorded.	Permanent
The number of animals counted on the holding indicates the records are not accurate, taking account of specific farming systems.	On farm effect: evidence suggests difference has not involved live animal movements. Off farm effect: animal movements may have contributed to the difference found.	 The difference between the number of animals expected from the records and counted at inspection is: Low: less than 10% of the flock. Medium: between 10% and 40% of the flock High: more than 40% of the flock. 	Rectifiable or Permanent
Individual identities of home bred animals, present on the holding, are not in the records indicating the record of identification or the record of replacement identification have not been maintained.	On farm effect	 Low: Less than 10% of the animals whose identities are checked are not present in the records. Medium: 10% or more of the animals whose identities are checked are not present in the records. 	Rectifiable or Permanent
Flock marks of purchased animals, present on the holding, are not in the records.	On farm effect	 Low: Less than 5 flock marks of animals whose identities are checked are not present in the records. Medium: Between 5 and 10 flock marks of animals whose identities are checked are not present in the records. High: More than 10 flock marks of animals whose identities are checked are not present in the records. 	Rectifiable or Permanent

SMR 9 - Prevention and control of Transmissible Spongiform Encephalopathies (TSEs)

The aim of these requirements is to minimise the risk posed to human and animal health by certain transmissible spongiform encephalopathies (TSEs). They apply to you if you keep farmed animals

You	ı must					
A1	You must notify the duty veterinary officer of your local Animal ar or carcass in your possession, or under your charge, is infected v					
	Description of breach	Extent	Severity	Permanence		
	The farmer has not notified the APHA of an animal or carcass in his/her possession, or under his/her charge known or suspected of being infected by a TSE.	On-farm effect or Off-farm effect in cases where an animal suspected of being infected have moved off farm	High	Rectifiable: if the animal/carcass can be traced and eliminated. or Permanent		
A2	You must fully comply with any movement restrictions imposed					
	Description of breach	Extent	Severity	Permanence		
	The farmer has failed to comply with movement restrictions imposed	On-farm effect or Off-farm effect in cases where an animals suspected of being infected have moved off farm	High	Rectifiable if the animal/product can be traced and eliminated. or Permanent		
A3	You must fully comply with any order to slaughter and destroy any animal					
	Description of breach	Extent	Severity	Permanence		
	The farmer has failed to comply with the order to slaughter and destroy any animal	On-farm effect or Off-farm effect in cases where an animals suspected of being infected have moved off farm	High	Rectifiable if the animal/product can be traced and eliminated. or Permanent		
A4	You must fully comply with any other notices served by an inspec	ctor				
	Description of breach	Extent	Severity	Permanence		
	The farmer has failed to comply with other notices served by an inspector	On-farm effect or Off-farm effect in cases where an animals suspected of being infected have moved off farm	High	Rectifiable if the animal/product can be traced and eliminated. or Permanent		

A5	You must comply with the inquiry carried out by an inspector to identify all animals at risk						
	Description of breach	Extent	Severity	Permanence			
	The farmer has failed to comply with the inquiry carried out by the inspector to identify all animals at risk.	On-farm effect or Off-farm effect in cases where an animals suspected of being infected have moved off farm	High	Rectifiable if the animal/product can be traced and eliminated. or Permanent			

B1	 You must not feed animal protein, or any feeding stuff that contains animal required sourcing and processing, e.g. it cannot be catering waste): milk, milk-based products and colostrum's eggs and egg products gelatine from non-ruminants hydrolysed proteins derived from non-ruminants or from ruminant liquid milk replacers for unweaned ruminants containing fishmeal, 	hides and skins	th the exception of the	following (subject to
	Description of breach	Extent	Severity	Permanence
	There is evidence that the farmer is feeding animal protein or products containing animal protein to ruminants	On-farm effect or Off-farm effect in cases where animals have moved off since being fed protein	High	Permanent
B2	You must not feed products containing prohibited proteins to any farmed	animals, or mix prohibited	proteins with feed stuf	fs
	Description of breach	Extent	Severity	Permanence
	There is evidence that the farmer is feeding prohibited proteins to farmed animals, or mixing prohibited proteins with animal feeding stuffs 'Prohibited proteins' are gelatine from ruminants and processed animal protein (such as mammalian meat and bonemeal, poultry meal, feather meal)	On-farm effect or Off-farm effect in cases where animals have moved off since being fed protein	High	Permanent

	You must not use restricted proteins to produce feed for non-ruminants			
	Description of breach	Extent	Severity	Permanence
	The farmer is producing feed for non-ruminants which contains restricted proteins and does not have authorisation from the competent authority to do so.		Low - if ruminants not	
	Requirement applies to all farms producing feed using restricted proteins	On-farm effect or	kept	Rectifiable or
	'Restricted proteins' are animal proteins restricted to non-ruminant feed production: fishmeal; blood products; bloodmeal (for feeding to farmed fish); dicalcium phosphate and tricalcium phosphate of animal origin.	Off-farm effect	Medium - if ruminants present	Permanent
ŀ	You must not use feed products containing restricted proteins on a farr	n whore there are rumi	nante procent unless vou ba	ve received registr
	You must not use feed products containing restricted proteins on a farr from the competent authority Description of breach	n where there are rumi Extent	nants present unless you ha	ve received registra

B5	You must not export from the UK any bovine animal born or reared in	n the United Kingdom before 1	August 1996			
	Description of breach	Extent	Severity	Permanence		
	e farmer has exported a bovine animal born or reared in the United ngdom before 1 August 1996. Off-farm effect if animal/product moved off		High	Permanent		
B6	³⁶ You must not place on the market or export any products consisting of or incorporating any material (other than milk) derived from a bovine animal born or reared in the United Kingdom before 1 August 1996.					
	Description of breach	Extent	Severity	Permanence		
	The farmer has placed on the market or exported products consisting of or incorporating material (other than milk or hides tanned according to official protocol) derived from a bovine animal born or reared in the United Kingdom before 1 August 1996.	On-farm effect or Off-farm effect if animal/product moved off	High	Rectifiable: if the animal/product can be traced and eliminated; or Permanent		
B7	You must not place on the market or export first generation offspring fully complying with the documentation requirements and restriction			ats (of any age) without		
	Description of breach	Extent	Severity	Permanence		
B7	The farmer has placed on the market or exported the offspring of a TSE (e.g BSE in Cattle or Scrapie in sheep)	On-farm effect or Off-farm effect if animal/product moved off	High	Permanent		
B7	The farmer has placed on the market/exported semen/embryo/ova without the correct certificate.	On-farm effect or Off-farm effect if animal/product moved off	High	Permanent or Rectifiable - if animal/product can be traced and eliminated.		

B8	8 You must not move any cattle born or reared in the UK before 1 August 1996 from their registered premises unless you have obtained a movement licence from the Animal and Plant Health Agency Specialist Service Centre in Worcester.				
	Description of breach	Extent	Severity	Permanence	
	"The farmer has moved cattle which were born or reared in the UK before 1 August 1996 from their registered premises without obtaining a movement licence from the Animal and Plant Health Agency Specialist Service Centre in Worcester. email: ahspecialistservicecentreworcester@apha.gsi.gov.uk"	On farm or Off farm"	High	Permanent or Rectifiable -if the animal can be traced and eliminated."	

SMR 10 - Restrictions on the use of plant protection products

The aim of these requirements is to ensure that plant protection products (PPPs) are used correctly and to minimise their risk to humans, animals and the environment (they apply to you if you use these products on your land)

You	You must				
A1	 You must use authorised or permitted plant protection products in accordance with ar specified in the authorisation, permit or in any extension of use or on the label of the product as required by the authorisation, permit or extension 		ion which is:		
	Description of breach	Extent	Severity	Permanence	
A1	 The farmer has used an authorised or permitted plant protection product but has not complied with the conditions of authorisation, permit or in any extension of use, e.g. Products not authorised or permitted for use on the crop, land or situation; Products not authorised for method of application; Max. dose/concentration exceeded; Max. number of applications exceeded; Application dates/harvest intervals not observed. 	On-farm effect or Off-farm effect where for example there is	Medium– where the breach is technical in nature or	Permanent	
A1	 The farmer has used an authorised or permitted plant protection product but has not complied with other label conditions e.g. Safe storage (keep out of reach of children, in original containers, protected from frost and stored to prevent environmental contamination) Safe disposal (empty containers disposed of safely and containers not reused) Operator safety (Personal Protective Equipment (PPE) available for use when handling concentrate) General warnings (e.g. extreme care should be taken to avoid spray drift) 		High - where the breach may have consequences for human health or the environment	remanent	

B1	You must not use any plant protection product unless it is authorised			
	Description of breach	Extent	Severity	Permanence
	The farmer has used an unauthorised product and/or a product for which a permit is required (e.g. a product whose authorisation has lapsed, been revoked; an imported product that does not have a permit for use in this country or 'own-use' parallel imports where an equivalent UK label in English is not available).	On-farm effect or Off-farm effect where environmental contamination or residues in foodstuffs arise from illegal use The impact of the use of an illegal product will vary dependent on the product but may pose a risk to human health and or the environment.	High	Permanent

SMR 11 - Welfare of Calves

The aim of these requirements is to protect the welfare of calves by setting minimum standards for their care and husbandry. If you keep calves, they apply to you in addition to the requirements for the welfare of all farmed animals (SMR 13)

Inspector note: Where breaches are referred to as "rectifiable or permanent" this is dependent on the individual circumstances of the breach for the animal(s) concerned. If welfare for individual animals can be improved then this should be regarded as rectifiable where the animal's pain and distress caused cannot be reduced e.g. injury is permanent or animal have to be euthanased then this must be regarded as permanent.

You must						
A1	You must inspect all housed calves at least twice a day, and tho					
	Description of breach	Extent	Severity	Permanence		
	Housed calves have not been inspected twice each day	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable		
			High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent		
	Calves kept outside have not been inspected once each day	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable		
	Calves kept outside have not been inspected once each day	Un-tarin	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent		
A2	You must ensure that each of your calves can stand up, turn aro	und, lie down, re	est and groom itself without difficulty			
	Description of breach	Extent	Severity	Permanence		
	Calf unable to stand up, turn around, lie down, rest and/or groom	On form	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable		
	itself without hindrance/ difficulty	On-farm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent		

Υοι	u must not			
B1	You must not tether your calves			
	Description of breach	Extent	Severity	Permanence
B1	Calf tethered for reasons other than feeding group housed	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
	calves milk/ milk substitute		High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent Rectifiable Rectifiable or Permanent
BI	Calf tethered for longer than one hour at each feed	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
		On-tailin	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	
	Tether prevents calf from lying down, resting, standing up and	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
B1	grooming itself without hindrance		High - where there is unnecessary pain, injury, suffering or distress to animal(s)	
	Tether has caused pain or injury to calf	On-farm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent
B2	You must not muzzle your calves	_	- · · · ·	
	Description of breach	Extent	Severity	Permanence
	Calves are muzzled or evidence that calves have been muzzled		Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
		On-farm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent

B 3					
	Description of breach	Extent	Severity	Permanence	
	Calves over 8 weeks old penned singly, without appropriate veterinary advice	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable	
		On-rann	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent	

You must A3 You must ensure that individual stalls or pens satisfy the minimum width and length requirements and that they have perform the calves to have direct visual and physical contact with each other					
	Description of breach	Extent	Severity	Permanence	
Δ3		On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable	
A3	Pen size too small in either length or width	Un-tarin	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Rectifiable or Permanent	
A3	No perforated walls for individual pens so calves have no direct and/or visual contact with other calves	On-farm	Medium It is unlikely that a breach of this requirement would result in UPUD, hence no "High" rated severity	Rectifiable	

A4	You must ensure that each calf, when kept in a group, has its minimum allowance of unobstructed floor space					
	Description of breach	Extent	Severity	Permanence		
		On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable		
	Unobstructed floor space too small for the weight of the calves	Un-Idilli	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent		

Description of breach	Extent	Severity	Permanence
Flooring is found to be any one or more of not smooth slippery 		Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
 not designed to prevent injury or suffering to calves when standing or lying on it unsuitable for size & weight of calves uneven/ unstable wholly slatted 	On-farm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permane

	Description of breach	Extent	Severity	Permanence	
	Calf does not have access to a lying area which is clean, comfortable and/or well-drained and does not adversely affects it	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)Rectifiable		
		Un-tarm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent	
A7	You must give all calves appropriate bedding			I	
A7	You must give all calves appropriate bedding Description of breach	Extent	Severity	Permanence	
A7		Extent	Severity Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Permanence Rectifiable	

A8	You must for calves kept in an artificially lit building, provide artificial lighting for a period that is at least equal to the period of natural light normally available between 9am and 5pm				
	Description of breach	Extent	Severity	Permanence	
	Inspector observation and/or farmer admission that artificial light provided between 9am and 5 pm for housed animals is not equivalent to natural light during this time	On-farm	Medium	Rectifiable	

A9	You must clean and disinfect housing and equipment used for smells and avoid attracting flies or rodents	or your calves; r	emove dung, urine and left-over food as o	often as necessary to reduce
	Description of breach	Extent	Severity	Permanence
A9	Evidence that cleaning and disinfection procedures are	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
73	inadequate	On-Tarihi	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent
	Evidence that faeces, urine and uneaten or spilt food has not		Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
A9	been removed frequently enough to avoid attracting flies or rodents	On-farm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent
A10	You must feed all weaned calves at least twice a day			L
	Description of breach	Extent	Severity	Permanence
	Column are fed less than twice per day (if not fed ad libiture)	On farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
	Calves are fed less than twice per day (if not fed ad libitum)	On-farm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent

	Description of breach	Extent	Severity	Permanence			
	For feeding systems that are not adlib, or where animals are not fed by an automatic feeding system feeding individually, calves are	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable			
	not able to access the feed at the same time as others in the feeding group	On-harm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent			
A12	You must give all your calves fresh drinking water at all times in hot weather conditions or when they are ill						
	Description of breach	Extent	Severity	Permanence			
	Sick calves do not have continuous access to water This requirement is additional to the general requirement to	On-farm	High	Rectifiable or Permanent			
	provide animals with water in SMR 13						
	In hot weather calves do not have continuous access to water This requirement is additional to the general requirement to provide animals with water in SMR 13	On-farm	High	Rectifiable or Permanent			
A13	You must give all calves food that contains enough iron						
	Description of breach	Extent	Severity	Permanence			
	Clinical anaemia in calves, associated with blood haemoglobin level < 4.5 mmol/l	On-farm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent			

	Description of breach	Extent	Severity	Permanence
	Evidence of no or insufficient fibrous food provision (less than 50g per day per calf at 8 weeks to less than 250g per day per calf at	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
	20 weeks)	High	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent

			High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent
15	You must ensure that each calf receives bovine colostrum as so	oon as possible a	after it is born and within the first six ho	urs of life
	Description of breach	Extent	Severity	Permanence
	Stock keeper does not ensure that calves receive bovine colostrum	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
	within 6 hours of birth	Un-tarifi	High - where there is unnecessary pain, injury, suffering or distress to	Rectifiable or Permanent

SMR 12 - Welfare of Pigs

The aim of these requirements is to protect the welfare of pigs by setting minimum standards for their care and husbandry. If you keep pigs, they apply to you in addition to the requirements for the welfare of all farmed animals (SMR 13).

Note: Where breaches are referred to as "rectifiable or permanent" this is dependent on the individual circumstances of the breach for the animal(s) concerned. If welfare for individual animals can be improved then this should be regarded as rectifiable where the animal's pain and distress caused cannot be reduced e.g. injury is permanent or animal has to be euthanased then this must be regarded as permanent

All pigs

Yo	u must			
A1	You must ensure that each of your pigs is free to turn around w	ithout difficulty at	all times, including while tethered (w	here this is allowed)
	Description of breach	Extent	Severity	Permanence
	Not all pigs can turn around without difficulty at all times If this breach is observed it is likely to be because of inadequate		Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
	tethering arrangements or accommodation – these breaches are detailed below	On-farm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent

1	You must not tether pigs at any time				
	Description of breach	Extent	Severity	Permanence	
	Pig tethered unnecessarily (i.e. not tethered for imminent or recent examination, treatment, operation) The farmer will not be in breach of this requirement if it is for veterinary purposes. In this case any tether must be regularly inspected and adjusted to ensure that it does not cause pain or injury to the pig and allows it to lie down, rest, stand up and groom itself.	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable	
		On-tailin	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanen	
	Tether prevents pig from lying down, resting, standing up and	On form	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable	
	grooming itself without hindrance	On-farm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanen	
	Tether has caused pain or injury to pig	On-farm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanen	

	 see other pigs (unless the pig is isolated for veterinal have enough space to allow all of them to lie down a maintain a comfortable temperature, including the reenvironment known as the 'sweat box system' (B2) B2 You must not keep pigs in high temperature/high humidities 	t the same time	you <u>must not</u> keep pigs in the high tempera

You must

•

A2 You must ensure that the accommodation for your pigs allows them to:

• stand up, lie down and rest without difficulty

harmful to the pigs)

A2	Pig(s) cannot maintain a comfortable temperature; includes	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
/	the use of accommodation defined as the sweat box system	•••••	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent
	locufficient encod for all nice to lie down at the come time	On form	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
A2	Insufficient space for all pigs to lie down at the same time	On-farm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent

}	You must ensure that individual stalls or pens satisfy the minimum size require			
	Description of breach	Extent	Severity	Permanence
	Internal area of stall/ pen is less than the square of the length of the pig; any internal side is less than 75% of the length of the pig			
	The length of a pig is measured from the tip of its snout to the base of its tail while it is standing with its back straight			
	Important: the following circumstances are permitted exceptions and are NOT classed as a breach of requirements for the size of an individual pen:		Medium - evidence of breach but where this has	Rectifiable
	• Those used for holding a female pig for the period between seven days before the predicted day of her farrowing and the day on which her piglets are weaned (including any piglets fostered by her)		not caused unnecessary pain, distress or injury to animal(s)	
	• When keeping a pig in a stall or pen for veterinary purposes.			
	 When keeping a pig in a stall or pen for the purposes of servicing, artificial insemination or collecting semen. 			
	• When keeping a pig in a stall or pen while it is fed.	On-farm		
	 When keeping a pig in a stall or pen for the purposes of marking, washing or weighing it. 			
	• When keeping a pig in a stall or pen while its accommodation is being cleaned.			
	 When keeping a pig in a stall or pen while it is waiting to be loaded for transportation. 		High - where there is unnecessary pain, injury, suffering or distress to	Rectifiable or Permane
	However, the period the pig is kept in this accommodation must not be longer than needed for that purpose.		animal(s)	
	The requirements for a minimum size of stall or pen also do not apply if it is referring to a stall or pen that the pig can enter or leave when it wants. In this case the stall must be entered from another stall or pen where the pig is normally kept and which does comply by the minimum standards			

A4 You must provide flooring, for those pigs kept in buildings, that is:

- smooth but not slippery
- suitable for the size and weight of the pigs
- rigid, even and stable, if there is no litter
- designed so there is no injury or suffering to the pigs standing or lying on it

Description of breach	Extent	Severity	Permanence
Flooring is found to be one or more of: - not smooth - slippery not switchle for size and weight of pige	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
 not suitable for size and weight of pigs uneven/ unstable (when no litter has been provided) not designed, constructed or maintained to prevent injury or suffering to pigs when standing or lying on it. 	Un-rarm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent

A5 You must provide flooring of the correct measurements (for openings and slats) if you use concrete slatted floors. This applies for pigs kept in groups and if your holding has been newly built, rebuilt or brought into use for the first time after 1 January 2003. It will apply to all holdings from 1 January 2013

Description of breach	Extent	Severity	Permanence
Openings are too wide between slats for category of pig This flooring requirement applies only if the holding was newly built,	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
rebuilt or brought into use for the first time after 1 January 2003. (It shall apply to all holdings from 1 January 2013)	Un-tarin	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent
Slat width too small for category of pig This flooring requirement applies only if the holding was newly built,	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
rebuilt or brought into use for the first time after 1 January 2003. (It shall apply to all holdings from 1 January 2013)	Sintaini	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent

Extent	Severity	Permanence
	Medium	
On-farm	There are general lighting requirements under SMR 13	Rectifiable

	fighting that goes beyond normal behaviour		High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent		
A3	You must provide opportunities for the animals to escape and h an age as possible, preferably before, or up to 1 week after, wea		ar pigs if mixing is necessary. This m	ust also be done at as young		
	Description of breach	Extent	Severity	Permanence		
	When pigs are mixed adequate opportunities are not provided for		Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable		
	pigs to escape and hide from other pigs	On-farm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent		

You B1	You must not You must not use tranquilising medication to help with mixing, unless there are exceptional circumstances and is on the advice of a vet					
	Description of breach	Extent	Severity	Permanence		
	Tranquillising medication has been used to facilitate mixing where there are no exceptional conditions and without - or contrary to - consultation with veterinary surgeon	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable		
		Un-farm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent		

SMR 13 – Welfare of Farmed Animals

The aim of these requirements is to protect the welfare of farmed animals by setting minimum standards for their care and husbandry. They apply to you if you keep any species for farming purposes.

Note - Where breaches are referred to as "rectifiable or permanent" this is dependent on the individual circumstances of the breach for the animal(s) concerned. If welfare for individual animals can be improved then this should be regarded as rectifiable where the animal's pain and distress caused cannot be reduced e.g. injury is permanent or animal has to be euthanased then this must be regarded as permanent

	/ou must			
Sta A1	ffing You must ensure that your animals are looked after by enough s	taff who have th	e correct skills and knowledge	
	Description of breach	Extent	Severity	Permanence
	Number of staff available insufficient to prevent welfare problems	On-farm -	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
	occurring		High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent
	 Evidence that stockperson demonstrates lack of professional competence and/ or ability in livestock care, which is not covered by any other specific criteria listed in the schedule For example: Where any animals (other than poultry) are kept in a building and do not have access at all times to, a lying area which either has well-maintained dry bedding or is well-drained); Where animals are kept in a building where the maintenance of 	Ore form	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
	bedding etc. restricts their freedom of movement but US has not been caused. Note: from 2012 these situations will be a breach for cross compliance purposes even without evidence of US. Where US is disclosed in example 2 the breach should be recorded under 7 (freedom of movement)."	On-farm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent
