## 2.2.2 Exclude Land

You may wish to exclude land if it is no longer part of your business. If you are removing land parcels from a location, you can do this by submitting an online LMF or paper LMF to your local RPID office. If you are removing a whole location from your business you can do this on your RP&S account. If you don't have the land removed, the land will be treated as undeclared land that you occupy when we process your claim. This will result in under-declaration penalties being applied to your SAF application where the under-declared area of land linked to your business is greater than 3% of your total declared land area on your SAF application.

**1** Click on the **Land Parcel Identifier** or **Common Grazing Share**  
In this example, we will exclude land parcel NM/00000/00002.

Documents upload into Rural Payment & Services better during quieter periods of system use. It is best to avoid uploading documents nearer the 15 May submission deadline. Ultimately it is your responsibility to ensure that your document(s) has uploaded correctly and that you can see it on your application. If you can't upload your supporting documentation successfully, you will need to make separate arrangements to get it to the Area Office that deals with your business before the SAF submission deadline.

Please note that the PF27 form, notifying the seasonal use of a common grazing share, no longer needs to be uploaded as a supporting document with your application. This change applies from the SAF 2025 onwards. Our system will continue to prompt the requirement, as you still need to have permission from the permanent shareholder to use their share. We will check you hold that permission during an inspection.

From the SAF 2026 year onwards you no longer have to upload EFA maps, showing the location of EFA practices, to the SAF application. You must keep a map(s) in your farm records, and we will ask for the map(s) during a farm inspection.

## 7. Validation Errors

While entering information into your application, the system checks your application for possible errors. When an error is specific to a section, it will appear at the top of that section in a red panel rather than on this screen.

Errors are resolved by either amending your information or by providing a justification reason.

<b>1</b>	<b>General Errors</b> are triggered by information that is not specific to one section All errors must be resolved or justified before you can submit your application
<b>2</b>	Please note there is a <b>scroll bar</b> to allow you to navigate to errors that are not initially visible
<b>3</b>	Each section details how many errors there are within it
<b>4</b>	Use the <b>section navigation bar</b> to the right to resolve errors reported in <b>step 3</b> There are no links to the sections from the headings in step 3. They simply tell you which sections contain errors and you have to navigate to those sections to resolve the errors.
<b>5</b>	If you have amended the application information or justified any of the errors, click the <b>Update</b> button.
