# Section E: Number of animals expected E1 - Has the number of animals expected & found been accepted as verification that the keeper has maintained accurate records? If no, comment below. (if no, SMR 8 breach must be recorded in Annex D). Comments must be entered to explain any difference between figure projected and actually counted. Comment on nature, breed and management of flock and specify whether black loss would be expected on farm. E2 - Was the death rate within reasonable limits for the locality? If no, comment below. No Yes Comments E3 - Was the birth rate within reasonable limits for the locality? If no, comment below. (Comments must be entered to explain how the birth rate was established).

No

Yes

Comments

### **Section F: Physical Inspection**

Sample 1 (An entry in column D, E, F, G or H will require an SMR 8 breach to be recorded (in Annex D). If animals with lost tags are found in the sample, section I must be completed).

### **Section H: General questions**

Use of a Business Warning Letter can be considered if a record has been kept at a business basis rather than per individual holding, first offences only. Enforcement action must be taken where a 'No' answer, to any question, is recorded. If SMR 8 breaches are found, these must be recorded in Annex D.

|  | Yes | No | N/A | Comments |
|--|-----|----|-----|----------|
| H1 - Were records provided for inspection?   |     |    |     |          |
| H2 - Have the holding and keeper details been recorded?                                    |     |    |     |          |
| H3 - Has a record of identification been maintained?                                       |     |    |     |          |
| H4 - Has a record of replacement identification been maintained?                           |     |    |     |          |
| H5 - Has a record of deaths been maintained?   |     |    |     |          |
| H6 - Have complete movement details been recorded for movements ON/OFF the holding?        |     |    |     |          |
| H7 - Have distinct movement records been kept for each holding used?                       |     |    |     |          |
| H8 - Was an annual inventory figure recorded in the holding register or returned to RESAS? |     |    |     |          |
| H9 - Was an annual inventory recorded or returned to RESAS for each holding in use?        |     |    |     |          |
| H10 - Did the annual inventory in the holding register match the return made to RESAS?     |     |    |     |          |
| H11 - Were official approved eartags stored in a safe place?                               |     |    |     |          |

### **Section H: General questions**

|  | Yes | No | N/A | Comments |
|--|-----|----|-----|----------|
| H12 - Were all lost eartags replaced at the inspection? If no, issue a 28 day tagging letter and proforma.   |     |    |     |          |
| H13 - Was animal husbandry/welfare satisfactory? If no, complete a cross compliance referral form and report to APHA.  |     |    |     |          |
| H14 - Were live discrepancies on each holding below 20% at conclusion of inspection?  If no, a movement restriction is required.   |     |    |     |          |
| H15 - Are there signs of any cross compliance breaches, other than those which relate to SMR 8?  If yes, refer to the cross compliance mailbox.  |     |    |     |          |
| H16 - Are any of the SMR 8 breaches discovered at the inspection considered to be intentional?  If yes, gather as much information as possible regarding the intentional breach(es). Discuss your findings with the sheep inspection coordinator and send a report outlining your findings to AIT. |     |    |     |          |

| Section I: Replacement tag policy  |
|--|
| I1 - Was a SMR 8 breach recorded for lost tags or failure to maintain a record of replacement identification?  Yes No If yes, please complete the questions below. |
| 12 - How often does the keeper check their animals for missing official identifiers and what is their replacement tagging procedure?                               |
| Comments (include what the keeper is doing when checking and when - e.g. when gathered for clipping in July)   |
| I3 - What is the keepers explanation for any missing official identifiers discovered at inspection? (e.g. fences/whins/bad batch of tags)                          |
| Comments (bad batch - encourage keeper to feedback issues to tag manufacturer. Request evidence if this was already raised with the tag manufacturer).             |

Dear Keeper

# The Sheep and Goats (Records, Identification and Movement) (Scotland) Order 2009

During the physical inspection of your animals on \_\_\_\_\_sheep were presented with lost official identifiers, as detailed on the enclosed **Official Identification Compliance proforma.** 

Under the above regulations you have an obligation in law to replace lost tags as soon as possible, or at the latest, before the animal is moved from the holding; and no later than 28 days of discovering the loss.

I discussed your replacement requirements with you at the inspection and enclose a **Replacement Tagging summary table** (annex 1) and a **Replacement tagging flowchart** (annex 2) which you may find useful.

You must now take remedial action to ensure your animals are correctly identified.

### What you need to do

You must -

- Re identify these animals within 28 days of the date of the physical inspection.
- Record the date of replacement, the replacement identification number and the previous number (if known) within 48 hours of re identification taking place.
- Sign and date the enclosed 'Official Identification Compliance proforma' and return it to me either by e-mail, fax or post as soon as possible. My contact details are shown at the top of this letter.

I will monitor the Ear Tag Allocation System (ETAS) to check that you order official identifiers within the above timescales.

You should be aware if you do not fit the official identifiers within 28 days of discovery, SGRPID may consider this to be a breach of Statutory Management Requirement 8 (SMR 8) under Cross Compliance. An SMR 8 breach will reduce any Common Agricultural Policy (CAP) support scheme payments due to you in the calendar year of inspection. SGRPID may also take legal enforcement action if appropriate.

## **Annex 1: Replacement Tagging Summary Table**

|  |   | Animal on holding of birth  | Animal not on holding of birth  |
|--|---|---|---|
| Breeding sheep<br>Born after 31/12/2009.   | If one tag is lost or<br>illegible and another<br>tag remains   | Remove the remaining tag and apply two new matching tags. One of these tags must be electronic.  OR  Replace the lost tag with a tag showing the animal's original identity.  Record the replacement in the holding   | Remove the remaining tag and apply two new matching tags which must be red in colour. One of these tags must be electronic.  OR  Replace the lost tag with a tag showing the animal's original identity.  Record the replacement in the holding register.   |
| Original identification:<br>Two matching tags,<br>with five digit individual<br>numbers. One of the<br>tags electronic.  | If both tags are lost or illegible                              | register.  Apply two new matching tags. One of these tags must be electronic.  OR  Apply two matching tags showing the animal's original identity, if known. One of these tags must be electronic.  Record the replacement in the holding register.   | Apply two matching red replacement tags. One of these tags must be electronic.  OR  Apply two matching tags showing the animal's original identity, if known. One of these tags must be electronic.  Record the replacement in the holding register.  |
| Animals less than 12 months of age, intended for slaughter before 12 months of age.  Original identification: Single electronic tag showing only the flock mark. | Tag is lost.  | Apply a new slaughter tag. This tag must be electronic.  Record the replacement in the holding register.  | Apply a <b>red</b> replacement slaughter tag. This tag must be electronic.  OR  If the original flock mark is known, replace with a tag showing the original flock. The tag must be electronic.  Record the replacement in the holding register.  |
| Animals born before 1/1/2010 or goats.  Original identification: Two tags with six digit individual numbers if   | If one tag is lost or<br>illegible and another<br>tag remains   | Remove the remaining tag and apply two new matching tags. One of these tags may be electronic, or matching pairs of conventional tags can be used.  OR  Replace the lost tag with a tag showing the animal's original identity.  Record the replacement in the holding register.  | Remove the remaining tag and apply two new matching tags which must be red in colour. One of these tags may be electronic, or matching red conventional tags can be used.  OR  Apply two matching tags showing the animal's original identity, if known. One of these tags may be electronic, or matching red conventional tags can be used.  Record the replacement in the holding register. |
| born since 1/1/2008.  OR  Single tag either UK baseline or S baseline with six digit individual number. May also have S movement tags showing only flock mark.   | If all tags with<br>individual numbers<br>are lost or illegible | Apply <b>two</b> new matching tags. One of these tags may be electronic, or matching conventional tags can be used.  OR  Apply two matching tags showing the animals original identity, where this is known. One of these tags may be electronic, or matching conventional tags can be used.  Record the replacement in the holding register. | Apply <b>two</b> new matching tags. The tags must be red in colour. One of these tags may be electronic, or matching conventional tags can be used.  OR  Apply two matching tags showing the animal's original identity, if known. One of these tags may be electronic, or matching red conventional tags can be used.  Record the replacement in the holding register.                       |

What to expect at a sheep and goat inspection

Dear Keeper

### Your sheep and goat inspection

This document explains why we need to visit you, what we will do at a sheep and goat inspection and how you can help to make the inspection run smoothly.

### Why we need to visit you

The Sheep and Goat (Records, Identification & Traceability) (Scotland) Order 2009 provides an identification & traceability system for sheep and goats in Scotland. The purpose of the regulation is to help control animal diseases and protect public health.

We inspect 3% of sheep and goat holdings each year to ensure that the regulatory requirements are met and that the information held on the movement database for sheep and goats (ScotEID) is accurate. Inspections are generally unannounced, but as we usually start our inspection checking the holding register and movement documents, you will have time to gather your sheep and goats for inspection.

As part of this inspection, an Active Farmer/Minimum Agricultural Activity check will be undertaken if you are in receipt of any Common Agricultural Policy (CAP) scheme payments.

### What we will do

We will arrive with an inspection pack which includes the details held by ScotEID of movements of sheep and goats off and on to your holding(s).

We will use this pack and check:

- your holding register ("farm records")
- all movement documents in your possession
- at a physical inspection, headcount all your sheep and goats and a sample of eartags on the holding(s) they are located on

When an inspector makes these checks, they will be looking for evidence that you:

- identify your sheep and goats correctly and keep unused eartags safely
- keep your holding register up-to-date
- · maintain a record of identification
- · maintain a record of replacement identification

- inform ScotEID of all movements (on & off) your holding(s) within the required deadlines
- replace missing eartags within 28 days of discovery

When we have completed the inspection we will give you the opportunity to provide written comments on the inspection pack. Once we have entered the results of your inspection on to our computer system we will send you a results letter to summarise your inspection. This letter will explain any problems found and their consequences.

### How you can help

- make the inspecting officer aware of any health and safety risks on your farm and direct the officer around your farm
- make sure the facilities for handling livestock are suitable, well maintained and safe
- gather and present livestock in a safe and secure manner to allow the inspector to confirm the official identification of animals as required by the inspector
- make sure that your records and documents are always up to date, logically laid out, neat and close at hand
- use the ScotEID database to regularly check your movement information is up to date
- replace lost or illegible eartags within 28 days of discovery

There will be situations where on the grounds of animal welfare and/or human health and safety concerns sheep cannot be presented for physical inspection at the time of the RPID inspection. If you are of the opinion that on the grounds of animal welfare and/or human health and safety concerns that some / all sheep cannot be presented for physical inspection explain your concerns to the inspector and propose an alternative date for consideration by RPID.

The Sheep and Goat Identification and Traceability – Guidance for Keepers in Scotland is a comprehensive guide to the requirements for keeping sheep and goats in Scotland and is available online at:
