Example of application that overlaps the boundaries of the Core and Fringe areas
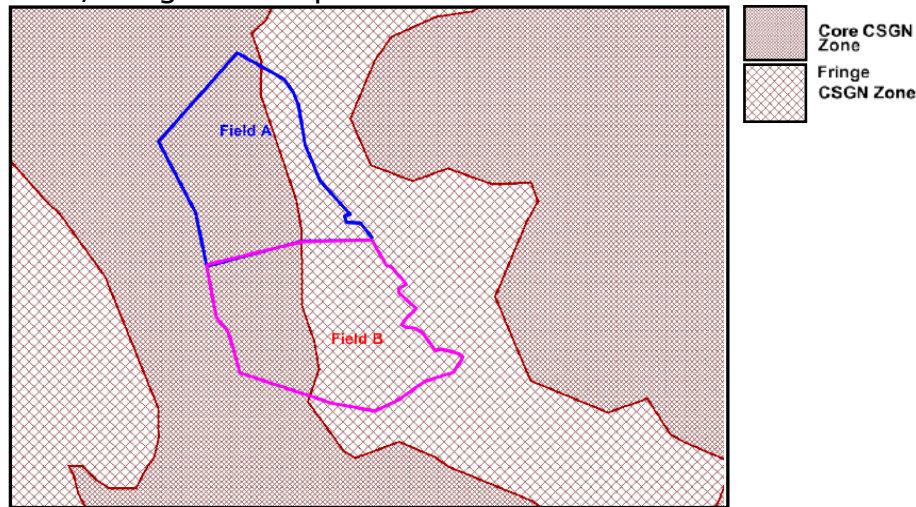

Core/Fringe Overlap

Assuming the whole of each land parcel is to be planted and proposals are eligible for CSGN Contribution, the following rates would apply:

Field A: Total area = 49 Ha (35ha (71%) in Core, 14ha (29%) in Fringe) **= Paid at Core rate**

Field B: Total area = 58 ha (23ha (40%) in Core, 35ha (60%) in Fringe) **= Paid at Fringe rate**

Fields A + B: Total area = 107ha (58ha (54%) in Core, 49ha (46%) in Fringe) **= Paid at Core rate**

In all cases, the CSGN Contribution is capped to 40ha

To check if over 50% of your planting area is within a CSGN Contribution Area, you can use the 'Measure Area' tool in the Map Browser.
