SMR 7 – Livestock Identification and Traceability - Cattle	
SMR 8 - Livestock Identification and Traceability- Sheep & Goats	84
SMR 9 - Prevention and control of Transmissible Spongiform Encephalopathies (TSEs)	92
SMR 10 - Restrictions on the use of plant protection products	97
SMR 11 - Welfare of Calves	99
SMR 12 - Welfare of Pigs	107
SMR 13 – Welfare of Farmed Animals	130

Introduction

As a condition of receiving support scheme payments farmers have to comply with a number of requirements and if a farmer is found to have breached a requirement their payments are reduced, recovered or withheld. The Verifiable Standards tables provide details of the requirements and how breaches are classified in terms of Extent, Severity and Permanence. The classification of a breach, in conjunction with the Penalty Tables, determines the level of penalty that's applied to a support scheme payments. The following annotated table explains the format of the Verifiable Standards and the terms that are used to classify breaches of the requirements.

GAEC 1 -

GAEC 1 – Buffer strips along watercourses

The aim of this is to protect water against pollution and run-off. The requirements restrict storage, application of fertilisers and pesticides and cultivations along water courses

* Severity relates to the shortfall in the buffer strip and the total distance within the business over which the shortfall occurs.

B1	You must not B1 You must not apply organic manure to land situated within: • 10 metres of any surface water or • 50 metres of any well, borehole etc.					
	Description of breach	Extent	Severity *	Permanence		
	The farmer has applied organic manure to land situated within On-farm effect	Application of organic manure (surface water) • Directly entering surface water Medium – up to 50m High – over 50m	Permanent			
	 10 metres of any surface water or 50 metres of any well, borehole etc. 	or Off farm effect	Within 5m of any surface water Very low – up to 50m Low – over 50m up to 250m Medium – over 250m up to 500m High – over 500m	Rectifiable or Permanent if there is pollution		

Between 5 and 10m of any surface water Very low – up to 75m Low - over 75m up to 400m Medium – over 400m up to 750m High – over 750m	
Application of organic manure (borehole)	Rectifiable
Medium - between 25m and 50m High – within 25m	or Permanent if there is pollution

B2A	You must not locate a field heap within: • 10 metres of any surface water or • 50 metres of any well, borehole etc					
	Description of breach	Extent	Severity *	Permanence		
	The farmer has located a field heap within: • 10 metres of any surface water or	On-farm effect	Location of field heap (surface water) Medium – between 5m and 10m of any surface water High – within 5m of any surface water	Rectifiable or Permanent if there is pollution		
	50 metres of any well, borehole etc	Off farm effect	Location of field heap (borehole) Medium – between 25m and 50m High – within 25m	Rectifiable or Permanent if there is pollution		
B2B	You must not allow organic manure from a store on your holding to become located within: 10 metres of any surface water or 50 metres of any well, borehole etc.					
	Description of breach	Extent	Severity *	Permanence		

The farmer has allowed organic manure from a store on your holding has become located within: • 10 metres of any surface water	On-farm effect	Surface water Medium – between 5m and 10m of any surface water High – within 5m of any surface water	Rectifiable or Permanent if there is pollution
50 metres of any well, borehole etc.	or Off farm effect	Any well, borehole etc. Medium – between 25m and 50m High – within 25m	Rectifiable or Permanent if there is pollution

В3	You must not apply a chemical fertiliser (that doesn't co surface water, taking into account:	ntain nitrogen) to any land if there is a significant risk of the fe	tiliser entering	
	the slope of the land, particularly if greater than	12 degrees			
	any ground cover				
	the proximity of the land to any surface water				
	weather conditions				
	the type of fertiliser being applied				
	Description of breach	Extent	Severity *	Permanence	

The farmer has applied chemical fertiliser that doesn contain nitrogen (e.g. P and K only) to land, with a significant risk of the fertiliser entering surface water taking into account: • the slope of the land, particularly if greater that 12 degrees • any ground cover • the proximity of the land to any surface wate • weather conditions* • the type of fertiliser being applied *Applying chemical fertiliser to land which is waterlogged or flooded or has been frozen for 12 hours or longer in the preceding 24 hours or covered in snot is consider to pose a significant risk of fertiliser entering surface water.	On-farm effect or Off farm effect	Risk of entering surface water - Low – if the risk is low Medium – if the risk is medium High – if the risk is high	Permanent
--	-----------------------------------	--	-----------

B4	You must not apply a nitrogen fertiliser to land if there is a significant risk of the fertiliser entering surface water, taking into account: • the slope of the land, particularly if greater than 12 degrees • any ground cover • the proximity of the land to any surface water • weather conditions • the type of fertiliser being applied					
	The farmer has applied nitrogen fertiliser to land, with a significant risk of the fertiliser entering surface water taking into account: • the slope of the land, particularly if greater than 12 degrees • any ground cover • the proximity of the land to any surface water • weather conditions* • the type of fertiliser being applied	On-farm effect or Off farm effect	Risk of entering surface water - Low – if the risk is low Medium – if the risk is medium High – if the risk is high	Permanent		
	*Applying nitrogen fertiliser to land which is waterlogged or flooded or has been frozen for 12 hours or longer in the preceding 24 hours or covered in snow is consider to pose a significant risk of nitrogen entering surface water.					

B5	You must not cultivate land or directly apply pestici apply	des within two m	eters of the top of the bank of any surface water, un	less exemptions
	Description of breach	Extent	Severity *	Permanence
th			 Cultivations Directly resulting in soil entering surface water Medium – up to 50m High – over 50m 	Permanent
	The farmer has cultivated land within two metres of the top of the bank of surface water, and the following exemptions do not apply; — Creating a green cover where one does not already exist — Establishing a new hedge		Within 1m of the top of the bank Very low – up to 50m Low – over 50m up to 250m Medium – over 250m up to 500m High – over 500m	Rectifiable or
			Between 1m and 2m of the top of the bank Very low – up to 75m Low – over 75m up to 400m Medium – over 400 up to 750m High – over 750m	Permanent if soil enters surface water
		Off farm effect	Applications of Pesticide	
	The former has applied posticides within two metros		Pesticides directly entering surface water Medium – up to 50m High – over 50m	Permanent
B5	The farmer has applied pesticides within two metres of the top of the bank of surface water, and the following exemptions do not apply; — Controlling injurious weeds, invasive species and, after prior written consent		Within 1m of the top of the bank Very low – up to 50m Low – over 50m up to 250m Medium – over 250m up to 500m High – over 500m	Rectifiable or Permanent if
	certain other weed species		Between 1m and 2m of the top of the bank Very low – up to 75m Low – over 75m up to 400m Medium – over 400 up to 750m High – over 750m	there is pollution

GAEC 2 – Abstraction of water for irrigation

The aim of these rules is to protect water resources by licensing abstraction of water for irrigation

You must comply with the authorisation process water involved: If you abstract less than (<) 10 cubic metres of means there is no requirement to contact the	f water each day you have	e to follow General Binding Rule 2 (GBR 2). (Complying with GBR
Description of breach	Extent	Severity	Permanence
The farmer does not have an irrigation licence	On farm effect or Off farm effect	Low - Failure to have an appropriate valid registration at the time of abstraction. Medium - Failure to have an appropriate valid simple licence at the time of abstraction. High - Failure to have an appropriate valid complex licence at the time of abstraction.	Rectifiable or Permanent

A2	You must comply with all the conditions of a water abstraction licence. Some of the conditions relate to: abstraction sites abstraction periods maximum daily abstraction volumes submitting an annual data return even if you don't abstract any water Description of breach Extent Severity Permanence					
		On farm effect	Very low - (warning letter, 0% penalty) for failing to submit a complete record of the volumes of water abstracted under the licence	Rectifiable		
	The farmer has failed to comply with the conditions of an abstraction licence.	On farm effect or Off farm effect	Very low – Failure to comply with the conditions of a licence. Potential impact assessed as Category 4 (see below). Low - Failure to comply with the conditions of a licence. Potential impact assessed as Category 3 (see below). Medium - Failure to comply with the conditions of a licence. Potential impact assessed as Category 2 (see below). High - Failure to comply with the conditions of a licence. Potential impact assessed as Category 1 (see below). High - failure to comply with any condition set in a Notice issued under the Water Environment (Controlled Activities) (Scotland) Regulations 2005 (as amended).	Rectifiable or Permanent if there is an environmental impact		

GAEC 2: Abstraction of water for irrigation – categories for assessing the potential impact on the environment. Category 4 – considered to have no potential environment impact. Category 3 – considered to have the potential to have a minor environmental impact. Category 2 – considered to have the potential to have a significant environmental impact. Category 1 – considered to have the potential to have a major environmental impact.

GAEC 3 – Protection of groundwater against pollution

The aim of these rules is to protect groundwater against pollution

Υοι	You must					
A1	You must ensure that a licence is in place to allow or carry out a disposal of list I and list II substances, such as waste sheep dip and/or pesticide washings to land.					
	Description of breach	Extent	Severity	Permanence		
	The farmer has carried out or permitted unauthorised disposal of list I or list II substances, such as waste sheep dip or pesticide washings	On-farm effect or Off-farm effect	High	Permanent		

A2	You must comply with the conditions of any as waste sheep dip and/or pesticide washing		SEPA to allow or carry out a disposal of list I and list II substances, s	such
	Description of breach	Extent	Severity Perman	anence
	The farmer has failed to comply with the conditions of the CAR authorisation.	On-farm effect or Off-farm effect - if disposals relate to unsuitable sites	Records Low - Incomplete records (minor omissions but a full assessment is still possible Rectif	ifiable
			Records High - No records or incomplete records which prevent a full assessment Perma	anent
A2			Maximum volume exceeded - Very Low - the excess can be accommodated by a variation to the disposal volume on the existing site Medium - the excess cannot be accommodated without adding a new disposal site High - the excess cannot be accommodated by adding a new disposal site	
			The number of permitted disposals on authorised sites has been exceeded – Very Low - The existing disposal site can be sub divided to accommodate the additional disposals Medium - At least one new disposal site has to be added to accommodate the additional disposals	anent
			Disposal on an unauthorised site – Medium - the disposal site is suitable and can be added to the authorisation High - The disposal site is not suitable	

A2	The farmer has failed to comply with the conditions of a Notice served under The Water Environment (Controlled Activities) (Scotland) Regulations 2011 in relation to List I and List II substances. Failure to comply with a notice issued in relation to a groundwater activity will usually be regarded as intentional but may depend on the nature of the failure; e.g. recipient has tried to comply but has not done so word for word.	On-farm effect or Off-farm effect	Medium High - SEPA description of major pollution incident	Permanent
B1	You must not carry out or permit an activity List II substances from any non-disposal act		ause pollution of groundwater by an indirect or direct discha	arge of List I or
	Description of breach	Extent	Severity	Permanence

GAEC 4 – Minimum soil cover

The aim of this rule is to protect soil against erosion after harvest until the end of winter ('winter' is up to and including the last day of February)

You must The land after harvest must be covered by the stubble of the previous crop, by another crop or by grass unless: agronomic or weather conditions are such that cultivating land would be detrimental to the use for the land for agricult production the land is being prepared for sowing the subsequent crop. Secondary cultivations and final seed beds must only be colose to sowing				
	Description of breach	Extent	Severity	Permanence
	 Soil erosion has occurred or there is a high risk of soil erosion because after harvest land is not covered by the stubble of the previous crop, by another crop or by grass The farmer will not break this rule where; agronomic or weather conditions are such that cultivating land would be detrimental to the use of the land for agricultural production or the land is being prepared for sowing the subsequent crop. Secondary cultivations and final seed beds must only be created very close to sowing 	On farm effect or Off farm effect	Low - up to 5ha Medium - more than 5ha up to 10ha High - more than 10ha.	Rectifiable – if there is a high risk of erosion Permanent – erosion has occurred

GAEC 5 – Maintain land management reflecting site specific conditions to limit erosion

The aim of these rules is to protect soil against erosion in certain situations

Description of breach	Extent	Severity	Permanence
		Very Low – limited erosion confined to occasional sites.	Rectifiable – Warning letter to be issued detailing follow up action require and the time in which this has to be completed. Timescales for follow up action should be kept to a minimum to ensure the effectiveness of the control.
The farmer has caused significant soil erosion by failing to limit overgrazing, heavy trampling or heavy poaching by livestock.	or Off farm effect Off farm effect	Low – moderate erosion identified across multiple sites where the banks of water courses etc. have predominately shallow sloping sides.	
		Medium – moderate erosion identified across multiple sites where the banks of water courses etc have predominately steeply sloping sides.	Permanent

	High – severe erosion identified at single or multip sites.	•
--	---	---

Description of breach	Extent	Severity	Permanence
The farmer has not put in place appropriate measures to limit soil erosion, when agronomic or weather conditions have prevented the subsequent crop or a cover crop from being sown.	On farm effect or Off farm effect	Low - up to 5ha Medium - over 5ha up to 10ha High – over 10ha.	Rectifiable – if there is a high risof erosion Permanent – erosion has occurred

GAEC 6 – Maintenance of soil organic matter

The aim of these rules is to maintain soil organic matter levels

	-						
You	must						
A1	You must comply with the requirements of the Muirburn code as they relate to the maintenance of soil organic matter. The following would be considered to be a breach of the requirements: • leaving a fire unattended • being unable to control a fire or having not made provision for its proper control • causing damage to any woodland						
	Description of breach	Extent	Severity	Permanence			
	The farmer has not followed the requirements of the Muirburn code. Whereby - • the fire has been left unattended • the fire has not been able to be controlled or no provisions were made for its proper control • the fire has caused damage to woodland	On farm effect or Off farm effect	Low – unintentional burning up to 10ha Medium - unintentional burning over 10ha up to 50ha High - unintentional burning over 50ha.	Permanent			
You	You must not						
B1	You must not burn arable stubble except for reasons other to	han plant disease or pe	est control				
БТ	Description of breach	Extent	Severity	Permanence			
	The farmer has burned arable stubble (the farmer will not break this rule if he has carried this out for the purposes of plant disease or pest control)	On farm effect or Off farm effect	Low - burning up to 1ha Medium - burning more than 1ha up to 5ha High - burning over 5ha.	Permanent			
B2	You must not plough rough grazing or other semi-natural are	eas unless approved as	part of an Environmental Impact	Assessment (EIA)			
DZ	Description of breach	Extent	Severity	Permanence			
	The farmer has ploughed up rough grazings and other seminatural areas without approval under the Environmental Impact Assessment (Agriculture) (Scotland) Regulations 2006	On farm effect or Off farm effect	Low - ploughing up to 1ha Medium - ploughing over 1ha up to 5ha High - ploughing over 5ha.	Permanent			

GAEC 7 – Retention of landscape features

The aim of these rules is to protect landscape features

1 Y	 drystane or flagstone dykes; ponds, watercourses or; turf and stone-faced banks; 	walls;hedges;	line, in a group or isolated).	
	nsecurely rooted and are likely to cause a danger	by falling over	for livestock or farm machinery or fell trees that are dead, dis	
	Description of breach	Extent	Severity	Permanence
fe	he farmer has removed or destroyed a landscape eature without written consent of the Scottish linisters	On farm effect or Off farm effect	Dykes, banks, walls, hedges and watercourses Low - up to 100m of feature affected. Medium – over 100m up to 500m of feature affected. High - over 500m of feature affected. Ponds Medium – one pond. High – two or more ponds.	Rectifiable or Permanent if the feature can't be reinstated by reasonable means.

Low – two or fewer tree have been felled. Medium – three to five trees have been felled. High – more than five trees or at least one tree with a tree preservation order (TPO) has been felled. Perm mature	ifiable or anent if e tree(s) een felled.
--	---

Description of breach	Extent	Severity	Permanence
The farmer has carried out hedge trimming and/or lopped branches off trees between 1 March and 31 August (inclusive) and the following exemptions do not apply; — Road safety (prevent danger to or the passage of vehicles, pedestrians and horse riders on farm tracks and areas of public access) — The hedge or tree is cut in August and the hedge or tree is in a field which will be sown with one of the following crops in that month: o oilseed rape grass another crop subject to prior written consent of the Scottish Ministers.	On farm effect Or Off farm effect	Hedges Low – up to 750m Medium - over 750m up to 1500m High – over 1500m Trees Low – three or fewer trees cut Medium – four to six trees cut High – more than six trees cut	Rectifiable or Permanent if there is evidence nests have been destroyed or birds have beer disturbed

* Severity relates to the shortfall in the buffer strip and the total distance within the business over which the shortfall occurs.

В3	You must not cultivate land or apply fertilisers	or pesticides wit	hin two metres of the centre line of a hedge, unless the	exemptions apply
БЗ	Description of breach	Extent	Severity*	Permanence
В3	The farmer has cultivated land within 2m of the centre line of a hedge, and the following exemptions do not apply; — Creating a green cover where one does not already exist — Establishing a new hedge	On farm effect	 Within 1m of the centre line Very low – up to 100m Low – over 100m up to 500m Medium – over 500m up to 1000m High – over 1000m Between 1m and 2m of the centre line Very low – up to 150m Low – over 150m up to 750m Medium – over 750 up to 1500m High – over 1500m 	Rectifiable or Permanent if there is evidence the hedge has been damaged
В3	The farmer has applied pesticides within 2m of the centre line of a hedge, and the following exemptions do not apply; — Establishing a new hedge — Controlling injurious weeds, invasive species and, after prior written consent certain other weed species	Off farm effect	 Applications of pesticides Within 1m of the centre line Very low – up to 100m Low – over 100m up to 500m Medium – over 500m up to 1000m High – over 1000m Between 1m and 2m of the centre line Very low – up to 150m Low – over 150m up to 750m Medium – over 750 up to 1500m High – over 1500m 	Rectifiable or Permanent if there is evidence the hedge has been damaged

(B3 continued on next page)

В3	The farmer has applied fertilisers within 2m of the centre line of a hedge, and the following exemptions do not apply; — Establishing a new hedge	On farm effect Or Off farm effect	Within 1m of the centre line Very low – up to 100m Low – over 100m up to 500m Medium – over 500m up to 1000m High – over 1000m Very low – up to 150m Low – over 150m up to 750m Medium – over 750 up to 1500m High – over 1500m Medium – over 1500m High – over 1500m	Rectifiable or Permanent if there is evidence the hedge has been damaged
B4	Scheduled Monument Consent (SMC)		nument without prior written consent of the Scottish Minister	
	Description of breach	Extent	Severity	Permanence
	The farmer has altered, damaged and/or destroyed any SAMs without prior consent of the Scottish Ministers (known as Scheduled Monument Consent (SMC)	On farm effect or Off farm effect	Low – SAM altered or damage caused but does not affect integrity of SAM and can be rectified. Medium - Permanent damage caused but does not affect integrity of SAM. High - Damage affected the integrity of the SAM.	Rectifiable or Permanent

SMR 1 – Protection of water in Nitrate Vulnerable Zones (NVZ)

The aim of these requirements is to reduce pollution of water caused or induced by nitrates from agricultural sources and to prevent further pollution from arising. They apply if you farm land within a Nitrate Vulnerable Zone NVZ).

41	You must prepare an annual Fertiliser and Man	ure Management	Plan by 1 st March							
	Description of breach	Extent	Severity	Permanence						
4 1	The farmer has not prepared a plan by 1 st March	On-farm effect or Off-farm effect	High	Permanent						
\1	The farmer has not completed a storage calculation (where required)	On-farm effect or Off-farm effect	High	Permanent						
A1	obvious sign of pollution and other not breached as a result High - Organic manure applied and occurs as a result, or other AP rule as a result		Medium - Organic Manure applied but no obvious sign of pollution and other AP rules not breached as a result	Rectifiable						
			On farm official	On form effect	On form official	On form offset	On form offset	On form offect	On-farm effect	On form offset
	for organic manures (if applied on farm) or The farmer has carried out an inaccurate risk assessment for organic manures	Or Off-farm effect	Very low - Risk assessment completed, but wrongly assessed (No actual pollution or breach of AP occurred as a result)	Rectifiable						
			High - Risk assessment completed, but wrongly assessed (Actual pollution or breach of AP occurred as a result)	Permanent						

ont	Description of breach	Extent	Severity	Permanence
			Very low - Nmax calculated incorrectly, nitrogen already applied to the crop type but does not exceed actual Nmax. i.e. Crop type nitrogen fertiliser programme is complete or Nmax for crop type is never likely to be exceeded	Rectifiable
The farmer has completed an incorrect Nmax calculation for a crop type	On-farm effect or	Low - Nmax calculated incorrectly, nitrogen already applied to the crop type but does not exceed actual Nmax. Crop type nitrogen fertiliser programme is not complete. i.e. further nitrogen fertiliser applications are required for crop type or is likely to exceed the Nmax limit for a crop type	Rectifiable	
		Off-farm effect	Low - Nmax calculated incorrectly and nitrogen already applied to the crop type is up to 5% in excess of the Nmax limit.	
			Medium - Nmax calculated incorrectly and nitrogen already applied to the crop type is over 5% and up to 15% in excess of the Nmax limit.	Permanent
			High - Nmax calculated incorrectly and nitrogen already applied to the crop type is over 15% in excess of the Nmax limit.	

A 2	You must prepare a fertiliser and manure plan an areas of farm & fields, soil types, quantity of nitrogen fertiliser applied to each type & date of crop sown, type and date of each application of nitrogen number of livestock, their species and type quantity type and nitrogen content of livest the person receiving it; quantity, type and nitrogen content of organ address of the supplier; and the quantity and type of chemical fertilisers. The occupier must retain these records for a peri	ch crop, en fertiliser to crops, e, and length of time kept of tock manures retained and stock manures moved off the nic manures imported moves s brought onto, used and re	n the farm, used on the farm, ne farm, the date of the movement an red onto the farm, the date of the mo etained on farm.	vement and the name and
	Description of breach	Extent	Severity	Permanence
	The farmer has no records or missing essential elements - unable to determine compliance with specific requirements of the Action Programme	On-farm effect or Off-farm effect	High	Permanent
A 3	Storage of livestock manure • You must have sufficient storage to meet apply.	the minimum stage require	ements for your farm, taking into acc	ount any exclusions which

Description of breach	Extent	Severity	Permanence
The farmer has insufficient storage to meet the minimum requirements	On-farm effect or Off-farm effect	High	Permanent

A4	You must comply with closed period restrictions for	chemical and organic n	itrogen fertilisers			
	Description of breach	Extent	Severity	Permanence		
A4	The farmer has applied organic manures with high available N content during the relevant closed period.	On-farm effect or Off-farm effect	High	Permanent		
A4	The farmer has applied chemical nitrogen fertiliser during the relevant closed period.	On-farm effect or Off-farm effect	High	Permanent		

A4	The farmer has applied livestock manure to any area of the farm within 3 weeks of a previous application	On-farm effect or Off-farm effect	Low - No Risk of pollution to the water environment Medium - Risk of Pollution to water environment or on an area which should be designated as high risk for livestock manure application	Permanent
A4	The farmer has exceeded the Quantitative Restrictions either side of the closed period	On-farm effect or Off-farm effect	Medium	Permanent
A4	The Farmer has applied Organic Manure with high available N content to bare ground or stubble during July, August or September and crop not sown within 6 weeks of the first application (subject to general compliance with the closed periods)	On-farm effect or Off-farm effect	Very low - No crop sown but able to demonstrate intention to sow and was prevented by severe weather conditions Medium - Crop sown late, unable to justify late sowing of crop due to severe weather conditions following application High - Crop not sown, unable to demonstrate intention to sow crop (no seed on farm or invoice to support intention to sow)	Permanent

Δ	\5	You must maintain the structural integrity of manure and silage effluent stores and provide appropriate facilities at stores to prevent pollution of the water environment				
		Description of breach Extent Severity Permanence				
		The farmer's existing storage facility for manure or	On-farm effect	Medium – No actual pollution of water Environment	Permanence Rectifiable	
A	\ 5	The farmer's existing storage facility for manure or silage has structural defects or is leaking	or Off-farm effect	High – Actual pollution of water environment occurring, has occurred	Permanent	

	The farmer is storing silage (except wrapped or bagged silage) in a facility that does not have an impermeable base, or does not have facilities for collecting run-off. OR	On-farm effect or Off-farm effect	Medium – No actual pollution of water Environment	Rectifiable
A5	The farmer's permanent storage facility for livestock manure (other than slurry) is either: • not sited on an impermeable surface • on impermeable surface but not covered by waterproof covering, or • does not have collection facilities for collecting runoff etc		High – Actual pollution of water environment occurring, has occurred	Permanent
A6	You must comply with farm and field based limits			
	Description of breach	Extent	Severity	Permanence
			Serency	1 ominanono
A6	The whole farm limit for livestock manure N breached	On-farm effect or Off-farm effect	High	Permanent
A6	The whole farm limit for livestock manure N breached The Individual field limit for organic manure, other than compost, breached	On-farm effect		

Υοι	You must not					
B1	You must not apply slurry with a raised splash plate (except on growing arable crops)					
	Description of breach	Extent	Severity	Permanence		
	The farmer has applied slurry with raised splash-plate spreader (except on growing arable crops)	On-farm effect or Off-farm effect	Low or High – if pollution has occurred	Permanent		

B2	You must not inappropriately use or locate field middens				
	Description of breach	Extent	Severity	Permanence	
		On-farm effect	Very low – No actual pollution of water environment		
B2	The farmer has temporary field heap containing non-solid manure		High – Actual pollution of water environment occurring or has occurred	Permanent	
DO.	The farmer has stored neat poultry manure in temporary field	On-farm effect	Medium – No actual pollution of the water environment	Rectifiable	
B2	heap without an impermeable cover	or Off-farm effect	High – Actual pollution of water environment occurring or has occurred	Permanent	

(B2 continued on next page)

B2	You must not inappropriately use or locate field middens			
cont	Description of breach	Extent	Severity	Permanence
B2	The farmer has located a field heap within 10 metres of any surface water or 50 metres of any well, borehole etc	On-farm effect	Location of field heap (surface water) Medium – between 5m and 10m of any surface water High – within 5m of any surface water	Permanent
<i>5</i> 2	Or on any other site that is a high risk or no spreading area		 Location of field heap (borehole) Medium – between 25m and 50m of a borehole High – within 25m of a borehole 	Permanent
	The former has not used the contents of a temperary field	On-farm effect	Very low - (if very low risk of pollution and the heap is identified on the RAMS map to confirm this).	
B2	The farmer has not used the contents of a temporary field heap within 12 months of manure first being placed there	or Off-farm effect	High – (if high risk of pollution, and/or the heap is not identified on the RAMS map so low risk cannot be verified)	or Permanent (if pollution has
B2	The farmer has created a temporary field heap on the site of a previous heap within 24 months	On-farm effect or Off-farm effect	Very Low	Rectifiable

	Description of breach	Extent	Severity	Permanence
ВЗ	The farmer has applied Nitrogen fertiliser in an inaccurate manner.	On-farm effect or Off-farm effect	Low or High — if pollution has occurred	Permanent
ВЗ	The farmer has applied Nitrogen fertiliser to land when: • the soil is waterlogged or the land is flooded the soil has been frozen for 12 hours or longer in the preceding 24 hours or the land is covered by snow	On-farm effect or Off-farm effect	Medium or High	Permanent
В3	The farmer has applied organic manure to land situated within 10 metres of any surface water or 50 metres of any well, borehole etc	On-farm effect or Off-farm effect	Application of organic manure (surface water) Directly entering surface water Medium – up to 50m High – over 50m Within 5m of any surface water Very low – up to 50m Low – over 50m up to 250m Medium – over 250m up to 500m High – over 500m	Permanent

Between 5 and 10m of any surface water Very low – up to 75m Low over - 75m up to 400m Medium – over 400m up to 750m High – over 750m	
Application of organic manure (borehole) Medium - between 25m and 50m High – within 25m	Permanent

(B3 continued on next page)

В3	The farmer has allowed nitrogen fertiliser of any type to enter a watercourse	On-farm effect or Off-farm effect	High	Permanent
B3	The farmer has applied nitrogen fertiliser (organic manures or chemical fertiliser) to land, with a significant risk of the fertiliser entering surface water taking into account: • the slope of the land, particularly if greater than 12 degrees • any ground cover • the proximity of the land to any surface water • weather conditions • the type of fertiliser being applied You must not exceed the Nmax limit as calculated for any contents.	On-farm effect or Off farm effect	Medium – Risk of Nitrogen fertiliser entering surface water High – Nitrogen fertiliser has entered surface water	Permanent
	2			
	Description of breach	Extent	Severity	Permanence
	Nitrogen available to any crop type exceeds Nmax	On-farm effect or Off-farm effect	Low – nitrogen available to the crop type is up to 5% in excess of the Nmax limit. Medium - nitrogen available to the crop type is over 5% and up	Permanent

to 15% in excess of the Nmax limit.	
High - nitrogen available to the crop type is over 15% in excess of the Nmax limit.	

SMR 2 - Conservation of wild birds

The aim of these rules is to protect wild birds, their eggs and nests if you have land classified as a Special Protection Area (SPA). They apply to all wild birds

Breaches of SMR 2 can vary greatly. The Extent, Severity and Permanence of each breach will be assessed individually taking into account all the facts surrounding the breach. SGRPID may require to seek advice from Scottish National Heritage to obtain technical information to decide the categorisation of the breach.

\1	You must notify Scottish Natural Heritage in writing of any proposal to carry out, cause or permit any specified operation (i.e. ORC) (or where a special nature conservation order applies (unless covered by the terms of a management agreement, scheme or notice) and obt consent before starting that operation			
	Description of breach	Extent	Severity	Permanence
A1	The farmer has carried out, caused or permitted a specified operation for which no notice/consent has been given	On-farm effect or Off-farm effect	Low or Medium or High	Rectifiable or Permanent
\1	The farmer has carried out, caused or permitted a specified operation on land where a special nature conservation order is in force for which no notice/consent has been given	On-farm effect or Off-farm effect	Low or Medium or High	Rectifiable or Permanent
A 1	The farmer has carried out, caused or permitted a specified operation with notice/consent but has failed to adhere to the terms of the consent	On-farm effect or Off-farm effect	Low or Medium or High	Rectifiable or Permanent

A2	You must comply with any nature conservation, management, restoration orders relevant to the purpose of the SPA				
	Description of breach	Extent	Severity	Permanence	
A2	The farmer has failed to comply with a nature conservation order(Nature Conservation Act s. 23-27)	On-farm effect or Off-farm effect	Low		
A2	The farmer has failed to comply with a land management order (Nature Conservation Act s. 29-36)		or Medium or	Rectifiable or Permanent	
A2	The farmer has failed to comply with a restoration order (Nature Conservation Act s. 40)		High	· o.manone	

You must not				
You must not intentionally or recklessly destroy or damage the special interest features of the area or disturb any fauna that are a specinterest feature. (This requirement can apply to actions that take place other than on the SPA itself but which have the same consequent				
Description of breach	Extent	Severity	Permanence	
The farmer has intentionally or recklessly caused damage or destruction of the special interest or disturbance of the fauna (that is also an interest feature of the SPA) You will not break the rules above, if: • you have a planning permission to carry out the work • you have consent from a public body or statutory authority that has complied with its duty to consult Scottish Natural Heritage before giving it consent • it is an emergency operation (provided that Scottish Natural Heritage is told as soon as possible after the emergency)	On-farm effect or Off-farm effect	Low or Medium or High	Permanent	
You must not carry out any activities on land outside a SPA which are likely to result in the disturbance of birds or the deterioration habitats affecting birds.				
Description of breach	Extent	Severity	Permanence	

r	The farmer has carried out an activity outside a SPA which is likely to result in the disturbance of birds or the deterioration of habitats affecting birds.	On-farm effect or Off-farm effect	Low or Medium or High	Rectifiable or Permanent
---	--	---	-----------------------------------	--------------------------------

SMR 3 - Conservation of flora and fauna

The aim of these requirements is to protect species of flora and fauna, if you have land designated as a Special Area of Conservation (SAC)

Breaches of SMR 3 can vary greatly. The Extent, Severity and Permanence of each breach will be assessed individually taking into account all the facts surrounding the breach. SGRPID may require to seek advice from Scottish National Heritage to obtain technical information to decide the categorisation of the breach.

You must You must notify Scottish Natural Heritage in writing of any proposal to carry out, cause or permit any specified operation (i.e. ORC) or where a special nature conservation order applies (unless covered by the terms of a management agreement, scheme or notice) and obtain consent before starting that operation. **Description of breach** Extent Permanence Severity Low On-farm effect Rectifiable The farmer has carried out, caused or permitted a specified A1 Medium or operation for which no notice / consent has been given. Off-farm effect Permanent High Low The farmer has carried out, caused or permitted a specified On-farm effect Rectifiable operation on land where a Special Conservation Order (or or Medium or Nature Conservation Order) applies for which no notice / Off-farm effect Permanent consent has been given. High Low The farmer has carried out, caused or permitted a specified Rectifiable On-farm effect operation with notice / consent but has failed to adhere to the Medium terms of the consent. Off-farm effect Permanent High

A2	ou must comply with any nature conservation, management, restoration orders relevant to the purpose of the SAC				
	Description of breach	Extent	Severity	Permanence	
A2	The farmer has failed to comply with a nature conservation order (Nature Conservation Act s. 23-27)				
A2	The farmer has failed to comply with a land management order (Nature Conservation Act s. 29-36)	On-farm effect or Off-farm effect	Medium or High	Rectifiable or Permanent	
A2	The farmer has failed to comply with a restoration order (Nature Conservation Act s. 40)		Š		

Yo	u must not				
B1	You must not intentionally or recklessly destroy or damage the protected features that are relevant to the purpose of the SAC or disturb any protected fauna that are a special interest feature. (This requirement can apply to actions that take place on land other than the SAC itself but which have the same consequences).				
	Description of breach	Extent	Severity	Permanence	
	The farmer has intentionally or recklessly caused damage or destruction of the special interest or disturbance of the fauna that are also a special feature of the SAC You will not break the rules above, if: you have a planning permission to carry out the work you have consent from a public body or statutory authority that has complied with its duty to consult Scottish Natural Heritage before giving it consent it is an emergency operation (provided that Scottish Natural Heritage is told as soon as possible after the emergency)	On-farm effect or Off-farm effect	Low or Medium or High	Rectifiable or Permanent	

SMR 4 – Food and Feed Law

The aim of these requirements is to ensure the safe production of food for human consumption and food or feed that is fed to food producing animals (these requirements apply if you are a food or feed producer or keep food producing animals)

	must	form the model of the leaves to the		I 4I-	
A1	You must arrange for unsafe food or unsafe feed to be withdraw your local authority and the Food Standards Scotland (FSS)	on from the market if you believe you r	nave supplied it and inf	orm both	
A2	You must destroy unsafe feed unless the competent authority to	ells you to do otherwise			
A3	You must tell consumers of food, or the users of the feed, of the reason for any withdrawal if it may have reached them				
A4	You must arrange for unsafe food or unsafe feed to be recalled protection	if there is no other way of achieving a	sufficiently high level of	of health	
	Description of breach	Extent	Severity	Permanence	
A1 A2 A3 A4	Where there has been a feed safety incident and the farmer has not followed the due processes. "Due processes" - procedures to withdraw feed include holding any unused stock and not using it for feed. Recall would include contacting customers receiving non-complying feed. The competent authorities that must be informed of a withdrawal or recall are either the local authority (the trading standards department) or the Food Standards Scotland. Destruction would probably be under the direction of a local authority inspector and would often be as a result of a sample of feed having been tested positive for a contaminant, which breached a statutory maximum permitted level. Other acceptable uses might be considered depending on the case as long as these did not have implications for the food chain (e.g. industrial use)	Off-farm effect The breach might be in relation to a nationwide recall of batches. A farmer must keep records of those they have immediately supplied with a feed but not other parties, which might receive the feed subsequently	Medium – if feed is unlikely to have an adverse affect on animal or consumer health High – if feed is likely to have an adverse affect on animal or consumer health	Permanent	
A5	You must immediately tell both your local authority and the FSS intend to sell, could be injurious to health and of the actions you	u have taken to prevent risks to the fin	al consumer		
	Description of breach	Extent	Severity	Permanence	
	Where there has been a food safety incident and the farmer has not followed the requirements concerning notification, recall and withdrawal.	On Farm or Off-farm effect	High	Permanent	

Trac	raceability			
A6	You must put in place systems and procedures related to the traceability of inputs* to your farm. These systems must identify: The name and address of your supplier The nature and quantity of the products that were supplied to you The date of the transaction (delivery) *Inputs are: food, feed, food-producing animals, and any other substance intended/ expected to be incorporated into a feed.			
	Description of breach	Extent	Severity	Permanence
	Traceability of inputs - Key pieces of information are missing, or information is not kept at all.	On-farm effect Although limited to on-farm the consequences of poor traceability systems could affect entire food chain. This would only raise serious implications in the event of a recall/ withdrawal where records were unavailable and there was a serious risk to human health	Low - Information largely available but incomplete (where records can be completed using information available on farm) Medium –Poor or inadequate system of keeping the required information. Cannot fully meet inspection requirements (records can't be completed using information available on farm) High - No system or information kept	Rectifiable

A7	You must put in place systems and procedures related to the traceability of your products when they leave the farm. These systems must identify; The name and address of your customer The nature and quantity of the products that were supplied to that customer The date of the transaction (when the product left the farm)				
	Description of breach	Extent	Severity	Permanence	
	Traceability of outputs -Key pieces of information are missing, or information is not kept at all.	On-farm effect Although limited to on-farm the consequences of poor traceability systems could affect entire food chain. This would only raise serious implications in the event of a recall/ withdrawal where records were unavailable and there was a serious risk to human health.	Low - Information largely available but incomplete (where records can be completed using information available on farm) Medium –Poor or inadequate system of keeping the required information. Cannot fully meet inspection requirements (records can't be completed using information available on farm) High - No system or information kept	Rectifiable	

A8	You must store this information in a format which	is readily available and prod	uce it when requested	
	Description of breach	Extent	Severity	Permanence
	Information is kept but not in a systematic manner: it cannot be produced on demand, taking into account a test of reasonableness. (For Cross Compliance purposes, this effectively means within the period of the Cross Compliance inspection.)	On-farm effect Although limited to on-farm the consequences of poor traceability systems could affect entire food chain. This would only raise serious implications in the event of a recall/ withdrawal where records were unavailable and there was a serious risk to human health.	Low - Information largely available but incomplete (where records can be completed using information available on farm) Medium —Poor or inadequate system of keeping the required information. Cannot fully meet inspection requirements (records can't be completed using information available on farm) High - No system or information kept	Rectifiable

A9	You must store and handle waste and/or hazardo products			o or reed
	Description of breach	Extent	Severity	Permanence
	There is evidence of inappropriate handling of waste or hazardous substances which have the capacity to contaminate stored foodstuffs or feedstuffs. Waste or hazardous substances stored inappropriately which could cause contamination of stored foodstuffs or feedstuffs. Hazardous substances; are any that have the potential to cause an adverse effect on health (human or animal). There is no exhaustive list of waste and hazardous substances but may include	On farm	Very Low - Poorly stored/handled waste or hazardous substances, where there has been no contamination. Low - to be given if there is an increased risk of contaminating the feed. Inspectors to decide severity in each case Medium - e.g. gross contamination from poorly stored/ handled waste or hazardous substances. The product is still on farm. The non-compliance is unlikely to lead to a direct impact on human health.	Rectifiable
\10	protection products and biocides, fertilisers, veterinary products, noxious chemicals, diesel. Please note that these are examples only.	Off Farm In extreme cases: Not limited to on farm (i.e. whe there has been a food/feed safety incident)	human health. Farmer has taken no steps to control or prevent the breach.	
	relevant to feed safety	ant analysis carried out of	i dampied taken from primary products or ou	ioi Juliipios
	Description of breach	Extent	Severity	Permanence

	The results of any analysis carried out indicate a possible risk to human health and the farmer has not taken any action to stop the risk.	On farm Or Off farm: where there has been a food/feed safety incident."	Medium: unlikely to have an adverse effect on human health. High: likely to have an adverse effect	Permanent
--	--	---	---	-----------

A11	You must store feed away from chemicals or any other products prohibited for use as animal feed			
ATT	Description of breach	Extent	Severity	Permanence
	Feed not stored separately or is stored in direct contact with a product with the potential to cause contamination.	On farm Or Off farm In extreme cases: Not limited to on farm (i.e. when there has been a food/feed safety incident)	Very Low - Feed is poorly stored or handled although not in contact with hazardous substances. The non-compliance is unlikely to lead to a direct impact on human health. Low - to be given if there is an increased risk of contaminating the feed. Inspectors to decide severity in each case Medium - e.g. Gross contamination from poorly stored / handled feed that has come into contact with hazardous substances (chemicals or other prohibited products). The feed product is still on farm. The non-compliance is unlikely to lead to a direct impact on human health.	Rectifiable

			High - in extreme instances where non-compliance has led to, or can be linked to, food- borne disease or illness with a direct impact on human health. Farmer has taken no steps to control or prevent the breach.	Permanent
--	--	--	---	-----------

Farmer has not kept clean and/or dry and/or taken sufficient care taken when cleaning containers/areas. The noncompliance is unlikely to lead to a direct impact on human and/or animal health. Medium: insufficient care taken when cleaning containers/areas which has led to containination of feed. The feed is still on the farm. The non-compliance is unlikely to lead to a direct impact on human and/or animal health. Permanent: Where there has been a food/feed safety incident and traceability and/or full withdrawal is not possible. Rectifiable: in all other cases." A13 You must store seed properly and in such a way that it is not accessible to animals		Description of breach	Extent	Severity	Permanence
A13 You must store seed properly and in such a way that it is not accessible to animals		- Farmer has not kept clean and/or dry and/or taken sufficient care when cleaning containers/areas used to store medicated and non-medicated feed. - Farmer has not implemented appropriate pest	Or Off farm: where there has been a food/feed	Low: insufficient care taken when cleaning containers/areas. The noncompliance is unlikely to lead to a direct impact on human and/or animal health. Medium: insufficient care taken when cleaning containers/areas which has led to contamination of feed. The feed is still on the farm. The non-compliance is unlikely to lead to a direct impact on human and/or animal health High: Non-compliance has led to, or can be linked to, food borne disease or illness with a direct impact on human and/or animal health. Farmer has taken no steps to control or prevent the	safety incident and traceability and/or full withdrawal is not possible. Rectifiable: in all other
	A13	You must store seed properly and in such a way t	hat it is not accessible	to animals	

Seed has not been stored in containers and/or areas that prevent animal access	On farm Or Off farm: where there has been a food/feed	Low: inappropriate storage. The non-compliance is unlikely to lead to a direct impact on human and/or animal health. Medium: inappropriate storage and there is animal access to the seed. The non-compliance is unlikely to lead to a direct impact on human and/or animal health.	Permanent: Where there has been a food/feed safety incident and traceability and/or full withdrawal is not possible
	has been a food/feed safety incident	High: Non-compliance has led to, or can be linked to, food borne disease or illness with a direct impact on human and/or animal health. Farmer has taken no steps to control or prevent the breach.	Rectifiable: in all other cases.

	Description of breach	Extent	Severity	Permanent
			Very Low - Feed is poorly stored or handled although not in contact with medicated feeding-stuffs .The non-compliance is unlikely to lead to a direct impact on human health.	
	Medicated feeding stuffs not clearly labelled as such and stored separately	On farm or Off farm In	Low - to be given if there is an increased risk of contaminating the feed. Inspectors to decide severity in each case	Rectifiable
	from non-medicated feed. Feeds are not separated in store via physical barrier or bagged. No separate handling facilities for medicated feedings stuffs.	extreme cases: Not limited to on farm (i.e. when	Medium – e.g. Gross contamination from poorly stored / handled feed that has come into contact with medicated feed has contaminated non-medicated feed. 		incident	High: Non-compliance has led to, or can be linked to, food borne disease or illness with a direct impact on human and/or animal health. Farmer has taken no steps to control or prevent the breach.	Rectifiable; in all other cases			
A17	You must use feed additives, veterinary medicinal products and biocides correctly (if you use them on your farm) with dosage, application and storage as stated on the label or as prescribed. This includes making sure that food you produce does not contain residues of pesticides or veterinary medicinal products that are higher than the permitted maximum residue level (MRL) for the pesticide or medicine used						

	Description of breach	Extent	Severity	Permanence
A17	Evidence of feed additives, veterinary medicines or biocides being used incorrectly or inappropriately For example: • not mixed or stored correctly • not labelled • past their use-by dates • not used in accordance with the instructions/ dosage on the label (evidence from records of application) • withdrawal periods have been contravened (evidence from veterinary medicines records)	On-farm effect or Off-farm effect (i.e. when there has been a food/ feed safety incident)	Medium - gross contamination of feed not stored separately, or medicated feeds fed either in excess or to the wrong species. The noncompliance is unlikely to have a direct impact on human health High - in extreme cases, where non-compliance has led to or can be linked with direct impacts on human health. The farmer has not controlled or prevented the breach	Permanent

(A17 continued)

A17 cont.	You must use feed additives, veterinary medicinal products and biocides correctly (if you use them on your farm) with dosage, application and storage as stated on the label or as prescribed. This includes making sure that food you produce does not contain residues of pesticides or veterinary medicinal products that are higher than the permitted maximum residue level (MRL) for the pesticide or medicine used				
	Description of breach	Extent	Severity	Permanence	
A17	The farmer has placed food on the market that, on analysis of a sample, and taking account of measurement uncertainty, has been found to contain a pesticide residue that exceeds the statutory maximum residue level (MRL) for a pesticide found in the food tested.	On farm or Off farm	Low - there is approval for the use of a pesticide on the crop, but the MRL set from residues of that pesticide has been exceeded. No safety or health concern arises from the breach of the MRL. High - there is no authorisation for the use of the pesticide concerned on any crops in the UK. There is no authorisation for the use of the pesticide on the crop concerned. Safety concerns arise from the level of pesticide residue found;	Permanent	
A17	The farmer has sold or supplied an animal for slaughter, or has sold/supplied milk, eggs or honey that, on analysis of a sample, has been found to contain residues of authorised	Off farm	Low - The medicine used was a UK authorised product or a product prescribed by a Veterinary Surgeon under the terms of the cascade. However the MRL set for residues of that medicine has been exceeded but complete (re origin of medicine + batch	Permanent	

veterinary medicinal products that exceed the maximum residue level (MRL) for the medicine used or an unauthorised substance.

number + identity of animals treated) and contemporaneous medicine records kept show that the withdrawal period for the medicine concerned has been complied with.

Medium - The medicine used was a UK authorised product or a product prescribed by a Veterinary Surgeon under the terms of the cascade. However the MRL set for residues of that medicine has been exceeded and complete (re origin of medicine + batch number + identity of animals treated) and contemporaneous medicine records kept show that the withdrawal period for the medicine concerned has not been complied with.

High - The medicine used did not carry UK authorisation and has not been prescribed by a Veterinary Surgeon under the terms of the cascade or the medicine concerned has been prohibited for use in food producing animals or

The medicine used was a UK authorised product or a product prescribed by a Veterinary Surgeon under the terms of the cascade but the MRL set for residues of that medicine has been exceeded and there are no complete (re origin of medicine + batch number + identity of animals treated) and contemporaneous medicine records kept to show that the withdrawal period for the medicine concerned has been complied with

A1

You must take adequate measures to prevent the introduction and spread of contagious diseases transmissible to humans through food.

Which include:

- ensure that all eligible animals conform to national herd / flock health surveillance and testing intervals for Tb
- have a system in place regarding precautionary measures when new animals are introduced on-farm (e.g.; keep separate from rest of herd/flock to verify whether they carry disease or not)
- inform the relevant authority of a disease incident on farm (Note: diseases referred to here are the notifiable zoonotic diseases)
- report indicators of potential outbreaks (abortions) to relevant authorities

	Description of breach	Extent	Severity	Permanence
A18	Failure to ensure that all eligible animals conform to national herd / flock health surveillance and testing intervals for Tb.	On-farm effect or Off-farm effect	Very Low - where testing is overdue by between 1 and 10 days. Low - where testing is overdue by between 11 and 30 days. Medium – where testing is overdue by between 31 and 60 days. High - where testing is overdue by 61 days or more.	Rectifiable if the animals(s) are still on the farm and the test can still be completed Permanent if the animal(s) have been moved off the farm.
A18	Clear evidence that farmer has no system in place regarding precautionary measures when new animals are introduced on-farm (e.g.; not kept separate from rest of herd/flock to verify whether they carry disease or not)	On-farm effect or Off-farm effect (i.e. when there has been a food/ feed safety incident)	Medium - where non-compliance has not led to, or can be linked to a food-borne disease with a direct impact on human health. High - where non-compliance has led to, or can be linked to, a food-borne disease with a direct impact on human health	Permanent
A18	The farmer has not informed APHA of a notifiable disease outbreak	On-farm effect or	Medium - where non-compliance has not led to, or can be linked to a food-borne disease with a	
A18	Evidence that the farmer has failed to report indicators of potential outbreaks (abortions)	Off-farm effect (i.e. when there has been a food/ feed safety incident)	direct impact on human health. High - where non-compliance has led to, or can be linked to, a food-borne disease with a direct impact on human health	Permanent

You must source and use feed, for food-producing animals, from establishments that are registered and/or approved by your local authority

A1 9	Description of breach	Extent	Severity	Permanence	
	Evidence that the farmer is sourcing and/ or using feed from establishments that are not registered/ approved	On-farm effect or Off-farm effect - where there has been a food/ feed safety incident	Low - feed has been sourced from establishmen not registered/approved in accordance with 183/2005 but there has been no contamination risk to animal health or human health High - feed has been sourced from establishm not registered /approved in accordance with 183/2005 and has led to, or can be linked to, for borne disease with a direct impact on human health; linked to animal illness death	or ent Permanent	
A2 0	You must take appropriate remedial action when informed of problems identified during official controls.				
	Description of breach	Permanence			
	Farmer has not implemented the remedial action highlighted during previous official controls.	On farm Off farm: where there has been a food/ feed safety incident.	Medium: unlikely to have an adverse effect on human and/or animal health. High: likely to have an adverse effect on huma and/or animal health	Permanent	
A21	 You must keep records on all of the following areas if they are relevant to your business: veterinary medicinal products, or other treatments, administered to your animals; the dates of the treatment and the withdrawal period. the results of any analyses carried out on samples taken from food producing animals, plants or other samples taken for diagnostic purposes, that have importance for human health; use of plant protection products and biocides. any use of genetically modified seeds (in feed production) 				
	Description of breach	Extent	Severity	Permanence	
	No records kept or records incomplete	On-farm effect	Low - missing information or errors that can be rectified and a full assessment is possible	Rectifiable	

	Medium - sufficient partial records/incomplete records. Only information to allow a partial assessment	Rectifiable - if records can be corrected. t. Permanent - if records cannot be corrected.
	High - no records	Permanent

Υοι	You must not					
Foo	Food and feed safety, withdrawal and recall:					
B1	You must not place unsafe food or unsafe feed on the	market.				
	Description of breach	Extent	Severity	Permanence		
	There is evidence that food that is unfit for consumption and/or injurious to health (for example, mould growth or pest infestation of grain) has been placed on the market and is not to be disposed of or used as feed.	On Farm or Off-farm effect	High	Rectifiable - If products still on farm and no evidence of sales or Permanent		
B2	You must not feed unsafe feed to food-producing anim	nals.				
	Description of breach	Extent	Severity	Permanence		
	There is evidence that feed that is held for placing on the market or feed to food producing animals is obviously unsafe e.g. there are visible signs or other evidence of gross contamination such as mould or pest infestation.	On Farm or Off-farm effect	Medium – Clear visible signs or other evidence of gross contamination, feed has not been fed to animals but producer has failed to take steps to destroy or treat contamination. High – Unsafe feed has been fed to food producing animals resulting in animal deaths or sickness, or food products have become contaminated.	Rectifiable - If products still on farm and no evidence of sales or Permanent		

DAIRY HYGIENE REQUIREMENTS

You must

- You must The following additional hygiene requirements apply where you are a producer of raw milk and/or colostrum (from any species). You must ensure that raw milk and/or colostrum comes from animals that:
 - are in a good general state of health
 - present no sign of disease that might result in the contamination of milk and/or colostrum and, in particular, are not suffering from any infection of the genital tract with discharge, enteritis with diarrhoea and fever, or a recognisable inflammation of the udder:
 - do not have any udder wound likely to affect the milk and/or colostrum;
 - are not within the prescribed withdrawal period following the administration of authorised products or substances
 - have not been administered with any unauthorised substances or products

	Description of breach	Extent	Severity	Permanence
A22	(BP 1-3) Evidence that milk and/or colostrum from animals showing signs of ill health (as could reasonably be determined by a non-vet, e.g. discharge, inflammation, udder wounds) has been included in the bulk tank.	On Farm or Off-farm effect	Low – where milk is going for heat treatment. Medium – where milk will not be heat treated	Rectifiable - if in tank on farm or Permanent - if found at processors
A22	(BP 4) Evidence of milk and/or colostrum from treated animals that have not observed the required withdrawal time has been included in the bulk tank	On Farm or Off-farm effect	High	Rectifiable - if in tank on farm or Permanent - if found at processors
A22	(BP 5) Evidence of milk and/or colostrum from animals treated with an unauthorised substance has been included in the milk tank	On Farm or Off-farm effect	High	Rectifiable - if in tank on farm or Permanent - if found at processors

A23	As regards to tuberculosis and brucellosis, you must ensure the which have disease-free status. Where your herd/ holding is not free from tuberculosis or bruce animals if: • you are selling to a wholesaler who will heat treat the milk • the raw milk is from sheep/ goats and is intended to be made to the way of the property of the way of	llosis, you may sell and/or colostrum be ide into cheese that	milk and/or colostrum from your non-reference marketing it for human consumption has a maturation period of at least two	eactor ion, or o months.
	Description of breach	Extent	Severity	Permanence
A23	Evidence that milk and/or colostrum from non-reactor animals from herds or flocks that have lost their disease free status has been marketed for human consumption without being pasteurised (e.g. heat treated or the raw milk is from sheep or goats and is intended to be made into cheese that has a maturation period of at least two months)	Off-farm effect	Medium – all situations except where the producer sells raw milk directly to the final customer. High – only if producer retails raw drinking milk directly to the final	Permanent
A23	Evidence that milk and/or colostrum from reactor animals has been marketed for human consumption		customer.	
A24	You must isolate animals that are infected, or suspected of bein order to avoid any adverse effect on other animals' milk and/or of		perculosis and brucellosis must be effe	ctive in
	Description of breach	Extent	Severity	Permanence
	Evidence of failure to isolate animals that are infected or suspected to be infected	On farm	Low – contact with herd mates and milk and/or colostrum has been heat treated High – contact with susceptible livestock on neighbouring holdings and milk and/or colostrum has not been heat treated	Permanent

A25	You must ensure that milking equipment and the premises where milk and/or colostrum is stored, handled or cooled must be located and constructed so as to limit the risk of contamination of milk					
	Description of breach	Extent	Severity	Permanence		
A20	Inadequate location or construction of such premises that is within the farmer's ability to do something about. Evidence that there is a significant risk of contamination occurring due to location of the milking equipment close to hazardous materials and/or due to poor construction and/or practices in maintenance of the milking shed or milk/colostrum storage area	On-farm effect	Very low – where there are minor problems with small risk of contamination Medium – where the problems found show a higher risk of contamination of the milk and/or colostrum	Rectifiable or Permanent		
A26	You must ensure that premises used for the storage of		rum are:			
	 be protected against vermin - including birds an have adequate separation from premises where 					
	have suitable refrigeration equipment in order to					
	Description of breach	Extent	Severity	Permanence		
A26	Evidence that the premises used for storing milk and/or colostrum are not protected against vermin - including birds and bird's nests	On-farm effect Or Off-farm effect (i.e. when there has been a food/feed safety	Medium - gross infestation, inadequate separation or poor refrigeration and milk and/or colostrum is still on farm. The non-compliance is unlikely to lead to a direct impact on human health. High - in extreme instances where non-compliance has led to/or can be linked to food	Rectifiable		

A26	Evidence that there is no adequate separation between the milk and/or colostrum storage area and the livestock housing	incident or if food went off-farm)	borne disease from the milk and/or colostrum that has a direct impact on human health. Farmer has taken no steps to control or prevent the breach.	
A26	Refrigeration equipment not working to the required level.			

A27	You must ensure the surfaces of equipment that come into contact with milk and/or colostrum (utensils, containers, tanks etc.) are easy to clean, and disinfect where this is necessary.				
	Description of breach	Extent	Severity	Permanence	
A27	The equipment that comes into contact with milk are not constructed of materials conducive to easy cleaning		Low - where there are minor problems with a small risk to human health (or contamination of milk)		
A27	The materials are not made of smooth, washable and non-toxic materials	On-farm effect	Medium - where there is contamination and a risk to human health (or contamination of milk)	Rectifiable	

A28	You must clean (and disinfect where necessary) the surfaces of equipment that come into contact with milk and/or colostrum after use and maintain in a sound condition.			
	Description of breach	Extent	Severity	Permanence
A28	Dirty facilities and equipment	On-farm effect		Rectifiable

A28	Milk contact surfaces in the milking or storage area are contaminated (e.g stale milk residues, milk stone/mould)	Low - where there are minor problems with a small risk to human health (or contamination of milk)	
A28	The surfaces of milking equipment intended to come into contact with milk are not in a sound condition	Medium - where there is contamination and a risk to human health (or contamination of milk)	

A29	 You must carry out milking hygienically, especially making sure that: before milking starts, the teats, udder and adjacent parts are clean; you satisfactorily identify animals undergoing any medical treatment which is likely to transfer residues to the milk and/or colostrum; milk and/or colostrum from such animals, or any that are still within the withdrawal period is not used for human consumption 						
	Description of breach Extent Severity Permanence						
A29	Teats and udders not clean before cluster attachment at milking time. Milking routine or facilities are not robust enough for the cleanliness of the animals.	On-farm effect	Low - all situations except where the producer sells raw drinking milk and/or colostrum directly to the final	Rectifiable			
A29	Animals that are undergoing medical treatment likely to transfer residues to the milk, or are still within the withdrawal period for that treatment are not adequately identified at milking	On-farm effect	customer High - if producer sells raw drinking milk to the final customer	or Permanent			
A29	Such animals are not milked last and with the delivery pipe removed from the bulk tank, or using separate equipment e.g. separate dump bucket and cluster. [if such practices are not followed it could lead to milk obtained from these animals being sold for human consumption]	On-farm effect	High	Rectifiable or Permanent			

A30	immediately after milking. The milk must be cooled immediately to: • not more than 8°C if it is collected daily • not more than 6°C if it is not collected daily For the purposes of this requirement it is considered that "immediately" means within a reasonable and practicable time period (2 hours).					
	Description of breach	Extent	Severity	Permanence		
A30	Evidence of inappropriate storage of milk and/or colostrum. Storage facilities are not clean; and do not prevent contamination.	On-farm effect or Off-farm effect (where there has been a food safety incident).	Low – inappropriate storage (no contamination) Medium - dependent upon the levels and location of any contamination and the likelihood of it leading to a direct impact on human health High - dependent upon the levels and location of any contamination and the likelihood of it leading to a direct impact on human health	Rectifiable or Permanent		
A30	Milk and/or colostrum has not been cooled immediately (2 hours) following the end of milking and prior to collection. (NB It may not be practical to cool milk and/or colostrum immediately in all situations) (this can be observed on the tanker dockets and/or by taking temperature of milk or colostrum stored).	On-farm effect -the milk and/or colostrum will not be collected by the buyer or Off-farm effect - where there has been a food safety incident; milk and/or colostrum has left the premises.	Low - non-compliance is unlikely to lead to a direct impact on human health. Medium - where breach is seen as to be a very recent development and little or no effort is being made to rectify situation High - where it is obvious that the facilities are not in effective operational order or are not suitable for the volume of milk to be stored (extra tanks outside dairies without cooling equipment for example) and no action is being taken to rectify situation	Rectifiable or Permanent		

ADDITIONAL REQUIREMENTS FOR EGG PRODUCERS

This hygiene requirement relates to all eggs in shell that are produced by farmed birds.

You must

shocks and out of direct sunshine Description of breach	Extent	Severity	Permanence
Eggs kept in unsuitable conditions. For example close to moving agricultural machinery, in the tractor shed, close to bleach or diesel This hygiene requirement relates to all eggs in shell that are produced by farmed birds.	On-farm effect where eggs have not left the premises Off-farm effect: where there has been a food safety incident; eggs have left the premises	Low	Rectifiable or Permanent

SMR 5 – Restrictions on the use of substances having hormonal or thyrostatic action and beta-agonists in farm animals

The aim of these requirements is to prohibit the illegal use in stock farming of substances that have a hormonal or thyrostatic action and beta-agonists, and to prevent the residues that these substances leave in meat and other foodstuffs from entering the human or animal food chain (they apply to you if you keep farmed animals)

A1	You must observe the relevant withdrawal period if your food-producing animals have been given any of the restricted substances in line with the permitted exceptions				
	Description of breach	Extent	Severity	Permanence	
	The farmer has not observed the relevant withdrawal periods where food producing animals have been administered any of the restricted substances. Currently there are no authorised medicines containing thyrostats for farm animals. Failure to observe withdrawal periods only applies to slaughtered animals or to live animals from which products (usually eggs and milk) are taken.	On farm: if the animal is still present. Off farm: where animal has left the holding.	High	Permanent	

Description	n of breach	Extent	Severity	Permanence
Non-maintenance of records of persubstances with hormonal or betacontrary to Regulations 18 (if the a (administration is by the farmer) of Regulations. Assessment of medicines records Animal Health when they inspect farmer with the substance of the substance o	mitted animal treatment with agonists to food-producing animals dministration is by the vet) or 19 the Veterinary Medicines as often part of the procedure for arms. Inces covered by SMR 5 is bing the records required by the salso required and failure to do so ase of all veterinary medicinal and proof of purchase of any refore if a farmer has the no or an incomplete record of use of	On farm effect	Low: minor omissions in records of administration of SMR 5 substances or mistakes but inspector still able to make an assessment of compliance with withdrawal periods or trace treated animals. Medium: records of administration of SMR 5 substances incomplete - only sufficient for inspector to make a partial assessment of compliance with withdrawal periods or trace treated animals. High: no records of administration of SMR 5 substances – or inspector unable to make an assessment of compliance with withdrawal periods or trace treated animals	Rectifiable or Permanent: depending on time lag between suspected treatme and whether farme is in possession of any information the would enable him make a record.

You must not give food-producing animals restricted substances (unless in	line with any permitted	d exceptions)		
Description of breach	Extent	Severity	Permanence	
The farmer has administered restricted substances with hormonal or thyrostatic action or beta-agonists to food-producing animals				
Note: some exemptions exist: • Authorised veterinary medicinal products (VMPs) containing betaagonists prescribed by a veterinary surgeon may be administered by a vet, or by a farmer under direction of a vet, to equidae and pets. • Authorised VMPs containing beta-agonists prescribed by a veterinary surgeon may be administered by a vet by injection to treat or induce tocolysis in cows during calving. • Authorised VMPs with a gestogenic, oestrogenic (other than oestradiol 17ß and its ester-like derivatives) or androgenic action prescribed by a veterinary surgeon may be administered by a vet, or by a farmer under direction of a vet, for the synchronisation of oestrus or for the preparation of donors or recipients for the implantation of embryos	On farm Off farm: if the animals have left the farm.	High	Rectifiable: only where animals are found on farm and can be established no products have entered the food ch	
Note: Evidence for this breach may come from the detection in samples taken from live animals or from samples taken at slaughterhouses. Evidence may also come from the detection in feed or water of unauthorised substances having hormonal or thyrostatic action or betaagonists Only the farmer's own veterinary surgeon or a UK registered pharmacy acting in accordance with a veterinary prescription should have supplied drugs covered by SMR10. However, obtaining such products from a non-authorised source may not in itself constitute a breach of SMR 5, if it is a UK authorised product and is			or Permanent	

B2	You must not have substances on your farm that contain beta-agonists to induc	ce tocolysis in cows whe	n calving	
	Description of breach	Extent	Severity	Permanence
	The farmer is in possession of any substance containing a beta-agonist that may be used for induction purposes in the treatment of tocolysis. Note: Any prescription may not be available in written form on the farm. But the farmer should be able to demonstrate who prescribed the medicinal product and this should be followed up to verify. As farmers are required to keep the proof of purchase of all veterinary medicinal products for 5 years this should be available to identify the supplier of the source of the medication. Some banned substances have legitimate uses as medicines for humans and companion animals. If the inspector is satisfied that any products found are for these purposes, no breach of SMR 5 has occurred. Where illegal possession is suspected or has been established, an assessment will have to be made as to whether illegal administration has also taken place (see above). Inspectors may also have to take into account that medicines may be found that were legally obtained, but have since ceased to be authorised. The continued possession of such products is unlawful.	On-farm effect	High	Rectifiable - as any illegally possessed products can be seized by an inspector appointed under the Veterinary Medicines Regulations
В3	You must not have food producing animals on your farm to which a restricted s any permitted exceptions) Description of breach	ubstance has been admi	nistered (ur	
	Description of breach		Severity	Permanence
В3	- The farmer is in possession of animals with residues in any tissues or body fluids at concentrations that indicate illegal administration to food producing animals of substances with hormonal or thyrostatic action or beta-agonists	On-farm: where it is found that an animal and/or animal products have left the farm it will	High	Rectifiable

The farmer is in possession of animals with residues in any tissues or body fluids at concentrations that indicate non-compliance with an authorised SMR 5 product's stated dosing instructions	be necessary to consider whether a breach has occurred under SMR 5 breach B4 and/or B5.	
---	---	--

	Description of breach	Extent	Severity	Permanence
huma fluids produ action	farmer has placed on the market or sent to slaughter for an consumption animals with residues in any tissues or body at concentrations that indicate illegal administration to fooducing animals of substances with hormonal or thyrostatic in or beta-agonists. Ain exemptions apply - see Regulation 9 of SI 1997 No.1729 as	On-farm Off farm: if the animals have left the farm	High	Rectifiable: in cases where the animals can be prevented from entering the food chain; or Permanent: in cases where the animals cannot be prevented from entering the food chain.

Description of breach	Extent	Severity	Permanence
The farmer placed on the market meat or animal products from animals with residues at concentrations that indicate illegal administration of substances with hormonal or thyrostatic action or beta-agonists.	Off-farm effect	High	Rectifiable: in cases where the produce can still be prevented from entering the food chain; or Permanent: in cases where the produce cannot be prevented from entering the food chain.

SMR 6 – Livestock Identification and Traceability - Pigs

The aim of these requirements is to establish a system for the identification and registration of pigs to facilitate their traceability, in particular in the event of a disease outbreak (they apply to you if you keep pigs)

For cross compliance purposes, you do not need to do anything more than you are already required to do by law for the identification and registration of pigs. The key elements of the pig tracing system, that applies specifically for cross compliance purposes, are listed below. This is a summary only. For a full explanation of your legal obligations, you should refer to the relevant legal provisions.

Requirement 1- Identification of pigs. You must,

Identify your pigs before they leave your holding in one of the following ways:

- For movements out with the UK, to an exhibition, show, semen collection centre, under a walking licence or for breeding purposes where return is intended, pigs must be permanently identified with an approved ear tag or tattoo including unique identifier
- For movements to a market or slaughterhouse, pigs may either be permanently identified with an approved ear tag, tattoo or a slap mark.
- For farm to farm movements of pigs under 12 months old pigs may either be permanently identified with an approved eartag, tattoo, slap mark or a temporary mark which must last at least until the pig reaches its destination.
- Permanent identification that has become illegible or has been lost must be replaced as required.

An animal's identification must not be removed or replaced without authority issued by Scottish Ministers, details of which can be found in the Pig Identification and Registration – Guidance for keepers in Scotland (issued October 2011)

Extent	Severity	Permanence
	, ,	
	identified	
but are not		Rectifiable or
Off farm effect: where there is		Permanent
evidence that pigs have moved off	of pigs not correctly identified	Termanent
the holding without being correctly	High: More than 20% of pigs not correctly identified

tattoo but do not, are on the holding		D. difficient
Off farm offoct: where there is		Rectifiable or
	replacement recorded (if applicable).	Permanent
	On farm effect: where pigs are on the holding and should be identified, but are not Off farm effect: where there is evidence that pigs have moved off the holding without being correctly identified On farm effect: where animals which should have an ear tag or tattoo but do not, are on the holding Off farm effect: where there is evidence that animals which should have had an ear tag or tattoo but did	The highest severity that applies is used. This is dictated by either the number of animals or percentage of animals sampled On farm effect: where pigs are on the holding and should be identified, but are not Off farm effect: where there is evidence that pigs have moved off the holding without being correctly identified On farm effect: where animals which should have an ear tag or tattoo but do not, are on the holding Off farm effect: where there is evidence that animals which should Off farm effect: where there is evidence that animals which should

Identification has been removed or replaced without authority issued by Scottish Ministers	On farm effect or Off farm effect	High: Where any pig is found to have had permanent identification removed or replaced without authority.	Rectifiable or Permanent	
--	---	---	-----------------------------	--

Requirement 2- Record Keeping. You must,

Maintain a separate register for each holding (CPH) that you keep pigs on, make your records available to SGRPID or local authority on request and retain records for a minimum period of three years from the last record entry.

You must record

• The holding address including CPH and the name and address of the keeper

You must record details of the movement of pigs on and off your holding within 48 hours of the movement date, including

- The date of the movement
- The number of pigs moved
- The identification of the pigs moved (either temporary mark or identification number, including unique individual identification if applicable)
- The address and CPH number where the pigs were moved from / to

You must record the number of pigs on the holding at least once a year

You must record the details of replacement identification as a result of identification becoming lost or illegible, cross referencing the new identifier to the original identifier (unless the replacement used is identical to the original)

Description of breach	Extent	Severity	Permanence
Failure to keep records or failure to provide the records for inspection.	On farm effect: evidence suggests no pig movements have taken place Off farm effect: evidence suggests pig movements have taken place	High: No verifiable records	Rectifiable or Permanent
Failure to record complete movement details	On farm effect: where the missing information relates to pigs moved onto the holding Off farm effect: where the missing information relates to pigs that have moved off the holding	Records incomplete Very Low: Less than 5 movement records do not have all the required information Low: 5 to 10 movement records do not have all the required information Medium: Greater than 10 movement records do not have all the required information	Rectifiable or Permanent

		No records Medium: Less than 5 movements are not recorded High: 5 or more movements are not recorded	
Failure to record the number of pigs on your holding in the register at least once per year	On farm effect	Low: Failure to record the number of pigs on the holding in the previous year	Rectifiable or Permanent
Failure to maintain a record of replacement identification	On farm effect: where the animals are still on the holding Off farm effect: where there is evidence that animals may have moved off the holding	Medium : Evidence that new identifiers have been inserted but no record of replacement identification has been kept	Rectifiable or Permanent

Requirement 3 – Movement Notification. You must,

Notify Scottish Ministers via the ScotEID database of movements onto and off your holding (except for movements for veterinary treatment). Note where the movement on/off is notified electronically to ScotEID, no movement document is required (except for movement of pigs that are under 12 months old and identified with a temporary mark, or where the pigs are moving to England, Wales or Northern Ireland.

For movements off you must provide the following details either prior to the movement or on the day of the movement -

- Address details, including postcode and CPH number of the holdings from and to which the pigs are being moved (except when the pig is moving to a show but the holding which it will be moved after the show is not known, notification must take place within 3 days commencing on the day of the move from the show)
- The date of the movement
- The number of pigs moved
- The identification mark of each pig moved

For movements on you must confirm to ScotEID the following details within 3 days (including day of arrival) of the pigs arriving on the holding -

- Address details, including postcode and CPH number of the holdings from and to which the pigs are being moved
- The date of the movement
- The number of pigs moved
- The identification mark of each pig moved
- And where the pig is being moved from a market, the lot number of the pigs being moved

Description of breach	Extent	Severity	Permanence
Failure to notify movements and/or all required information notified to ScotEID			Rectifiable or Permanent
Mandatory information for	On farm effect	High: Over 5 movements have not been notified Very Low: Up to 5 movement notifications reported outwith legislative deadline	
movements supplied to ScotEID prior to announcement of inspection but outwith legislative deadline	Off farm effect	Very Low: Between 6 and 10 movement notifications reported outwith legislative deadline	Rectifiable
sat satima isgisialivo doddinio	Off farm effect	Low: 10 or more movement notifications reported outwith legislative deadline	

Requirement 4 – Registration as a keeper of pigs. You must,

- Register your details with your local Animal and Plant Health Agency (APHA) office, as a keeper of pigs, within one month of establishing your holding. Notify your local Animal and Plant Health Agency (APHA) office of any change to your details, within one month of the change

Description of breach	Extent	Severity	Permanence
Failure to have up to date details registered with APHA	Off farm effect	Low: Registration details have not been updated within one month Medium: No registration	Rectifiable or Permanent

SMR 7 – Livestock Identification and Traceability - Cattle

The aim of these requirements is to establish a system for the identification and registration of cattle to facilitate their traceability, in particular in the event of a disease outbreak. Within this SMR, 'cattle' means all bovine animals.

For cross compliance purposes, you do not need to do anything more than you are already required to do by law for the identification and tracing of cattle. The key elements of the cattle tracing system (CTS), which applies specifically for cross compliance purposes, are listed below. This is a summary only. For a full explanation of your legal obligations, you should refer to the relevant legal provisions and the British Cattle Movement Service (BCMS) Cattle Keeper's handbook and relevant ScotMoves guidance on the Scottish Government and ScotEID websites. Note the CTS system includes the information held on both the CTS database (administered by BCMS on behalf of Scottish Ministers) and the ScotMoves database (administered by ScotEID on behalf of Scottish Ministers).

Eartags

- Each calf born on your holding (or cattle imported from outside the European Union EU) must be double tagged with Scottish Minister approved eartags with the same unique identification code.
- Dairy calves must be tagged with one eartag within 36 hours of birth and within 20 days of birth for the second eartag. Bison calves to be tagged within 9 months of birth or when they are separated from their mother, if this is earlier. Any other calves must be tagged within 20 days of birth, or before they leave the holding, if this is sooner.
- Eartags must not be removed or replaced without permission from Scottish Ministers. Illegible or lost tags must be replaced within 28 days of discovery of the loss, or before the animal leaves the holding, if this is sooner.
- You must not alter, obliterate or deface an eartag.

Notifications

- · Births must be notified to BCMS within seven days of tagging
- Deaths on your holding must be notified to BCMS within seven days.
- Movements of cattle on and off a holding must be notified to BCMS within three days. If you elect to use ScotMoves to notify within business's moves the movement notification period to ScotEID is 3 days.
- Note if your animals move directly from or to a market or (most) abattoirs in Scotland, the movement 'on' and 'off' farm will be electronically transmitted to BCMS on your behalf. It is your responsibility to ensure the market/abattoir will complete the move and movement details accurately and timeously on your behalf.

Description of breach	Extent	Severity	Permanence
Breaches to be assessed in line with the CII discrepancy tables.	On Farm effect or Off Farm effect	Very Low or Low or Medium or High	Rectifiable or Permanent

Refer to the Cattle Penalty Calculator in the following Section

Holding registers

- You must keep an up-to-date on farm holding register, which includes for each animal: official eartag number; date of birth; sex; breed, date of movements on and off holding; details of where the animal has moved to or from (including previous and next keeper information) and date of death if animal dies on holding.
- The register must be completed within 48 hours of a movement, within seven days of a death and within seven days of a birth in a dairy herd (or within 30 days of the birth of any other calf).
- The register must be kept for 10 years if you are still a cattle keeper, and three years in any other case from the end of the calendar year in which the last entry was made and be available to SGRPID or local authority on request.
- Note If you elect to use ScotMoves to notify within business movements you can use the ScotMoves database movement information to comply with your holding register movement recording requirements. For all other mandatory information as per first bullet point you must still keep a separate (paper or electronic) on farm holding register containing the information.

Description of breach	Extent	Severity	Permanence		
		Very Low or			
Breaches to be assessed in line with the CII discrepancy tables.	On Farm effect or Off Farm effect	Low or Medium	Rectifiable or Permanent		
tables.		or High			
Refer to the Cattle Penalty Calculator in the following Section					

Penalty procedures for breaches of SMR 7 - Animal Identification and Registration - Cattle

Breaches of Cross Compliance are assessed against the following criteria –

- Intent whether errors are attributed to negligence or intentional non-compliance
- Extent whether effects are confined to on-farm or have a far reaching impact off-farm
- Severity the highest determined severity level is applied
- **Permanence** whether the errors are rectifiable in a reasonable period of time, or are permanent
- Repetition the same CII error found at inspection within a 3 calendar year period

During cattle inspections checks are made to ensure compliance with current regulations. Any area of non-compliance (discrepancy) which is identified is allocated a CII (Cattle Identification Inspection) error code.

Each CII error code has been allocated a Severity score for Cross Compliance purposes depending on its relative seriousness.

Each CII error code has also been defined as having either "On farm" or "Off farm" extent, which is dependent on whether the breach is classed as having a far reaching impact or limited to the farm itself.

The individual codes are also classified according to Permanence as either Rectifiable or Permanent.

Cattle Penalty Calculator
The table below shows the 18 CII error codes, their scores, Extent and also the Permanence.

Code	Discrepancy Description	Score Scot- Moves	Score CTS	Extent	Permanence
FB	Failure to notify birth to database within legislative deadline	NA	1	Off farm	Rectifiable
FM	Failure to notify movement to database within legislative deadline	0.1	1	Off farm	Rectifiable
FD	Failure to notify death to database within legislative deadline	NA	1	Off farm	Rectifiable
LB	Birth notification supplied to database prior to announcement of inspection but outwith the legislative deadline	NA	0.1	Off farm	Rectifiable
LM	Movement notification supplied to database prior to announcement of inspection but outwith the legislative deadline	0.1	0.1	Off farm	Rectifiable
LD	Death notification supplied to database prior to announcement of inspection but outwith the legislative deadline	NA	0.1	Off farm	Rectifiable
IB	Incorrect birth date notified to database	NA	0.7	On farm / Off farm	Rectifiable
IM	Incorrect movement date notified to database	0.1	0.4	On farm / Off farm	Rectifiable
ID	Incorrect death date notified to database	NA	0.4	On farm / Off farm	Rectifiable
IDAM	Incorrect Dam id notified to database (other than space or leading zero issues)	NA	0.3	On farm / Off farm	Rectifiable
LZ	Incorrect Dam id notified to database (space or leading zeros issues)	NA	0	On farm / Off farm	Rectifiable
ISB	Incorrect sex or breed notified to database	NA	0.1	On farm / Off farm	Rectifiable
NF	Animal details not found in farm records	NA	1	Off farm	Permanent
LR	Animal details found in farm records and notified to database prior to announcement of inspection but outwith the legislative deadline	0.1	NA	Off farm	Rectifiable
NA	Animal expected to be present on holding but no animal presented	NA	1	Off farm	Rectifiable
TG1	Animal has lost 2 tags but can still be identified by other means.	NA	0.3	On farm / Off farm	Rectifiable / Permanent
TG2	Animal incorrectly tagged for age, not tagged within timescale or has been tagged previously but has lost 2 tags and cannot be identified by other means	NA	1	On farm / Off farm	Rectifiable / Permanent

TG3	Animal has lost 1 tag but still identifiable	NA	0.1	On farm / Off farm	Rectifiable / Permanent	
-----	--	----	-----	--------------------	----------------------------	--

The scores allocated to each CII discrepancy code are added up, which is known as the **absolute severity score**.

The absolute severity score is then converted to a **percentage severity score**, which is established by dividing the absolute score by the number of "animals inspected" and multiplying that figure by 100.

These two figures are then assessed against the threshold severity levels listed in the table below and the highest is taken forward in determining the level of financial penalty.

Absolute Severity Table				
Score	Absolute Severity			
0.01 - 1.99	Very Low			
2.00 - 4.99	Low			
5.00 – 10.00	Medium			
10.01 +	High			

% Severity Table				
Score	Percentage Severity			
0.01 – 10.00	Very Low			
10.01 – 40.00	Low			
40.01 – 60.00	Medium			
60.01 +	High			

Extent and Permanence is determined using the table above per CII discrepancy code.

The following two examples demonstrate how a breach of CII requirements can result in a Cross Compliance penalty.

Example 1:

Following an inspection it is determined that:

- 1 animal has died and the death has not been notified to CTS
- 3 animals moved onto the holding but the incorrect date of movement had been reported to CTS
- 1 animal present at inspection was discovered to have been tagged previously but has lost its official identifiers and cannot be identified by other means
- 1 animal present at inspection correctly identified, however animal over 27 days of age and no birth notification made to CTS
- 1 animal present at inspection with mandatory birth information missing in the farm records
- The number of "animals inspected" (seen and / or record checked) was 66

The discrepancies identified attracted the following score:

Code	Discrepancy Description	Score	Extent	Permanence
FD	Failure to notify death to database within legislative deadline	1.0	Off farm	Rectifiable
IM	Incorrect movement date notified to database	1.2 (0.4 x 3)	On Farm	Rectifiable
TG2	Animal incorrectly tagged for age, not tagged within timescale or has been tagged previously but has lost 2 tags and cannot be identified by other means	1	On Farm	Rectifiable

FB	Failure to notify birth to database within legislative deadline	1	Off farm	Rectifiable
NF	Animal details not found in farm records	1	Off farm	Permanent

The Absolute Scores are calculated as follows: FD- 1.0, IM- 1.2 TG2- 1, FB- 1, NF- 1

The Percentage is calculated as follows: FD- 1 / 66 = 1.5%, IM- 1.2/66 = 1.8%, TG2- 1/66 = 1.5%, FB- 1/66 = 1.5%, NF- 1/66 = 1.5%

These scores are assessed against the absolute and percentage severity tables, with the assessments as follows -

```
FD Extent – Off farm, Severity – Very Low, Permanence – Rectifiable, Cross Compliance reduction – 1%
```

IM Extent – On farm, Severity – Very Low, Permanence – Rectifiable, Cross Compliance reduction – 1%

TG2 Extent – On farm, Severity – Very Low, Permanence – Rectifiable, cross Compliance reduction – 1%

FB Extent – Off farm, Severity – Very Low, Permanence – Rectifiable, Cross Compliance reduction – 1%

NF Extent – Off farm, Severity – Very Low, Permanence – Permanent, Cross Compliance reduction – 3%

In this example the errors found would lead to a <u>3%</u> reduction in payments.

Example 2:

Following an inspection it is determined that:

- 1 animal, still on the holding, had no entry in the farm records,
- 2 animals, still on the holding, did not have their movements onto the holding reported to CTS,
- The number of "animals inspected" (seen and record checked) was 11.

The discrepancies identified attracted the following score:

Code	Discrepancy Description	Score	Extent	Permanence
NF	Animal details not found in farm records	1	Off Farm	Permanent
FM	Failure to notify movement to database within legislative deadline	2 (2x1)	Off Farm	Rectifiable

The Absolute Scores are calculated as follows: NF - 1, FM - 2

The Percentage is calculated as follows: NF - 1/11 = 9.09%, FM - 2/11 = 18.18%

These scores are assessed against the absolute and percentage severity tables, with the assessments as follows –

NF Extent – Off farm, Severity – Very Low, Permanence – Permanent, Cross Compliance reduction – 3%

FM Extent – Off farm, Severity – Low, Permanence – Rectifiable, Cross Compliance reduction – 3%

In this example the errors found would lead to a 3% reduction in payments.

SMR 8 - Livestock Identification and Traceability- Sheep & Goats

The aim of these requirements is to establish a system for the identification and registration of sheep and goats to facilitate their traceability, in particular in the event of a disease outbreak. They apply to you if you keep sheep or goats.

For cross compliance purposes, you do not need to do anything more than you are already required to do by law for the identification and tracing of sheep and goats. The key elements of the sheep tracing system, that apply specifically for cross compliance purposes, are listed below. These elements do not cover all the legal requirements. For a full explanation of your legal obligations, you should refer to the relevant legal provisions. Summary of these provisions was supplied to you in the booklet titled 'Sheep and Goat Identification and Traceability- Guidance for Keepers in Scotland' in January 2010.

Requirement 1 - Identification of sheep and goats. You must,

- Identify all sheep and goats, born after 7th July 2005, with the correct means of identification within 6 months of birth for intensively farmed animals and 9 months for extensively farmed animals, or before they move off the holding of birth, whichever is sooner.
- Identify animals that are under 12 months of age and are intended for slaughter in the UK before 12 months of age with a single electronic tag showing only the flock mark of the animal. You may choose to use two matching identifiers, with individual numbers, for these animals.
- Identify all other animals born on or after 31 Dec 2009 with two matching means of identification. One means of identification must be electronic. One means of identification must be an ear tag. The second means of identification can be either a matching ear tag, pastern tag, bolus or tattoo.

Description of breach	by either the number of animals or percentage of animals sampled.		Permanence
Animals have not been tagged or have been incorrectly tagged before leaving a holding or reaching the appropriate age	On farm effect: where the animals that have never been tagged or are incorrectly tagged are still on the holding Off farm effect: where there is evidence that animals that have	Incorrectly tagged Very Low: Less than 5 animals or up to and including 10% of the animals sampled have been incorrectly tagged Low: 5 or more animals or between 10% and 20% of the animals sampled have been incorrectly tagged Medium: Between 20% and 40% of the animals sampled have been incorrectly tagged High: More than 40% of the animals sampled have been incorrectly tagged	Rectifiable or Permanent
	never been tagged or are incorrectly tagged have moved off the holding	Never been tagged Low: Less than 5 animals or up to and including 10% of the animals sampled have never been tagged Medium: 5 or more animals or between 10% and 20% of the animals sampled have never been tagged	

	High: More than 20% of the animals sampled have never been tagged	

Requirement 2 - Replacement of Identification. You must,

- Replace any lost or illegible means of identification within 28 days of discovery or before the animal leaves the holding, if this is sooner.
- You must record, within 48 hours, the date of replacement and the replacement number with cross reference to the previous mark, if known.

You must not,

• Remove or replace official ear tags without permission from the Scottish Government, unless for the purpose of preventing unnecessary pain or suffering to an animal.

Description of breach	Extent	Severity	Permanence
The keeper has not replaced lost or illegible identification and/or the record of replacement identification has not been maintained.	On farm effect: where the animals are still on the holding Off farm effect: where there is evidence the animals may have moved off the holding	Very Low: Less than 10 animals with missing identification or up to and including 20% of animals sampled Low: 10 or more animals with missing identification or between 20% and 40% of the animals sampled Medium: More than 40% of the animals sampled with missing identification Record of replacement Low: Animals with replacement identification fitted, but the details have not been entered in the replacement identification record. Medium: Animals with missing / illegible / replacement identification are present at inspection and there are no entries in the record of replacement identification within the last 12 months. Medium: A record of replacement identification has not been kept for any of the previous 3 calendar years. Medium: Keeper has failed to comply with a request, issued at inspection, requiring that they order and fit tags within 28 days.	Rectifiable or Permanent
Ear tags have been removed or replaced without the permission of the Scottish Government.	On farm effect: where the animals are still on the holding Off farm effect: where there is evidence the animals may have moved off the holding	High: Where any animal is found to have had official ear tags removed or replaced, without permission.	Permanent

Requirement 3 - Record Keeping. You must,

Keep up-to-date records, for every holding (CPH) that you use, make your records available to SGRPID or local authority on request and available for a minimum of three years from the last day an animal referred to in the register dies or leaves the holding. Records must contain at least the following details,

- the CPH of the holding;
- the holding address;
- the type of production (e.g. meat, wool, pet)
- the name and address of the keeper.

The following details of the movement of sheep and goats off your holding must be recorded within 48 hours of the event taking place,

- the date of the movement;
- the number of animals moved;
- the destination of the animals;
- the haulier's name and vehicle registration;
- the individual numbers of breeding animals born or identified on or after 31st Dec 2009;
- the flock marks and the number of animals with each flock mark for slaughter animals.

The following details of the movement of sheep and goats on to your holding must be recorded within 48 hours of the event taking place,

- the date of the movement;
- the number of animals moved;
- the origin of the animals;
- the individual numbers of breeding animals born or identified on or after 31st Dec 2009;
- the flock marks and the number of animals with each flock mark for slaughter animals

The following details for each animal born or first identified on or after 31st Dec 2009 must be recorded within 48 hours of the event taking place,

- the identification code of the animal;
- the year of birth;
- the date of identification;
- the breed and genotype if known;
- the month and year of death.

An annual inventory as at 1st December each year must be recorded for each permanent holding (unless the land is within the same crofting township and/or used on a seasonal basis and is less than 5 miles from the main holding). This must be recorded by 30th December.

(SMR 8 requirement 3 continued on next page)

Description of breach	Extent	Severity	Permanence
Failure to keep records or failure to provide the records for inspection.	On farm effect: evidence suggests no animal movements have taken place. Off farm effect: animal movements may have taken place	High: No verifiable records	Rectifiable or Permanent
Failure to record complete movement details (other than individual identifiers via a CCP)	On farm effect: where the missing information relates to animals moved on to the holding Off farm effect: where the missing information relates to animals that have moved off the holding	Movement records Very Low: Less than 5 movement records do not have all the required information. Low: 5 to 10 movement records do not have all the required information. Medium: 11 or more movement records do not have all the required information. No record Medium: Less than 5 movements are not recorded. High: 5 or more movements are not recorded.	Rectifiable or Permanent
Failure to record individual EID's or failure to record the number of slaughter tag flockmarks in a batch/batch within a batch when a movement took place via a CCP. On farm effect: where the missing information relates to animals moved on to the holding Medium: 1		Very Low: Less than 5 movement records do not have all the required information. Low: 5 – 10 movement records do not have all the required information. Medium: 11 or more movement records do not have all the required information.	Rectifiable or Permanent
Failure to record death details of an animal born or identified after 31/12/2009	On farm effect	Very Low: Failure to make individual entries in the record of deaths. Medium: No record of deaths has been kept.	Permanent

(continued on next page)

Description of breach	Extent	Severity	Permanence
Annual inventory as at 1 st December not recorded by 30 th December.	On farm effect	Very Low: The annual inventory has not been recorded.	Permanent
The number of animals counted on the	On farm effect: evidence suggests difference has not involved live	The difference between the number of animals expected from the records and counted at inspection is:

accurate, taking account of specific farming systems.	Off farm effect: animal movements may have contributed to the	Medium: Between 10% and 40% of the flock.	Permanent
	difference found.	High: More than 40% of the flock.	
Individual identities of home bred animals, are not in the records indicating the record of identification or the record of replacement identification have not been maintained.	On farm effect	Low: Less than 10% of the animals whose identities are checked are not present in the records. Medium: 10% or more of the animals whose identities are checked are not present in the records. Very Low: Failure to maintain an identification record for one or two of the previous 3 calendar years. Medium: A record of identification has not been kept for each of the previous 3 calendar years.	Rectifiable or Permanent
Flock marks of purchased animals, present on the holding, are not in the records. On farm effect Medium: Between 5 and 10 flock identities are checked are not present in the High: More than 10 flock marks of purchased animals, present on the holding, are not in the records.		Low: Less than 5 flock marks of animals whose identities are checked are not present in the records. Medium: Between 5 and 10 flock marks of animals whose identities are checked are not present in the records. High: More than 10 flock marks of animals whose identities are checked are not present in the records.	Rectifiable or Permanent

SMR 9 - Prevention and control of Transmissible Spongiform Encephalopathies (TSEs)

The aim of these requirements is to minimise the risk posed to human and animal health by certain transmissible spongiform encephalopathies (TSEs). They apply to you if you keep farmed animals

You	ı must						
A1	You must notify the duty veterinary officer of your local Animal and Plant Health Agency office immediately if you know or suspect that an animal or carcass in your possession, or under your charge, is infected with a transmissible spongiform encephalopathy (TSE)						
	Description of breach	Extent	Severity	Permanence			
	The farmer has not notified the APHA of an animal or carcass in his/her possession, or under his/her charge known or suspected of being infected by a TSE.	On-farm effect or Off-farm effect in cases where an animal suspected of being infected have moved off farm	High	Rectifiable: if the animal/carcass can be traced and eliminated. or Permanent			
A2	You must fully comply with any movement restrictions imposed						
	Description of breach	Extent	Severity	Permanence			
	The farmer has failed to comply with movement restrictions imposed	On-farm effect or Off-farm effect in cases where an animals suspected of being infected have moved off farm	High	Rectifiable if the animal/product can be traced and eliminated. or Permanent			
A3	You must fully comply with any order to slaughter and destroy a	ny animal					
	Description of breach	Extent	Severity	Permanence			
	The farmer has failed to comply with the order to slaughter and destroy any animal	On-farm effect or Off-farm effect in cases where an animals suspected of being infected have moved off farm	High	Rectifiable if the animal/product can be traced and eliminated. or Permanent			
A 4	You must fully comply with any other notices served by an inspe	ector					
	Description of breach	Extent	Severity	Permanence			

	The farmer has failed to comply with other notices served by an inspector	On-farm effect or Off-farm effect in cases where an animals suspected of being infected have moved off farm	High	Rectifiable if the animal/product can be traced and eliminated. or Permanent
--	---	---	------	--

A5	You must comply with the inquiry carried out by an inspector to identify all animals at risk					
	Description of breach	Extent	Severity	Permanence		
	The farmer has failed to comply with the inquiry carried out by the inspector to identify all animals at risk.	On-farm effect or Off-farm effect in cases where an animals suspected of being infected have moved off farm	High	Rectifiable if the animal/product can be traced and eliminated. or Permanent		

You must not B1 You must not feed animal protein, or any feeding stuff that contains animal protein, to ruminants, with the exception of the following (subject to required sourcing and processing, e.g. it cannot be catering waste): milk, milk-based products and colostrum's eggs and egg products gelatine from non-ruminants hydrolysed proteins derived from non-ruminants or from ruminant hides and skins liquid milk replacers for unweaned ruminants containing fishmeal, if registered to do so. **Description of breach** Severity Permanence **Extent** On-farm effect There is evidence that the farmer is feeding animal protein or products Off-farm effect in High Permanent containing animal protein to ruminants cases where animals have moved off since being fed protein **B2** You must not feed products containing prohibited proteins to any farmed animals, or mix prohibited proteins with feed stuffs **Description of breach** Extent Severity Permanence

	Description of breach	Extent	Severity	Permanence
	The farmer is producing feed for non-ruminants which contains restricted proteins and does not have authorisation from the competent authority to do so.			
	Requirement applies to all farms producing feed using restricted proteins	On-farm effect	Low - if ruminants not kept	Rectifiable or
	'Restricted proteins' are animal proteins restricted to non-ruminant feed production: fishmeal; blood products; bloodmeal (for feeding to farmed fish); dicalcium phosphate and tricalcium phosphate of animal origin.	Off-farm effect	Medium - if ruminants present	Permanent
34	You must not use feed products containing restricted proteins on a fa			_
34		rm where there a	re ruminants present unless you have re Severity	ceived registration

B5	You must not export from the UK any bovine animal born or reared in the United Kingdom before 1 August 1996				
	Description of breach	Extent	Severity	Permanence	
	The farmer has exported a bovine animal born or reared in the United Kingdom before 1 August 1996.	On-farm effect or Off-farm effect if animal/product moved off	High	Permanent	

B6	You must not place on the market or export any products consisting of or incorporating any material (other than milk) derived from a bovine animal born or reared in the United Kingdom before 1 August 1996.					
	Description of breach	Extent	Severity	Permanence		
	The farmer has placed on the market or exported products consisting of or incorporating material (other than milk or hides tanned according to official protocol) derived from a bovine animal born or reared in the United Kingdom before 1 August 1996.	On-farm effect or Off-farm effect if animal/product moved off	High	Rectifiable: if the animal/product can be traced and eliminated; or Permanent		
B7	You must not place on the market or export first generation offspring, the semen, ova or embryos of cattle, sheep or goats (of any age) without fully complying with the documentation requirements and restrictions applying to the sale or export of such products.					
	Description of breach	Extent	Severity	Permanence		
В7	The farmer has placed on the market or exported the offspring of a TSE (e.g BSE in Cattle or Scrapie in sheep)	On-farm effect or Off-farm effect if animal/product moved off	High	Permanent		
В7	The farmer has placed on the market/exported semen/embryo/ova without the correct certificate.	On-farm effect or Off-farm effect if animal/product moved off	High	Permanent or Rectifiable - if animal/product can be traced and eliminated.		

B8	You must not move any cattle born or reared in the UK before 1 August 1996 from their registered premises unless you have obtained a movement licence from the Animal and Plant Health Agency Specialist Service Centre in Worcester.					
	Description of breach	Extent	Severity	Permanence		
	"The farmer has moved cattle which were born or reared in the UK before 1 August 1996 from their registered premises without obtaining a movement licence from the Animal and Plant Health Agency Specialist Service Centre in Worcester. email: ahspecialistservicecentreworcester@apha.gsi.gov.uk"	On farm or Off farm	High	Permanent or Rectifiable -if the animal can be traced and eliminated."		

SMR 10 - Restrictions on the use of plant protection products

The aim of these requirements is to ensure that plant protection products (PPPs) are used correctly and to minimise their risk to humans, animals and the environment (they apply to you if you use these products on your land)

A 1	 You must use authorised or permitted plant protection products in accordance with any requirements or condition which is: specified in the authorisation, permit or in any extension of use or on the label of the product as required by the authorisation, permit or extension of use. 				
	Description of breach	Extent	Severity	Permanenc e	
A1	The farmer has used an authorised or permitted plant protection product but has not complied with the conditions of authorisation, permit or in any extension of use, e.g. Products not authorised or permitted for use on the crop, land or situation; Products not authorised for method of application; Max. dose/concentration exceeded; Max. number of applications exceeded; Application dates/harvest intervals not observed.	On-farm effect or Off-farm effect where for example there is	Medium- where the breach is technical in nature or	Permanent	
A1	 The farmer has used an authorised or permitted plant protection product but has not complied with other label conditions e.g. Safe storage (keep out of reach of children, in original containers, protected from frost and stored to prevent environmental contamination) Safe disposal (empty containers disposed of safely and containers not reused) Operator safety (Personal Protective Equipment (PPE) available for use when handling concentrate) General warnings (e.g. extreme care should be taken to avoid spray drift) 	for example there is environmental contamination and/or damage to human health as a result of the non-compliance	High - where the breach may have consequences for human health or the environment	rermanent	

•	•					4			4
·v		••	m	1	e	•	n	$\boldsymbol{\smallfrown}$	•
	u	u		ıu	-	L		u	L

B1	You must not use any plant protection product unless it is authorised Description of breach	Severity	Permanence	
	The farmer has used an unauthorised product and/or a product for which a permit is required (e.g. a product whose authorisation has lapsed, been revoked; an imported product that does not have a permit for use in this country or 'own-use' parallel imports where an equivalent UK label in English is not available).	On-farm effect or Off-farm effect where environmental contamination or residues in foodstuffs arise from illegal use The impact of the use of an illegal product will vary dependent on the product but may pose a risk to human health and or the environment.	High	Permanent

SMR 11 - Welfare of Calves

The aim of these requirements is to protect the welfare of calves by setting minimum standards for their care and husbandry. If you keep calves, they apply to you in addition to the requirements for the welfare of all farmed animals (SMR 13)

Inspector note: Where breaches are referred to as "rectifiable or permanent" this is dependent on the individual circumstances of the breach for the animal(s) concerned. If welfare for individual animals can be improved then this should be regarded as rectifiable where the animal's pain and distress caused cannot be reduced e.g. injury is permanent or animal have to be euthanased then this must be regarded as permanent.

Yo	You must							
A1	You must inspect all housed calves at least twice a day, and th	ose kept outside	at least once a day					
	Description of breach	Extent	Severity	Permanence				
	Housed calves have not been inspected twice each day	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable				
	Thouses can be have not seen inspected times cash aay		High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent				
		On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable				
	Calves kept outside have not been inspected once each day	On-lann	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent				
A2	You must ensure that each of your calves can stand up, turn a	round, lie down, r	est and groom itself without difficulty					
	Description of breach	Extent	Severity	Permanence				
	Calf unable to stand up, turn around, lie down, rest and/or groom itself without hindrance/ difficulty	On form	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable				
		On-farm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent				

You	You must not						
B1	You must not tether your calves						
	Description of breach	Extent	Severity	Permanence			
	Calf tethered for reasons other than feeding group housed	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable			
B1	calves milk/ milk substitute	On-laim	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent			
ы	Calf tethered for longer than one hour at each feed	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable			
	Call tetriered for longer than one hour at each feed	On-laini	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent			
	Tether prevents calf from lying down, resting, standing up and	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable			
B1	grooming itself without hindrance		High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent			
	Tether has caused pain or injury to calf	On-farm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent			
B2	You must not muzzle your calves	_					
	Description of breach	Extent	Severity	Permanence			
	Calves are muzzled or evidence that calves have been	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable			
	muzzled		High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent			

B3	You must not keep a calf in an individual stall or pen after the age of 8 weeks (unless it needs to be isolated to receive treatment)					
	Description of breach	Extent	Severity	Permanence		
	Calves over 8 weeks old penned singly, without appropriate		Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable		
	veterinary advice	On-laini	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent		

You	You must						
A3	You must ensure that individual stalls or pens satisfy the minimum width and length requirements and that they have perforated walls which allow the calves to have direct visual and physical contact with each other						
	Description of breach	Extent	Severity	Permanence			
A3	Pen size too small in either length or width	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable			
A3			High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent			
A3	No perforated walls for individual pens so calves have no direct and/or visual contact with other calves	On-farm	Medium It is unlikely that a breach of this	Rectifiable			
	and/or visual contact with other carves		requirement would result in UPUD, hence no "High" rated severity				

Description of breach	Extent	Severity	Permanence
Unobstructed floor space too small for the weight of the calves	On form	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
Unobstructed floor space too small for the weight of the calves	On-farm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent

Description of breach	Extent	Severity	Permanence
Flooring is found to be any one or more of not smoothslippery	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
 not designed to prevent injury or suffering to calves when standing or lying on it unsuitable for size & weight of calves uneven/ unstable wholly slatted 		High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permane

A6	You must keep all housed calves on – or at all times give them access to – a lying area that is clean, comfortable, well-drained and has dry bedding					
	Description of breach	Extent	Severity	Permanence		
	Calf does not have access to a lying area which is clean, comfortable and/or well-drained and does not adversely affects it	On form	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable		
		On-farm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent		
A7	You must give all calves appropriate bedding					
	Description of breach	Extent	Severity	Permanence		
	Insufficient or no bedding for all calves	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable		
		On-farm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent		

A8	You must for calves kept in an artificially lit building, provide a normally available between 9am and 5pm	r a period that is at least equal to the	period of natural light	
	Description of breach	Extent	Severity	Permanence
	Inspector observation and/or farmer admission that artificial light provided between 9am and 5 pm for housed animals is not equivalent to natural light during this time	On-farm	Medium	Rectifiable

You must clean and disinfect housing and equipment used for your calves; remove dung, urine and left-over food as often as necessary reduce smells and avoid attracting flies or rodents					
	Description of breach	Extent	Severity	Permanence	
A9	Evidence that cleaning and disinfection procedures are		Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable	
A9	inadequate	OII-Iaiiii	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent	
	Evidence that faeces, urine and uneaten or spilt food has not been removed frequently enough to avoid attracting flies or rodents		Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable	
A9		On-farm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent	
A10	You must feed all weaned calves at least twice a day				
	Description of breach	Extent	Severity	Permanence	
	Column are ford loop than twice per day (if not ford and like twee)	On former	unnecessary pain, distress or injury to animal(s)	Rectifiable	
	Calves are fed less than twice per day (if not fed ad libitum)	On-farm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent	

A11	You must ensure that when feeding group-housed calves each calf either: has access to feed at the same time as the others in the feeding group; has continuous access to feed; is fed by an automatic feeding system				
	Description of breach	Extent	Severity	Permanence	
	For feeding systems that are not adlib, or where animals are not fed by an automatic feeding system feeding individually, calves are not able to access the feed at the same time as others in the feeding group	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable	
			High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent	
A12	You must give all your calves fresh drinking water at all times in hot weather conditions or when they are ill				
	Description of breach	Extent	Severity	Permanence	
	Sick calves do not have continuous access to water This requirement is additional to the general requirement to provide animals with water in SMR 13	On-farm	High	Rectifiable or Permanent	
	In hot weather calves do not have continuous access to water This requirement is additional to the general requirement to provide animals with water in SMR 13	On-farm	High	Rectifiable or Permanent	
A13	You must give all calves food that contains enough iron				
	Description of breach	Extent	Severity	Permanence	
	Clinical anaemia in calves, associated with blood haemoglobin level < 4.5 mmol/l	On-farm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent	

A14	You must provide the specified minimum daily ration of fibrous food for each calf over 2 weeks old				
	Description of breach	Extent	Severity	Permanence	
	Evidence of no or insufficient fibrous food provision (less than 50g per day per calf at 8 weeks to less than 250g per day per calf at	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable	
	20 weeks)		High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent	
	Diet present during inspection not suitable for calves	On-farm _	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable	
			High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent	
A15	You must ensure that each calf receives bovine colostrum as soon as possible after it is born and within the first six hours of life				
	Description of breach	Extent	Severity	Permanence	

Stock keeper does not ensure that calves receive bovine	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
colostrum within 6 hours of birth	On-laini	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent

SMR 12 - Welfare of Pigs

The aim of these requirements is to protect the welfare of pigs by setting minimum standards for their care and husbandry. If you keep pigs, they apply to you in addition to the requirements for the welfare of all farmed animals (SMR 13).

Note: Where breaches are referred to as "rectifiable or permanent" this is dependent on the individual circumstances of the breach for the animal(s) concerned. If welfare for individual animals can be improved then this should be regarded as rectifiable where the animal's pain and distress caused cannot be reduced e.g. injury is permanent or animal has to be euthanased then this must be regarded as permanent

All pigs

You must					
A1	You must ensure that each of your pigs is free to turn around without difficulty at all times, including while tethered (where this is allowed)				
	Description of breach	Extent	Severity	Permanence	

Not all pigs can turn around without difficulty at all times If this breach is observed it is likely to be because of inadequate		Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
tethering arrangements or accommodation – these breaches are detailed below	On-farm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent

Yo	You must not					
B1	You must not tether pigs at any time					
	Description of breach	Extent	Severity	Permanence		

Pig tethered unnecessarily (i.e. not tethered for imminent or recent examination, treatment, operation) The farmer will not be in breach of this requirement if it is for veterinary purposes. In this case any tether must be regularly	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
inspected and adjusted to ensure that it does not cause pain or injury to the pig and allows it to lie down, rest, stand up and groom itself.		High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent
Tether prevents pig from lying down, resting, standing up and	0(Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
grooming itself without hindrance	On-farm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent
Tether has caused pain or injury to pig	On-farm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent

You must

A2 You must ensure that the accommodation for your pigs allows them to:

- stand up, lie down and rest without difficulty
- have a clean, comfortable and adequately drained place in which to rest (including making sure that any bedding is clean, dry and not harmful to the pigs)
- see other pigs (unless the pig is isolated for veterinary reasons or for farrowing)
- have enough space to allow all of them to lie down at the same time
- maintain a comfortable temperature, including the requirement that you <u>must not</u> keep pigs in the high temperature/high humidity environment known as the 'sweat box system' (B2)

B2 You must not keep pigs in high temperature/high humidity environment known as the 'sweat-box system' – to classify this type of breach please see point A2

	Description of breach	Extent	Severity	Permanence
A2	Pig(s) unable to stand up and/or lie down and/or rest without difficulty On-fa	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
		On-iaim	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent
A2	Pig(s) do not have a clean, and/or physically comfortable and/or adequately drained lying area to rest On-fair		Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
A2		On-iariii	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent
42	Pig(s) are unable to see other pigs (unless the pig is isolated for farrowing or for veterinary reasons)	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
A2			High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent

(A2 continued on next page...)

	Pig(s) cannot maintain a comfortable temperature; includes the use of accommodation defined as the sweat box system	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
	the use of accommodation defined as the sweat box system	0.1.10.111	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent
	O Insufficient and as for all piece to lie down at the come time	On form	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
<i>P</i>	Insufficient space for all pigs to lie down at the same time	On-farm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent

А3	You must ensure that individual stalls or pens satisfy the minimum size requi	rements (the	ese do not apply in certain ex	cepted situations)
	Description of breach	Extent	Severity	Permanence

Internal area of stall/ pen is less than the square of the length of the pig; any internal side is less than 75% of the length of the pig			
The length of a pig is measured from the tip of its snout to the base of its tail while it is standing with its back straight			
Important: the following circumstances are permitted exceptions and are NOT classed as a breach of requirements for the size of an individual pen:		Medium - evidence of breach but where this has	Rectifiable
Those used for holding a female pig for the period between seven days before the predicted day of her farrowing and the day on which her piglets are weaned (including any piglets fostered by her)		not caused unnecessary pain, distress or injury to animal(s)	
When keeping a pig in a stall or pen for veterinary purposes.			
When keeping a pig in a stall or pen for the purposes of servicing, artificial insemination or collecting semen.			
When keeping a pig in a stall or pen while it is fed.			
When keeping a pig in a stall or pen for the purposes of marking, washing or weighing it.			
When keeping a pig in a stall or pen while its accommodation is being cleaned.			
When keeping a pig in a stall or pen while it is waiting to be loaded for transportation.		High - where there is unnecessary pain, injury,	Rectifiable or Permanent
However, the period the pig is kept in this accommodation must not be longer than needed for that purpose.		suffering or distress to animal(s)	
The requirements for a minimum size of stall or pen also do not apply if it is referring to a stall or pen that the pig can enter or leave when it wants. In this case the stall must be entered from another stall or pen where the pig is normally kept and which does comply by the minimum standards			

A4	You must provide flooring, for those pigs kept in buildings, that is:					
	Description of breach Extent Severity Permanence					
	Flooring is found to be one or more of: - not smooth - slippery - not suitable for size and weight of pigs	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable		
	- uneven/ unstable (when no litter has been provided) - not designed, constructed or maintained to prevent injury or suffering to pigs when standing or lying on it.	On-laini	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent		
A5	You must provide flooring of the correct measurements (for open groups and if your holding has been newly built, rebuilt or brough 1 January 2013					
	Description of breach	Extent	Severity	Permanence		
	Openings are too wide between slats for category of pig This flooring requirement applies only if the holding was newly built,	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable		
	rebuilt or brought into use for the first time after 1 January 2003. (It shall apply to all holdings from 1 January 2013)		High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent		
	Slat width too small for category of pig This flooring requirement applies only if the holding was newly built, rebuilt or brought into use for the first time after 1 January 2003. (It shall apply to all holdings from 1 January 2013)	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable		

			High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent
A6	You must provide artificial lighting of at least 40 lux for at leas	t 8 hours each da	ay, for pigs kept in an artificially lit bu	uilding
	Description of breach	Extent	Severity	Permanence
	 Pigs exposed to light of less than 40 lux in buildings where pigs are dependent on artificial lighting Pigs exposed to less than 8 hours of light in buildings where pigs are dependent on artificial lighting 	On-farm	Medium There are general lighting requirements under SMR 13 (requirements A12 and B3); any breach of lighting requirements resulting in UPUD are described under SMR 13	Rectifiable

You must not					
B3	You must not expose your pigs to constant or sudden noise, or levels above 85 decibels in any building where you keep your pigs				
	Description of breach	Extent	Severity	Permanence	
	Exposure of pigs to continuous levels of 85 decibels and above	On-farm	Medium It is unlikely that a breach of this requirement would result in UPUD, hence no "High" rated severity	Rectifiable	
	Exposure of pigs to continuous or sudden loud noises that could be reasonably avoided or minimised	On-farm	Medium It is unlikely that a breach of this requirement would result in UPUD, hence no "high" rated severity	Rectifiable	

.7	You must give permanent access to enough manipulable material which allows proper investigation and manipulation, for example, straw, hay, wood, sawdust, mushroom compost, peat or a mixture of such, which does not upset the health of your animals					
	Description of breach	Extent	Severity	Permanence		
	No or insufficient manipulable material available to enable proper	On-farm	Medium - evidence of breach but	Rectifiable		
	investigation and manipulation activities	On-tarm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent		
	Material provided which compromises pig health	On form	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable		
		On-farm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent		

- Inadequate measures are taken to minimise aggression in groups of pigs	On form	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
- Persistent aggressors, or their victims, are not isolated from the rest of the group	On-farm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent

A9	You must ensure that when feeding group-housed pigs each pig either: has access to feed at the same time as the others in the feeding group has continuous access to feed; is fed by an automatic feeding system				
	Description of breach	Extent	Severity	Permanence	
	For feeding systems that are not adlib, or where animals are not fed by an automatic feeding system feeding individually, pigs are not able to access the feed at the same time as others in the feeding group There are specific requirements for sows and gilts detailed later	On-farm	Medium It is unlikely that a breach of this requirement would result in UPUD, hence no "High" rated severity	Rectifiable	
A10	You must give all pigs over 2 weeks old permanent access to a sufficient supply of fresh drinking water				
	Description of breach	Extent	Severity	Permanence	

Pigs over 2 weeks old have not been given permanent access to an adequate supply of fresh water	On form	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
This requirement is additional to the general requirement to provide animals with water in SMR 13	On-farm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent

Piglets

	u must			
A1	You must provide piglets with a source of heat and a dry and c time	omfortable lying	g area away from the sow where all of	them can rest at the same
	Description of breach	Extent	Severity	Permanence
	Piglets have not been provided with a source of heat and a dry and comfortable lying area away from the sow where all of them	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
	can rest at the same time (where it is considered necessary in order to meet all accommodation requirements)	On-larm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent
A2	junta in the second of the sec		e enough to allow the animals to rest	together at the same time
	and is solid, covered with a mat or littered with straw or any ot	her suitable mat	erial	J.
	Description of breach	her suitable mat	erial Severity	Permanence
	Description of breach No or insufficient area for the piglets, which is solid or covered	Extent		_
	Description of breach		Severity Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury	Permanence
А3	Description of breach No or insufficient area for the piglets, which is solid or covered with a mat or littered with straw or other suitable material that	Extent On-farm	Severity Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s) High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Permanence Rectifiable

Piglets do not have sufficient space to suckle without difficulty	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
rigiets do not have sumcient space to suckie without difficulty	On-laini	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent

You must not

You must not wean piglets from the sow at an age of less than 28 days (unless there is a risk of adverse welfare or health of the dam or piglets). You will not be in breach of the requirement relating to the weaning of piglets if they are weaned up to 7 days earlier, provided that you move them into specialised housing which you empty and thoroughly clean and disinfect before you introduce a new group and which is separate from housing where you keep sows

Description of breach	Extent	Severity	Permanence
Piglets are weaned earlier than 28 days, where there is no reasonable justification based on sow and/or piglet health or	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
welfare grounds AND where there is not appropriate specialised housing for early weaning of pigs	On-laini	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent
Specialised accommodation is available for early weaned piglets but the housings are not emptied and thoroughly cleansed and disinfected before introduction of a new group and/or the	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
accommodation is not separated from housing where sows are kept	On-laini	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent

Sows and gilts

	must			
A2	You must treat pregnant gilts and sows against internal and external parasit	es, if necess	ary	
	Description of breach	Extent	Severity	Permanence
	Sows and/ or gilts have not, where necessary, been treated against external and internal parasites (unacceptable parasite burden)	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s) High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable Rectifiable or Permanent
43	You must thoroughly clean pregnant sows and gilts before they are placed in	n farrowing o	rates	
	Description of breach	Extent	Severity	Permanence
	Evidence and/or farmer admission that sows and/or gilts are not cleaned prior to placement in farrowing crates	On-farm	Medium	Rectifiable
A4	You must give sows and gilts enough suitable nesting material in the week by practical because of the slurry system you use)	pefore the ex	pected farrowing time (unles	s it is not technically
	Description of breach	Extent	Severity	Permanence
	Lack of sufficient quantity of suitable nesting material provided for sows and/or gilts one week prior to farrowing, where it is reasonably possible to provide such material	On-farm	Medium	Rectifiable

A5	You must keep sows and gilts in groups (except during the pet the weaning of piglets is complete). You will not be in breach holdings of fewer than 10 sows provided that the individual ac	of the requiremen	nt relating to keeping sows and gilts in groups if	they are kept on
	Description of breach	Extent	Severity	Permanence
	Sows and gilts housed singly other than during the period 1 week prior to farrowing up to 4 weeks following service On holdings of fewer than 10 sows, sows and gilts may be kept in this land, and the improvement of the property of the pr	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable Rectifiable or
	individually as long as their accommodation keeps to the general requirements for pig accommodation		High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Permanent

Α	You must ensure that each female pig after service,	when kept in	n groups, has its minimum allowance of unobstructed floor spa	ce, continuous
	solid floor and pens of correct dimensions. This app	plies if your l	holding has been newly built, rebuilt or brought into use for the	first time after 1
	January 2003. It will apply to all holdings from 1 Jan	nuary 2013		
	Description of breach	Extent	Severity	Permanence

Insufficient unobstructed floor space for the gilts and/or sows assessed		Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
This requirement applies only if the holding was newly built, rebuilt or brought into use for the first time after 1 January 2003. (It shall apply to all holdings from 1 January 2013)	On-farm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent
Insufficient continuous solid floor area for the gilts and/or sows assessed		Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
This requirement applies only if the holding was newly built, rebuilt or brought into use for the first time after 1 January 2003. (It shall apply to all holdings from 1 January 2013)	On-farm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent
Pen length < than 2.8m (or <2.4m where there are less than 6 pigs)		Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
This requirement applies only if the holding was newly built, rebuilt or brought into use for the first time after 1 January 2003. (It shall apply to all holdings from 1 January 2013)	On-farm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent

A6	You must provide an unobstructed area behind the sow	or gilt during farrowing		
	Description of breach	Extent	Severity	Permanence
	No unobstructed area available behind sow(s) or gilt(s) for the ease of natural or assisted farrowing	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
	the ease of flatural of assisted fairowing		High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent
A7	You must provide some method of protecting the piglets	s, such as farrowing rail	ls, if you keep sows loose in farrowing pens	
	Description of breach	Extent	Severity	Permanence

	When sows are kept loose in farrowing pens there is no	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
	method of protecting the piglets (e.g. farrowing rails)	J. 14	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent
A8	You must feed sows and gilts using a system that ensure	es each pig can get end	ough food even when other pigs are competing f	or food
	Description of breach	Extent	Severity	Permanence
	Sows and gilts kept in groups are not fed using a system which ensures each individual can obtain sufficient food in	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
	the presence of competitors		High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent
A9	You must give all dry pregnant sows and gilts enough bu	ılky or high-fibre food,	as well as high-energy food, to satisfy their hun	ger and need to
	Description of breach	Extent	Severity	Permanence
	Dry pregnant sows or gilts are not provided with a sufficient quantity of bulky or high fibre food	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
	quality of high horo lood		High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent

Boars

You	ı must			
A1	You must place and build boar pens to allow the boars to turn round	and to hear, see	e and smell other pigs	
	Description of breach	Extent	Severity	Permanence
	Boar unable to turn around in pen	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
	Boar unable to hear and/or see and/or smell other pigs	On-iaini	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent
A2	You must provide clean resting areas in the boar pens and ensure the	at the lying area	is dry and comfortable	
	Description of breach	Extent	Severity	Permanence
	Boar pen does not contain clean resting areas and the lying area is not	On form	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
	dry and comfortable.	On-farm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent

А3	you must ensure that each boar has its minimum allowance of ur	nobstructed floor s	pace	
	Description of breach	Extent	Severity	Permanence
A3	Pen, which is not used for natural service, is less than 6 m ²	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
Αυ	r en, which is not used for natural service, is less than o m	On-lann	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent
	Pen, which is also used for natural service, is less than 10 m ²	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
A3	T ch, which is also used for natural service, is less than to m	On-raini	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent
AS	Den which is also used for natural convice, contains abstacles	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
	Pen, which is also used for natural service, contains obstacles	On-iarm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent

Weaners and rearing pigs

	Description of breach	Extent	Severity	Permanence

	Description of breach	Extent	Severity	Permanence	
	Tranquillising medication has been used to facilitate mixing where there are no exceptional conditions and without - or contrary to - consultation with veterinary surgeon	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable	
		On-larm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanen	

SMR 13 – Welfare of Farmed Animals

The aim of these requirements is to protect the welfare of farmed animals by setting minimum standards for their care and husbandry. They apply to you if you keep any species for farming purposes.

Note - Where breaches are referred to as "rectifiable or permanent" this is dependent on the individual circumstances of the breach for the animal(s) concerned. If welfare for individual animals can be improved then this should be regarded as rectifiable where the animal's pain and distress caused cannot be reduced e.g. injury is permanent or animal has to be euthanased then this must be regarded as permanent

Yo	You must					
Sta	Staffing					
A1	A1 You must ensure that your animals are looked after by enough staff who have the correct skills and knowledge					
	Description of breach	Extent	Severity	Permanence		

Number of staff available insufficient to prevent welfare problems	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
occurring	On-rarm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent
Evidence that stockperson demonstrates lack of professional competence and/ or ability in livestock care, which is not covered by any other specific criteria listed in the schedule For example: 1) Where any animals (other than poultry) are kept in a building and do not have access at all times to, a lying area which either has well-maintained dry bedding or is well-drained); 2) Where animals are kept in a building where the maintenance of	On forms	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
bedding etc. restricts their freedom of movement but US has not been caused. Note: from 2012 these situations will be a breach for cross compliance purposes even without evidence of US. Where US is disclosed in example 2 the breach should be recorded under 7 (freedom of movement)."	On-farm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent

A2	You must inspect your animals thoroughly at least once a day where the husbandry system depends on frequent human attention and in other					
	systems as often as necessary to avoid suffering					
	Description of breach	Extent	Severity	Permanence		

	Livestock have not been inspected to the required frequency	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable		
	There are specific requirements relating to calves in SMR 16 (requirement 1)	Oli-lailli	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent		
A3	You must ensure that you have enough lighting so that you can	can carry out a thorough inspection at any time

You B1	You must not B1 You must not restrict your animals' freedom of movement if this causes them unnecessary suffering or injury					
	Description of breach	Extent	Severity	Permanence		
	Animal(s) caused unnecessary suffering or injury due to restricted freedom of movement Note: Where animals are kept in a building where the maintenance of bedding etc. restricts their freedom of movement but US has not been caused the breach should be recorded under 1."	On-farm	High (only one breach level as by definition there is UPUD)	Rectifiable or Permanent		

You	You must				
Free	dom of movement				
A8	You must give your animals enough space to avoid unnecess:	ary stress if they a	are continuously or regularly tethered or	r confined and also allow	
	them to exhibit their normal behaviour in line with established experience and scientific knowledge				
	Description of breach	Extent	Severity	Permanence	
	Animal(s) caused unnecessary suffering or injury by method of tethering or confinement	On-farm	High (only one breach level as by	Rectifiable or Permanent	
	There are specific tethering requirements relating to calves in SMR 11 and pigs in SMR 12		definition there is UPUD)	rectinable of Fernandin	

Υοι	You must not					
Buil	Buildings and accommodation					
B2	You must not use materials and/or equipment for accommoda	ation purposes th	at is harmful to your animals			
	Description of breach Extent Severity Permanence					
	Harmful materials have been used in the construction of	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable		
	accommodation, pens and/or equipment		High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent		

You	You must					
	Buildings and accommodation					
A9	You must use materials for animals' accommodation that call Description of breach	n be thoroughly c	eaned and disinfected Severity	Permanence		
	Material used means that accommodation is not capable of	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable		
	being thoroughly cleaned and disinfected	On-iarm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent		
A10	You must build and maintain accommodation so that there a	re no sharp edges	or protrusions which could injure ye	our animals		
	Description of breach	Extent	Severity	Permanence		
	Sharp edges or protrusions in accommodation or fittings likely	On favor	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable		
	to cause injury	On-farm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent		
A11	You must keep air circulation, dust levels, temperature, relat	ive air humidity aı	nd gas concentrations within limits th	nat will not harm your animals		
	Description of breach	Extent	Severity	Permanence		

	Air circulation, dust levels, temperature, relative air humidity or gas concentrations either singly or in combination are harmful	On farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
	to the animals		High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent
A12	You must provide artificial lighting if there is not sufficient na	atural light in a bu	illding	
	Description of breach	Extent	Severity	Permanence
	No supplementary lighting provided when natural light provided is insufficient to meet the physiological and ethological needs of animals	On-farm	Medium	Rectifiable

You must not						
В3	You must not keep animals in permanent darkness or without an appropriate rest from artificial lighting					
	Description of breach Extent Severity Permanence					
	Animals kept in permanent darkness					
	There are specific requirements relating to calves in SMR 11 and pigs in SMR 12	On-farm	High	Rectifiable		
	Animals kept without appropriate rest from artificial lighting					
	There are specific requirements relating to calves in SMR 11 and pigs in SMR 12	On-farm	High	Rectifiable		

_						
You	You must					
Anim	Animals not kept in buildings					
A13	You must give your animals that are not kept in buildings access to a well-drained lying area at all times and, if necessary, protection from adverse weather conditions, predators and risks to their health					
	Description of breach	Extent	Severity	Permanence		

A13	Evidence of no well drained lying area for stock that are not	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
AIS	kept in buildings	On-tarm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent
A 12	Lack of protection from adverse weather conditions, predators and/or other risks to health	On form	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable
A13		On-farm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent

Automatic or mechanical equipment							
A14	You must check automated/mechanical equipment that is essential for the health and well-being of your animals at least once a day and put right any faults immediately (or take appropriate steps to protect the health and well-being of your animals until you can get the fault put right)						
	Description of breach	Extent	Severity	Permanence			
A14	Automated and/or mechanical equipment essential to animal	On form	High - where there is unnecessary pain, injury, suffering or distress to animal(s) Rectifial Perman	Rectifiable			
	health and well-being is not inspected at least once a day	On-farm		Rectifiable or Permanent			
A14	Defects are found in automated or mechanical equipment	0	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable			
	essential for health and well-being and farmer has not taken appropriate action	On-farm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent			

A15	You must provide an appropriate back-up to the main system if your animals' health and well-being depends upon artificial ventilation and an alarm to warn you if the ventilation system fails. Inspect and test these at least once every 7 days.					
	Description of breach	Extent	Severity	Permanence		
	Lack of appropriate back-up system and/ or alarm	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable		
A15	system	<u> </u>	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent		
	Lack of evidence and response from stockperson		Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable		
	indicates that back-up system and/ or alarm system is not inspected at least every 7 days	On-farm	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent		
A15	Back-up system and/or alarm system is present but fails to operate when inspector requests demonstration at time of inspection (i.e. there are faults in the system(s).	On-farm	Medium - evidence of breach but where this has not caused unnecessary pain, distress or injury to animal(s)	Rectifiable		
		o raim	High - where there is unnecessary pain, injury, suffering or distress to animal(s)	Rectifiable or Permanent
