Broadband

This scheme is intended to help communities across rural Scotland to co-ordinate demand for broadband access by joining together with other community groups to deliver a broadband solution for their area.

The scheme will:

- support communities to establish and grow the demand for superfast broadband services in areas that are unlikely to be served by the Digital Scotland Superfast Broadband Programme
- support community projects that create, improve and extend superfast broadband infrastructure in remote and rural Scotland

This scheme is open to rural communities in Scotland and is administered by Community Broadband Scotland.
