[Non-targeted capital items which can stand alone with prior approval from NatureScot](#)

[Non-targeted capital items which must be linked to a management option](#)

[Recent changes](#)

[Previous versions](#)

Please note:

For all applications, only essential capital items will be accepted.

For agri-environment type applications this would include:

- Capital items that are directly required to deliver the management option, such as the capital item Creation of Wild Bird Seed for Farmland Birds which is essential for the Wild Bird Seed for Farmland Birds option.
- Essential complimentary capital items, such as Creation of Wader Scrapes or Cutting of Rush Pasture.
- Any other capital items that are essential to achieve the outcome of your application.

It is not anticipated that applicants returning to the scheme from expired or expiring 2015, 2016 and 2017 contracts would seek funding for the same capital items in the same locations as in the original contract. The exception would be where the same capital item is needed in order to deliver essential ongoing management under the new application.

If you received funding for fencing in a previous AECS or agri-environment scheme covering the last 15 years you cannot apply for replacement fencing in a new AECS application.

Targeted capital items

To apply for one of these capital items, it must first appear in your list of targeted management options and capital items, indicating that you are within the target area for the capital item. It can be applied for on a stand-alone basis.

- [Coastal Embankment Breaching, Lowering or Removal](#)
- [Control of Invasive Non-native Plant Species – Follow-up Monitoring and Treatment](#)
- [Control of Invasive Non-native Plant Species – Primary Treatment](#)
- [Hard Standings for Troughs and Gateways](#)
- [Livestock Crossing](#)
- [Livestock Tracks](#)
- [Managing Steading Drainage and Rural Sustainable Drainage Systems](#)
- [Pesticide Handling Facilities](#)
- [Rhododendron Control – Foliar Spray / Treatment for Rhododendron Control](#)
- [Rhododendron Control – Follow-up Treatment](#)
- [Rhododendron Control – Manual Eradication – Light, Medium or Difficult](#)
- [Rhododendron Control – Mechanised Eradication – Light, Medium or Difficult](#)

- Rhododendron Control – Stem Injection Eradication – Medium or Difficult
- River Embankment Breaching, Lowering or Removal
- Restoring (Protecting) River Banks
- Rural Sustainable Drainage Systems – Pond
- Rural Sustainable Drainage Systems – Sediment Traps and Bunds
- Rural Sustainable Drainage Systems – Swales
- Rural Sustainable Drainage Systems – Wetland
- Slurry Storage
- Water-use Efficiency – Irrigation Lagoon

Non-targeted capital items which can stand alone

To apply for one of these capital items, the specific eligibility requirements must be met. Please check the full capital item wording.

- Conversion of Deer Fence to Stock Fence
- Cutting of Rush Pasture - Only stand alone for white fronted geese, otherwise must be linked to a management option
- Deer Census – Helicopter Counts
