

Control of Scrub or Woody Vegetation – Removal from Site of Cut Vegetation

This is an old version of the page

This is an old version of the page

Date published: 30 March, 2015

Date superseded: 21 December, 2015

Aim

The aim of this item is to benefit a variety of habitats where scrub is invading a sensitive site.

Leaving cut vegetation on site following control of intermediate or heavy scrub is not always appropriate for nutrient sensitive sites, or where regeneration of underlying plants is required.

Eligibility

Any land where intermediate or heavy scrub is invading a sensitive habitat is eligible.

You must combine this item with:

- [Control of Scrub or Woody Vegetation: Primary Treatment – Intermediate and Heavy Vegetation](#)

Application requirements

Your scrub control plan must detail how the vegetation will be removed, and where it will be disposed of.

[Scrub Control Plan \(MS Word, Size: 143.4 kB\)](#)

doc_external_url: <https://www.ruralpayments.org/media/resources/Scrub-Control-Plan-AECS-April-2015.docx> [Plan template]

Management requirements

- you must remove all cut or uprooted scrub material from the site
- you must maintain a diary

Payment

You can claim £1,050 per hectare.

You may apply for payment on an actual cost basis for this item if the work you are proposing to carry out will benefit the notified features of a designated site, and where there are exceptional circumstances.

Inspections

The inspectors will check:

- the location and extent of the work
- you have removed all cut or uprooted scrub material from the mapped site
- you have maintained a diary
