Date superseded: 22 December, 2015

Aim

The aim of this item is to improve water quality by creating a wetland to intercept and treat run-off that currently discharges direct to a watercourse or freshwater drain. Wetlands can improve water quality through natural processes, including filtration, retention, biological breakdown and plant uptake.

Eligibility

The land must be within a diffuse pollution priority catchment or focus area (unless an endorsement has been obtained from the Scottish Environment Protection Agency) or a flooding target area.

Spatial targeting

[Map of target area – Rural Sustainable Drainage Systems – Wetland \(PDF, Size: 1.2 MB\)](https://www.ruralpayments.org/media/resources/52_RSuDS_Wetland.pdf)

doc_external_url: https://www.ruralpayments.org/media/resources/52_RSuDS_Wetland.pdf This option is available within the target area shown on this map.

Application requirements

You must prepare a plan which must include a map of the relevant fields / steading identifying the location of the proposed rural sustainable drainage system feature.

Requirements

Only run-off which does not fall within the definition of slurry may be conveyed to a wetland, unless the run-off is of a type permitted by the Control of Pollution (Silage, Slurry and Agricultural Fuel Oil) (Scotland) Regulations 2003 as amended to be conveyed to a constructed farm wetland, and the wetland has been designed and constructed in line with the Constructed Farm Wetland Design Manual for Scotland and Northern Ireland, 2008 as evidenced by a sign-off from the Scottish Environment Protection Agency.

Additionally:

- run-off from pesticide handling or washdown areas must not be conveyed to a wetland
- fencing must be provided to protect people and livestock
- existing wetlands must not be used
- you must obtain planning permission, or have confirmation that planning permission is not required for your proposed wetland
- where a proprietary lining is used, a receipt for the liner will be required

Payment

You can claim:

- £9 per square metre for wetland with a proprietary lining
- £5 per square metre for wetland with a soil lining

Inspections

The inspectors will check:

- the location and extent of the wetland
- that there is a receipt for a proprietary liner
- only run-off which does not fall within the definition of slurry is conveyed to a wetland
- run-off from pesticide handling or wash-down areas is not conveyed to a wetland
- fencing has been provided to protect people and livestock
- existing wetlands are not used

Additional guidance

[Supporting guidance is available for this option.](#)
