

Deer Fence

This is an old version of the page

Date published: 30 March, 2015

Date superseded: 15 December, 2018

Aim

The aim of this item is to protect an existing or newly created habitat or landscape feature from deer damage.

Eligibility

Any land where the area to benefit is included in a management option or a newly created capital item is eligible.

Application requirements

You must show the location of the proposed deer fence on a 1:10,000 map.

If you have shared responsibility for the fence, a Shared Boundary Agreement form must be completed and submitted with your application.

[Shared Boundary Agreement form \(MS Word, Size: 134.3 kB\)](#)

doc_external_url: <https://www.ruralpayments.org/media/resources/Shared-Boundary-Agreement-AECS-May-2015.docx>

Management requirements

- you must erect a fence which will form a deer-proof barrier
- the minimum fence height for protection against roe deer is 1.5 metres. The minimum fence height for protection against red, sika or fallow deer is 1.8 metres
- you must use woven high tensile, mild steel or welded rectangular mesh
- any water gates must be designed to keep watercourses deer and stock proof, whatever the level of the water
- you must maintain a diary
- all fencing woodwork must be treated

Payment

You can claim:

- £8.50 per metre
- £4.25 per metre where the fence will form a shared boundary

You may apply for payment on an actual cost basis for this item if the work you are proposing to carry out will benefit the notified features of a designated site, and where there are exceptional circumstances.

To support deer fencing you can select this item with the following items:

- [Gate](#)
- [Gate - Self-closing, One-way Opening Gate](#)
- [Gate - Self-closing, Two-way Opening Gate](#)

Inspections

The inspectors will check:

- the location and extent of the work

- you have erected a fence which will form a deer-proof barrier
- the minimum fence height for protection against roe deer is 1.5 metres. The minimum fence height for protection against red, sika or fallow deer is 1.8 metres
- you have used woven high tensile, mild steel or welded rectangular mesh
- any water gates have been designed to keep watercourses deer and stock proof, whatever the level of the water
- you have maintained a diary
- all fencing woodwork has been treated
